

Prompt Engineering

The Art of Giving Perfect Instructions

| The AI "Mind-Reader" Myth

AI isn't a mind-reader — it's a master assistant that needs clear orders from YOU!

- AI follows the instructions you give
- Clear, detailed prompts = better AI help
- Think of AI as your helpful actor — you're the director!

| What is Prompt Engineering?

Prompt Engineering is the process of refining instructions to get better AI results.

Vague Prompt

"Write something"

Improved Prompt

"Write a story about Diwali celebrations in your city for a school magazine"

| The 3-Pillar Framework

Context + Task + Format = Perfect Prompt!

Context

Who you are or where you are

Example: "I am a Grade 6
student in Chennai"

Task

What you want AI to do

Example: "Write a poem
about the Monsoon"

Format

How you want the output

Example: "In bullet points
with simple words"

| Recipe Instruction Analogy

Just like cooking, details change the result!

Vague Prompt

"Make tea"

Result: Plain, boring tea.
Not what you wanted!

Engineered Prompt

"Make Masala tea with extra
ginger, less sugar, served in
a Clay cup "

Result: Perfect tea, exactly
how you like it!

| Persona Power — Changing the AI's Voice

Pretend the AI is someone else to change the tone and style of the output!

- "Act like a Cricket Commentator and describe my morning school assembly"
- "Act like a Grandparent and tell me a story about old Bangalore"
- "Act like a Science Teacher and explain photosynthesis to a 5-year-old"

Context vs. Task — Making Prompts Stronger

Weak Prompt

"Write a poem"

Strong Prompt

"I am a 6th-grade student at Planrs Academy, and I need a poem about the Monsoon for my school magazine"

Adding Context + a clear Task makes your prompt 10x better!

| Indian Context Examples — Culture Day

Project: Use AI to plan a Culture Day stall for Indian states!

- Include the state name (Context)
Kerala, Punjab, West Bengal
- Describe the task clearly
"Plan stall activities for Kerala"
- Specify the format
"Give me a numbered list of 5 activities"

Prompt Makeover Activity

Transform this into a PRO prompt!

Original: "Tell me about tigers"

Use the Prompt Builder:

- ✓ Context: Who are you? Where is this for?
- ✓ Task: What exactly do you want?
- ✓ Format: How should it look?
- ✓ Persona: Who should AI pretend to be?

Your Pro Prompt:

"As a wildlife scientist, write a detailed paragraph about the habitat and diet of tigers in India for my Grade 6 science project"

Iterative Prompt Improvement

Keep improving your prompt — each version gets better!

Version 1

"Tell me about tigers"

Basic, vague — AI guesses what you want

Version 2

"Write a paragraph about
tigers' habitat for my
school science project"

Better! Has task + context

Version 3

"As a wildlife scientist,
write a detailed paragraph
about the habitat and diet
of tigers in India"

Pro level! Persona + Context
+ Task + Format

| The Prompt Builder Template

Fill in the blanks to build your perfect prompt!

Persona

Who should AI pretend to be?

Context

Who are you? What's the situation?

Task

What do you want AI to do?

Format

How should the output look?

| The Golden Rule of Prompting

- ✓ Be specific
- ✓ Be clear
- ✓ Provide context
- ✓ Use Persona to set tone
- ✓ Practice iterative refinement

Remember: Better input = Better output!

| Recap — What You Learned Today

- ★ Define prompt engineering
- ★ Apply Context, Task, Format
- ★ Use Persona to change tone
- ★ Improve prompts by testing and refining

You are now a Prompt Engineering Pro!

Thank You!
