

Sink or Float?

Predict & Test!

What Is Sink or Float?

- Some things sink in water.
- Some things float.
- Let's find out how!

How Do We Know?

1. Look at the object closely
2. Think about its weight and size
3. Make a guess before testing!

Materials We Need

- Water container
- Different small objects
- Towel for spills
- Notebook to write predictions

Making Our Predictions

Let's guess — will it sink or float?

Write your prediction down
before we test!

Testing Time!

Now, let's test and see
what happens!

Carefully place each object
in the water.

Objects That Sink

- Stone
- Coin
- Key
- Metal spoon

Objects That Float

These objects float on water:

- Leaf
- Plastic bottle cap
- Toy boat
- Cork

What Did We Learn?

SINK

- Stone
- Coin
- Key
- Metal spoon

FLOAT

- Leaf
- Bottle cap
- Toy boat
- Cork

Some objects are heavy or dense and sink. Others are light or shaped to float.

Why Do Things Sink or Float?

- Objects that are heavier than water sink.
- Objects that are lighter or shaped to hold air float.

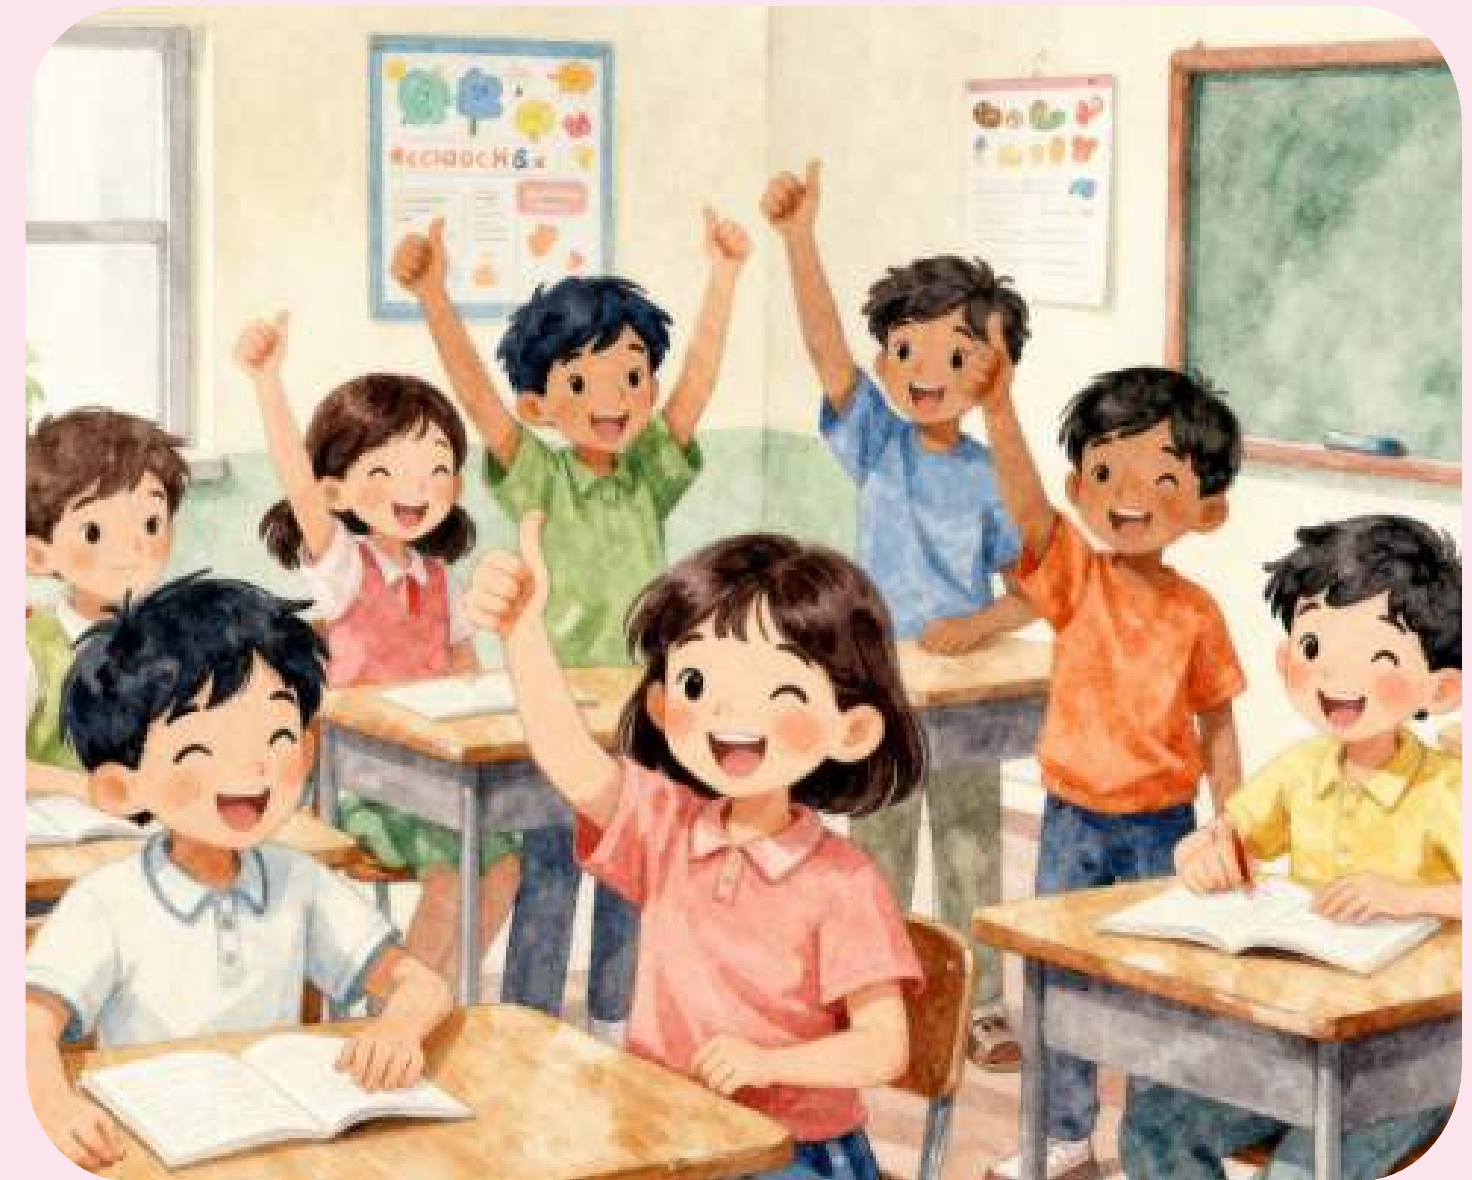

Try It Yourself!

1. Gather objects from around you
2. Make predictions - sink or float?
3. Test them in water
4. Write or draw what you see!

Summary

- Some things sink; some things float
- We can guess first by looking closely
- Testing helps us learn for sure!

Questions & Curiosity

- What objects do you want to test next?
- Share your ideas with your friends!

Thank You!
