Diyas

Pencils

Learning Objectives

KNOW Estimation

Estimation means using visual clues to make a reasonable guess — not a random one.

MAKE Smart Guesses

Apply known reference quantities — hands of 5, groups of 10 — to estimate unfamiliar quantities.

FEEL Proud!

Build confidence in mathematical thinking by celebrating close estimates, not just exact answers.

Clue → USE CLUES | 🖐️ Use 10 fingers as your anchor!

The Mystery Dabba

**How many LADDOOS
are inside?**

👉 Show your guess on your fingers! Teacher will record 5–6 guesses. The answer is revealed LATER! 🤔

What is Estimation?

Estimation = A SMART, REASONED GUESS using visual clues — NOT random!

1

USE CLUES

Look carefully at what you can see — size, groups, arrangement.

2

GET CLOSE

Compare to something you already know — like 5 fingers or a row of 10.

3

SMART GUESS

Say your estimate out loud WITH a reason. A reason makes it smart!

 *Think-Pair-Share: Tell your partner one clue you could use to estimate!*

Meet Arjun at the Mandi

😊 Arjun & his Amma are going to the Vegetable market to buy moong dal.

🛒 The dal shop has SO MANY bags!

🤔 Arjun needs to ESTIMATE how many — he can't count them all!

👉 When do YOU estimate in real life?

Real-Life Estimation

🥬 Vegetables in a bag

🍪 Biscuits in a packet

🪔 Diyas on a shelf

🌸 Flowers in a garland

🫘 Chana in a bowl

3 Steps to a Smart Estimate

LOOK

Observe the group carefully.
Note its size and how it is arranged.

THINK

Compare to something you know.
5 fingers = one hand
10 = two rows

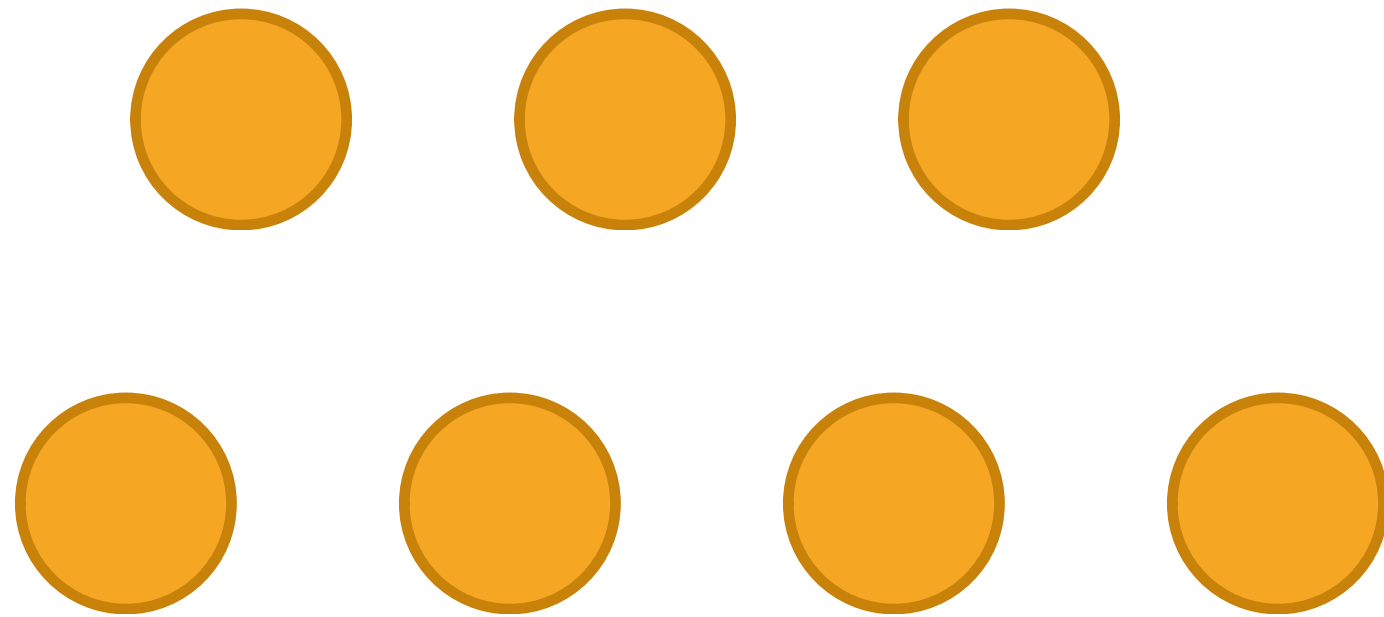

GUESS

Say your estimate **ALOUD** with a reason.
'I think about 12 because...'

🎵 Chant Together: LOOK... THINK... GUESS! (add hand actions!)

Round 1: Chana (Chickpeas)

$$\text{chickpea icon} \times 7$$

 **Hint**

 **5 = one hand!**

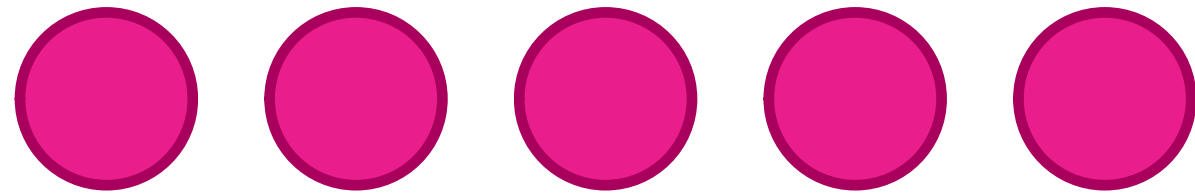

Write or show your guess on your whiteboard or fingers.

Is it more or less than one hand?

Answer: 7 ★ Within 2? WAH! ★

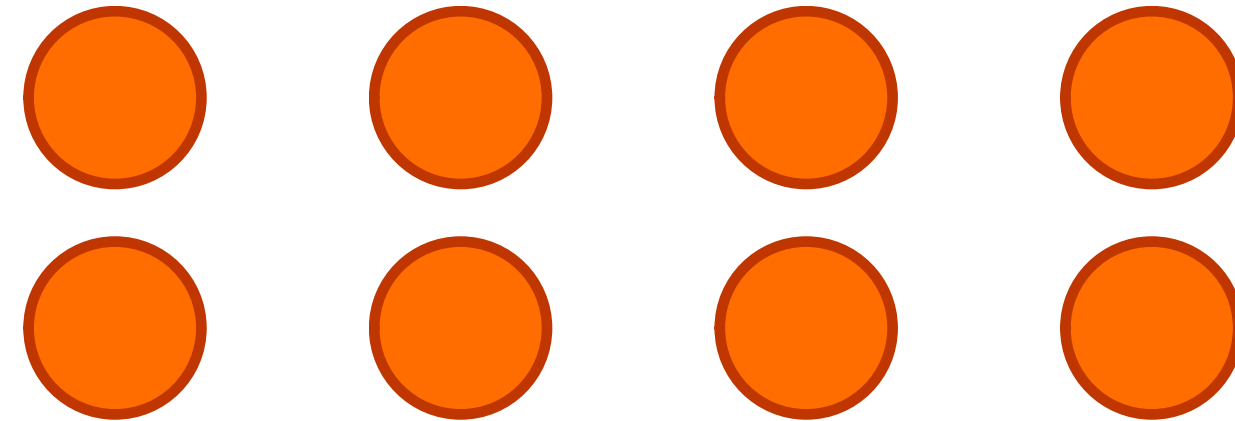

♥ Round 2: Bindis

Group 1: 5 Bindis

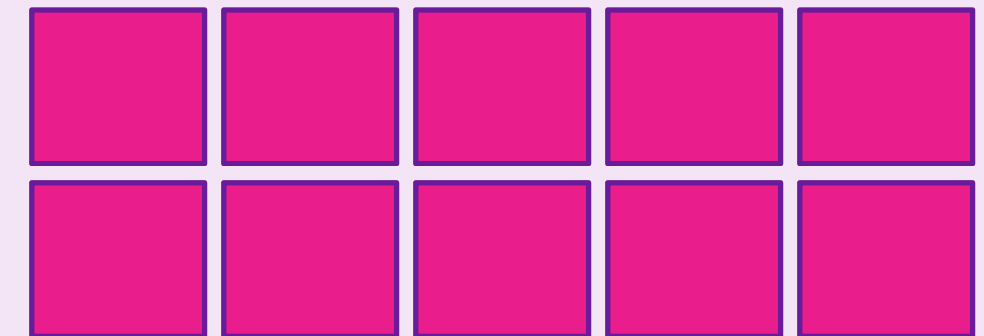

= 5

Group 2: 8 Bindis

= 8

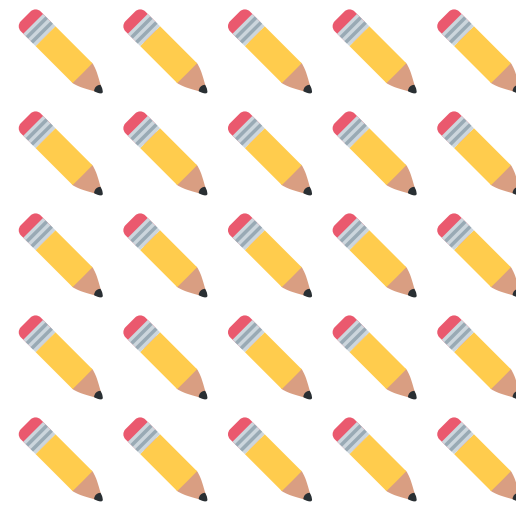

💡 10-Frame Hint: 10 = two rows of 5 boxes

Answer: $5 + 8 = 13$ ★ Within 5? EXPERT level! SHABASH! ★

Round 3: Pencils — CHALLENGE!

 **FLASH!**

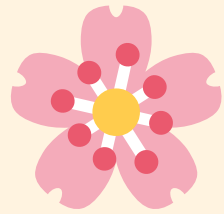

**NO
HINTS!**

 Teacher flashes the image for 2–3 seconds, then hides it.
Make your quick estimate — no counting allowed!

Answer: 25 pencils ★ Within 5? Earn a SHABASH! Badge! ★

Estimation Station — Independent Practice

Divide into 3 groups. Each group visits one station (~3 min), then rotates.

Flower Stall

Marigold garland

Answer: ~12 flowers

 *Record in your journal first!*

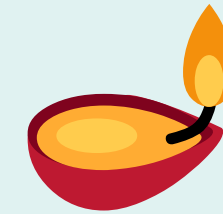

Biscuit Box

Biscuit packet

Answer: ~18 biscuits

 *Record in your journal first!*

Diya Shelf

Diyas arranged on shelf

Answer: ~25 diyas

 *Record in your journal first!*

Close Enough is GREAT!

EXPERT ESTIMATOR!

If your guess is within 5 of
the real number, you are an
EXPERT estimator!

WAH! 🎉 SHABASH! ✨

Exit Ticket

Riya sees marbles in two groups of 10.
She estimates there are about 20.

Is Riya:

A ☒ Estimating (using clues!)

B ☐ Just Guessing randomly

Answer: A — She used a clue!
👉 1 finger = A, 2 fingers = B

🌟 Estimation in Real Life & Recap

Vegetable market

Kitchen Dal

Diwali Diyas

Wedding Puris

Pookalam Flowers

💬 *Has your Amma or Grand mother ever estimated at home?*

🎵 **Recap Chant — say it TOGETHER!**

LOOK... 👁️ → **THINK...** 🧠 → **GUESS!** 🖐️

Repeat 2–3 times, increasing speed for extra energy!

🏠 **Homework: Find ONE thing at home to estimate tonight! Share back tomorrow. Shabash!** 🌟

Key Vocabulary

Estimation

A smart, reasoned guess about quantity using visual clues — not an exact count.

Clue

A piece of information (size, grouping, reference number) used to guide a guess.

Reference Number

A known quantity used as a benchmark — e.g., 5 (one hand) or 10 (two hands).

10-Frame

A visual tool showing two rows of 5 boxes, helping children anchor the idea of 10.

Range

A span of numbers an estimate might fall within — e.g., 'between 10 and 15'.

Shabash / Wah!

Hindi words of praise meaning 'Well done!' / 'Wow!' — to celebrate good thinking.

Assessment & Celebration

Observation (Rounds 1–3)

📌 Student verbalises a reason for their guess; references a known quantity.

✅ Uses clue-based language: 'I think about 10...'

Station Journals

📌 Written estimate is within ± 5 of the actual count for at least 2 of 3 stations.

✅ 2/3 stations within ± 5 = Estimation Expert! 🌟

Exit Ticket

📌 Student correctly identifies Riya as 'estimating' and explains she used clues.

✅ Correct answer + 1 sentence reason.

🎉 Wow — you did GREAT today! Keep estimating! You are Estimation Experts! WAH! 🌟

THANK YOU!

You are all amazing estimators! Keep guessing and growing!
