

The Tile Master: Understanding Area

The New Bedroom Rug Story

Ishaan wants to buy a rug for his bedroom, but he wonders how to choose the right size. How can Ishaan find out how much space the rug will cover?

What is Area?

The Space Inside

Area is the amount of space covered by a flat shape. Think of it as how much room something takes up!

If perimeter is the fence around a park, area is the grass inside where you play. Perimeter goes around, area fills inside!

Counting Squares

Step 1

Let's count how many small squares fit inside this rectangle. Each small square is one square unit.

Counting

Squares Step 2

Imagine a Barfi tray with 20 square pieces. The tray's area is 20 square units!

Count the rows: 4 rows

Count the columns: 5 columns

Total squares: 20 square units

From Counting to Multiplying!

Instead of counting one by one, we can multiply the number of rows by the number of columns!

Example: 4 rows $\times$ 5 columns = 20 squares

The Area Formula

Area of a Rectangle = Length $\times$ Width
This simple formula helps us find the space
inside any rectangle quickly!

Worked Example:
Length = 6 units, Width = 3 units
Area = $6 \times 3 = 18$ square units

Practice Time!

The Tiffin Box Challenge

Lid 1: Find the Area

___ rows × ___ columns = ___ square units

Lid 2: Find the Area

___ rows × ___ columns = ___ square units

Lid 3: Find the Area

___ rows × ___ columns = ___ square units

Count the squares inside each lid and use the formula!

Perimeter

Area

Area vs Perimeter

What's the Difference?

Perimeter is the distance around the shape.

Area is the space inside.

Think of it like this:

Fence around a garden = Perimeter

Grass inside the garden = Area

Recap: What We Learned About Area

Space Inside a Shape

Area is the amount of space covered by a flat shape - like the grass inside a park!

Count Unit Squares

Count how many small squares fit inside a shape to find its area in square units.

L + W Use the Formula

Area = Length $\times$ Width helps us find area quickly without counting each square!

Fun Indian Examples of Area

Time to Be a Tile Master!

Try counting squares and finding area at home with
your own things! Look at floor tiles, tiffin boxes,
mats, and more. Practice makes perfect!
You are now a Tile Master!

Thank You!

Any Questions?

We hope you enjoyed becoming a Tile Master today!
Feel free to ask any questions about area and counting squares.
