Final Showcase & Polish

Let's Build Our Digital Home!

A Simple Guide for Grade 1 Superstar Builders

What Is a Website?

A **website** is like a magical digital home! It is a special place on the internet that is all about **YOU!**

Just like a beautiful peacock shows its colorful feathers, your website shows everyone who you are!

Every digital home needs some important parts to look great. Let's find out what they are!

Three Magical Parts

Your digital home has **three key parts**:

- **The Header:** This sits right at the very top. It has your name so everyone knows it is your home!
- **The Gallery:** This is the middle space. It holds your favorite pictures!
- **The Buttons:** These let visitors click and move around your pages!

Let's learn how to stack them together like toy blocks!

Let's Build the Frame!

Open your **Planrs Web Editor** on your computer or tablet. It is time to make your website layout!

We will drag and drop three building blocks into place. You must stack them from **top to bottom**!

1. Welcome Banner (Top)

2. My Gallery (Middle)

3. Contact Badge (Bottom)

Superstars, you can do it! Drag them into place!

Stop & Check: Where Do They Go?

Let's play a quick game! Look at your screen. Can you answer these questions?

Raise your hand and tell the class:

1. Which block goes on the very top?
2. Which block comes next in the middle?
3. Which block goes at the bottom?

Superstar builders, you know this order! Trust your hands!

Personalize Your Website!

Now, let's make the website look like you! First, type your **first name** where it says "My Name".

Next, let's pick your favorite things to show on the page!

- **Type your name:** Example: *Kabir*
- **Choose your favorite food:** Do you like *Idli Sambar*?
- **Pick a fun avatar item:** Do you love a *Cricket Bat*, a *Dancing Peacock*, a *Musical Tabla*, or your neat *School Uniform*?

Choose Your Pictures!

Your website gallery needs beautiful pictures. Pick **3 pictures** that show your favorite festival things!

Drag these options right into your digital gallery block:

Kite Flying (Makar Sankranti)

Rangoli Patterns (Diwali)

School Sports Day

Diwali Lamps

Happy Dance

Art Class Fun

Which three are your favorites?

Share Your Picks!

Turn to your neighbor or partner sitting next to you. It is time to share what you chose!

"I chose _____ ,
_____, and _____ !"

Listen to what your friend picked too! Are your pictures the same or different?

Digital Safety Check!

Before we share our website with the world, we must do a safety check. Keeping our private details safe is very important!

Should we put our phone number on our website?

 **Yes?**

 **No?**

Smart kids say: NO! 

Never put your phone number or home address online.
Keep your info safe by using your **first name only!**

The Magic Publish Button!

Your website is beautiful, customized, and safely built! Now, look for the big green button in your editor.

PUBLISH

Clicking this button makes your website go **live** on the internet!

Once it is published, your editor will give you a special website link. You can share this link with your teacher and parents!

Fantastic job, creators! Your page is real!

How to Share Your Website

Now you can show off your hard work! Open your website link on a tablet, a mobile phone, or a computer screen.

Show it to your parents, brothers, sisters, or friends and say out loud:

"This is my website. I made it myself!"

They will look at your wonderful pages and be so very proud of you! ✨

Reflection Time

Take a moment to look back at your building journey. How do you feel about your website today?

 **Proud** — *"I made something amazing!"*

 **Happy** — *"I had so much fun building it!"*

 **Okay** — *"I tried my best today!"*

 **Raise your hand high for your feeling! You did an awesome job!**
