

THE SECRET LIFE OF INK: THE CHROMATOGRAPHY MYSTERY

The Mysterious Note

Ananya found a secret note written in black ink. But what if black ink is not just one colour?

What is a Mixture? The Secret Team

Black ink looks like one colour but is actually many colours hidden together!

Like Mixed Fruit Chaat — looks like one snack but has apple, banana, and papaya

Black ink is a 'chaat' of different colours!

Chromatography - The Great Colour Race

What is Chromatography?

Chromatography is a way to separate hidden colours using water. When water touches ink, the colours start to climb up the paper!

The Rainy Day Race!

Imagine a race on a rainy day — some colours run fast on wet paper, others run slow. That's how we see the hidden colours!

What You Need for the Colour Race

1 Black sketch pen

2 Tissue or filter
paper strip

3 Drop of water

4 Newspaper or table
surface

How to Set Up the Experiment

- 1 Draw a thick black line near the bottom of the paper strip

- 2 Place the paper strip standing in a small drop of water

- 3 Watch the colours climb up the paper like a race!

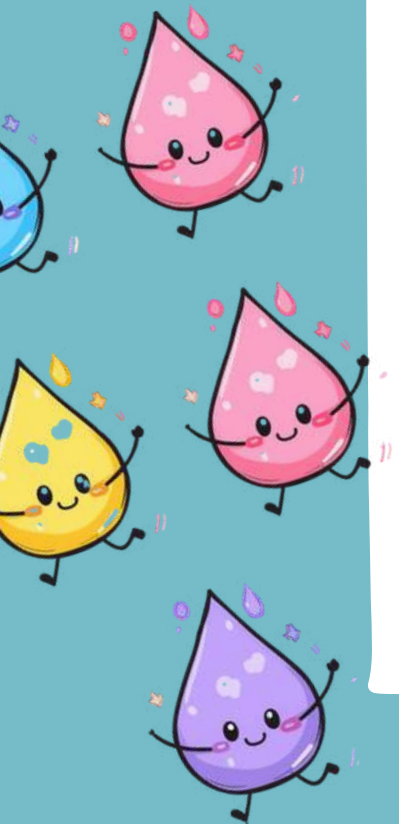

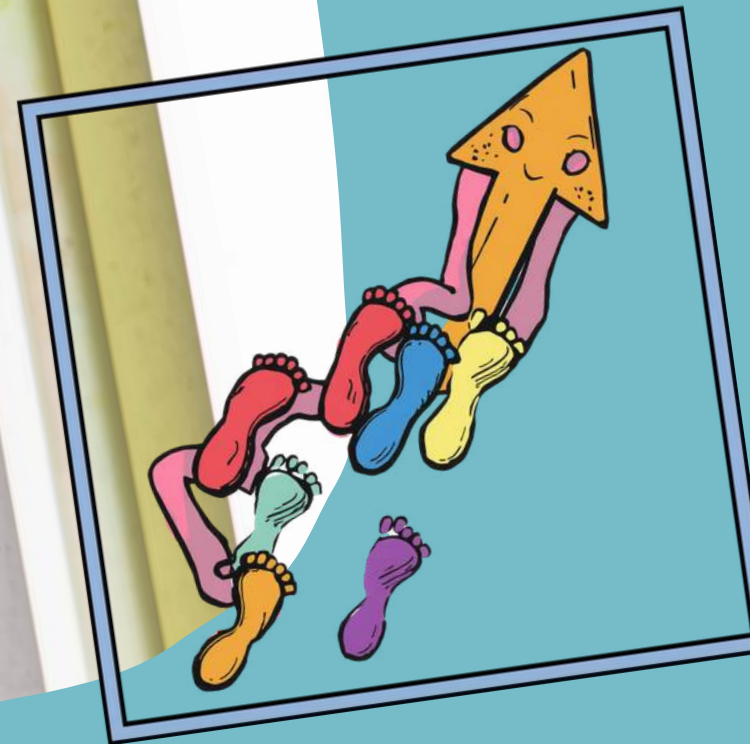

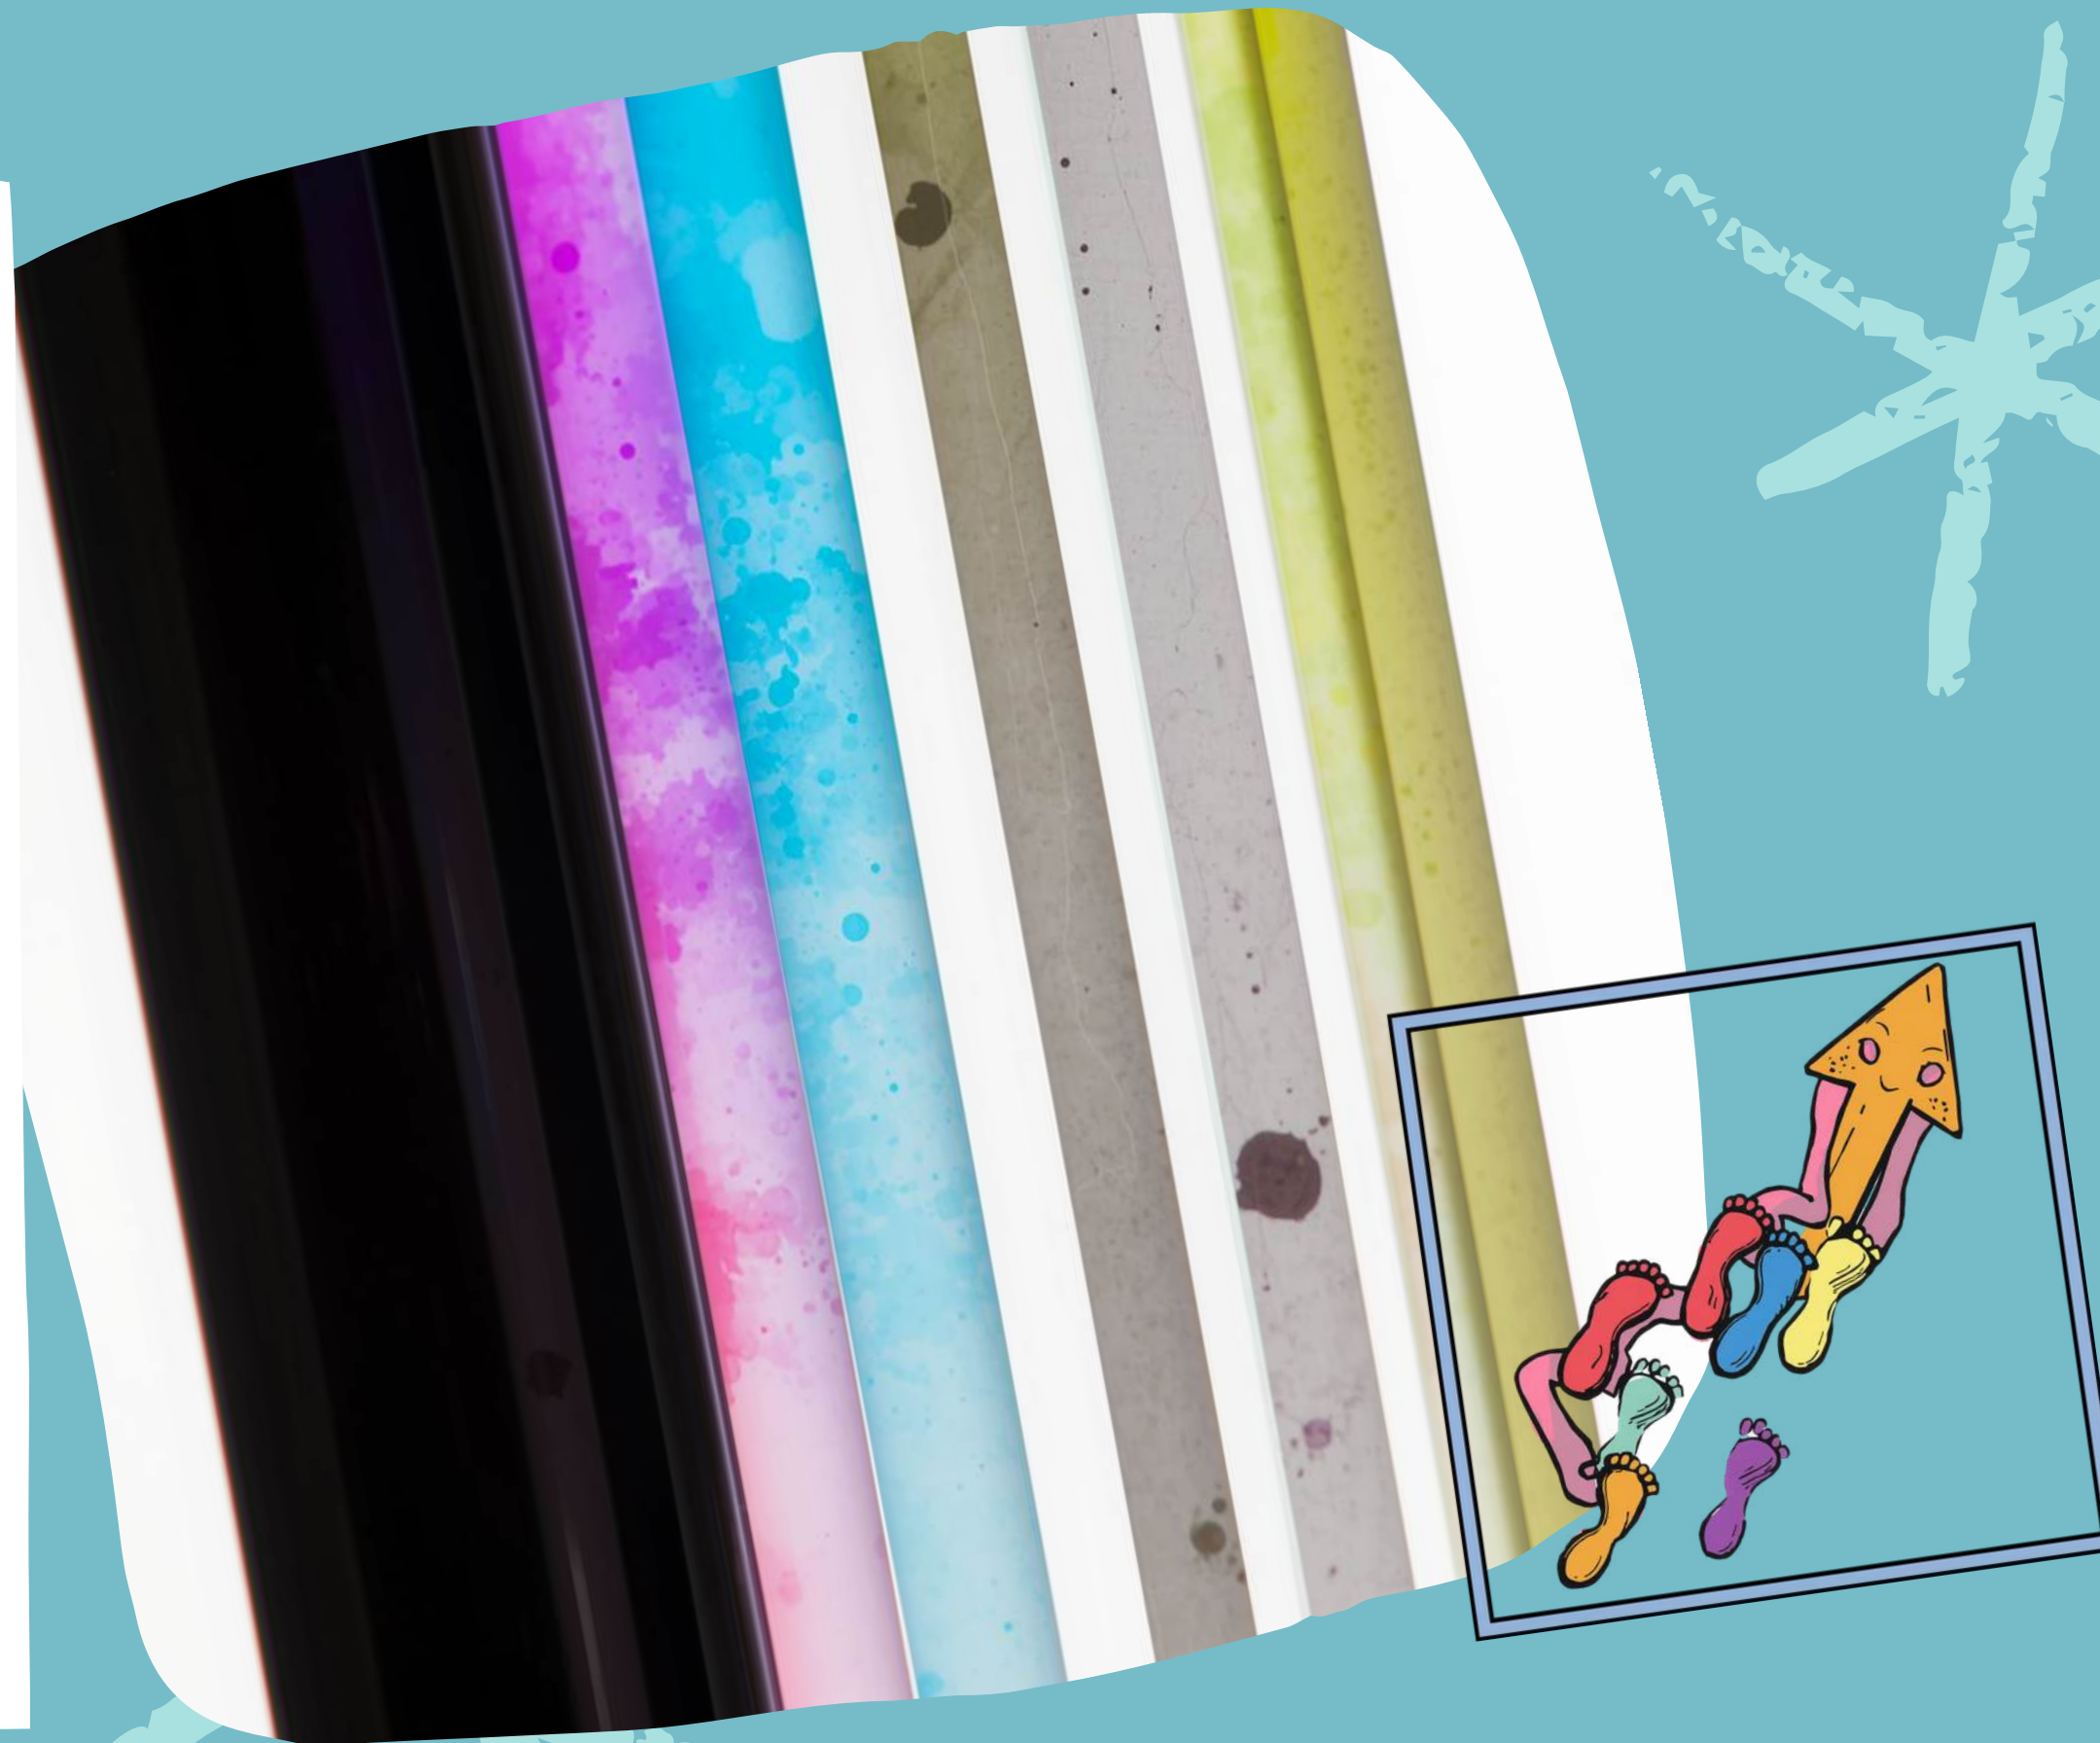

- 4 Keep the paper standing and don't touch it

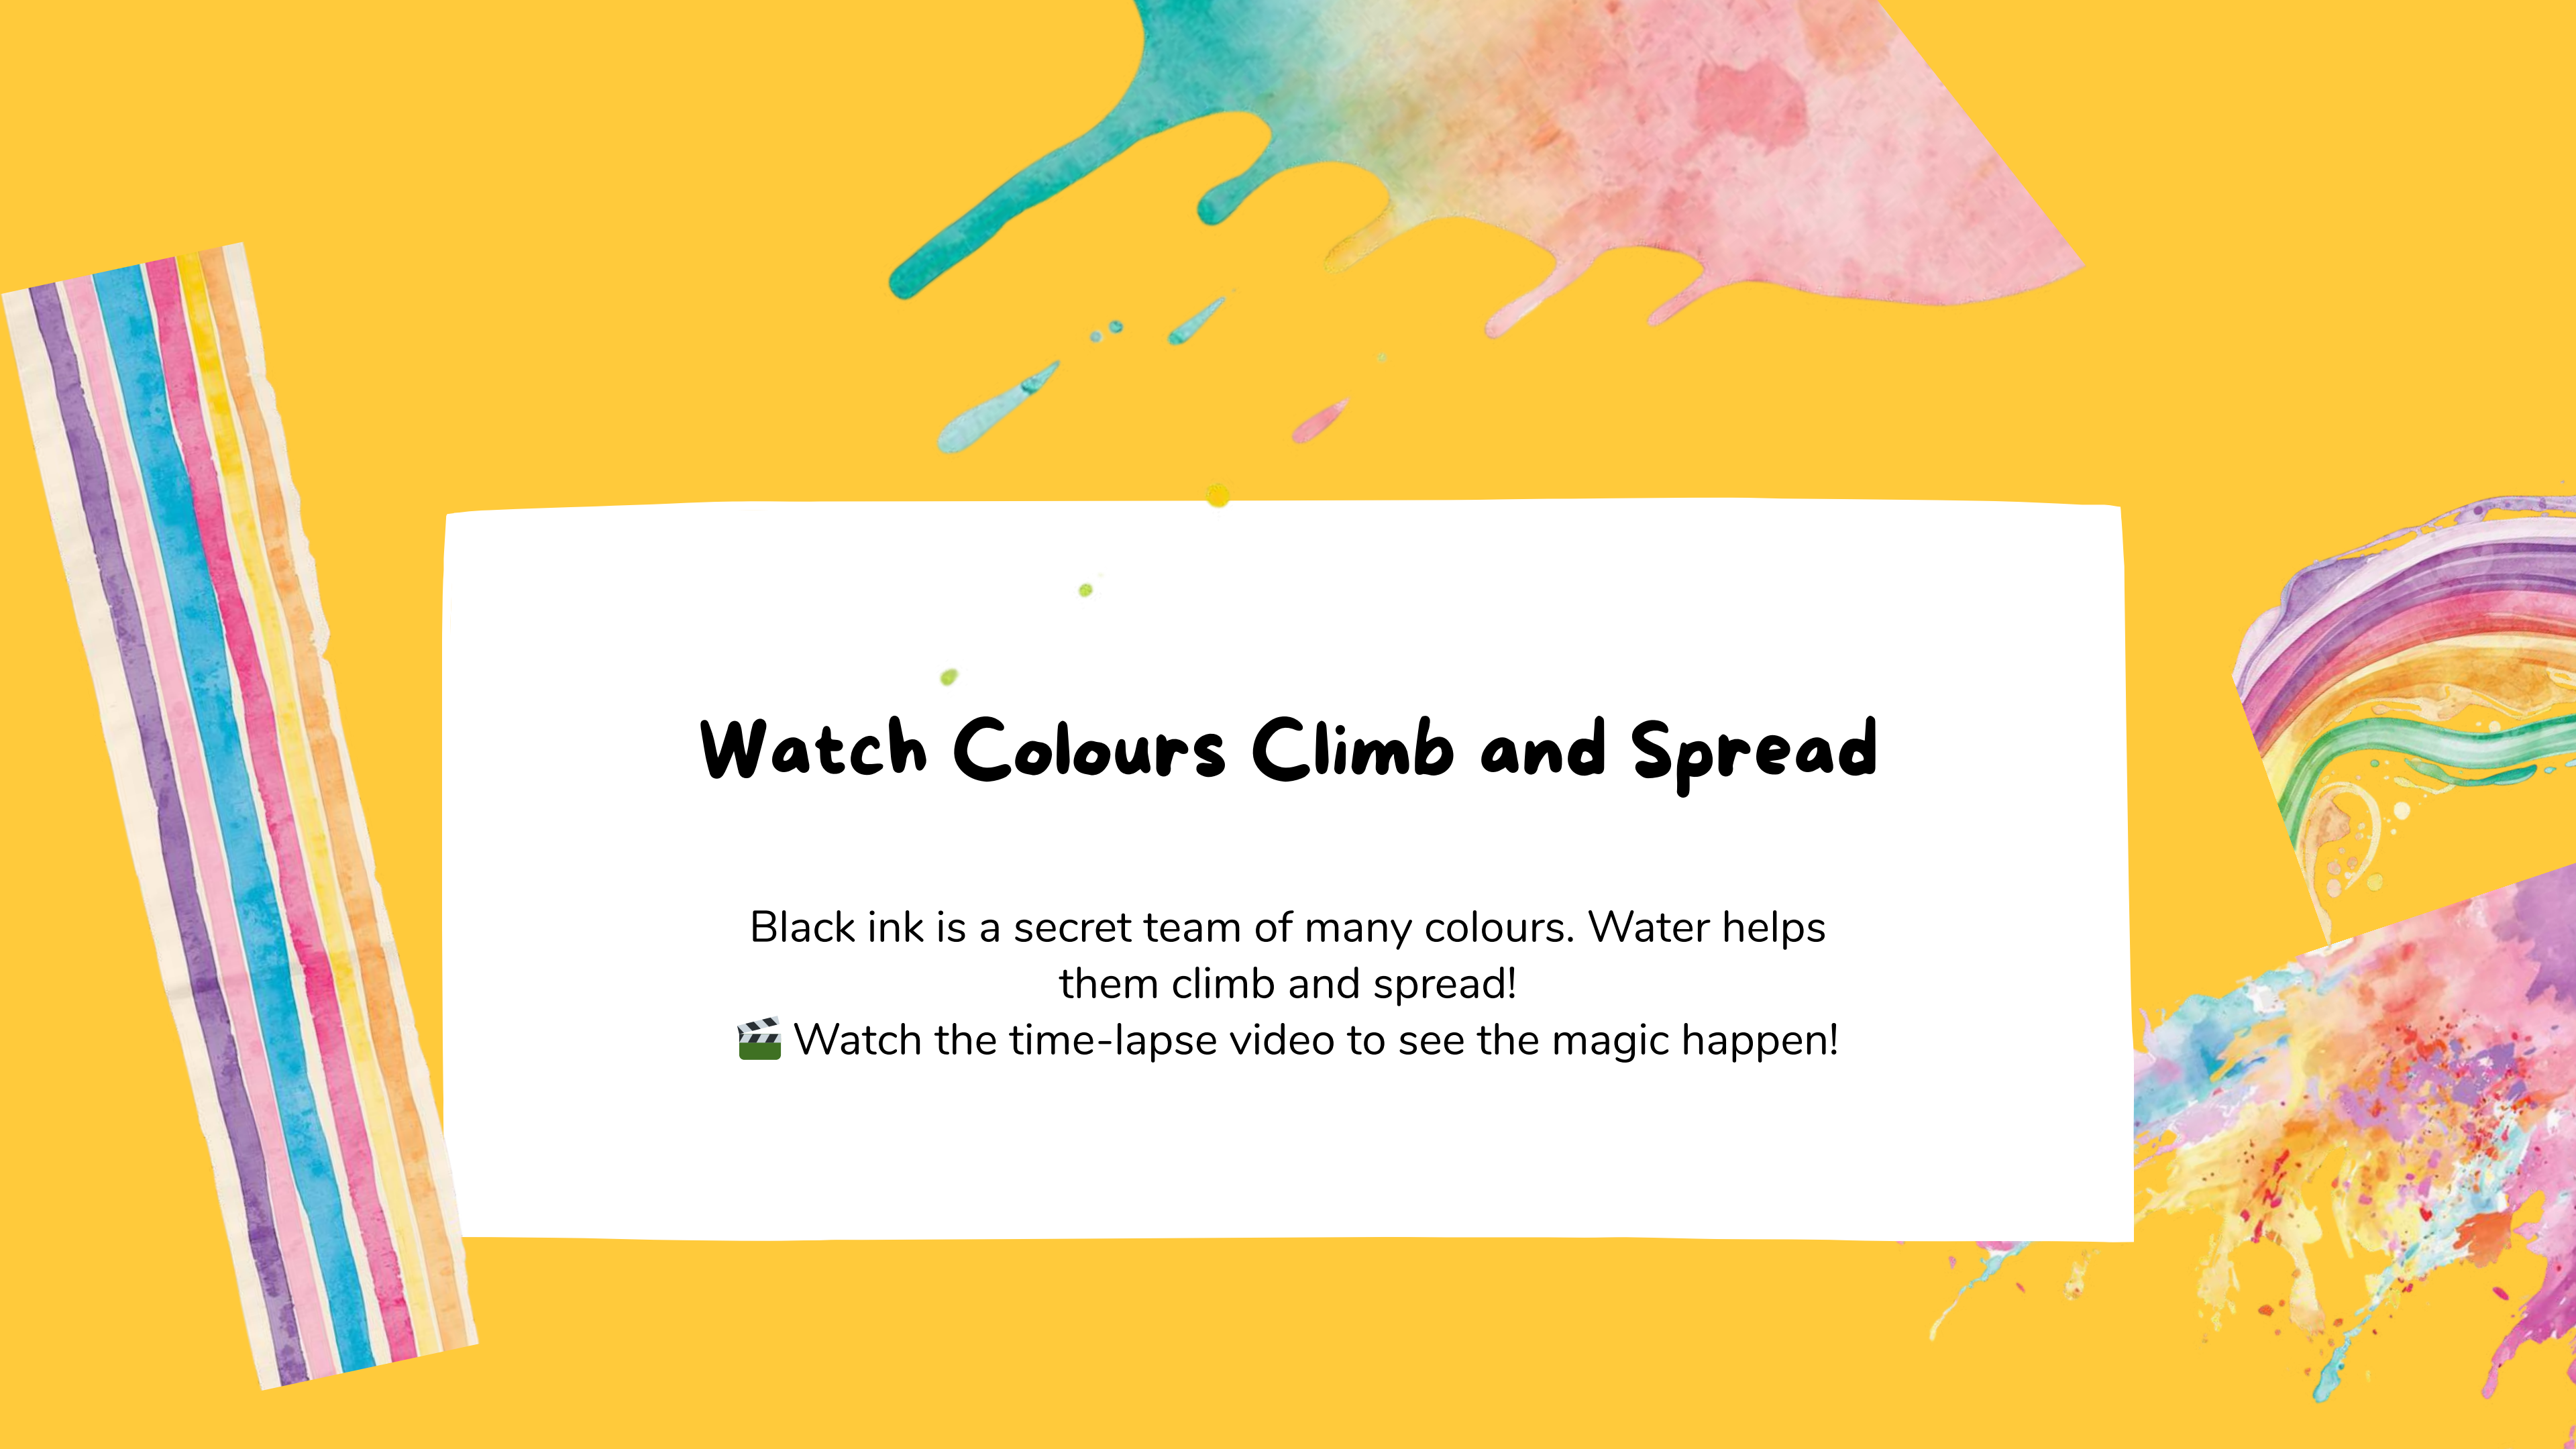

Let's Begin!

Follow these simple steps to start your colour race!

**Look closely!
Different colours
are running at
different speeds.**

Watch Colours Climb and Spread

Black ink is a secret team of many colours. Water helps them climb and spread!

 Watch the time-lapse video to see the magic happen!

Predict the Hidden Colours!

Green Pen

What colours do you think are hiding inside? Write your guess here!

Purple Pen

What colours do you think are hiding inside? Write your guess here!

Science Artist Challenge!

1 Try chromatography with different coloured pens

2 Draw a Colour Map of your results

3 Share your secret team colours with friends

4 Make a colourful art piece using your experiment

HOW CHROMATOGRAPHY WORKS

Step 1

1

Black ink has many colours

2

Water makes colours run

3

Colours run at different speeds

4

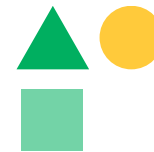

Paper shows hidden colours!

Step 2

Ink drop goes on paper

Add water drop to start the race

Watch colours climb up!

See the rainbow appear!

Step 3

Step 4

4

Paper shows hidden colours like magic!

Spot the Hidden Colour Quiz!

Can you spot the hidden colours in black ink?

- A) Red, Blue, Yellow
- B) Green, Orange, Pink
- C) Brown, Grey, White

The background is a solid yellow color. There are several white, hand-drawn style swirls or loops scattered across the page. On the left side, there is a white test tube tilted upwards, with a cluster of small, colorful dots (pink, blue, green, and yellow) emerging from its top. The dots are concentrated near the test tube and spread out slightly to the left.

Bonus: Your Colour Map Worksheet

Draw your experiment results here! Be a Science Artist and show your colours.
