

Building My First Full-Stack Mini App: The Digital Kirana Shop

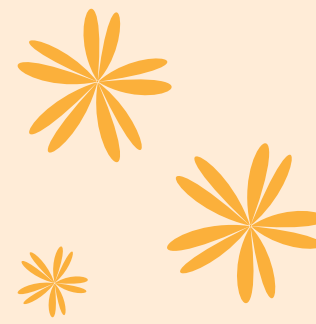

What Is It?

The Digital Kirana Shop

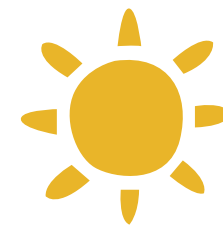

Imagine a shop where you can buy your daily groceries online, anytime, anywhere! That's the Digital Kirana Shop – your very own mini online store for snacks, spices, and everything you love!

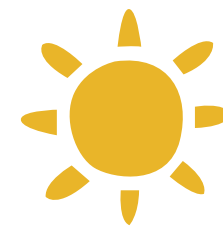

What Does Full-Stack Mean?

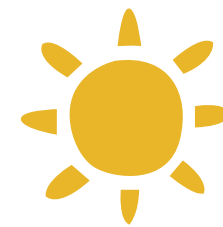

Think Like a Puppet Show!

Frontend: The puppets you see and click on the stage!

Backend: The puppeteer behind the curtain making it all work!

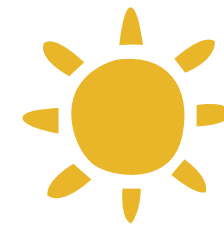

Database: The puppet box where all puppets are safely stored!

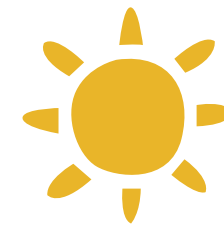

Meet the Key Parts of Our Kirana Shop!

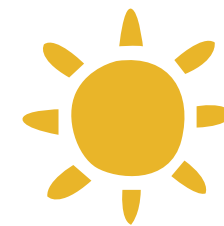

The Building Blocks of Our App

Database: The storeroom keeping all items safe and organized!

Frontend: The shop window with buttons and pictures you see and click!

Backend: The shopkeeper packing your orders behind the scenes.

How Our Kirana Shop Works

Step-by-Step Process

Step 1: Choose items you want from the shop window (Frontend)

Step 2: Shopkeeper checks the storeroom to find your items (Backend + Database)

Step 3: Your order is packed and delivered to your door!

Steps to Build Your Mini App

Design your shop's look (Frontend): Create the buttons, pictures, and pages you'll see!

Write the shopkeeper's rules (Backend): Code the logic that runs your shop!

Set up the storeroom (Database): Save your items so customers can find them!

Building My First Full-Stack Mini App

Frontend: The Shop Window

The Digital Kirana Shop

The frontend is what you see on the screen — buttons, pictures, and pages. Like choosing your favorite snack from the shop window, you pick what you want!

Building My First Full-Stack Mini App

Backend: The Shopkeeper's Brain

The Digital Kirana Shop

The backend is the shopkeeper who knows all the rules and packs your order. When you select a snack, the shopkeeper checks if it's available in the storeroom!

The Digital Kirana Shop

Database: The Storeroom

The database is like a big storeroom where all items and information are safely kept. It remembers what snacks are in stock and how many!

Popular Items

Kirana Shop Database

What's in Our Storeroom?

These are some of the items stored in our app's database. You can pick any to buy! Once you learn about databases, you'll know how to add your own items too!

Our Happy Shoppers

Meet Our Kirana Shop Users

➔ Happy Users at Work!

Aarav wants biscuits, Diya wants tea, Kabir wants rice, and Ananya helps pack their orders! Watch how each kid uses the app to shop for their favorite items.
