

THE GREAT FRACTION FEAST: MAKING PIECES MATCH

**ADDING AND SUBTRACTING FRACTIONS WITH UNLIKE
DENOMINATORS**

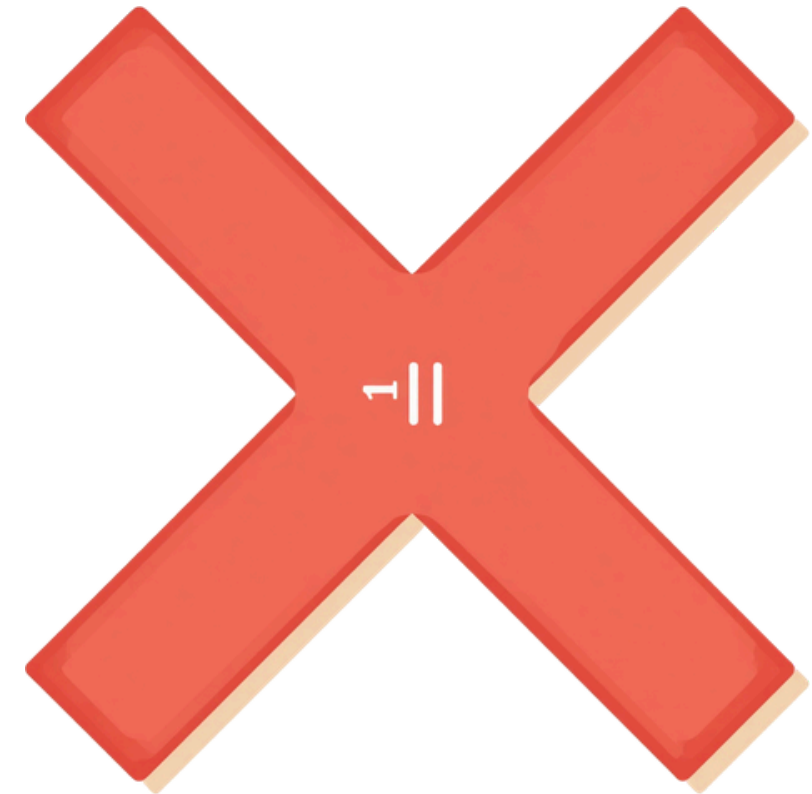

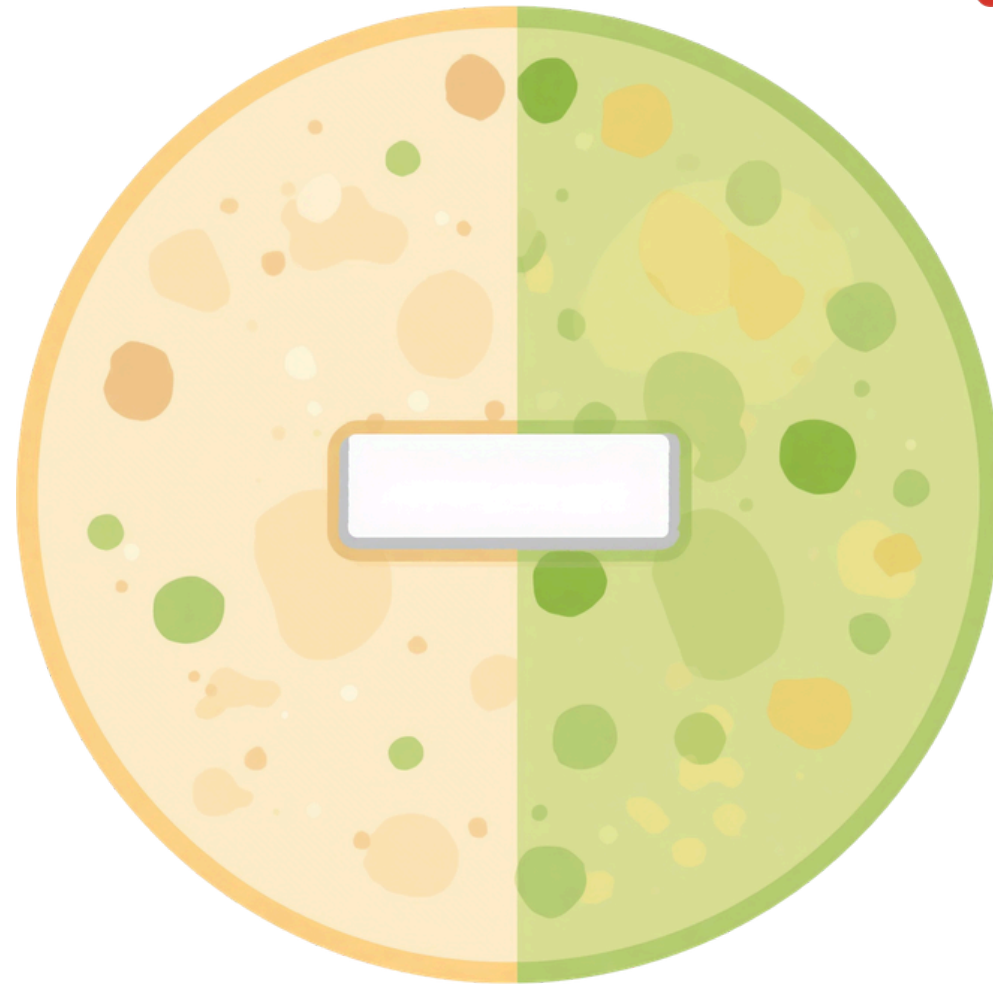

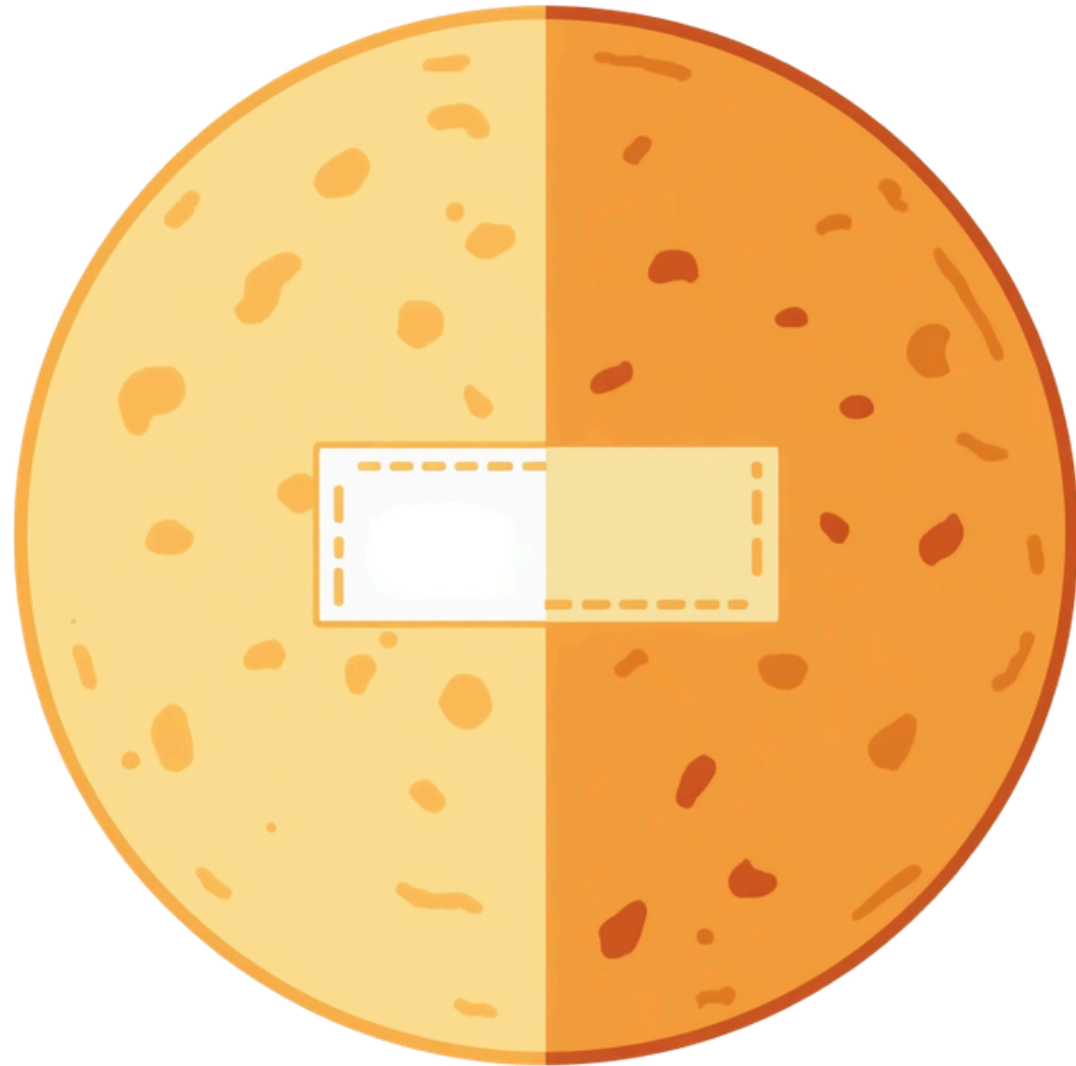

How much Barfi do they have together?

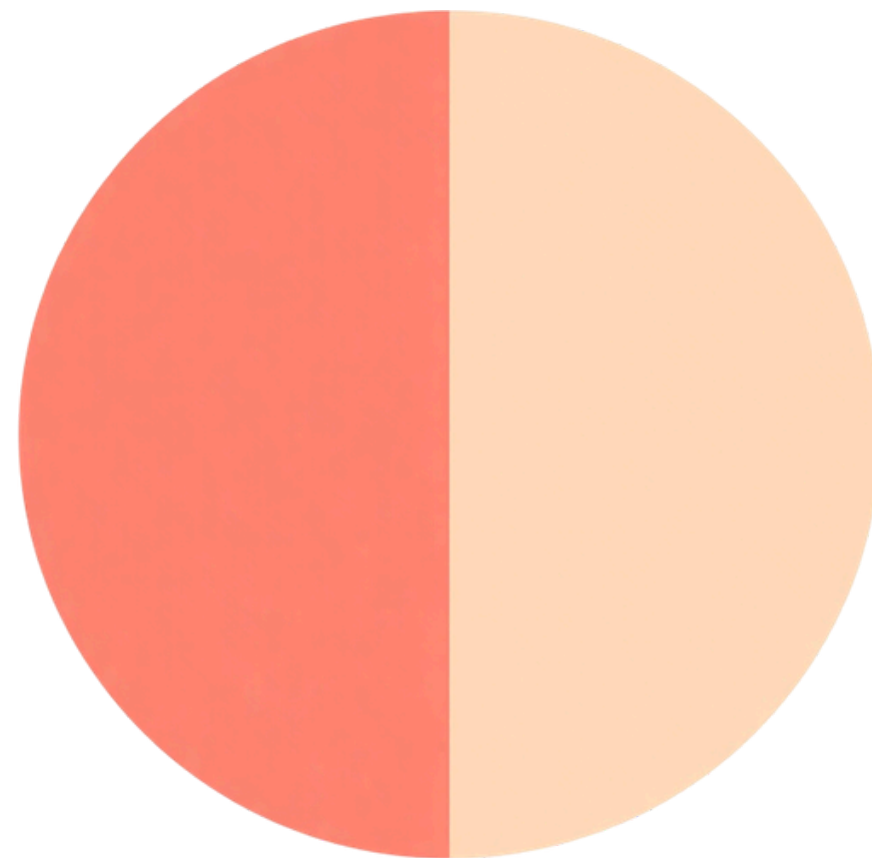

THE NON-MATCHING SLICE PROBLEM

Different denominators mean different slice sizes!

WHY CAN'T WE ADD TOP AND BOTTOM NUMBERS?

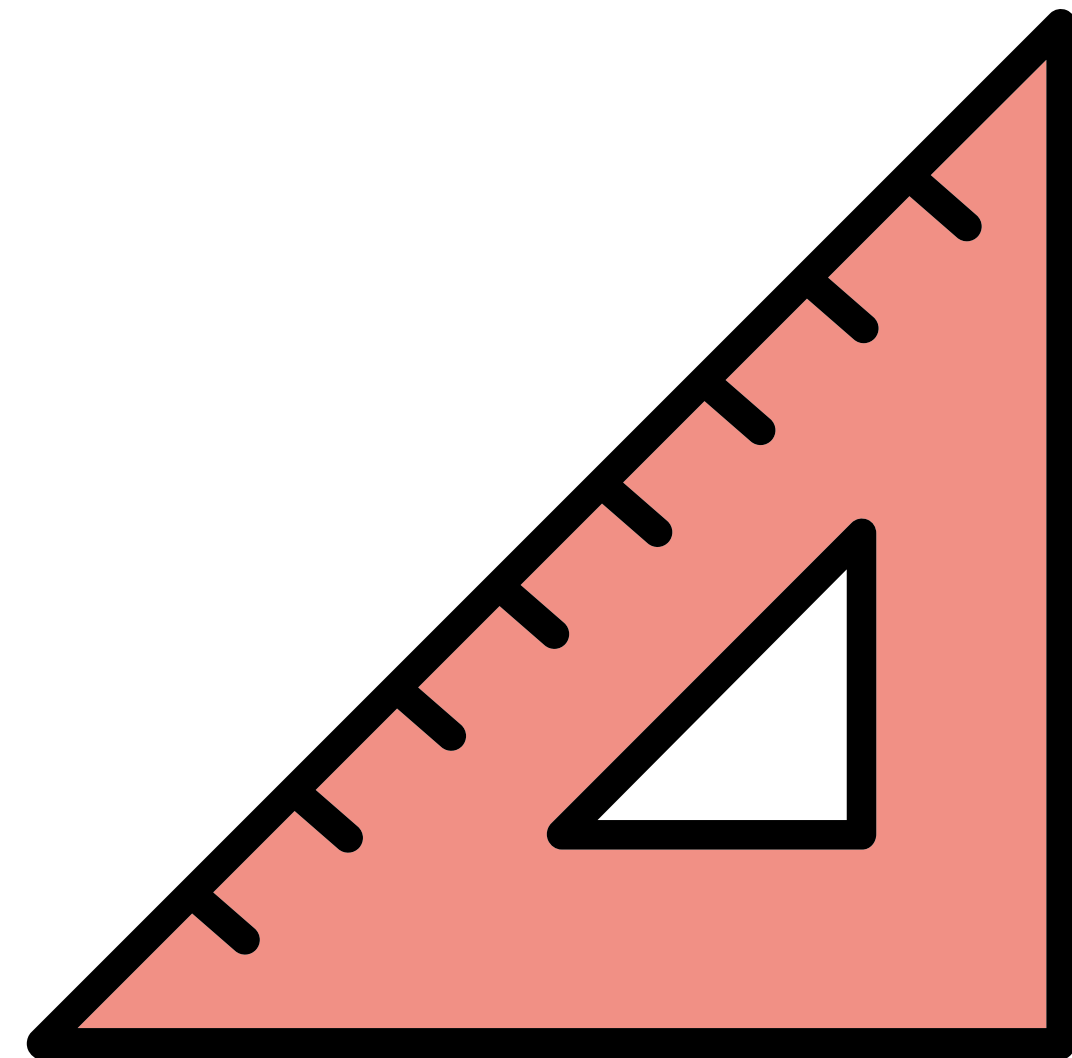

Bottom Number = size of each slice
Only add 'Top Numbers' when denominators match!

$\frac{1}{2}$
2 equal slices

3 equal slices

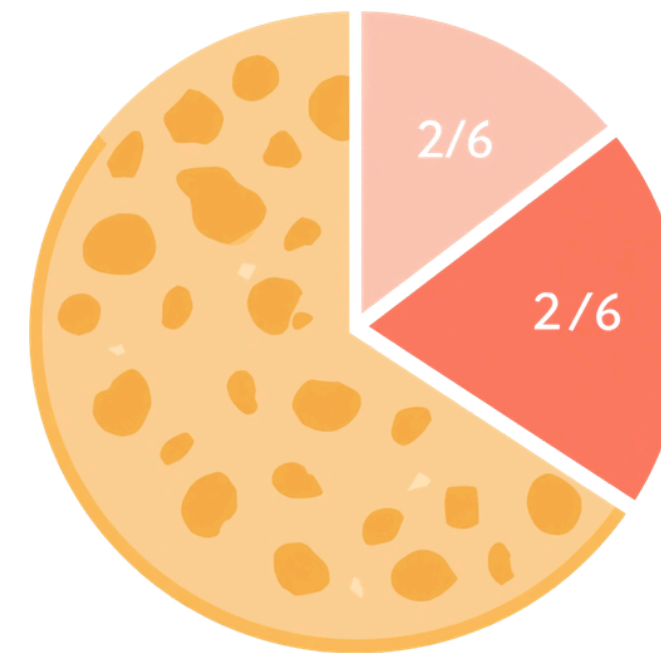

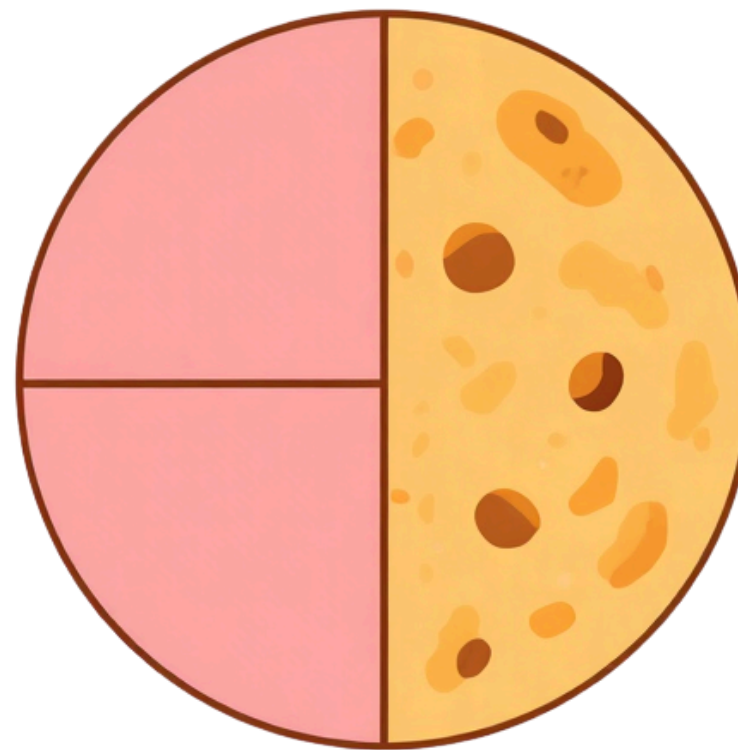

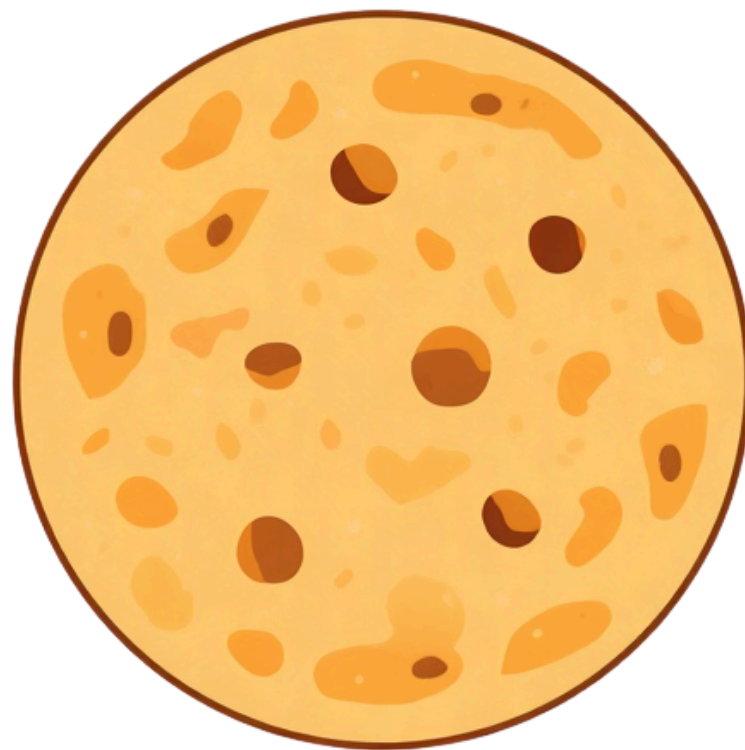

FINDING COMMON GROUND – MEET THE TWIN FRACTIONS!

Cut the paratha into 6 slices!

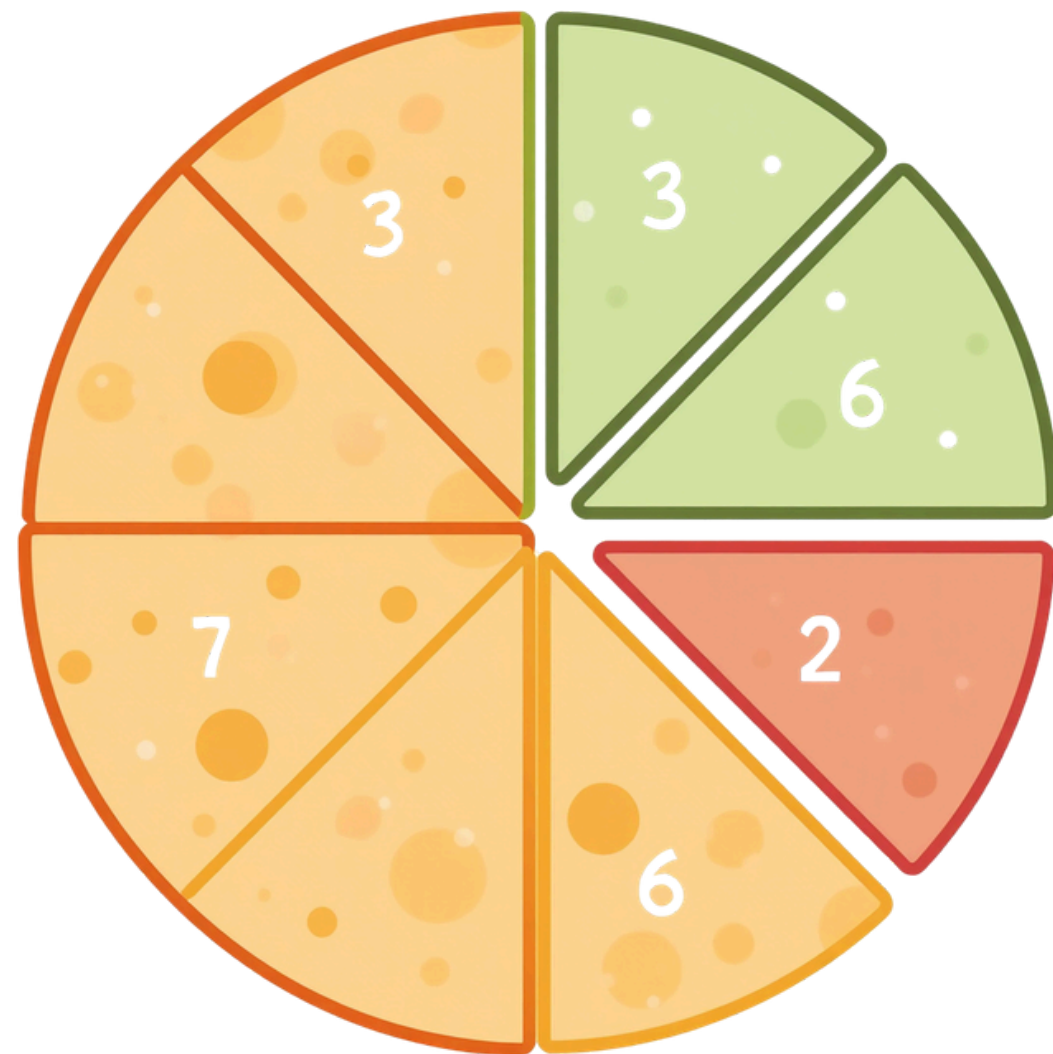

Dev's $\frac{1}{2}$ becomes $\frac{3}{6}$ ♦ Kiran's $\frac{1}{3}$ becomes $\frac{2}{6}$

"Twin Fractions = same size slices, different names!"

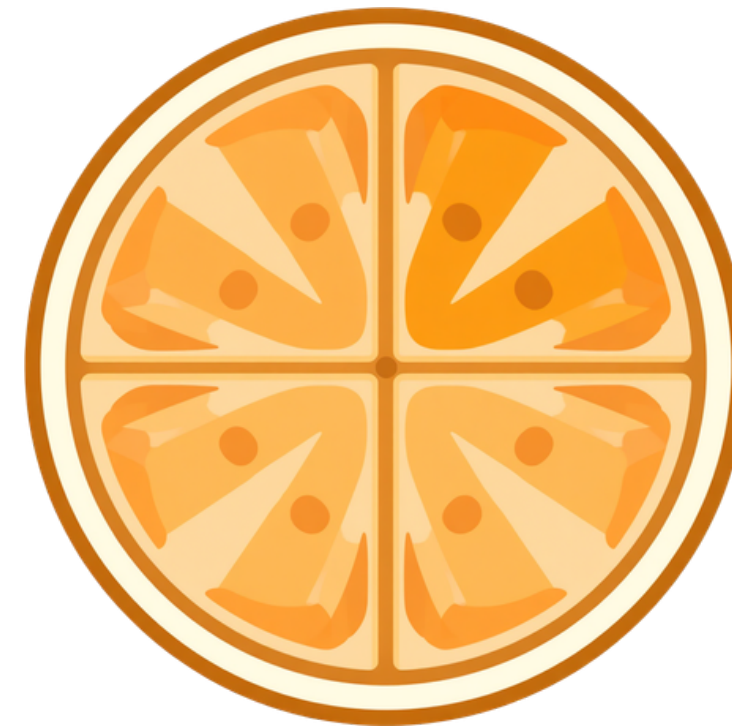

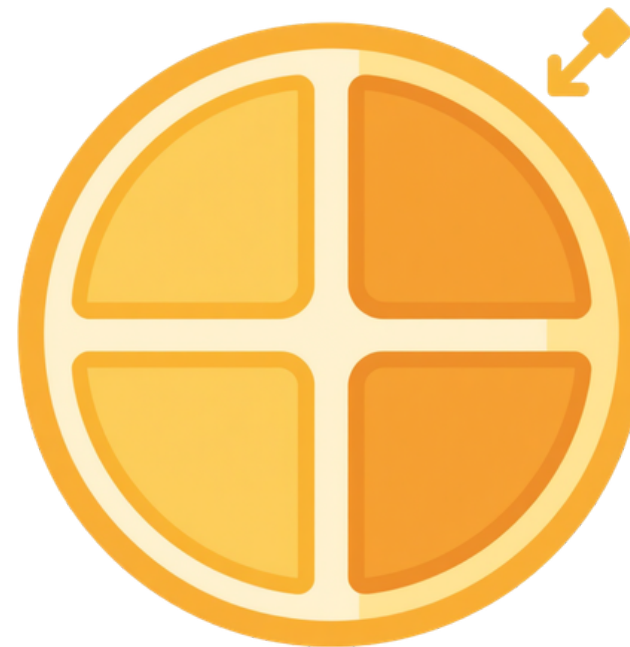

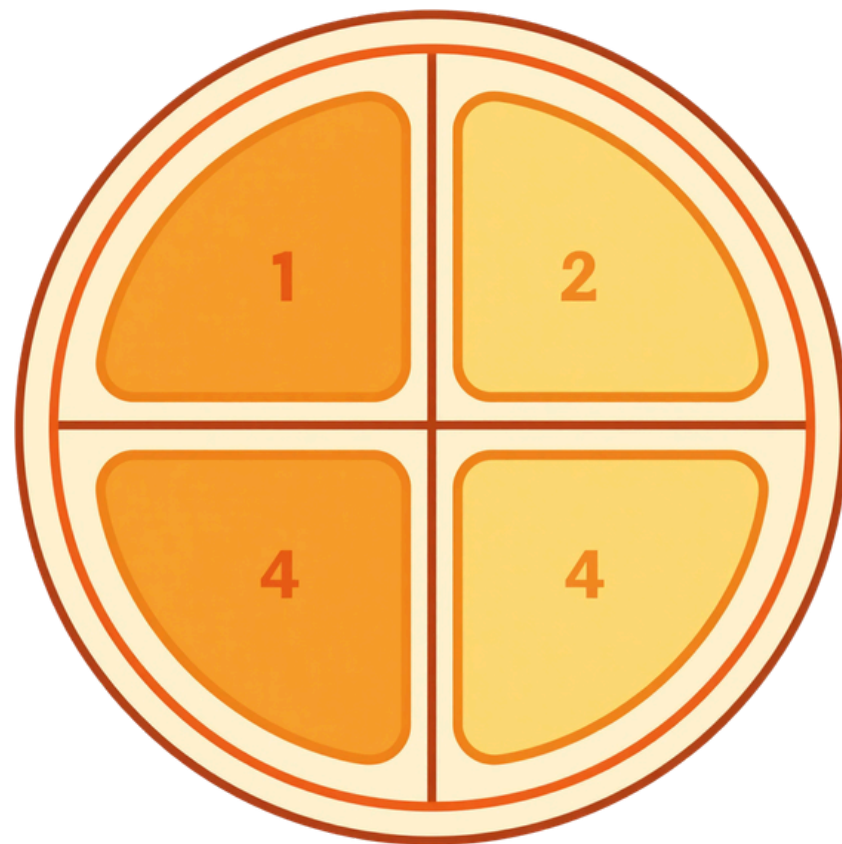

ADDING TWIN FRACTIONS – NOW IT'S EASY!

Add only the top numbers – the bottom ★ stays the same!

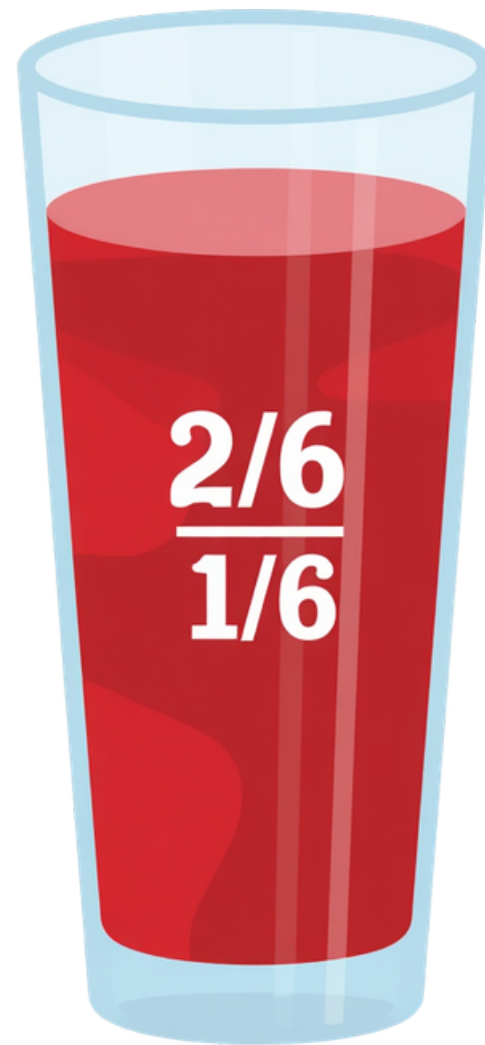

JALEBI TREAT – SUBTRACTION WITH LEFTOVERS!

Anjali has $\frac{3}{4}$ kg of jalebi. She gives her brother $\frac{1}{2}$ kg.
Convert $\frac{1}{2} \rightarrow \frac{2}{4}$, then subtract: $\frac{3}{4} - \frac{2}{4} = \frac{1}{4}$ kg left!
Always match the bottom numbers before subtracting!

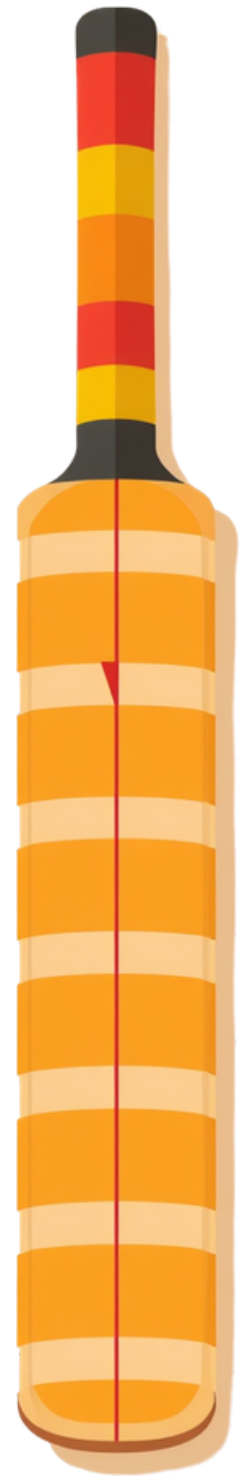

GUIDED PRACTICE 1 – MIXING JUICES

$\frac{1}{3}$ glass mosambi + $\frac{1}{6}$ glass pomegranate $\rightarrow$ Convert $\frac{1}{3}$ to $\frac{2}{6}$
 $\rightarrow$ Add: $\frac{2}{6} + \frac{1}{6} = \frac{3}{6} = \frac{1}{2}$ glass!

CRICKET GRIP TAPE LEFTOVER

Anjali has $\frac{5}{8}$ m tape. She cuts off $\frac{1}{4}$ m.
Convert: $\frac{1}{4} = \frac{2}{8} \rightarrow \frac{5}{8} - \frac{2}{8} = \frac{3}{8}$ m left!

YOUR 3-STEP FRACTION CHECKLIST!

Steps:

👁️ Look at the denominators – do they match?

✏️ Multiply top and bottom to make Twin Fractions!

+ – Add or subtract only the top numbers!

Bottom number stays the same – always!

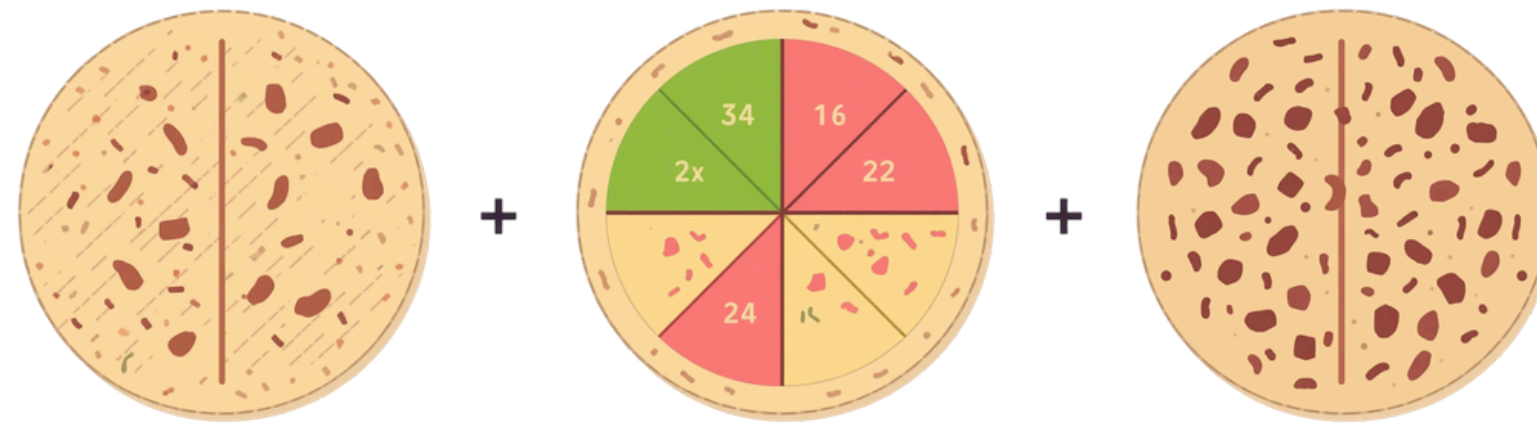

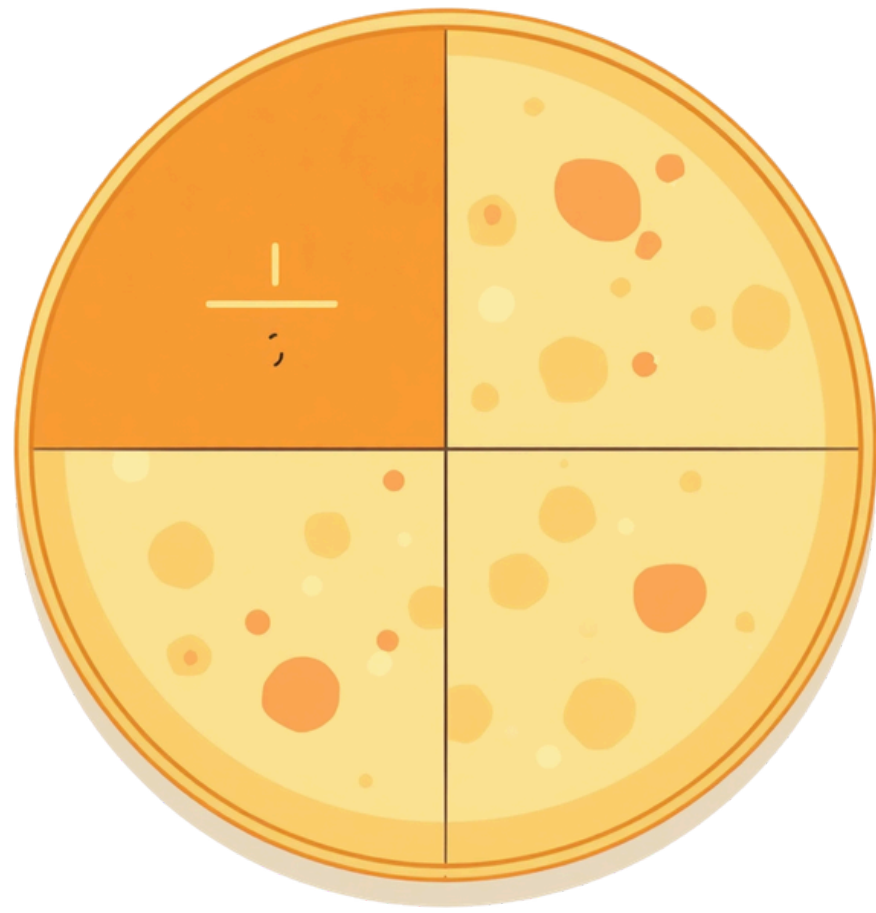

✅ Check: Did you find equivalent fractions first?

🎉 You've got this, Fraction Detective!

QUICK REFERENCE – FRACTION TERMS

- ★ Top Number = Numerator = How many pieces you have
- 🍊 Bottom Number = Denominator = How many pieces make a whole
- 🎉 Twin Fractions = Equivalent fractions with the same slice size!

HOME ASSIGNMENT – KITCHEN DETECTIVE!

Find two fractions with different bottom numbers in your kitchen –
spices, sweets, juice glasses – and try to make them twins!

Great job today! Any questions?
