

TypeScript — Build a Typed To-Do App

The Confused Grocery List at D-Mart!

Imagine a grocery list with mistakes –
can you spot them?

"TypeScript helps catch these sneaky
mix-ups before shopping!"

What is TypeScript? Your Smart Safety Guard!

Analogy

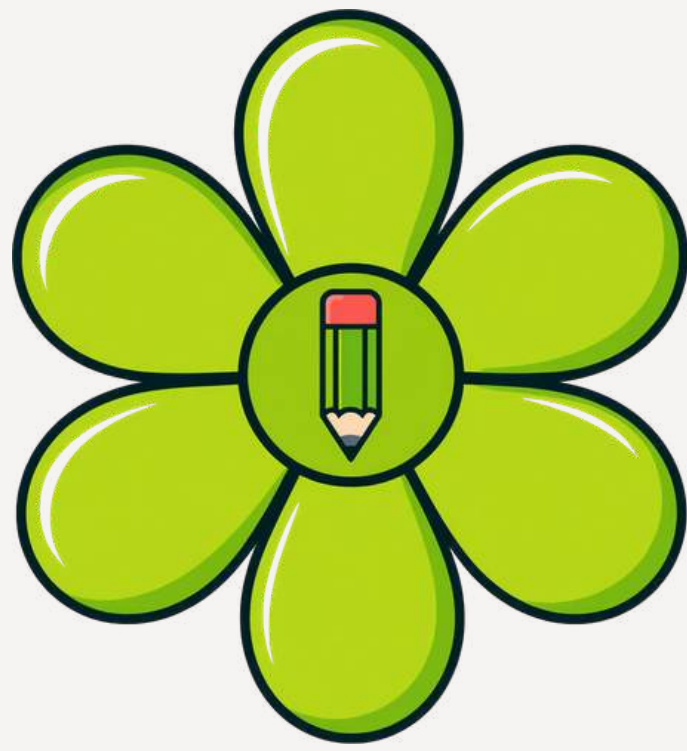

TypeScript is like labeled spice boxes in your kitchen – every box tells you exactly what is inside, so you never mix up salt and sugar!

TypeScript

JavaScript + Safety Rules = TypeScript. It stops sneaky bugs before your code even runs!

Meet the Basic Types – Our Coding Labels!

String

"Buy Amul Milk"
let taskName: string

Number

2 (priority!)
let priority: number

Boolean

true / false
let isDone: boolean

Watch Out! TypeScript Catches Sneaky Bugs!

Bug!

```
let taskName: string = "Do Homework";  
taskName = 100; // ✗ Type Error!
```

Explain

Oops! TypeScript says: "You can't put a number where words belong!" The proofreader (compiler) stops this sneaky bug!

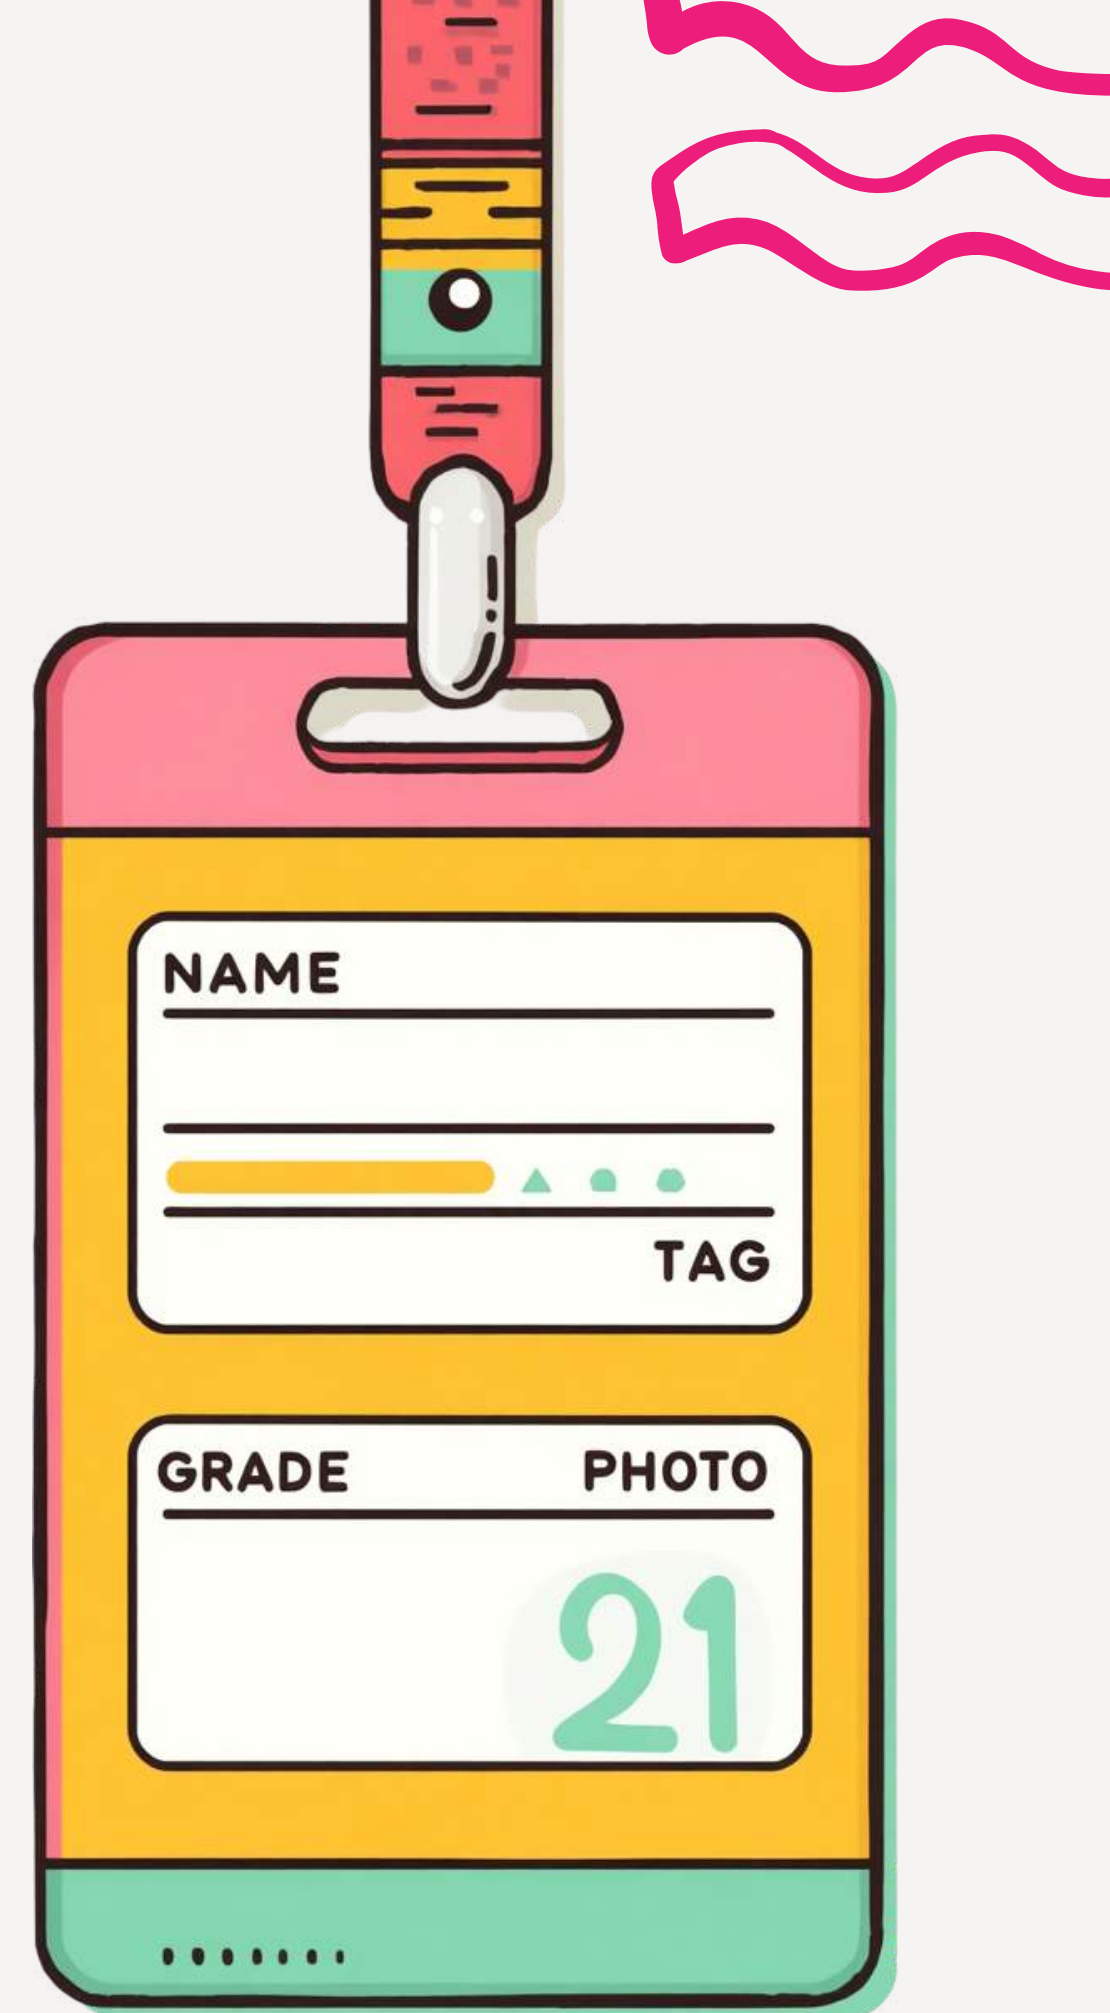

Our TodoItem Blueprint – Like a School ID Card!

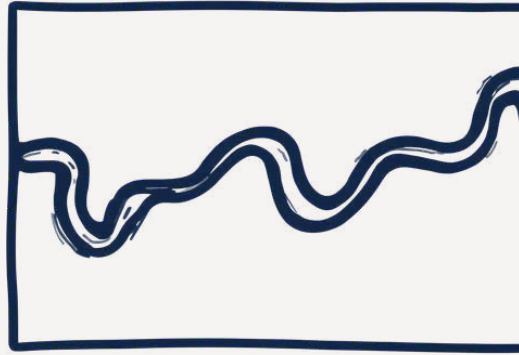

An interface is a blueprint – it tells what info every To-Do item must have!

```
interface TodoItem {  
  title: string;  
  priority: number;  
  isDone: boolean;  
}
```

Just like a school ID card has a name, grade, and photo – our To-Do must have a title, priority, and done status!

Let's Build!

Cricket

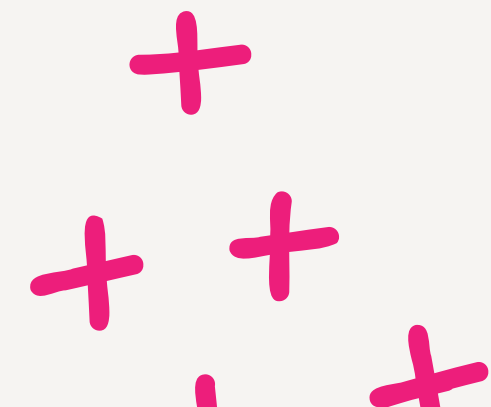

```
let task1: TodoItem = { title: "Practice Cricket",  
  priority: 2, isDone: false };
```

Maths

```
let task2: TodoItem = { title: "Revise Maths Chapter 3",  
  priority: 1, isDone: true };
```

Chores

```
let task3: TodoItem = { title: 3, priority: 3, isDone: false }; // 🐛  
Can you spot the sneaky bug here?
```

Spot the Bug Quiz Game!

Which is a string?
a) 100 b) 'Buy Amul Milk' c)
true

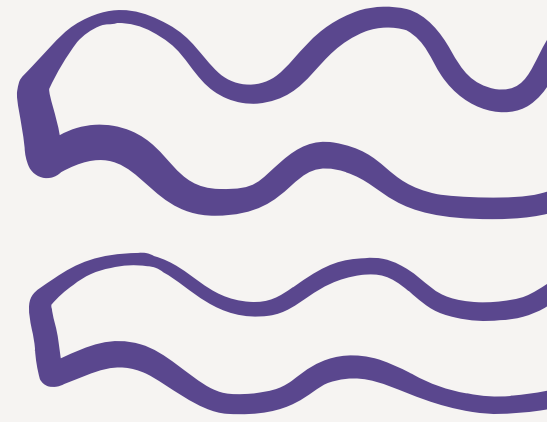

Can you assign false to a number?
Yes or No?

What does 'interface' mean?
a) Blueprint b) Color c) Snack

Your Typed To-Do App!

Practice Cricket

Practice Cricket — Priority: 2 — Done: No ✕

Revise Maths

Revise Maths Chapter 3 — Priority: 1 — Done: Yes ✓

Feed Pet

Feed Pet / Help Clean Room — Priority: 3 — Done: No ✕
Great job! You built a smart planner that stops bugs before they happen!

Wrap-Up, Badges & Homework!

Great work today, TypeScript Guardians! 🎉

TypeScript is your superhero spellchecker!

Learned: string, number & boolean types

Built a typed To-Do planner with interfaces!

Homework: Create an IPL Cricket Player Card interface 🖋️
