

JAVASCRIPT – CODE YOUR OWN KBC QUIZ GAME!

THE BROKEN SCOREBOARD!

Aarav clicks the right answer...
but the scoreboard stays at 0!
The scoreboard needs a
JavaScript function to count
and update points.

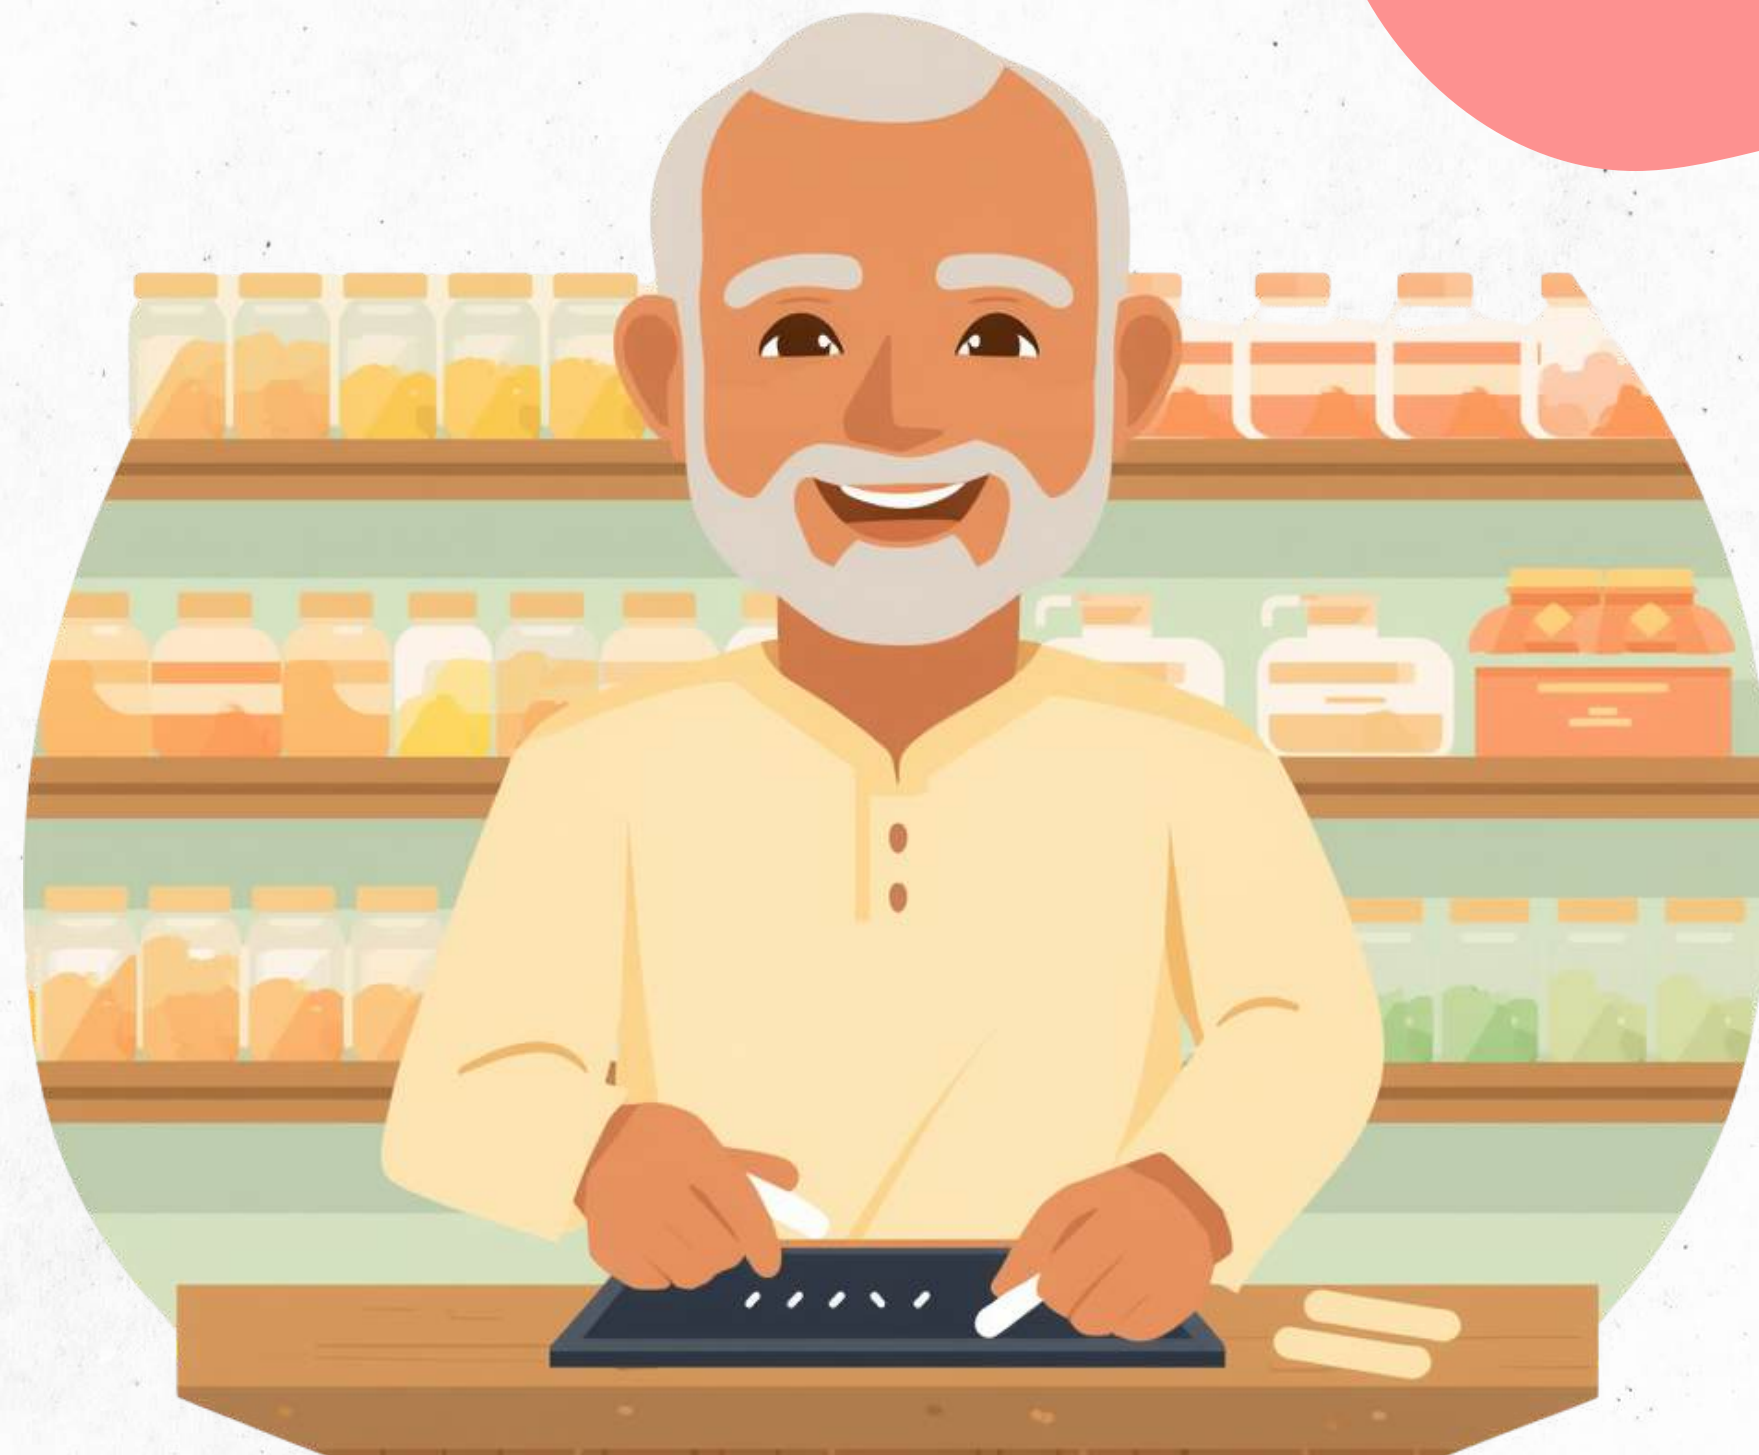

CONCEPT A – VARIABLES

A Kirana store uncle uses a chalk slate to track items sold.

```
let score = 0;
```

```
score = score + 1;
```

Variables are like a tally slate –
they update as the game goes on!

CONCEPT B – "SHALL WE LOCK IT??"

```
if (playerAnswer == "A") {  
    score = score + 1;  
}
```

Just like KBC, the game checks if your answer matches the correct one before awarding points!

CONCEPT C – THE RAILWAY BOARD (.INNERTEXT)

Just like a railway board instantly updates train info, `.innerText` changes your webpage text live!

```
document.getElementById("score-card").innerText = score;
```

The scoreboard updates the moment you answer!

HOW IT ALL FLOWS

1

Click a button →
score = score + 1
updates the
variable!

2

if/else checks if
your answer is
correct or
wrong.

3

innerText
updates the
scoreboard on
screen instantly!

CODE-ALONG PART 1: SCORE & CHECK!

```
let score = 0;
function checkAnswer(playerChoice) {
  if (playerChoice == "Tiger") {
    score = score + 1;
    document.getElementById("msg").innerText = "Correct! Clear answer!";
  } else {
    document.getElementById("msg").innerText = "Oops! Try again!";
  }
  document.getElementById("score-display").innerText = score;
}
```

GUIDED CODE-ALONG PART 2: WIRING BUTTONS

B: Tiger

A: Lion

Click the buttons to test and see your scoreboard update live!

BUG HUNTING – THE FROZEN COUNTER

✗ Bug Code (Frozen!):

```
score = 1;
```

Every click resets score to 1 – it never goes up!

✓ Correct Code (Increments!):

```
score = score + 1;
```

This adds 1 to whatever score already is. So 1 becomes 2, then 3... 🎉

PERSONALIZE YOUR WIN MESSAGES!

Shabaash!
Correct answer!

Dhamaka! +1
Point!

Well done!
Keep it up!

Superb! You
scored again!

Wah! Perfect
score!

Amazing! +1
point!

Brilliant!
Keep going!

RECAP – WHAT WE LEARNED!

1

Variables are tally counters – score keeps track of points!

2

if/else checks if your answer is correct!

3

.innerText updates the page & buttons run your functions!

FINAL QUIZ QUESTION EXAMPLE

Q: What is the
National Animal
of India?

Option B: Tiger

Option A: Lion

☒ Tiger is
Correct!
