

Math Pattern Detective

PLANRS ACADEMY

Welcome to PLANRS ACADEMY

Innovative learning for school students with
fun, culturally relevant math for Grade 1

Let's explore patterns all around us!

What Is a Pattern?

A pattern is something that repeats in a predictable order. Look for things that come again and again!

Patterns help us predict what comes next. Like: Red-Blue-Red-Blue... What comes next?

Patterns Around Us!

The Repeating Unit (Core Unit)

★ AB Pattern

Red bead, Blue bead, Red bead, Blue bead – the core is just Red-Blue!

🔦 ABC Pattern

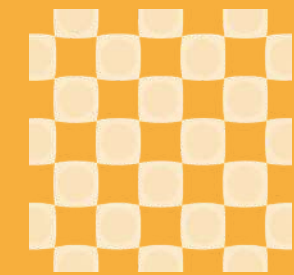

Mango, Banana, Guava, Mango, Banana, Guava – the core is Mango-Banana-Guava!

Types of Patterns: Colour and Shape

Patterns use colours and shapes that repeat! Look for Red-Blue patterns in Holi celebrations and Circle-Square patterns in bindis and kites.

Colour Patterns
Red-Blue-Red-Blue

Shape Patterns
Circle-Square-Circle

Cultural Motifs
Bindis, Kites,
Holi!

Types of Patterns: Size and Sound

Patterns aren't just what we see – they're also what we hear and feel!
Let's explore size and sound patterns together.

Size Patterns: Big-Small-
Big-Small

Sound Patterns: Clap-
Stomp-Clap-Stomp

Action Games Make
Learning Fun!

Types of Patterns: Number Patterns

* Counting in 2s

Pairs of students walking: 2, 4, 6, 8... Count your steps in twos!

* Counting in 5s

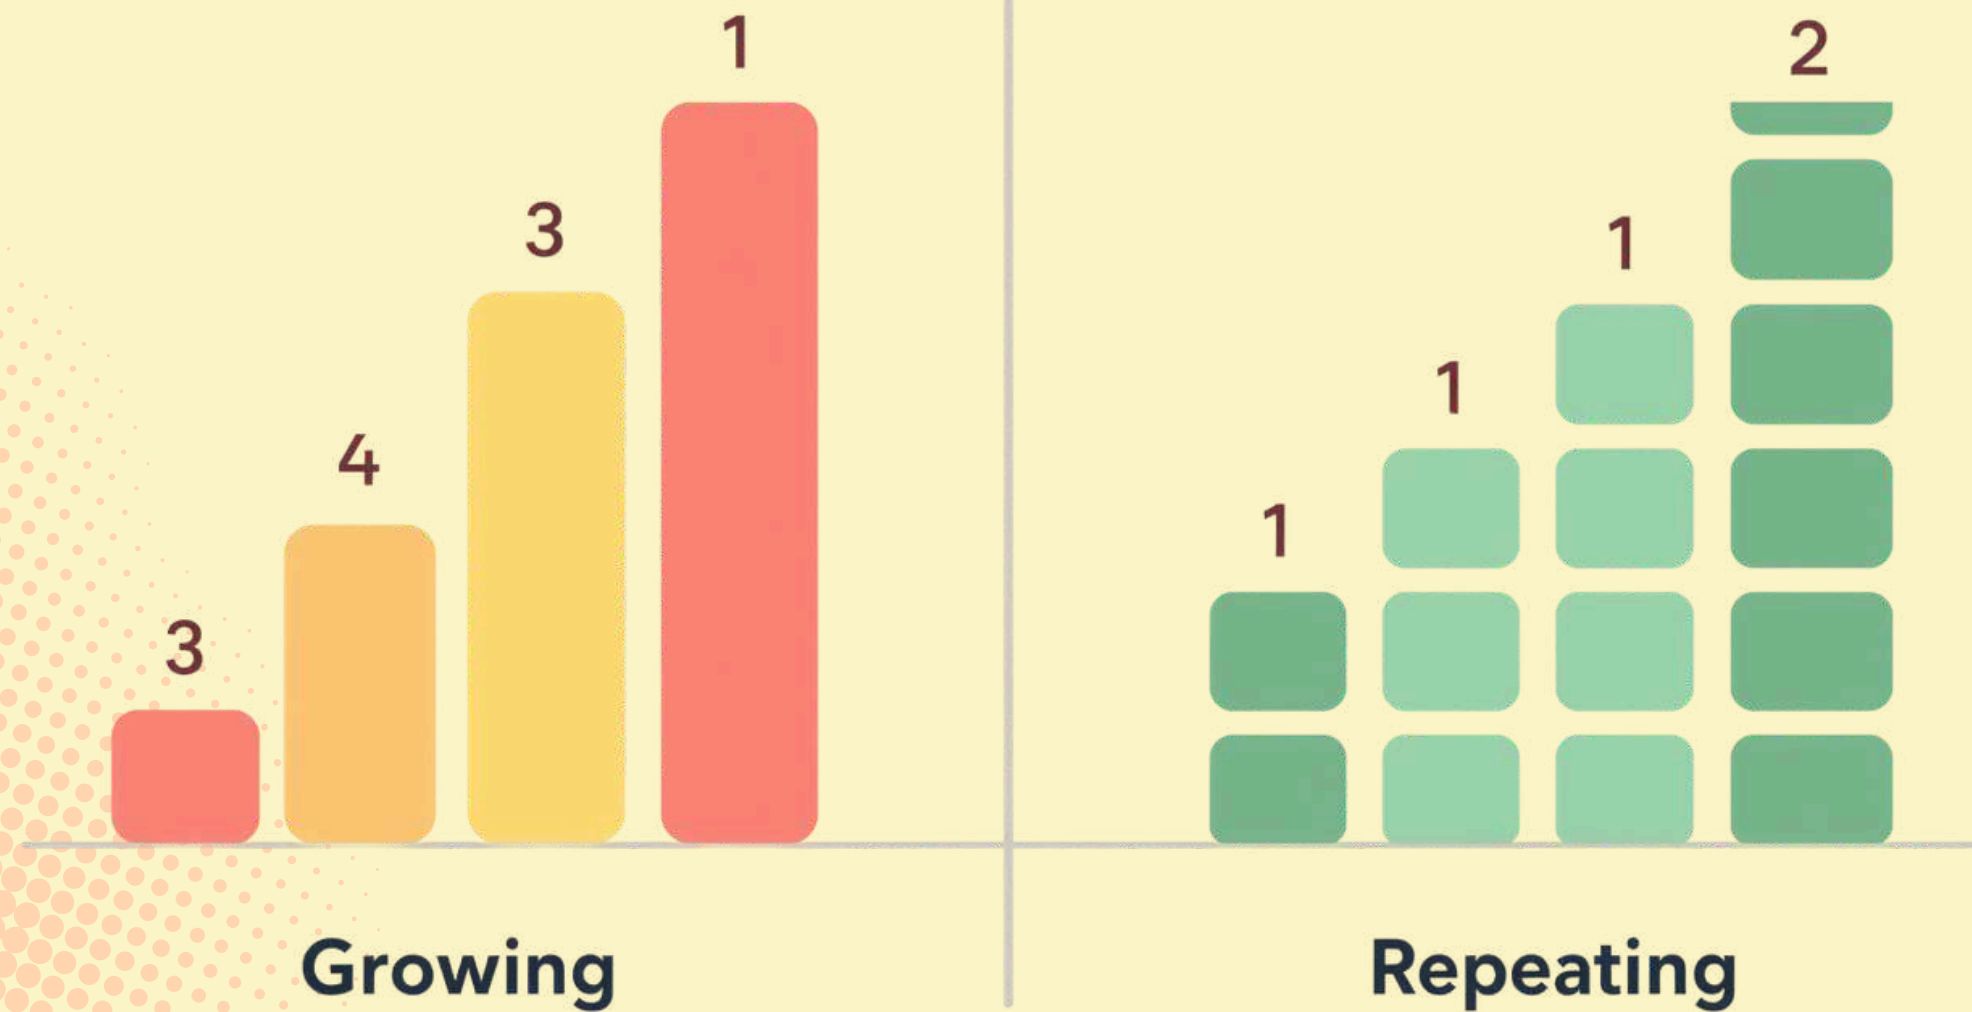

5-rupee coins in a row: 5, 10, 15, 20... Save your coins and count!

* Repeating Number Patterns

Roll-call fun: 1, 2, 3, 1, 2, 3... The numbers keep coming back!

Growing vs Repeating Patterns

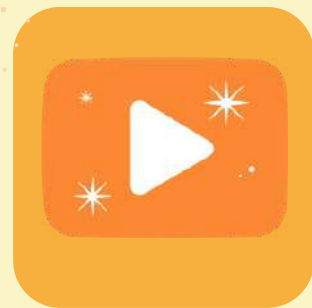

✿ Growing Patterns get bigger each time: 1, 2, 3, 4...

✿ Repeating Patterns stay the same: 1, 2, 1, 2...

Learning Objectives Mapped to Bloom's Taxonomy

Remember

Recognize AB, ABC, AAB

Understand

Explain why

Apply & Analyse

Add Elements

Create Patterns

Our young detectives will climb Bloom's pyramid! From recognizing repeating units to explaining what repeats and why, then applying skills to extend patterns and creating their own unique designs.

Micro-Learning Objectives

L01-2: Know & Identify Patterns

Say the word “pattern” and give an example from your life. Spot the repeating unit in colour or shape patterns!

L03-4: Extend & Recognise

Extend an AB pattern by 2 or more elements. Identify ABC or AAB patterns like Mango-Banana-Guava!

L05: Create Your Own Pattern

Design and build your very own 2-element repeating pattern independently. You’re a Pattern Detective now!

Success Criteria for Our Young Detectives

Define It Explain pattern in own words

Spot It 90% accuracy

Extend & Create Add 2 elements Score 3/5+

Our young pattern detectives will succeed when they can define a pattern in their own words, identify repeating units with 90% accuracy, extend AB patterns by 2 elements, spot patterns at home or school, and score 3/5 or above on the quiz!
