

LED Greeting Card - My Glowing Diwali Card

Let's Light Up Diwali!

Diwali is the Festival of Lights!

Just like tiny Diyas glow, we will make a card that
glows too! Electricity = Bijli that lights up our card!

Battery = Fatty

The Power House that gives energy to our card!

LED = Leggy

Our Little Diya that glows bright with electricity!

Copper Tape = Shiny Path

“Electric wire” that carries power like magic roads!

Meet Our Circuit Friends

These friends work together to make the light glow!

Just like you need friends to play, our LED needs these three special friends to glow bright on your Diwali card!

Battery - The Power House

Meet Fatty - Our Power Friend!

Fun Fact!

Battery is like the inverter at home during power cuts. It gives power to our card!

Remember!

Battery has a positive side (long leg) and negative side (short leg).

LED - Our Little Diya

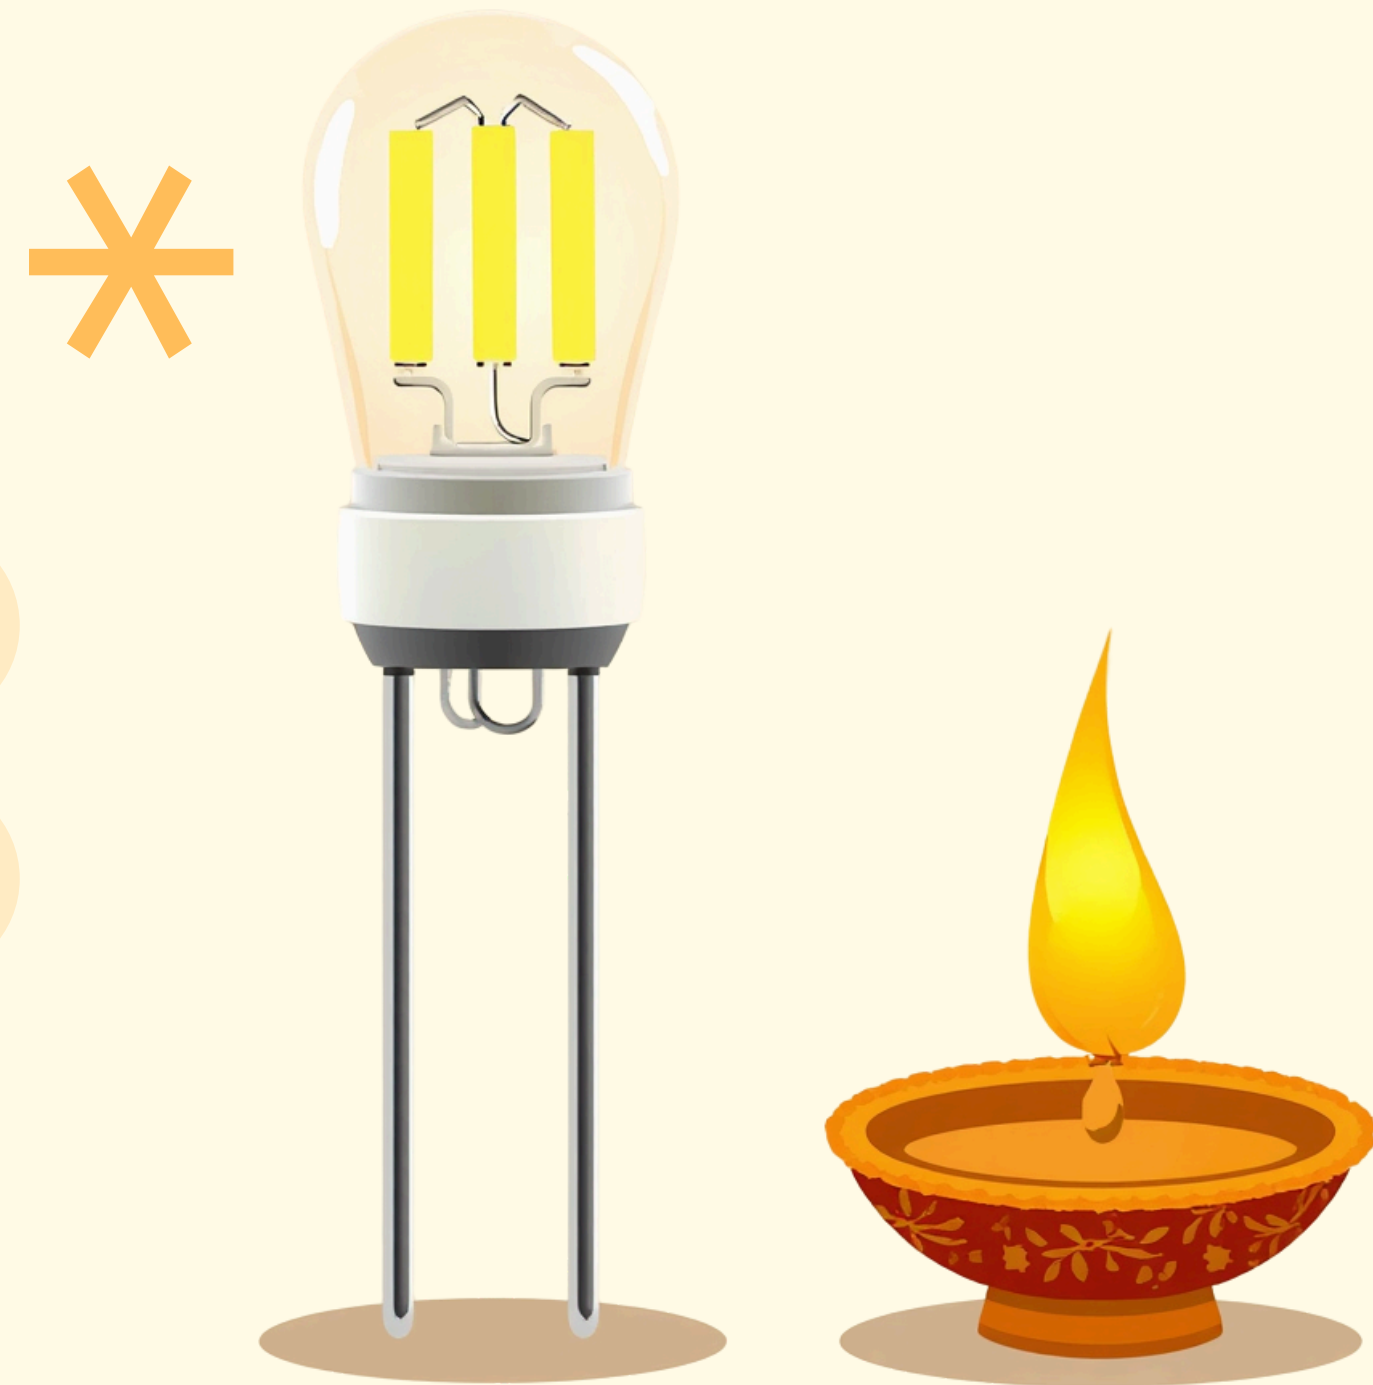

LED is a tiny bulb that glows like a Diya but uses electricity instead of oil!

Remember!

Long leg is the
positive side (+)

Remember!

Short leg is the
negative side (-)

Copper Tape - Bijli ki Taar

The Shiny Path for Electricity!

Copper tape is like the electric wires ("Electric wire") on the streets that carry electricity to our homes. It makes a shiny path for bijli to travel! Remember: If the tape breaks, the light won't glow! Keep your Shiny Path perfect!

Step 01

Stick the copper tape paths on the card carefully

Step 02

Place the battery on the tape – Fatty's home!

Step 03

Attach LED legs on tape and make a fold-switch!

Guided Build - Step by Step

Follow These Easy Steps to Make Your Card Glow!

When you fold your card, watch Leggy glow bright! You made your own circuit! Remember to keep your Shiny Path perfect!

Rangoli Art

Draw Rangoli patterns before placing your copper tape

Diya Decor

Add colorful Diya stickers or drawings around LED

Greetings

Write festive greetings for Diwali, Eid, or Birthdays

Decorate Your Card with Indian Motifs

Make Your Glowing Card Beautiful and Festive!

Add colorful Indian designs around your LED to make your card extra special. Use bright colors and traditional patterns to celebrate!

Step 1

Fold your card and watch Leggy light up!

Step 2

If tape breaks, light won't glow — keep Shiny Path perfect!

Step 3

You are now a circuit maker! Keep glowing!

Mega Glow Moment & Celebrate!

You Made Your Own Circuit!

When you fold your card, watch Leggy glow bright! Great job, little tinkerers! Keep experimenting and creating!

Thank You & Keep Glowing!
