Numbers intro

Journey Below Zero

Introduction to Negative Numbers

Exploring numbers less than zero with Aarav, Meher, and friends! Join us on an exciting adventure to discover what happens when we go below zero on the number line.

Underground Treasure Parking

Aarav and Meher park their car in the mall basement floors: Basement 1 is -1, Basement 2 is -2! The deeper they go, the smaller the number becomes.

From Lift Floors to Number Lines

Floors below ground have a special sign:
the minus sign '-'. These are called
negative numbers.

Just like going down in a lift takes us
below ground level, negative numbers
show us values below zero!

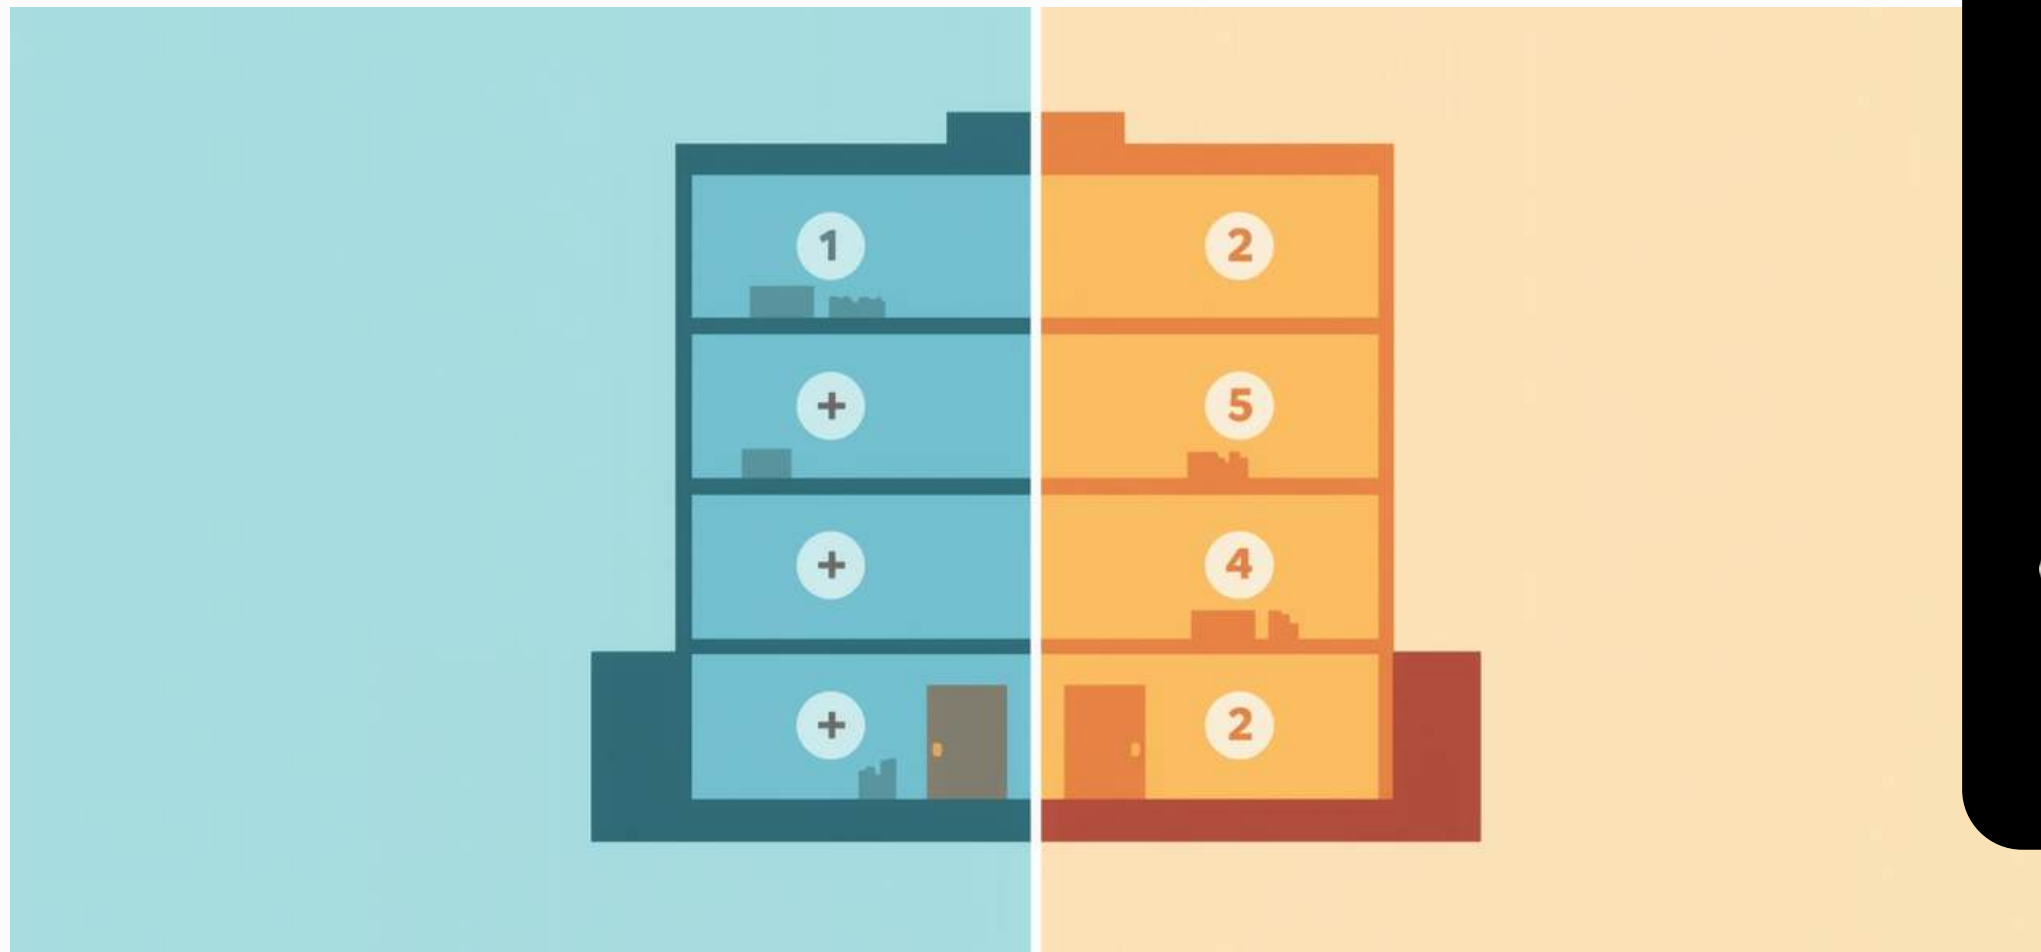

Exploring the Number Line

Numbers to the left of zero are negative numbers. They show "below zero" steps on our number journey!

Negative Numbers are Opposites

Below Ground

Basement floors go down: -1, -2. These are negative numbers showing down direction.

Above Ground

Floors above go up: +1, +2. These are positive numbers showing up direction.

Opposites Tell Direction

Negative numbers are opposites of positive numbers. They tell us direction!

Kirana Shop Sour Challenge

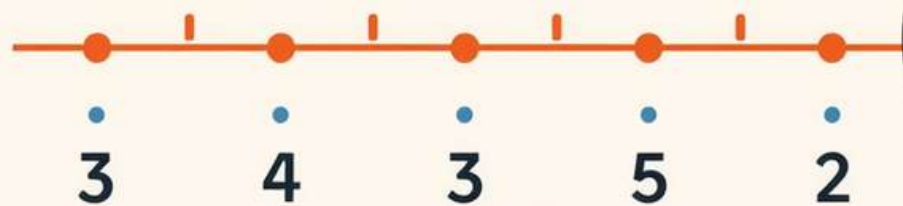

Kabir owes ₹3 to the shop. In numbers, that is negative three: -3. Let's see how the khata book keeps track of what we owe!

Adding Coins to the Sour

Watch as we drag ₹5 coins onto the Sour book.
Kabir's balance moves from -3, step by step,
all the way to +2 on the number line!

Let's help Kabir pay off his debt and reach
a positive balance! Each coin brings him
closer to zero and beyond.

Which is
Colder 🤔

Look at the thermometers and think: Which temperature feels colder - 2°C or -3°C ? Circle your answer!

Fill the Missing Number

Look at the number line below. Can you find the missing number? The pattern goes: -2, -1, __, 1, 2. What number comes after -1 and before 1?

Sort Above and Below Zero

Above Zero Box

Sort these numbers into the Above Zero box: 3, 4

Below Zero Box

Sort these numbers into the Below Zero box: -2, -1

Where Does 0 Go?

Zero is neither above nor below - it is the middle point!

1

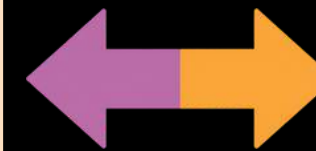

4

Recap of the Journey Below Zero

The Minus Sign

Numbers less than zero have a special '-' sign in front of them.

Opposite Direction

Negative numbers show below zero or the opposite direction from positive numbers.

Everyday Uses

We use negative numbers every day like basement floors, shop debt, and freezer temperature!

Freezer Quest Homework

Find something at home with a minus sign or below zero number. Look in the freezer or fridge!

Check the temperature display on your freezer. Can you spot numbers like -18°C ? Ask a grown-up to help you explore!

Thank You!
