

What Does a Computer 'See'?

The Secret World of Pixels

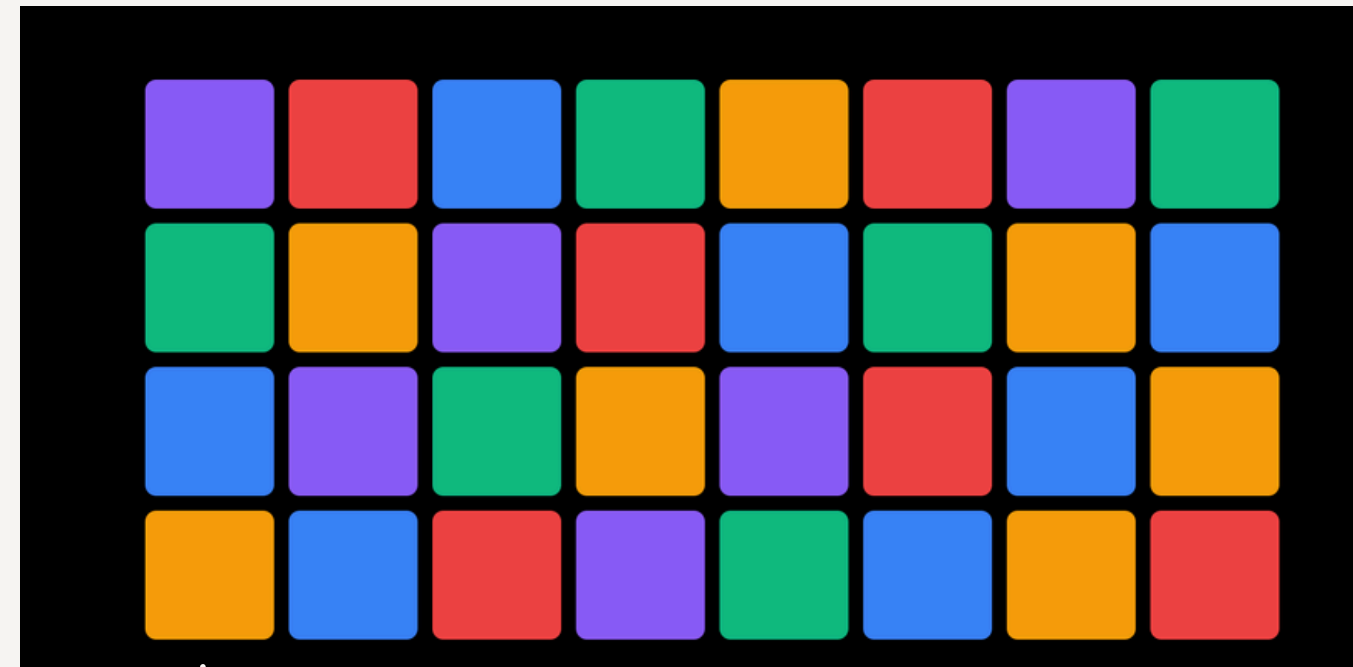

Super-Zoom Mystery Game

Can you guess what this is?
Your eyes see a tiger, but computers
see tiny colourful squares!

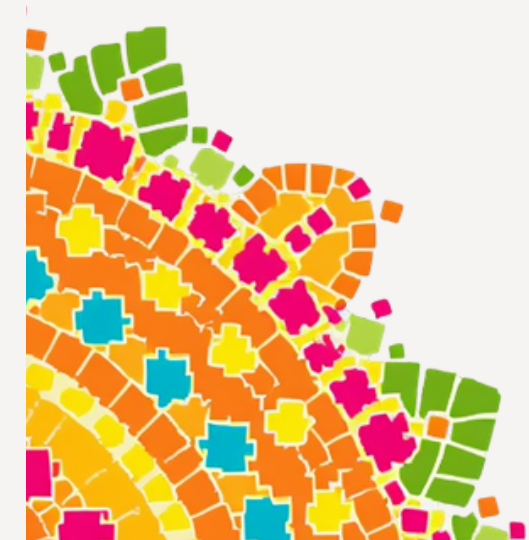

The Magic Mosaic: What is a Pixel?

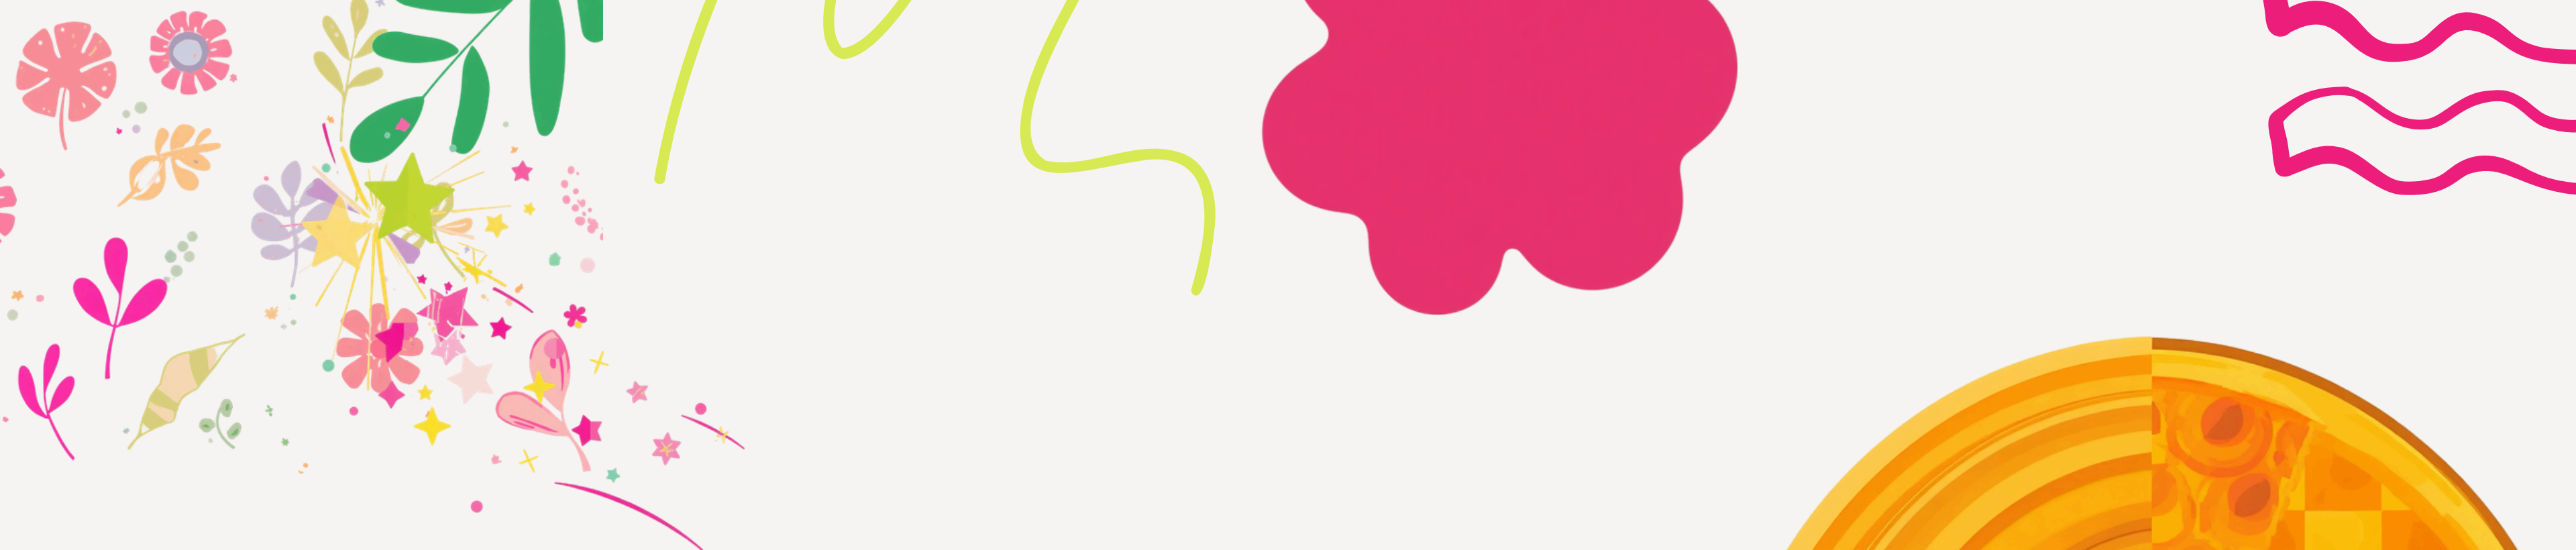

Pixels are tiny colorful squares that make up every picture on your screen!

"Small Colorful Boxes " — little colorful boxes!

Just like rangoli made of colored rice grains or bead-art (Beadwork),
screens use millions of tiny squares to build beautiful pictures!

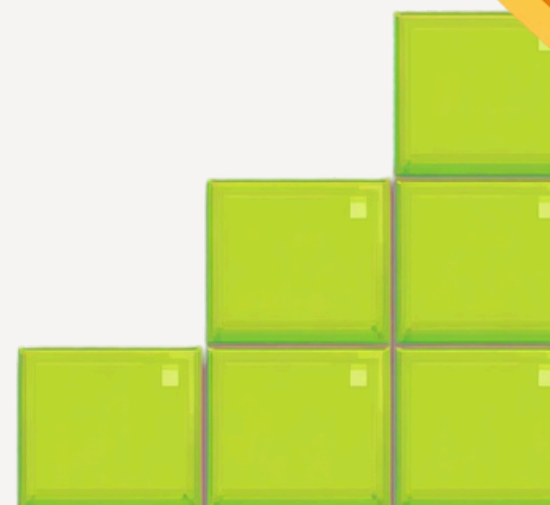

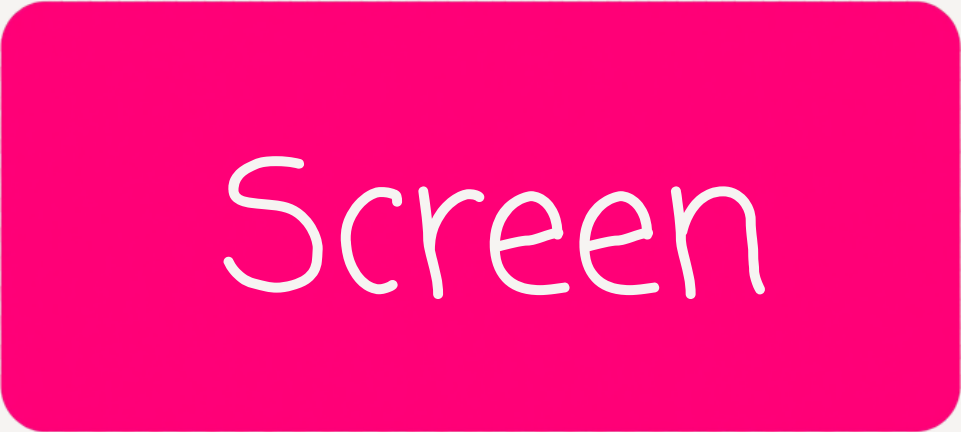

Pixels Make Pictures: Zooming In!

When you zoom in on a photo of golden Jalebi, the smooth curvy shape turns into tiny staircases of colourful squares!

Each little square is called a PIXEL. 

Secret Architecture of Your Screen!

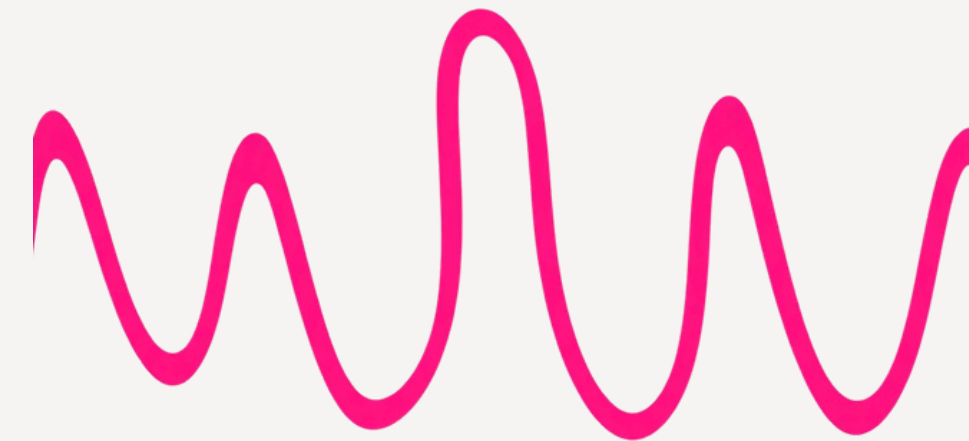

Screen

Your phone screen is like a giant chessboard with millions of tiny glowing lightbulbs – each one is a pixel lighting up in a different colour!

Try It!

Cup your hands around your eyes like binoculars and look closely at a screen – can you see the tiny colourful boxes?

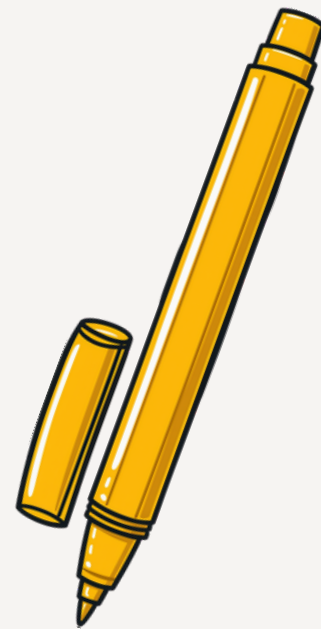

Let's Spot Pixels Together!

Can you see tiny colorful
boxes on your phone or TV?
Pixels are everywhere!

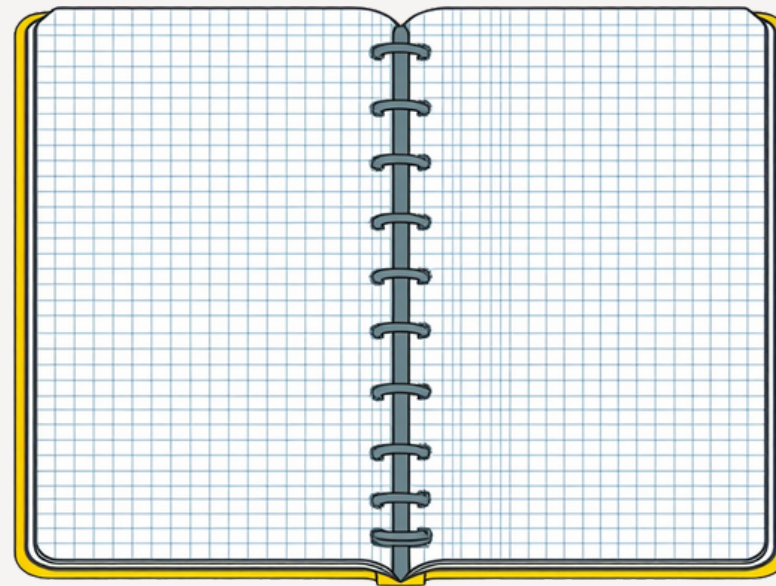

Hands-On Time: Create Your Pixel Art!

We will make a 5x5 pixel art using two colors.
Listen for the coordinates!

Yellow Sketch Pen

Square-Ruled Notebook

Red Sketch Pen

Your Pixel Art Masterpiece!

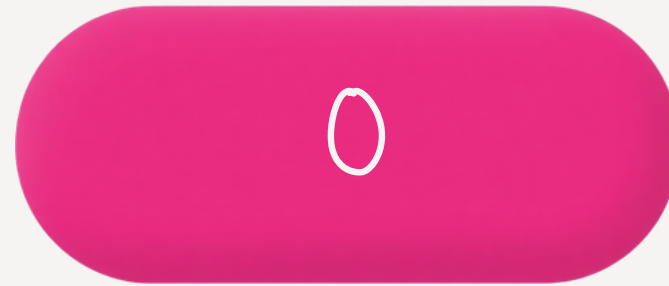

STEP-BY-STEP TO DIYA:

1. Outline a big square that is exactly 5 small boxes wide and 5 small boxes tall on the square-ruled notebook
2. Color the very center box of the top row with your bright yellow pen. This represents our glowing fire flame!
3. Color the middle boxes of the rows below it using your red pen to form the clay bowl cup. Step back and admire your clean pixel art!

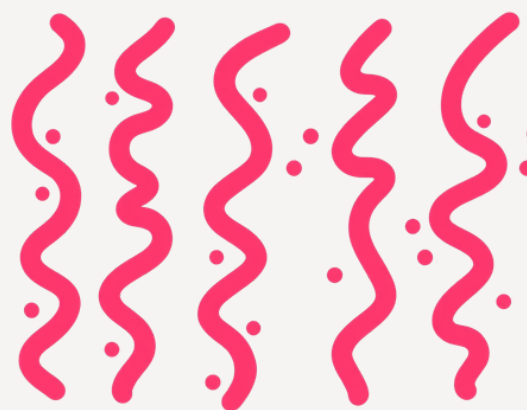

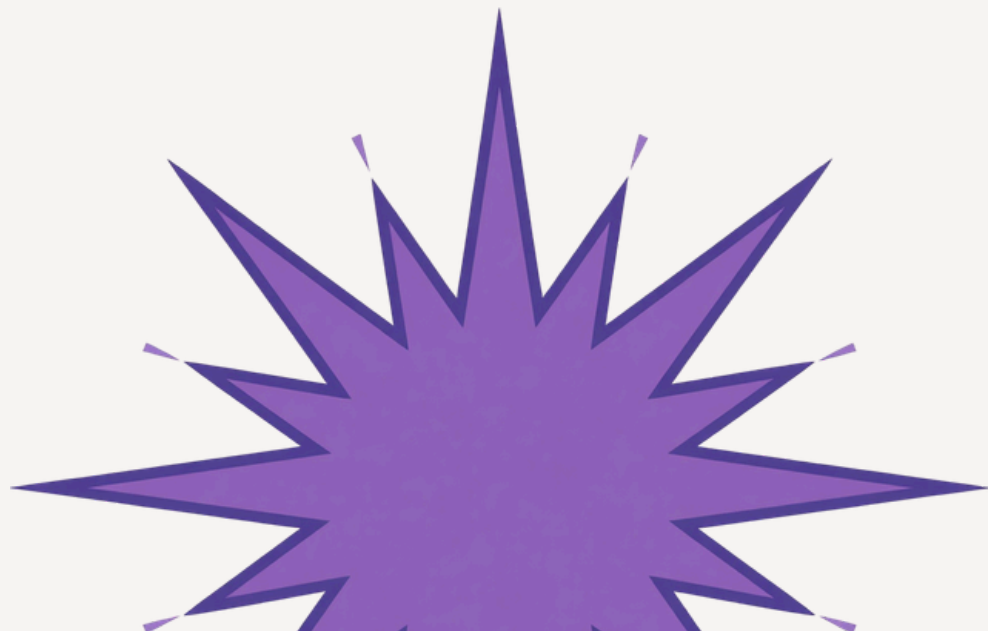

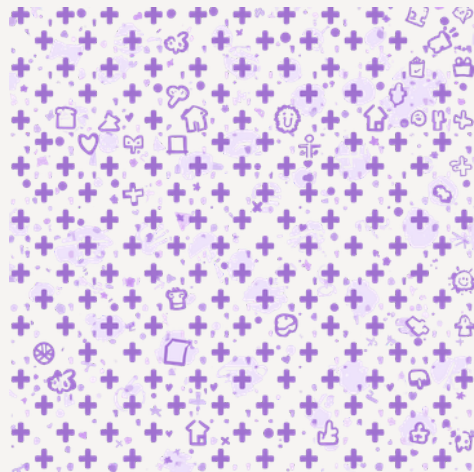

How Computers Read Our Art

Computers use '0' for blank squares — these are the empty boxes in your pixel art grid!

Computers use '1' for colored squares — this is how they remember your pixel picture!

Take Care of Your Eyes!

Don't sit too close to screens — pixels are bright lights! Always sit at a safe distance from your phone or tablet. Give your eyes a rest and keep smiling! 😊

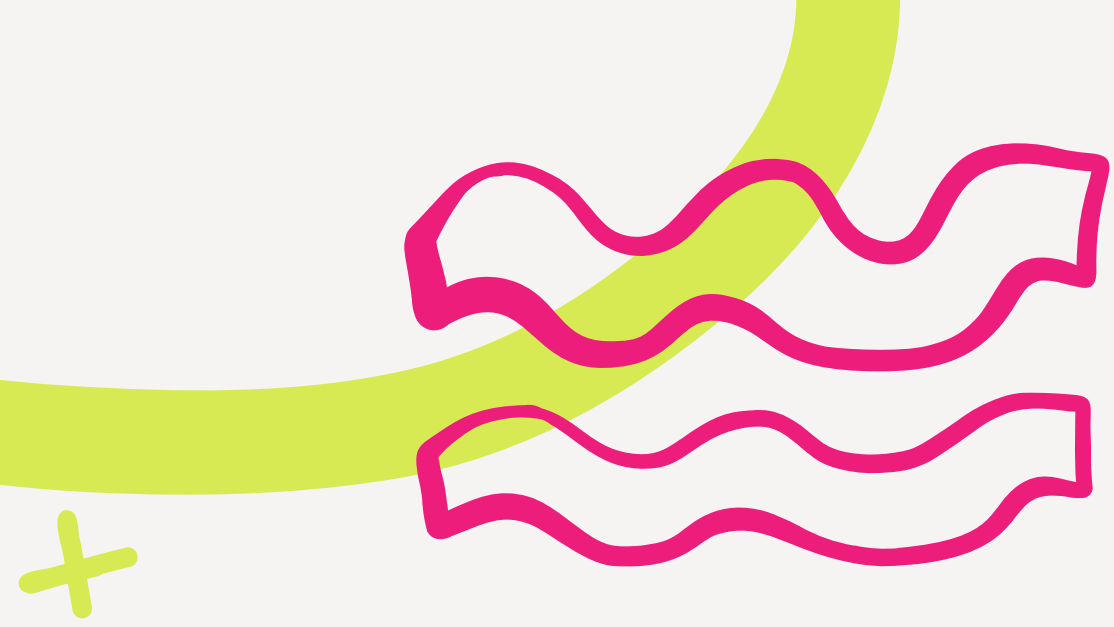

Recap: What We Learned Today!

Pixels are tiny coloured squares 

Screens have millions of pixels!

Computers read images as 0s and 1s

We made our own pixel art! 

Your Home Mission!

Ask your parents to zoom into a photo on your phone and find the tiny colourful boxes!
