

Pie Charts: Draw & Interpret with Fun!

What Is a Pie Chart?

A pie chart shows how parts make a whole — like slices of a pizza or a chapati!

- Pie charts are circle graphs.
- Each slice shows a part of the whole.
- All slices together make the full circle.

Look! Which Snack is the Yummiest?

Let's look at our favorite snacks pie chart! Samosas are the biggest slice at 30% — they're the most loved! Jalebis come next at 25%, pakoras at 20%, ladoos at 15%, and namkeen is the smallest at 10%.

The Chapati/Roti Rule!

Think of a pie chart like a roti cut into slices! The bigger the slice, the more of that part you have. Just like when you share a roti with friends!

How Do We Get to School?

Let's see how students travel! Walking leads with 40%, followed by Bicycle at 25%, Bus at 20%, Car at 10%, and Other at 5%.

Let's Compare!

FAVOURITE FRUITS

Look at two pie charts side by side! Chart 1 shows favorite fruits: mango 40%, banana 30%, apple 20%, orange 10%. Chart 2 shows favorite vegetables: carrot 35%, peas 25%, tomato 20%, spinach 20%. Notice how mango has the biggest slice for fruits, while carrot leads vegetables!

How to Draw Your Own Pie Chart!

- Step 1: Choose your favorite things (snacks, toys, etc.)
- Step 2: Count how many of each you have!
- Step 3: Use the template circle to cut slices
- Step 4: Color and label each slice!

Pie Chart Detective!

Test your knowledge!

- 1 Which slice is the biggest?
- 2 How many kids like walking the most?
- 3 Which pie chart shows more apples?

Why Pie Charts Are Fun and Useful!

Pie charts help us understand parts of a whole clearly. They help us compare and learn. Math is colorful and tasty like roti slices!

Thank You!
You're a Pie Chart Pro!

Keep drawing and discovering your favorite things! You've learned to read and create pie charts — you're amazing!
