

MY WEATHER APP — HTML PROJECT

Good Morning, India!

How is the weather today? Is it hot, cold, or rainy?
Let's check the weather and decide what to wear!

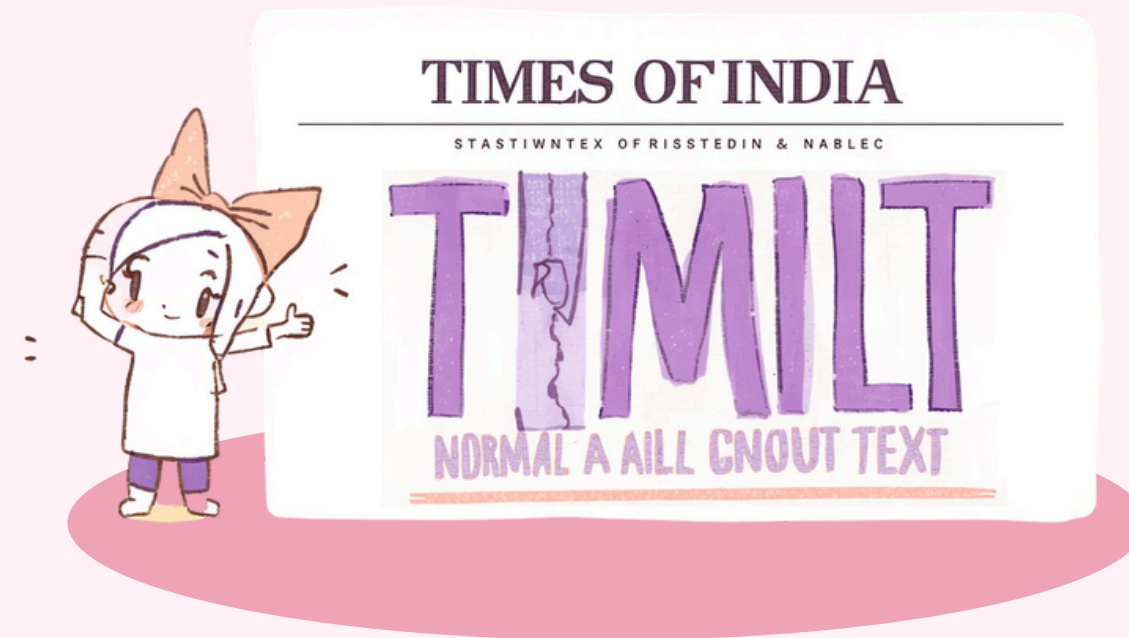

What is HTML? Web Tiffin Boxes!

HTML tags are like tiffin box containers!

MEET THE BIG TITLE TAG —

Normal text: weather report
With tag: WEATHER REPORT

Picture This! The Tag

use tag to add pictures –
like railway signs showing
weather!

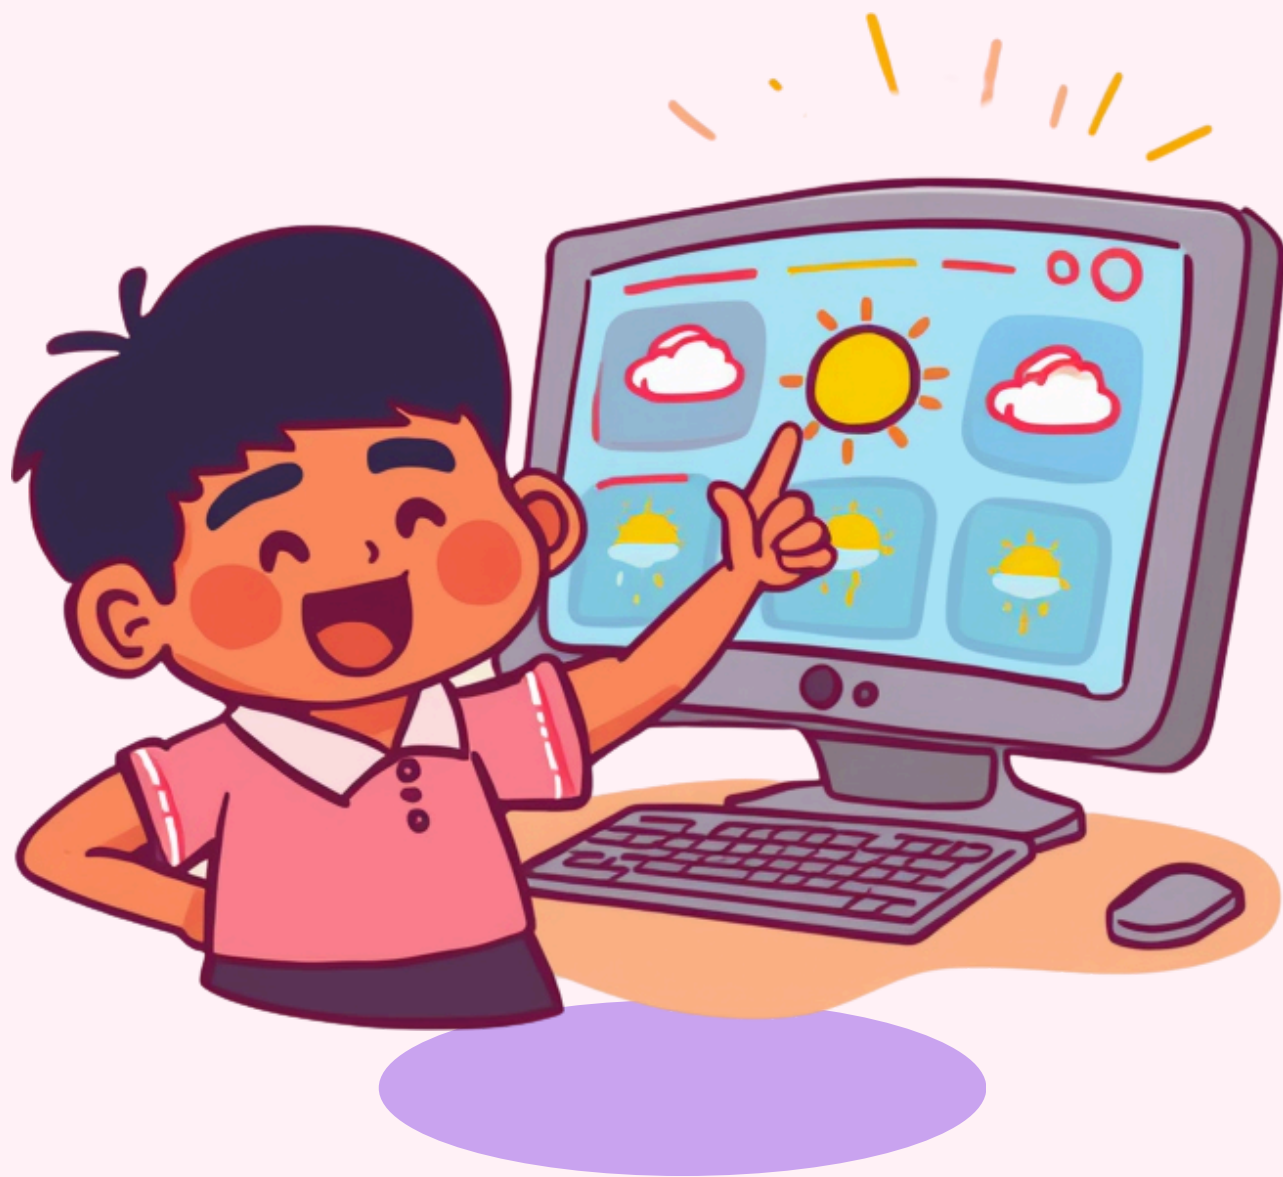

Variable Data — Weather Changes, Website Stays

Weather changes every day, but our app layout stays the same!

Like how your tiffin box stays the same size, but the food inside changes daily!

Build Your 3-Day Weather Forecast — Day 1

type or drag-drop these tags to build your first
day!

Build Your 3-Day Weather Forecast — Day 2

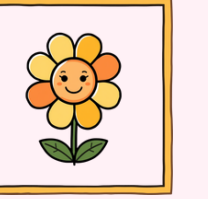

Build Your 3-Day Weather Forecast — Day 3

Complete your 3-day forecast with
the hot weather day!

PERSONALIZE WITH LOCAL SNACKS!

Add yummy local snacks to your app to make it fun!
Connect weather with delicious Indian treats!

- 🌧️ Rain → Pakoras & tea
- ☀️ Sunshine → Lemon Water
- ❄️ Cold → Ginger tea
- 🔥 Hot wind → Coconut Water

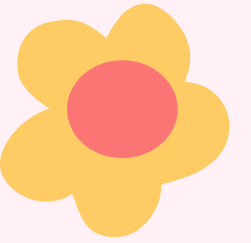

HELP AARAV DECIDE — CRICKET OR NO CRICKET?

Aarav opens his weather app every morning!
If clouds are heavy, Aarav carries his chhatra.
No cricket today – time for indoor games!
If the sun is shining bright, grab the bat!
It's perfect weather for gully cricket!

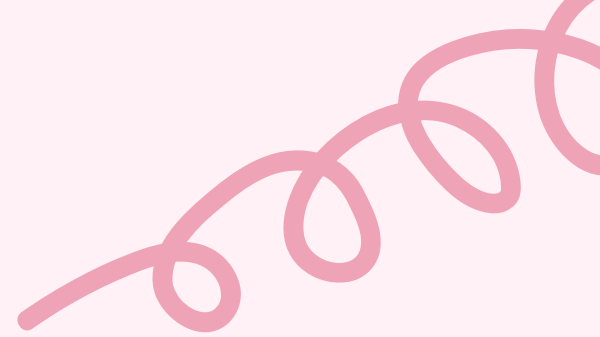

WHAT DID WE LEARN TODAY?

Let's remember the cool things we discovered about HTML and weather apps!

- 🏷️ tag makes BIG titles
- 🖼️ tag adds weather pictures
- 🔄 Variable data = changing weather
- 👕 Weather helps us pick clothes
- 🍿 weather decides our snacks!

Share Your Weather App!

"My weather app helps my friends get ready for the day!"
Show your app to your class and family!

THANK YOU! EVERYONE
