

**THE SECRET
NUMBER IN
THE BOX ?**

MEET MAYA'S MYSTERY GIFT BOX

A DIWALI PUZZLE – CAN YOU HELP MAYA?

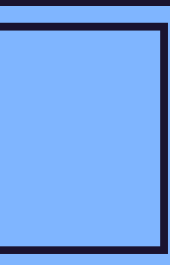

Maya's uncle brings a sealed Diwali gift box 📦

He says: "Inside this box plus 3 loose chocolates
= 10 chocolates total!"

Maya wonders: How many chocolates are hiding
inside?

$[?] + 3 = 10$

Can YOU find the secret number?

FROM ? TO A SECRET CODE LETTER

GIVING THE MYSTERY BOX A SUPERHERO NAME!

What if we give the secret box a superhero name?

Let's call it 'c' for chocolates!

The letter 'c' is a secret code that stands for a hidden number.

Our equation now looks like this:

$$c + 3 = 10$$

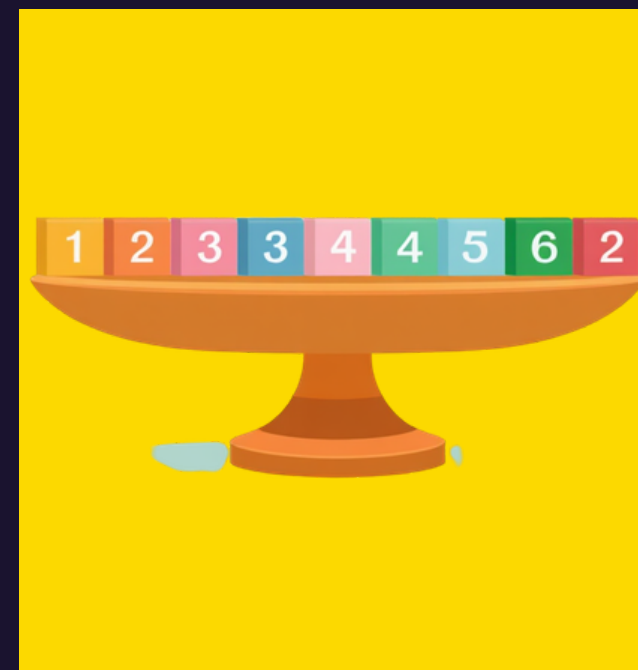

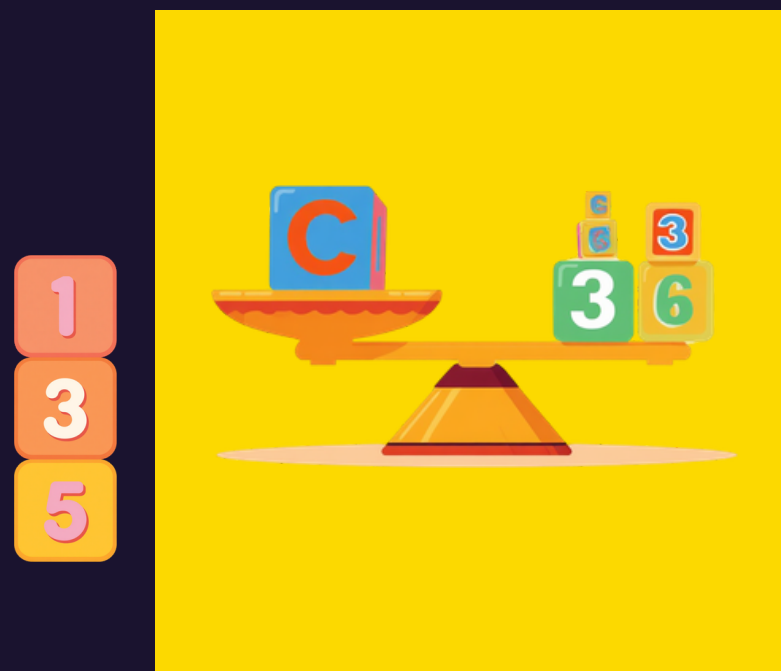

'c' is called a VARIABLE – a letter that holds the place of a number we don't know yet!

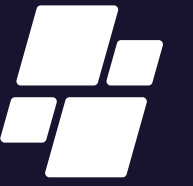

THE BALANCE SCALE

WHAT DOES = REALLY MEAN? – INTRODUCTION TO ALGEBRA

The equals sign (=) means both sides weigh exactly the same – just like a Tarazu (balance scale)! Left pan holds $c + 3$ blocks. Right pan holds 10 blocks. Since the scale is balanced, both sides are equal: $c + 3 = 10$

THE GOLDEN RULE OF ALGEBRA

BALANCE BOTH SIDES – SOLVING $C + 3 = 10$

The Golden Rule: Whatever you do to one side of the scale, you **MUST** do the same to the other side!

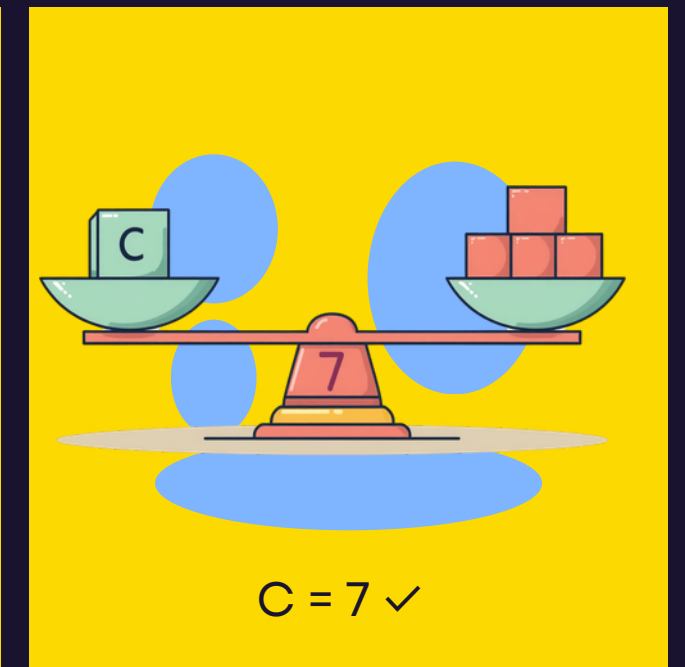

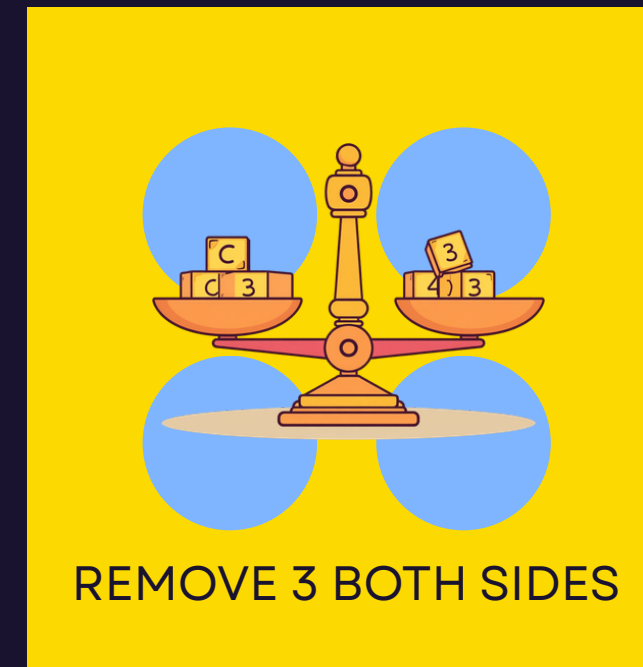

We have: $c + 3 = 10$

Step 1: Remove 3 blocks from the LEFT pan → the scale tips!

Step 2: Remove 3 blocks from the RIGHT pan → the scale balances again!

Result: $c = 7$ ✓

Remember: Keep both sides equal – that's the Golden Rule of Algebra!

GUIDED PRACTICE 1

AUTO-RICKSHAW FARE PUZZLE – SOLVE FOR T!

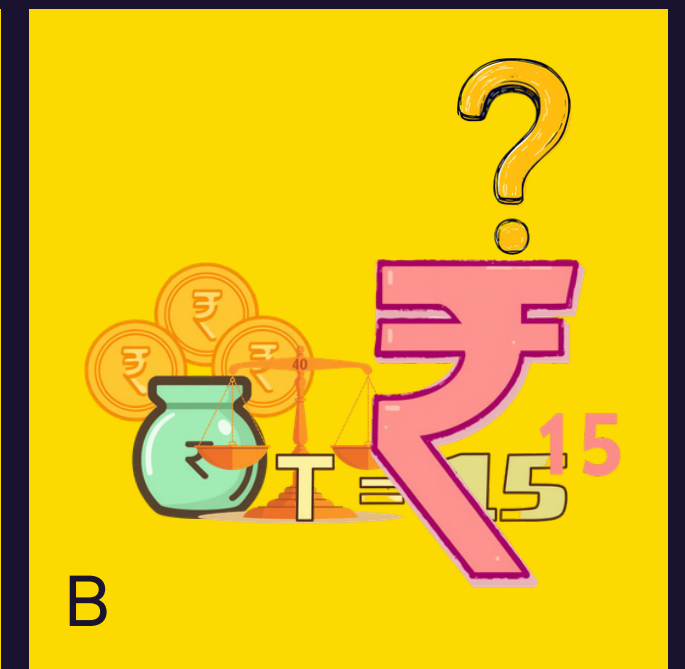

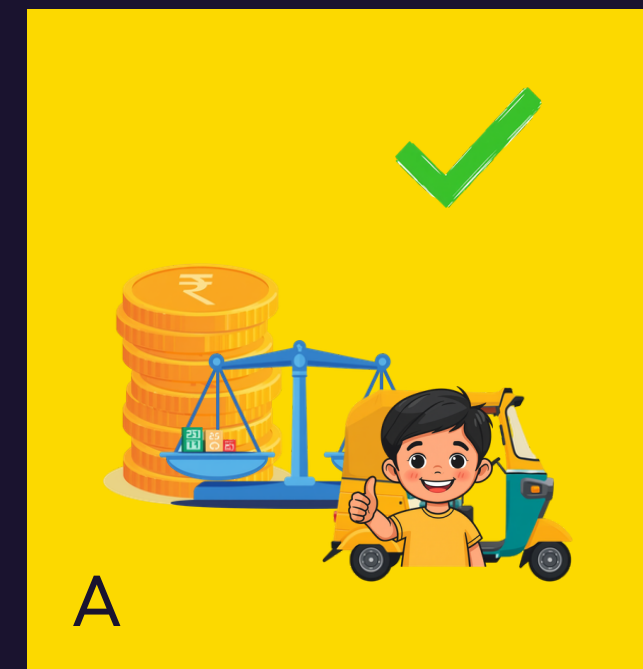

Story: Auto fare is Rs 25. Total paid including tip is Rs 40. What is the tip?

Equation: $25 + t = 40$

Golden Rule: Remove 25 from both sides!

$$25 + t - 25 = 40 - 25$$

Answer: $t = \text{Rs } 15$

GUIDED PRACTICE 2

KITE FLYING FESTIVAL – SOLVE FOR THE MISSING NUMBER!

Amit loves flying kites at the Makar Sankranti festival! 🪁

He has k kites. In a wind duel, he loses 4 kites. Now he has only 9 kites left.

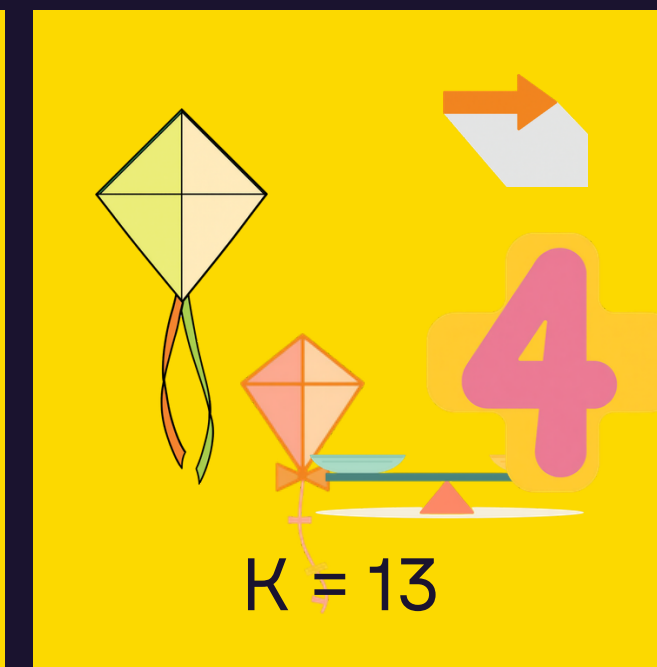

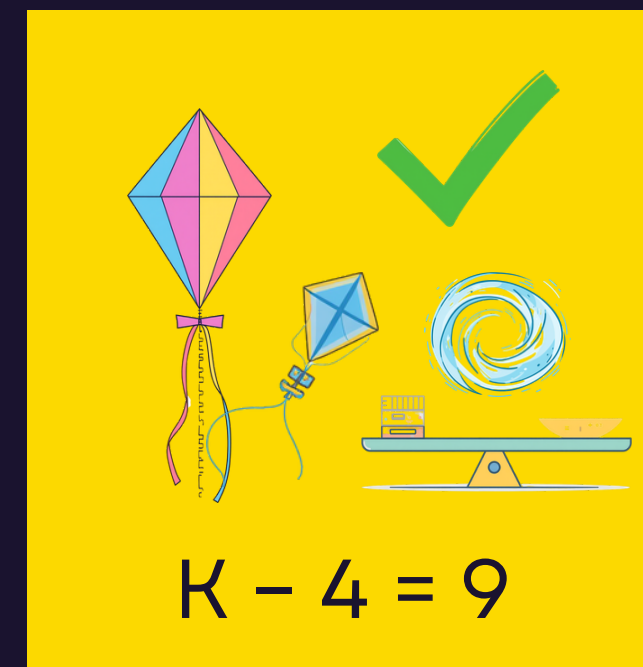

Equation: $k - 4 = 9$

Golden Rule: Add 4 to BOTH sides to keep the scale balanced!

$$k - 4 + 4 = 9 + 4$$

$$k = 13$$

Amit started with 13 kites!

SUBZI-WALA'S SCALE!

GUIDED PRACTICE 3 – POTATO WEIGHING PROBLEM

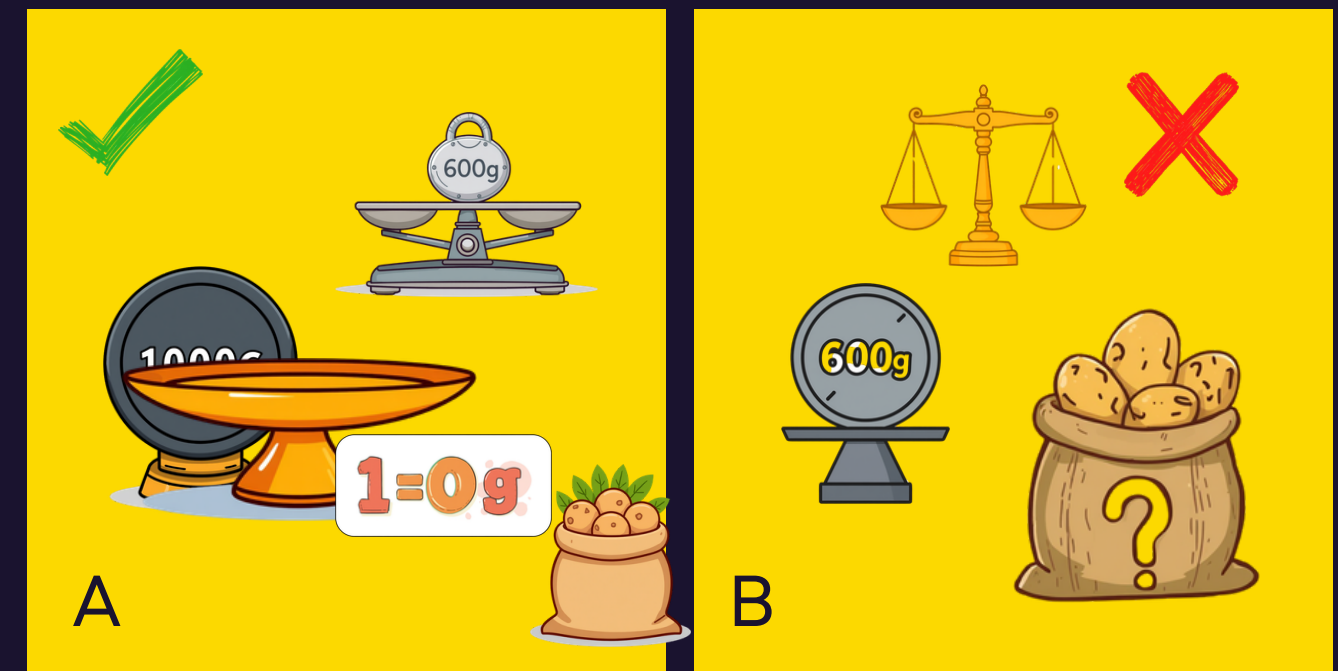

The subzi-wala has a balance scale.
Left pan has a 1000g weight.
Right pan has a 600g weight + a bag of potatoes (p).

Equation: $600 + p = 1000$

Solve: Remove 600g from both sides!

$p = 1000 - 600$

$p = 400\text{g}$ 🥔

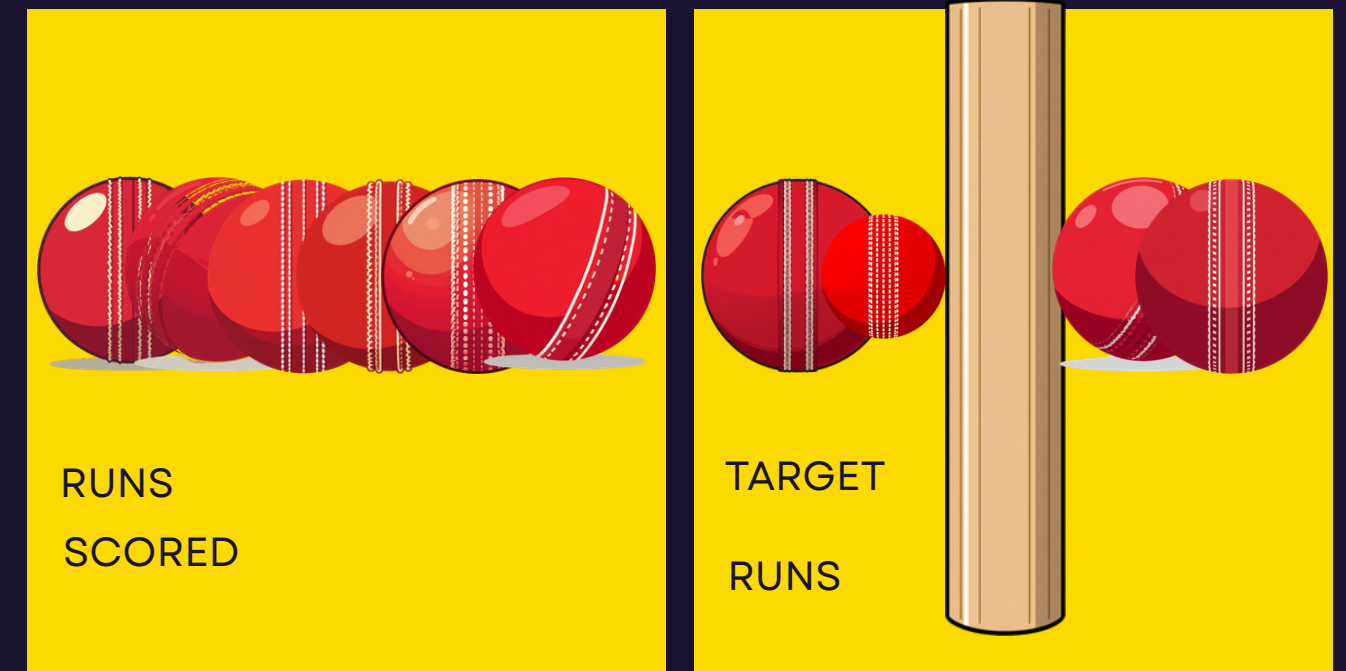

CRICKET RUNS!

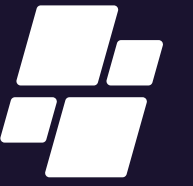

INTERACTIVE PUZZLE 1 – CAN YOU CRACK THE CODE?

Rahul is playing cricket for his school team. He has already scored 12 runs in the match. He wants to score a total of 20 runs by the end of the game. How many MORE runs (r) does Rahul still need to score?

Equation: $12 + r = 20$

🏏 Can you find r? Use the balance scale method – what do you remove from both sides to solve it?

MITHAI BOX MYSTERY

INTERACTIVE PUZZLE 2 – CAN YOU CRACK THE LADDOO CODE?

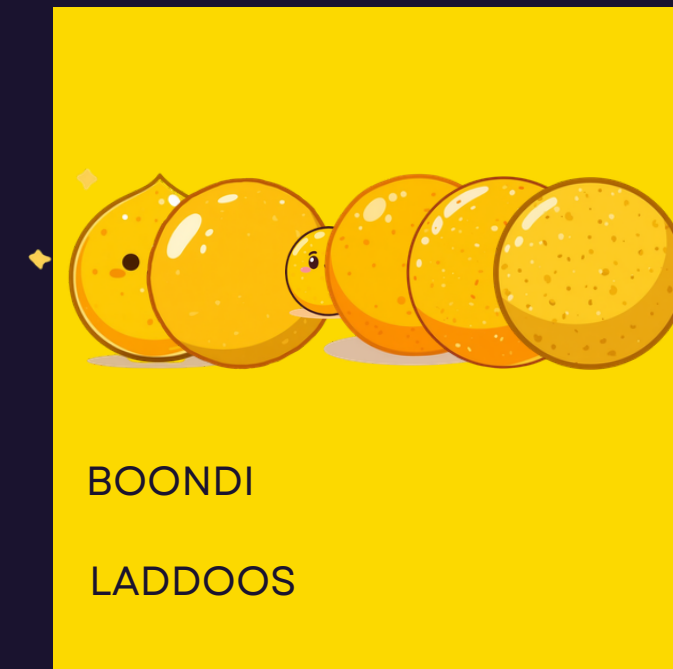

There are 10 laddoos in a box. 6 are yellow boondi laddoos. The rest are white coconut laddoos.

Let c = number of coconut laddoos.

Equation: $6 + c = 10$

🤔 Can you find c ? Use the balance scale method!

Hint: Remove 6 from both sides!

SOLVE FOR T!

INTERACTIVE PUZZLE 3 – SCHOOL BUS FARE

Riya takes the school bus every day. The bus fare is Rs 30. Today, Riya paid Rs 45 in total – that includes the fare plus a small tip (t) for the driver.

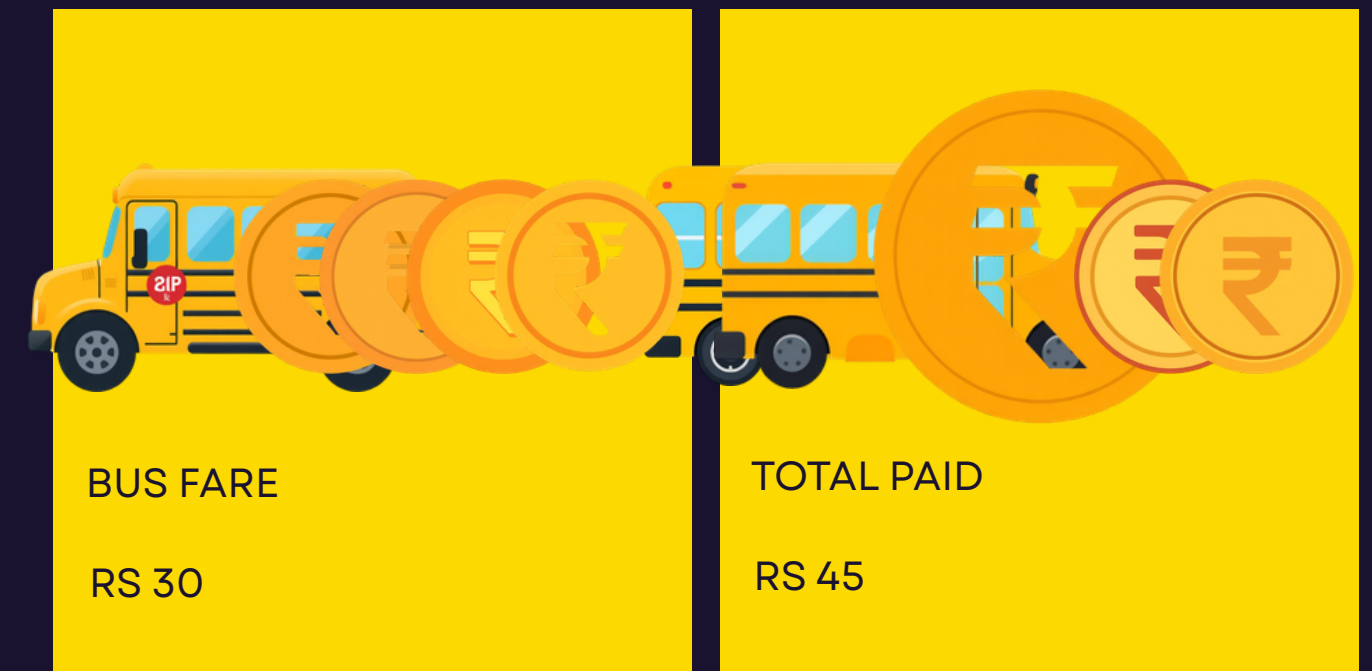

Can you write the equation?

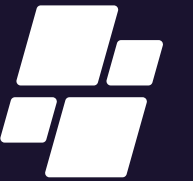

$$30 + t = 45$$

Use the balance scale method – what do you do to both sides to find t?

Hint: Remove 30 from both sides!

What is t? 🚌

CODEBREAKER QUIZ!

PLANRS ACADEMY – TEST YOUR ALGEBRA SKILLS!

Q1 WHAT DOES A LETTER IN MATH
STAND FOR?

A1 A SECRET (UNKNOWN) NUMBER!

Q2 HOW DO YOU KEEP A BALANCE
SCALE EQUAL?

A2 DO THE SAME ON BOTH SIDES!

Q3 IN $10 - X = 7$, WHAT IS X?

A3 $X = 3$ ($10 - 3 = 7$)

★ YOU ARE A PLANRS ALGEBRA SPY!

★ KEEP SOLVING SECRET NUMBERS!
