

SESSION 1

NUMBER DETECTIVES

My First Sudoku (1234)

Solving the 4x4 Puzzle

MEET THE GRID!

What is a Grid?

A grid is a big square made of smaller squares called **Khali jagah** (empty spaces).

The Story of the Mela:

Imagine a stall at a bazaar or mela. Every shelf must have different toys so everyone can see something new! In Sudoku, our "toys" are numbers or fruits.

Our Fruit Friends

Before we use numbers, let's meet our 4 fruit friends who each need their own square. It's like friends waiting for their turn on the swing - everyone wants a turn, but only one can sit at a time!

Mango

Guava

Banana

Papaya

THE ONE RULE: NO REPEATS!

To be a true **Jasoos (Detective)**, you must remember the most important rule in Sudoku:

"If Mango is here, no other Mango can be in this row or column! Right or Wrong?"

Spot the Mistake!

Look carefully at the row below. If you see two Mangoes, that is **Wrong!** A detective's job is to scan each row and column to fix these repeats.

Example of a Mistake (Row with Repeats):

⚠️ Two Mangoes in the same row! This is wrong.

How to Scan:

- **Look left-to-right (Row):** Check all spaces horizontally.
- **Look top-to-bottom (Column):** Check all spaces vertically.
- **Ask yourself:** "Is my friend already here?"

DIRA THE JASOOS

Let's watch how Dira solves a puzzle. She scans each row carefully to find where the missing friends belong.

Scanning Step-by-Step:

1. **Scan:** Dira looks at a row and sees: *Mango... Guava... Banana...*
2. **Identify:** She asks, "*Hmm, who is missing?*"
3. **Found!** "*Papaya! Papaya goes in the Empty space!*"

Can you spot the empty space? Scan... → Found!

✨ Papaya belongs in the missing spot!

THE BLOCK CHALLENGE

Looking Inside the 2x2 Boxes

Inside our big **4x4 grid**, there are 4 smaller squares. We call these **2x2 blocks**.

"Each little box is like a small stall in the bazaar — no repeats allowed inside!"

Each 2x2 block must have all 4 friends with no repeating!

The Block Scan:

Look at a 2x2 block. If you have Mango, Guava, and Banana... who is missing? Use your detective skills to find the missing friend and fill the stall!

A Full 4x4 Grid with 2x2 Blocks:

			
	?		
			
			

💡 Look at the highlighted top-left 2x2 block. Who is missing from that stall?

YOU ARE A NUMBER DETECTIVE!

Congratulations!

You filled the grid like a real Jasoos.

What We Learned Today:

- ✓ How to find repeated friends and fix them.
- ✓ How to scan rows and columns for missing pieces.
- ✓ How to complete the 2x2 Block Challenge.

Next Time: We'll try even bigger 6x6 puzzles! Keep practicing your detective skills.

Thank You, Number Detectives!
