

■ OUR TIFFIN CHART!

Math — Data Collection & Bar Graph | Grade 1

What will we learn?

- What DATA is
- How to use TALLY MARKS
- How to read a TALLY CHART
- How to draw and read a BAR GRAPH

■ THE TIFFIN BOX MYSTERY

We are DATA DETECTIVES!

Ramesh bhaiya, the school cook, wants to make the **BEST tiffin ever** — but he needs YOUR help! Let's collect data to find out what snacks children love most. Let's solve the mystery together! ■■

1. What is DATA?

Data means **information we collect** by asking questions or counting things. Like the *sabziwala* counting how many kilos of tomatoes he sold! ■

Remember: Data = information we collect and count!

2. What are TALLY MARKS?

Draw lines to count — and cross for 5!

| = 1 || = 2 ||| = 3 |||| = 4 ||||| = 5

Like *kirana aunty* marking biscuit packets sold! Tally marks help us count easily. ■

⇒ ■ Let's Practice Tally Marks!

Number	Draw Tally Marks here	Answer
--------	-----------------------	--------

1		
3		
5		■ (cross)
7		■

3. What is a TALLY CHART?

A tally chart is a **table to organise our counting**! It has three parts:

Category	Tally	Total
What we count	Our marks	The number

■ Sample Tally Chart — Favourite Fruit

Fruit	Tally	Total
■ Mango		4
■ Banana		3
■ Apple		5
■ Guava		2

4. What is a BAR GRAPH?

A bar graph is a **picture that shows data with bars!**

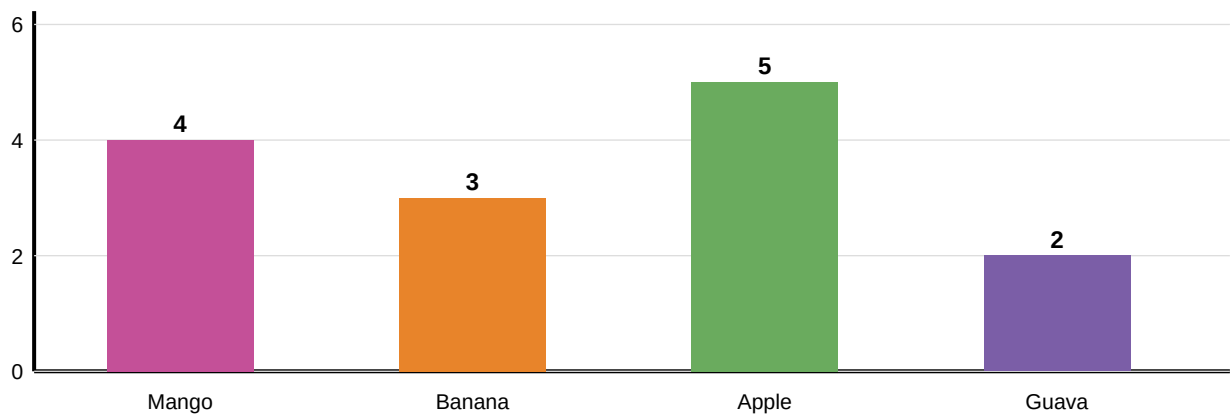

- Categories go on the **bottom**
- Numbers go on the **side** (0 to 10)
- Like a cricket scoreboard showing player scores! ■

■ From Tally Chart to Bar Graph

Taller bars mean MORE votes

Shorter bars mean FEWER votes

Sample Bar Graph — Favourite Fruit

Each bar shows how many children chose that fruit.

■ Reading Bar Graphs — Quick Questions

Question	Answer
How many like Mango?	4 children
Which fruit is MOST popular?	■ Apple (5 votes)
Which two have the SAME votes?	Mango (4) and... look carefully!
Which fruit is LEAST popular?	■ Guava (2 votes)

5. I Am a Data Detective! ■■

Complete these three tasks:

Task 1	Read the tally chart showing how children come to school (Walk, Cycle, Auto, Car).
Task 2	Colour the bar graph using the same transport data. Taller bar = more children!

Task 3

Ask 5 friends about their favourite tiffin snack (Roti, Idli, Paratha, Sandwich) and make tally marks!

■ My Tiffin Survey — Fill this in!

Tiffin Snack	Tally Marks	Total
■ Roti		
■ Idli		
■ Paratha		
■ Sandwich		

6. Data Detective Challenge! ■ or ■?

Is each statement TRUE (■) or FALSE (■)?

Statement	■ True or ■ False?	Answer
Tally marks help us count.		■ True!
Taller bars mean FEWER votes.		■ False! Taller = MORE
A tally chart has categories.		■ True!
We draw bars on the bottom axis.		■ False! Numbers on side

■ DATA DETECTIVE CHANT!

COLLECT it! COUNT it! CHART it! That's DATA!

You are now a Certified Data Detective! ■

■ Parent Corner — Fun at Home!

- Try a **family survey** about favourite snacks!
- Make your own **bar graph** at home with your family.
- Ask: "*What is everyone's favourite sabzi?*" and tally the answers! ■

Thank you, Data Detectives! Keep exploring the world of data! ■
