

THE GAME MAKER'S SECRET

RULES, TOOLS, AND FUN!

Session 1 | Planrs Academy Creative Lab

THE MYSTERY BOX HOOK

Go, let's invent a game! Can we make a game using these random items? What's your big idea?

Look around your home—any object can be a piece of your new world!

WHAT MAKES A GAME?

Think about **Lagori** and **Gully Cricket**. They all have these three magical parts:

Goal (Lakshya): What do you want to win or do?

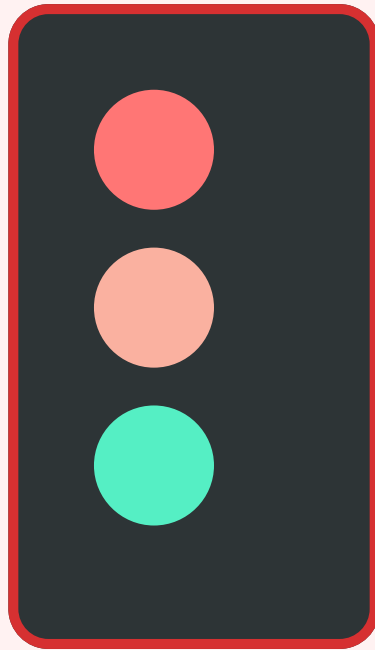

Rules (Niyam): How do we play fair and have fun?

Components: The pieces or things we use!

WHY RULES MATTER

Rules are like traffic lights—without them, it's just **Hungama (Chaos)**! If someone breaks a rule, the game is not fun. Fair play is everything!

The Twist Challenge: Play Tag, but you can only **hop like a frog**! If you stop hopping, you're out.

YOUR TURN TO INVENT!

1

PICK YOUR PIECES

What will you use? Socks, bottle caps, chalk, notebooks, or spoons? Every item is a tool for fun!

2

GIVE IT A FUN NAME

What will you call your creation? Think of something exciting that makes people want to play!

THE DESIGN LAB

3

MAKE 2 EASY RULES

Keep it simple! Rules tell players what they CAN and CANNOT do. For example:
"If you drop the cup, you lose a turn!"

4

TEST IT OUT!

Time to play scientist! Test your new game. Are you having fun? Is it too easy or too hard?

YOU ARE THE BOSS OF FUN!

Thanks for creating with us today.

READY FOR SESSION 2?

Come, let's keep inventing!

Remember: Fair Play is Fun!
