OVERALL VERDICT: CONDITIONAL PASS — SEND BACK FOR REVISION

Score: 7 / 15

OVERALL SCORECARD

Category	Score	Status
Indian Context & Cultural Fit	9/10	STRONG
Visual Design & Brand Consistency	8/10	STRONG
Pedagogical Structure & Flow	7/10	PARTIAL
Code Content & Accuracy	2/10	CRITICAL
Tone, Language & Age-Appropriateness	9/10	STRONG
Brief Compliance (Section 5.2)	5/10	CRITICAL

The deck has excellent bones — the structure, Indian context, character design, analogies (especially the thali/katori for the `<li>` tag), and overall visual identity are all strong and Brief-compliant. The tone is warm and age-appropriate throughout. **However, the deck cannot be used for teaching in its current state** because the actual HTML code — the core deliverable of a coding lesson — is absent from every slide where it should appear (Slides 5, 6, 8, 10, 11). This appears to be a production/export error rather than a design oversight. Once the 5 critical issues are resolved, this deck will be very close to a full pass and will be an excellent teaching resource.

PART A — SLIDE-BY-SLIDE REVIEW

Slide 1 TITLE / COVER

PASS

- ✓ Strong branded cover — Planrs Academy logo present.
- ✓ HTML coding symbol visible — sets subject context.
- ✓ Cheerful Indian girl character holding a laptop — age-appropriate.
- ✓ Indian food illustration (dosa / roti visible) — good cultural anchoring.
- ✓ Bright, high-energy colour palette (pink / teal / yellow).

Slide 2 HOOK: "DID YOU KNOW? COMPUTERS USE LISTS TOO!"

REVIEW

- ✓ Two-list contrast is the correct hook structure per Brief Section 4.
- ✓ Diwali Shopping List (no order) vs Top 5 Dishes (order matters) — perfect Indian context.
- ✓ Diya illustration adds festive, relatable visual.
- ✓ Girl in pavadai — strong Indian character representation.
- ✓ "These can be in ANY order!" label — pedagogically helpful.

CRITICAL

The ordered list shows only 3 food items (Chole Bhature, Dosa, Gulab Jamun) but is TITLED "Top 5 Favourite Dishes." Item 4 reads "Here, #1 is the BEST!" — this is explanatory text accidentally placed as a list item. The list is incomplete (missing items 4 and 5) AND the note is rendered as a numbered entry, which will confuse Grade 1 students.

Action: Either retitle as "Top 3 Favourite Dishes" OR add 2 more genuine food items (e.g. Rajma Chawal, Kheer) AND move the explanatory note outside the list box.

Slide 3 "WHAT IS HTML?"

PASS

- ✓ "Dadi's biryani recipe card" analogy — directly from Brief Section 3, Concept 1. Perfect execution.
- ✓ "Tags are Special Words in Angle Brackets < >" — clear framing.
- ✓ Lightbulb icon — signals 'key idea' well for young learners.
- ✓ Recipe card visual in corner — reinforces the analogy.
- ✓ Indian girl with tablet — relatable.

MINOR

Tag names (ul, li, etc.) appear to be missing from the rendered explanation text — likely a PDF export issue where HTML tags were stripped.

Action: Confirm tags render correctly in the live presentation.

Slide 4 "WHAT IS A LIST?"

PASS

- ✓ Four real-life Indian list examples in a 2x2 grid.
- ✓ Tiffin Box / Diwali Shopping / South Indian Menu / School Timetable — all from Brief Section 6.2.
- ✓ "Maths, Tamil, EVS, PE" — nice regional language touch (Tamil instead of generic Hindi) shows awareness of South Indian audience.
- ✓ Boy writing at desk — relatable character.
- ✓ Clean layout, readable font size.

Slide 5 UNORDERED LIST —

REVIEW

- ✓ Traffic light graphic — creative visual metaphor for 'order doesn't matter'.
- ✓ "Code Example — Try It!" CTA present.
- ✓ Indian girl with tablet — good character.
- ✓ Samosa illustration in corner — excellent Indian food visual.

CRITICAL

The "Code Example — Try It!" orange box appears completely blank. No code is visible. The actual HTML example is missing entirely. This is the most critical issue in the deck — the code demonstration is the core teaching moment for this slide.

Action: Add the full unordered list code example inside the orange box: `<ul> <li>Samosa</li> <li>Dosa</li> <li>Mango Lassi</li> <li>Poha</li> </ul>` Use a dark code-block background with coloured syntax per Brief Section 7.6.

MINOR

Tag names appear stripped in the explanation text (same PDF export issue as Slide 3).

Action: Verify tags display in live presentation.

Slide 6 ORDERED LIST — `<ol>`

REVIEW

- ✓ Trophy graphic — excellent visual metaphor for 'ranking / order'.
- ✓ Numbered list icon clearly displayed.
- ✓ "My Top 3 Favourite Foods Example" section present.
- ✓ Dal / rice illustration — good Indian food visual.

CRITICAL

Identical issue to Slide 5. The "My Top 3 Favourite Foods Example" orange box is completely blank. The `<ol>` code example is missing.

Action: Add the ordered list code example: `<ol> <li>Chole Bhature</li> <li>Gulab Jamun</li> <li>Aloo Paratha</li> </ol>`

MINOR

Tag names stripped in explanation text (same issue).

Action: Verify in source file.

MINOR

Slide title appears cut off — the `<ol>` tag is missing from the heading.

Action: Verify in source file.

Slide 7 THE `<li>` TAG — LIST ITEM

PASS

- ✓ Thali/katori analogy — OUTSTANDING. Directly matches Brief Section 3, Concept 5 memory hook: 'one katori = one `<li>` tag'.
- ✓ Illustrated thali with labelled katoris (dal, sabzi, chutney, raita) — brilliant, culturally rich visual.
- ✓ Magnifying glass icon — reinforces "look closely" attention cue.
- ✓ "Every item in a list needs ... tags" and "One katori = One tag!" key takeaways clearly boxed.

MODERATE

Katori labels contain typos: "Ratiti" should be "Roti" and "rabin" should be "Raita." Grade 1 students may read and retain these spellings.

Action: Fix illustration text labels.

MINOR

Tag names stripped in body text (same PDF issue).

Action: Verify in source file.

Slide 8 "LET'S BUILD TOGETHER!"

REVIEW

- ✓ "Code along with your teacher!" — correct collaborative framing.

- ✓ Excited student with headphones — high energy, matches 'Do' phase.
- ✓ Clock/code magnifier in corner — signals 'it's time to code'.

CRITICAL

The "Full Code Example — My Food Page" box is completely blank. This is the most important slide in the deck — the instructor's live code-along reference. The complete HTML page must appear here.

Action: Insert full scaffolded HTML: `<!DOCTYPE html> <html> <head><title>My Food Page</title></head> <body> <h1>My Favourite Foods by Arjun!</h1> <h2>Foods I Love:</h2> <ul> <li>Samosa</li> <li>Dosa</li> </ul> <h2>My Top 3 Dishes:</h2> <ol> <li>Chole Bhature</li> <li>Gulab Jamun</li> <li>Aloo Paratha</li> </ol> </body> </html>`
Use a dark-background code block per Brief Section 7.6. Consider splitting into 2 slides.

Slide 9 "YOUR TURN! ACTIVITY TIME"

REVIEW

- ✓ 5-step activity breakdown in card format — clear and scannable.
- ✓ Steps follow exact Brief Section 4 activity sequence.
- ✓ "Create myfood.html" — correct filename from Brief.
- ✓ Indian girl at laptop — good character match.
- ✓ Food illustrations (samosa, lassi, toast) — Indian context.

MODERATE

All 5 steps are numbered "1." — formatting/numbering error. Steps should be numbered 1 through 5 sequentially. For Grade 1 students, numbered steps are important to follow in order.

Action: Fix numbering to 1, 2, 3, 4, 5.

MINOR

Step 3 reads "Add your name in" — the `<h1>` tag name appears stripped.

Action: Verify in source.

MINOR

Steps 4 and 5 reference tag names that appear stripped.

Action: Verify in live deck.

Slide 10 "SPOT THE BUG!"

REVIEW

- ✓ Bug-spotting activity is present — matches Brief Section 4, Phase 5 requirement.
- ✓ "Hint: Check the closing tags!" — appropriate scaffold for Grade 1.
- ✓ Answer revealed: "Missing `</li>` after `Idli` & wrong `</ul>`".
- ✓ Fun detective magnifying glass character.

CRITICAL

The actual broken code that students need to examine is missing. Without the buggy code displayed, the "Spot the Bug" activity cannot function.

Action: Add the buggy code block (e.g., missing `</li>` and wrong closing `<ul>` tag). Display the buggy code FIRST, then reveal the answer. Consider making this a 2-slide sequence: Slide 10A (show bug) / Slide 10B (reveal answer).

Slide 11 "WHAT YOUR PAGE WILL LOOK LIKE!"

REVIEW

- ✓ "Code → Browser output" concept is exactly right.
- ✓ Excited girl at laptop — great for the reveal moment.
- ✓ "Your Code Becomes a Real Page!" framing is motivating.

CRITICAL

Both boxes ("Your Code Becomes a Real Page!" and "Browser Shows Your Food Lists Beautifully") are empty. The entire purpose of this slide — showing the code-to-output transformation — is absent.

Action: Add a side-by-side layout: *LEFT BOX* — the HTML code (dark code block); *RIGHT BOX* — the rendered browser output (light background, showing bullet points and numbered list). This side-by-side is the key visual specified in Brief Section 5.2 and Section 12.

Slide
12

"LEARNING RECAP"

PASS

- ✓ All three key tags summarised — `<ul>`, `<ol>`, `<li>`.
- ✓ "Built a Food Page!" as the fourth card — outcome-focused.
- ✓ "You made a real HTML page!" — celebratory framing.
- ✓ Two diverse children characters — inclusive.
- ✓ Checkmark badge graphic — achievement signifier.

MINOR

Tag names appear stripped in the card headers (shows "= Unordered List" instead of " = Unordered List").

Action: Verify in live deck.

Slide
13

"READY FOR MORE? STRETCH CHALLENGE!"

PASS

- ✓ Stretch challenge present — matches Brief Section 4 requirement.
- ✓ "Add a THIRD list — festival foods!" — directly from Brief.
- ✓ Diwali treats example (kaju katli, laddoo, namkeen) — from Brief Section 6.1 approved food list.
- ✓ Hint about using `<ul>` with reasoning ("all festival foods are equally yummy!") — excellent pedagogical reasoning.
- ✓ Mithai/sweets illustration — strong Indian visual.

MINOR

Tag name stripped in hint text.

Action: Verify in live deck.

Slide
14

"YOU DID IT!"

PASS

- ✓ "List Master Badge Awarded!" — matches Brief Section 4 badge.
- ✓ "You just built your first food webpage!" — specific, not generic.
- ✓ "Amazing work, young coder!" — warm, encouraging.
- ✓ "More HTML adventures coming soon!" — forward-looking.
- ✓ Confetti/celebration graphic — high energy close.
- ✓ Two diverse child characters celebrating — inclusive.
- ✓ Gold badge/medal illustration — tangible achievement symbol.

Slide
15

"FOR PARENTS — WHAT YOUR CHILD LEARNED TODAY"

PASS

- ✓ Parent Corner present — meets Brief Section 5.2 and 9.2.
- ✓ Three panels: HTML List Structure / How to Support / What's Next.
- ✓ "No coding knowledge needed — just cheer them on!" — perfectly jargon-free for non-technical parents.
- ✓ "Ask them to show you their food page!" — great parent engagement prompt.
- ✓ Parent-and-child illustration — warm, relatable.

MINOR

"HTML List Structure" card has tag names stripped (same PDF issue).

Action: *Verify in live deck.*

PART B — MASTER BRIEF COMPLIANCE CHECKLIST

Requirement	Status	Slides / Notes
Minimum 8 slides	PASS	15 slides
Code shown alongside browser output	FAIL	Slides 5, 6, 8, 11
Font size minimum 24pt for code	N/A	Code missing
Max 6 lines per slide	PASS	All slides
Bright brand colours (orange, teal, white)	PASS	All slides
At least 1 Indian food illustration per concept	PASS	Slides 5, 6, 7
Dark background code block	FAIL	Code missing
"Try It!" prompt after each concept slide	PASS	Slides 5, 6
Indian context references throughout	PASS	All slides
Minimum expectations for visual assets	PARTIAL	Multiple slides
Hook references daily Indian life	PASS	Slide 2
Student asked direct questions	MISSING	No direct questions
Spot the Bug activity	PARTIAL	Slide 10 (code missing)
Parent Corner present	PASS	Slide 15
Stretch challenge present	PASS	Slide 13
Badge / reward moment	PASS	Slide 14
Session outline timing followed	PASS	Structure matches
No Western food as primary examples	PASS	All slides
No unexplained jargon	PASS	All slides
Encouraging, warm tone	PASS	All slides
Indian characters (diverse, regional)	PASS	All slides
Things to Avoid — none present	PASS	No violations

PART C — SUMMARY OF ISSUES BY SEVERITY

CRITICAL ISSUES — Must fix before use (5 issues)

1. [Slides 5, 6, 8, 11] — CODE BLOCKS ARE EMPTY

The HTML code examples are missing from ALL concept and demo slides. This is the single biggest problem with the deck. The entire teaching methodology depends on students seeing and typing actual HTML.

Fix: Populate every code block with the correct HTML examples from Brief Section 4 (Phase 3) and Section 12.

2. [Slide 10] — BUG-SPOTTING CODE IS MISSING

The "Spot the Bug" activity has the answer but not the question. Students have no code to examine.

Fix: Add the buggy code block as specified in Brief Section 4, Phase 5. Consider a 2-slide reveal sequence.

3. [Slide 11] — BROWSER OUTPUT IS MISSING

The code-to-browser transformation slide shows two empty boxes. The side-by-side code vs output visual is absent.

Fix: Add both the code (left) and rendered output (right) per Brief Section 5.2 and Section 12.

4. [Slide 2] — ORDERED LIST HAS CONTENT ERROR

"4. Here, #1 is the BEST!" appears as a numbered list item instead of explanatory text. The list is also incorrectly titled "Top 5" but only shows 3 items.

Fix: Either complete the list to 5 items OR retitle as "Top 3." Move the explanatory note outside the list box.

5. [Slide 9] — ALL STEPS NUMBERED 1.

The 5-step activity list shows "1." for every step due to a numbering error. Grade 1 students need clear sequential numbering.

Fix: Number steps 1 through 5 sequentially.

MODERATE ISSUES — Should fix before final release (2 issues)

6. [Slides 3, 5, 6, 7, 9, 12, 13, 15] — HTML TAGS STRIPPED IN TEXT

Across nearly all slides, the HTML tag names (ul, ol, li, h1) appear to have been stripped when exporting to PDF, leaving blank spaces where tags should be.

Fix: Check and fix the source presentation file. Ensure tags are rendered as plain text (not as HTML) inside text boxes.

7. [Slide 7] — ILLUSTRATION SPELLING ERRORS

The thali illustration contains "Ratiti" (should be "Roti") and "rabin" (likely "Raita"). Grade 1 students who are beginning readers may absorb these spellings.

Fix: Correct the illustration labels.

SUGGESTIONS FOR ENHANCEMENT (Non-mandatory)

8. Add at least 2 direct questions to the student across the deck.

Example on Slide 5: "What number will the browser give Chole Bhature? (1, 2, or 3?)" — Brief Section 5.1 requires minimum 2 direct questions.

9. Slide 8 ("Let's Build Together") could be split into 2 slides.

Part A — Show the structure (`<html>`, `<head>`, `<body>`). Part B — Show the lists (`<ul>` and `<ol>` with food items). This prevents one very dense code-along slide.

10. Consider adding a "Thali Analogy" visual recap on Slide 12.

A small thali icon next to the `<li>` card would tie back the strongest analogy in the deck.

11. The "What Your Page Will Look Like" slide (11) could show Priya's page from Brief Section 12.

Giving students a concrete, named, aspirational target makes the outcome real.

PART E — PRIORITY ACTION LIST FOR CONTENT TEAM

Priority	Action	Slide(s)
P1	Add code example to code block	5
P1	Add code example to code block	6
P1	Add full HTML page code to code-along block	8
P1	Add buggy code to "Spot the Bug" activity	10
P1	Add side-by-side code + browser output	11
P2	Fix numbered list — all showing "1."	9
P2	Fix slide 2 list error (4th item / "Top 5" title)	2
P3	Verify and fix stripped HTML tags in all text	3,5,6,7,9,12,13,15
P3	Fix thali illustration spelling (Roti / Raita)	7
P4	Add 2 direct student questions to deck	5 or 6
P4	Consider splitting Slide 8 into 2 slides	8
P4	Add student's name example to "Page Preview"	11

END OF QUALITY REVIEW REPORT | Planrs Academy | Coding/HTML | Grade 1 | My Favourite Food Page | Reviewed by: Curriculum Design Team | Version 1.0
