

Shapes & Symmetry

Let's Explore! Activity Workbook

Name: _____ Date: _____

My Shape & Symmetry Guide

Side: A straight or curved line that forms a shape.

Corner (Vertex): The pointy place where two sides meet!

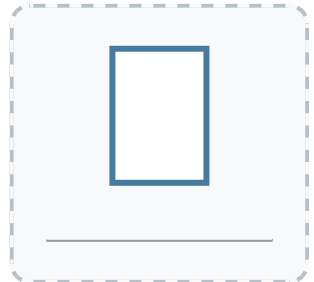

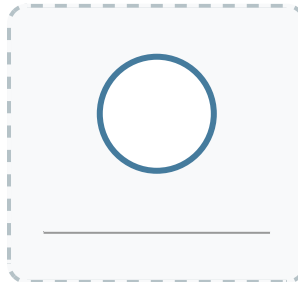

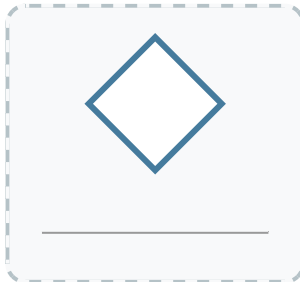

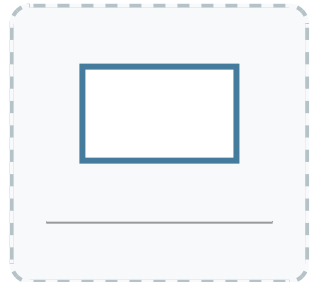

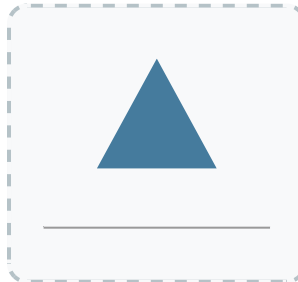

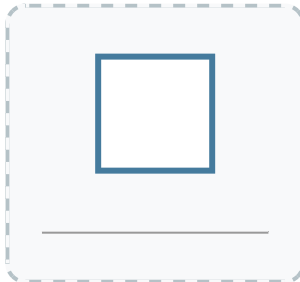

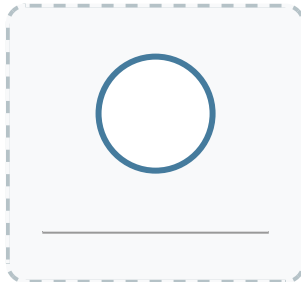

Symmetry: When you can fold a shape exactly in half so both sides match like a mirror image.

Line of Symmetry: The magic folding line that splits a shape into two perfect matching halves.

Worksheet 1: Name That Shape!

Instructions: Look at each shape box. Write the correct name of the shape on the line below it. Then, color it in using these magic rules:

- Circles = **Red**
- Squares = **Blue**
- Triangles = **Yellow**
- Rectangles = **Green**

Worksheet 2: Mirror Magic

Instructions: Use your ruler! Find the fold line and draw the missing half of each symmetrical picture so both sides match exactly.

1. Butterfly 🦋

2. Heart ❤️

3. House 🏠

4. Leaf 🍃

5. Face 😊

6. Star ★

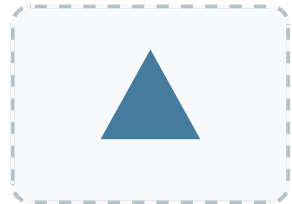

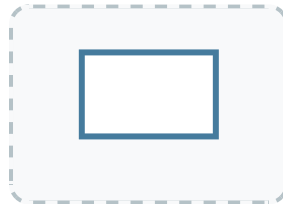

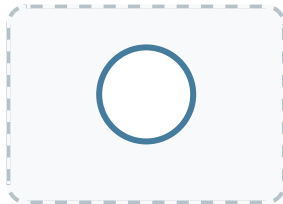

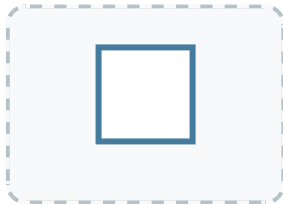

Worksheet 3: Unit Review (Part 1)

A) Name and count the attributes of each shape!

Shape	What is its name?	How many sides?	How many corners?
	_____	_____	_____
	_____	_____	_____
	_____	_____	_____
	_____	_____	_____
	_____	_____	_____

B) Draw the Line of Symmetry!

Use your pencil and ruler to draw exactly **one line of symmetry** on each of these 4 shapes:

Worksheet 3: Unit Review (Part 2)

C) Symmetrical Picture Search

Look at the items below. Put a big circle around the **8 pictures** that are perfectly symmetrical!

1. Butterfly 🦋

2. Sea Star ★

3. Left Boot 🦶

4. Apple 🍏

5. Coffee Mug ☕

6. Snowflake ❄️

7. Half-Eaten Cookie 🍪

8. Arrow ➡️

9. Tree Leaf 🌿

🎉 Fun Shape Explorer Challenge!

Can you look around your current room right now and find **two objects** that are shaped like a rectangle? Write them down below!

1. _____

2.
