

My Digital Portfolio Blueprint

T4 Capstone • Grade 3 Coding & Identity Lesson

Meet Aarav's Digital Portfolio! 🧑🌟

A digital portfolio is **YOUR very own special space** on the internet to show the world what you love, create, and learn! Just like Aarav from Mumbai, who built a robot car, painted a digital masterpiece of the Gateway of India, and uploaded his Tabla music practice, you can share your absolute best work with friends and family!

🌟 The Three Pillars of Your Digital Identity

To build a spectacular online portfolio, we need to balance it perfectly on three primary pillars:

Safe Digital Avatar

Your online self should feel just like a personalized **school scrapbook**—uniquely yours but completely safe!

Clean Categories

Organize your pages into custom tabs like *My Creativity*, *My Logic*, and *My Writings*—just like a neat Indian spice box!

Easy Navigation

Make finding things effortless, just like tracing lines on a clear map of the **Delhi Metro network**!

Organizing Your Portfolio: The School Bag Metaphor

Think of your portfolio structure exactly like a school bag with different pockets. Each pocket is designed to hold a distinct type of work cleanly:

-  **My Studies Pocket:** Perfect for showcasing your logical milestones, like solving a tricky 5-digit multiplication problem!
-  **My Hobbies Pocket:** An open canvas for your creative side, like sharing a beautiful drawing of the Himalayas!
-  **About Me Pocket:** A warm space to share your personality, like writing out your favorite school poem!

Interactive Activity: Draw Your Blueprint!

Let's draft a map of your homepage setup before building it. Follow these steps:

1. Draw a big rectangle inside the space below and label it **"Homepage"** at the top.
2. Draw three branches growing downwards out of it for **My Studies**, **My Hobbies**, and **About Me**.
3. Fill in little sketches inside each section (like mountains, a book, or music notes!).

Keeping Safe Online: The Baithak Rule

Never Share Private Information!

Your website's homepage acts exactly like a traditional **Baithak (drawing room)**. A drawing room is safe, welcoming, and open to arriving guests—but you would never let total strangers slide straight into your private bedroom!

 **Rule: Never post your private home address, phone number, or school name on your public homepage. Show off your work, not your secret personal details!**

Quick Quiz Checkpoint!

1. What information should you NEVER publish on your public portfolio homepage?

- ☐ A) Your phone number
- ☐ B) Your favorite color
- ☐ C) A picture of a hobby you made

2. Which of these options makes a safe and fantastic folder category for your portfolio?

- ☐ A) My Secrets
- ☐ B) My Hobbies
- ☐ C) A stranger's information

3. According to the lesson safety rules, your homepage is just like a...

- ☐ A) Kitchen sink
- ☐ B) School bag pocket
- ☐ C) Baithak (drawing room)

 **High Five! You completed the blueprint prep! Think carefully, design safely, and get ready to launch your own custom digital identity!**
