

NODE.JS — BUILDING YOUR FIRST CLI TOOL

YOUR COMMAND CENTER FOR SCHOOL TASKS

WHAT IS A COMMAND LINE INTERFACE (CLI)?

- Fast!
- Type Commands
- No Clicking
- Magic Spells
- Control
- Powerful
- Secret Codes

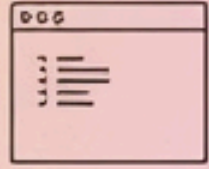

CLI VS GUI — THE REMOTE CONTROL VS BUTTONS

MEET NPM — YOUR MAGIC PACKAGE STORE!

- chalk
- express
- lodash
- inquirer
- axios
- ora
- figlet

GETTING STARTED WITH NPM INIT

Open your terminal or Command Prompt on your computer.

Navigate to your project folder using the `cd` command.

Type the magic spell: `npm init -y`

This creates a `package.json` file — your project's ID card!

PROCESS.ARGV — YOUR POSTMAN FOR MESSAGES!

- node
- assistant.js
- Keyboard
- Node.js
- Brain
- Input
- args

CREATING YOUR FIRST SCRIPT — SAY HELLO!

Your script reads the name and says Hello!

```
const name = process.argv[2];  
console.log(Hello, ${name}! Welcome to your  
Command Center.);
```

Run it: `node assistant.js Priya`

RUNNING YOUR SCRIPT WITH ARGUMENTS

Type this command in your terminal:

```
node assistant.js Arjun
```

Output:

Hello, Arjun! Welcome to your Command Center.

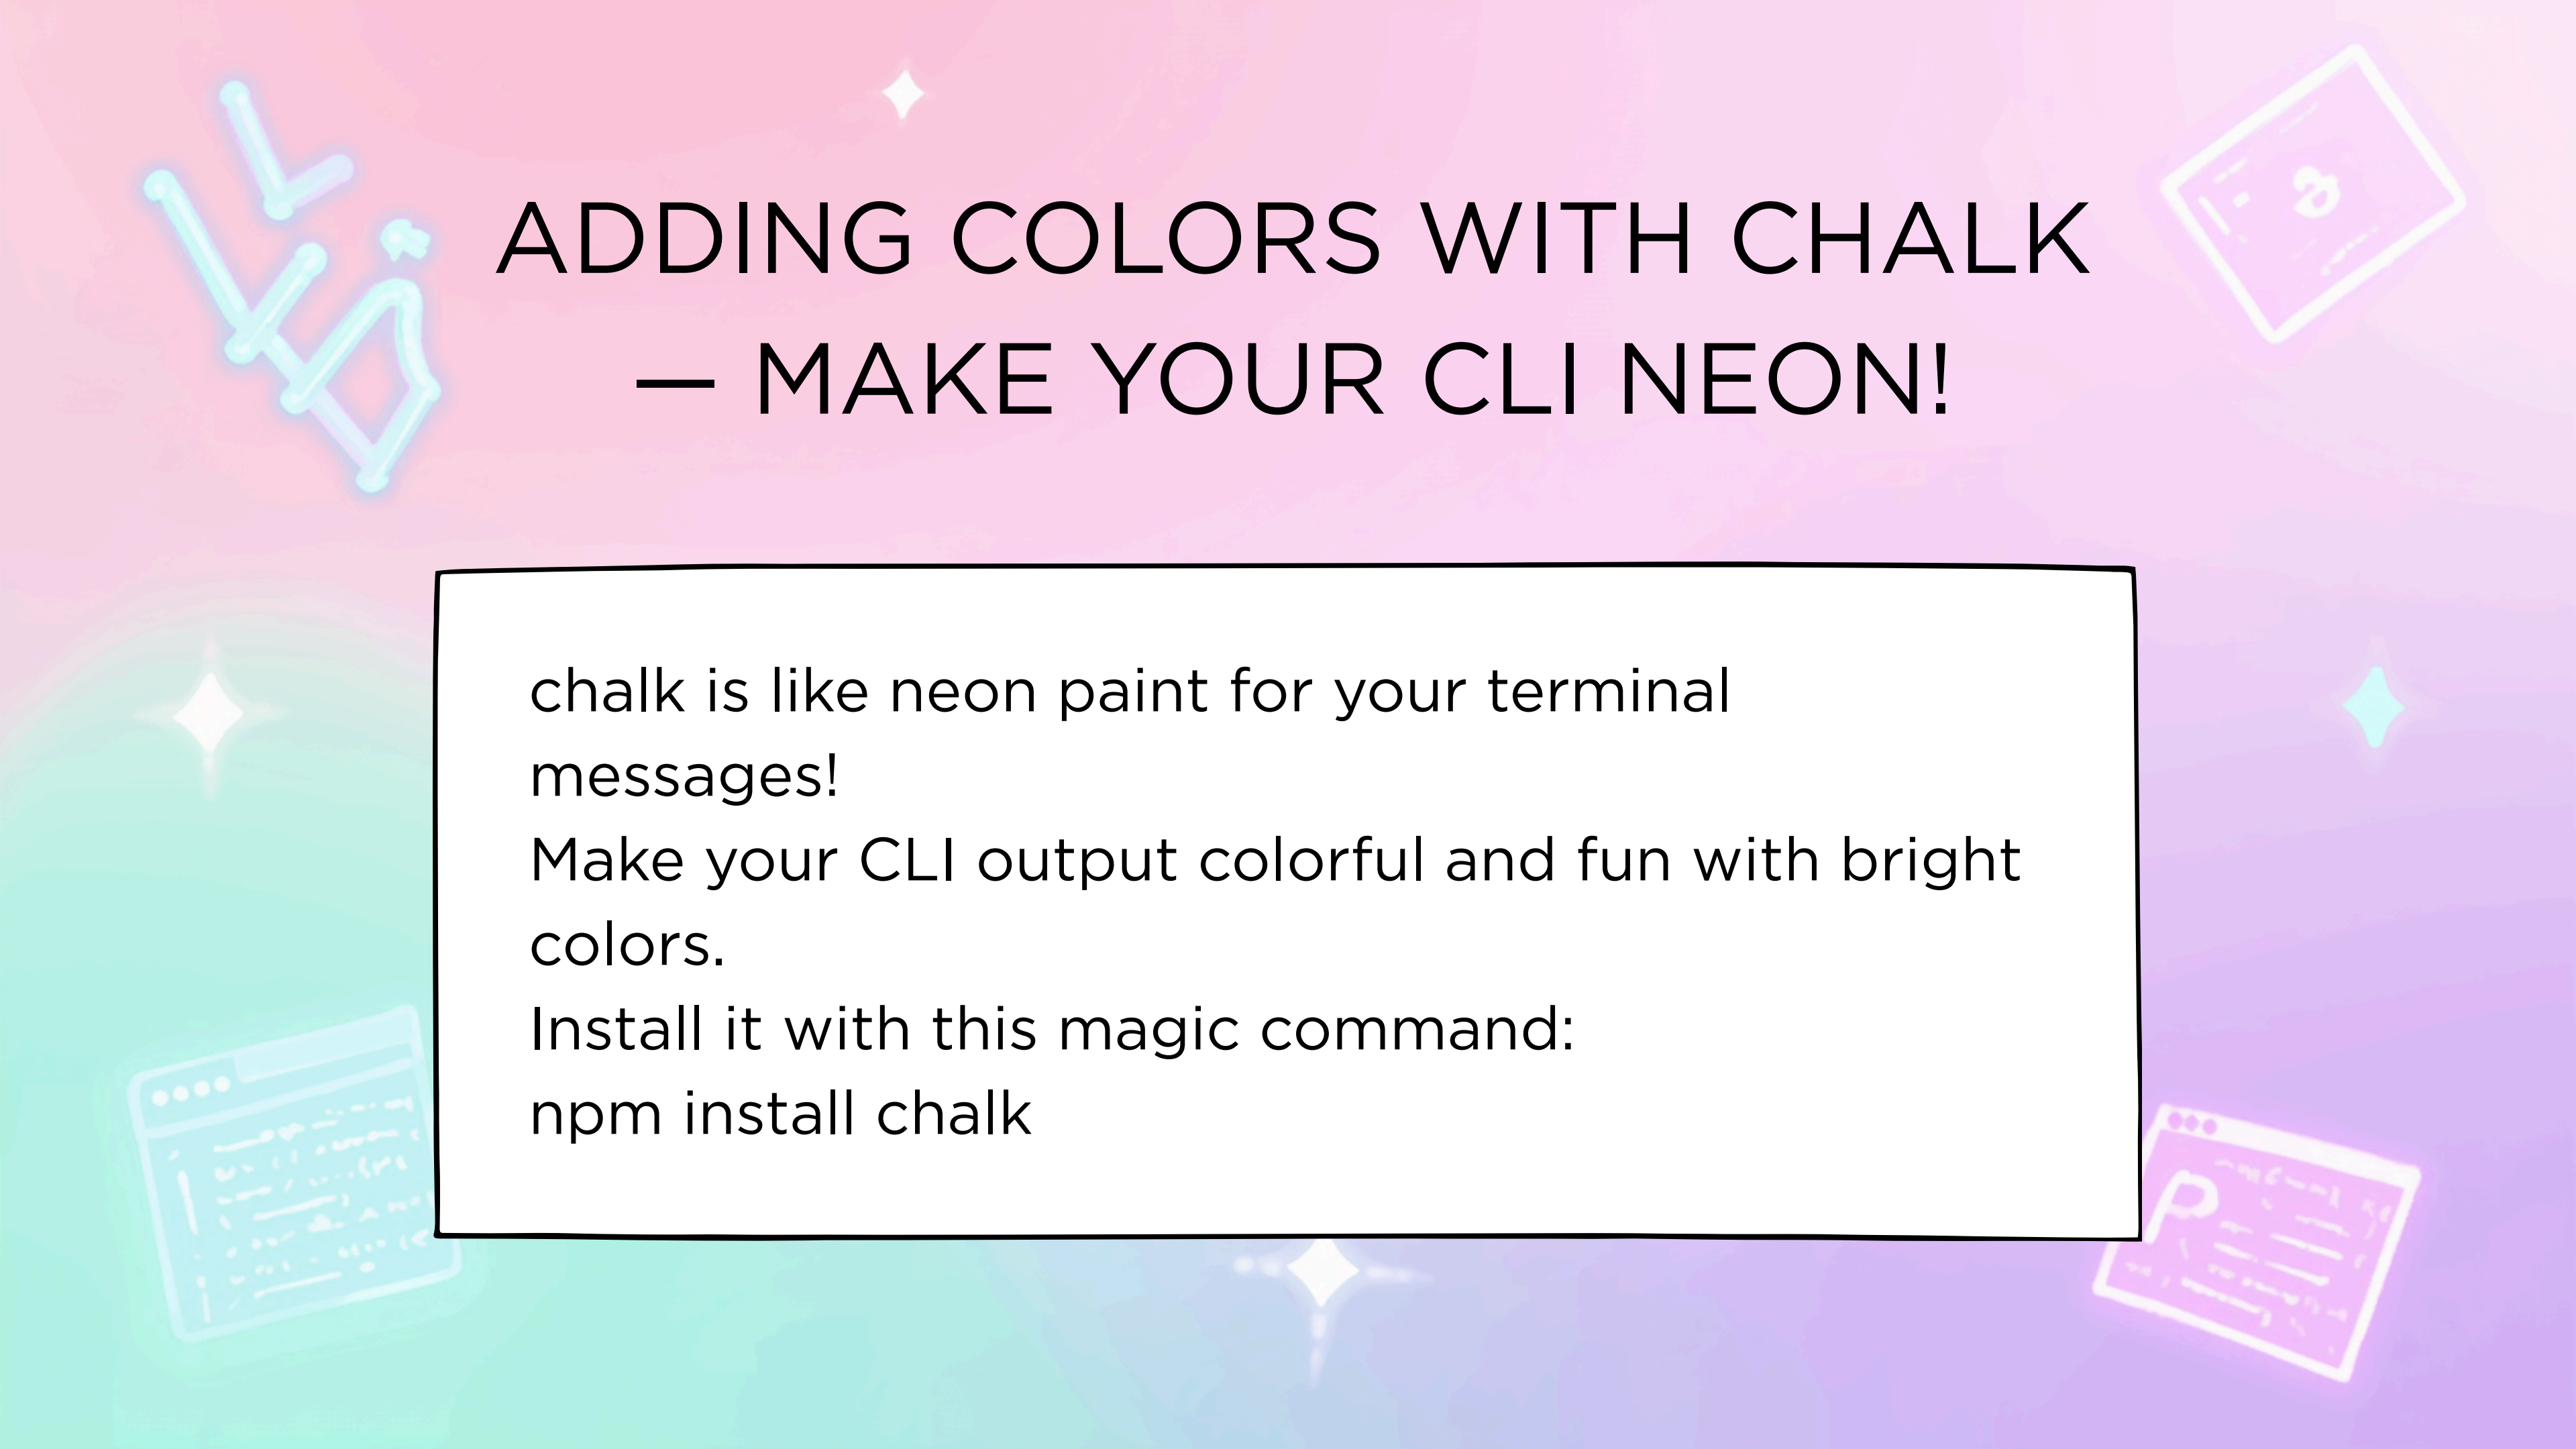

You told the computer your name using a command!

BUILDING THE HOMEWORK HELPER CLI

An illustration of a person with dark hair and rosy cheeks sitting at a desk, working on a laptop. The laptop screen displays lines of code. On the desk, there is a cup of pens, a yellow notebook, a pink sticky note, and a small potted plant. The background is a light pink color with various colorful geometric shapes like circles, triangles, and a leaf.

Now let's add your school task to a list!
`process.argv` captures what you type after the
command.
`console.log` prints your message to the screen.

ADDING COLORS WITH CHALK

— MAKE YOUR CLI NEON!

chalk is like neon paint for your terminal messages!

Make your CLI output colorful and fun with bright colors.

Install it with this magic command:

```
npm install chalk
```

USING CHALK IN YOUR HOMEWORK HELPER

Make your CLI messages colorful with chalk!
Use `require('chalk')` to import the package.
Wrap your text in `chalk.green()` for bright green
output.

MORE FUN CLI IDEAS FROM INDIA!

Pincode Finder — Look up any Indian city!

Cricket Score Notifier — Live match updates!

Vedic Maths Quiz — Practice ancient math tricks!

Sanskrit Word Helper — Learn cool Sanskrit words!

Festival Countdown — Days until Diwali or Holi!

Tiffin Menu Planner — Plan your lunch box!

WHY DEVELOPERS LOVE CLI

CLI is super fast and lets you run magic spells to do many tasks quickly! Typing commands is like having a superpower!

THANK YOU! QUESTIONS?
