

NEGATIVE NUMBERS — LESS THAN ZERO!

Numbers That Go the Other Way!
A Fun Introduction for Grade 2

2ND WARM-UP

What Comes Before
Zero?

Let's count backwards: 5, 4, 3, 2, 1,
0... What comes before zero? Have
you seen floors below zero?

Counting down
to discover!

5 4
3 2
1 0

$$1 - 2 + 3 +$$

3RD SLIDE

Introducing Negative Numbers

Numbers less than zero are called negative numbers. We write them with a minus sign like -3. We say "negative three" or "minus three."

Less than zero!

4TH STORY

Aarav's Mall Adventure

Aarav's family goes from Floor 2 down to Basement 2. Watch the floors: 2, 1, 0, -1, -2. Basements are below zero!

Floor sequence: $2 \rightarrow 1 \rightarrow 0 \rightarrow -1 \rightarrow -2$

5TH PAGE

Negative Numbers in India – Real Life!

Negative numbers are everywhere!
Shimla thermometer shows -3°C in
January. Mall lifts have B1, B2, B3
floors. Bank passbooks can show $-\text{₹}2$.
Cricket scoreboards show run deficits
like -5 runs.

Where else do negative numbers hide in
India?

5

=

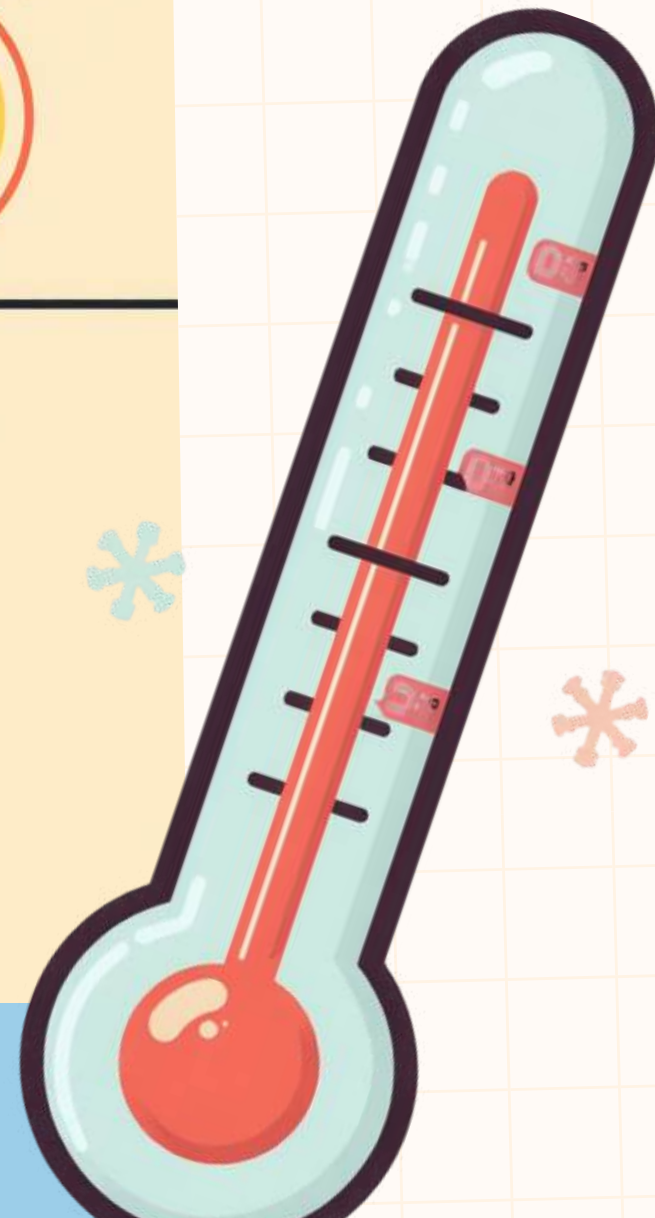

6TH ZERO

Understanding Zero – The Boundary

Zero is the boundary between positive and negative numbers. It is neither positive nor negative. Think of it as the ground floor – 0°C is the freezing point!

Zero means nothing, yet everything!

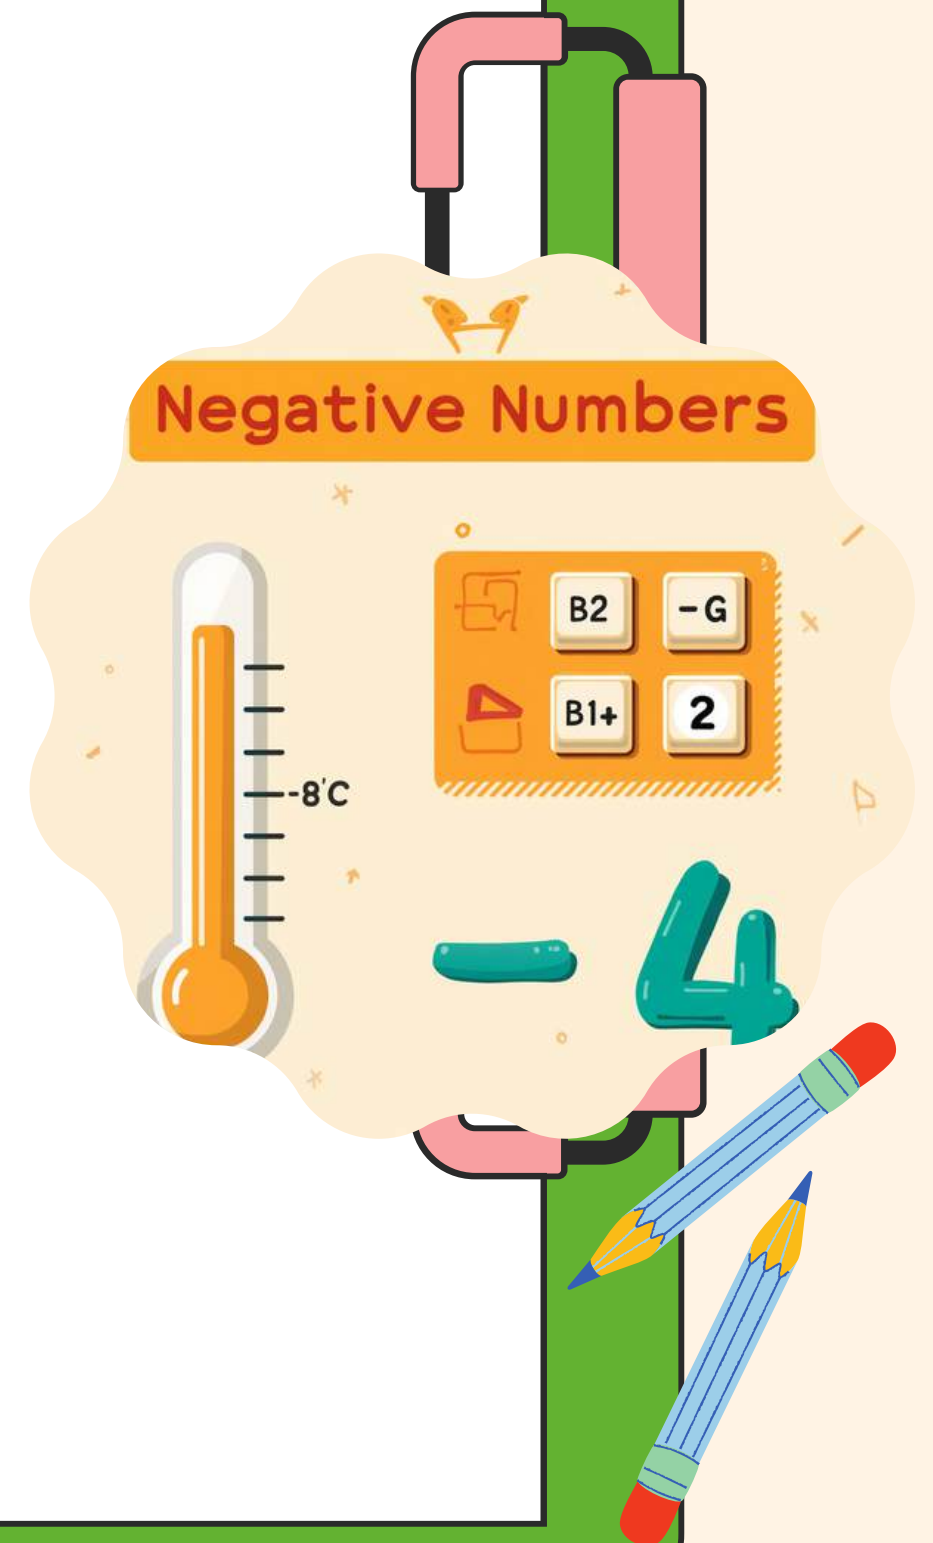

1TH RULE

Reading and Writing Negative Numbers

The minus sign (-) shows a negative number. Examples: -4 (negative four), -8°C on a thermometer, -2 lift button. Remember: Not subtraction! Just a number less than zero.

The minus sign makes it negative!

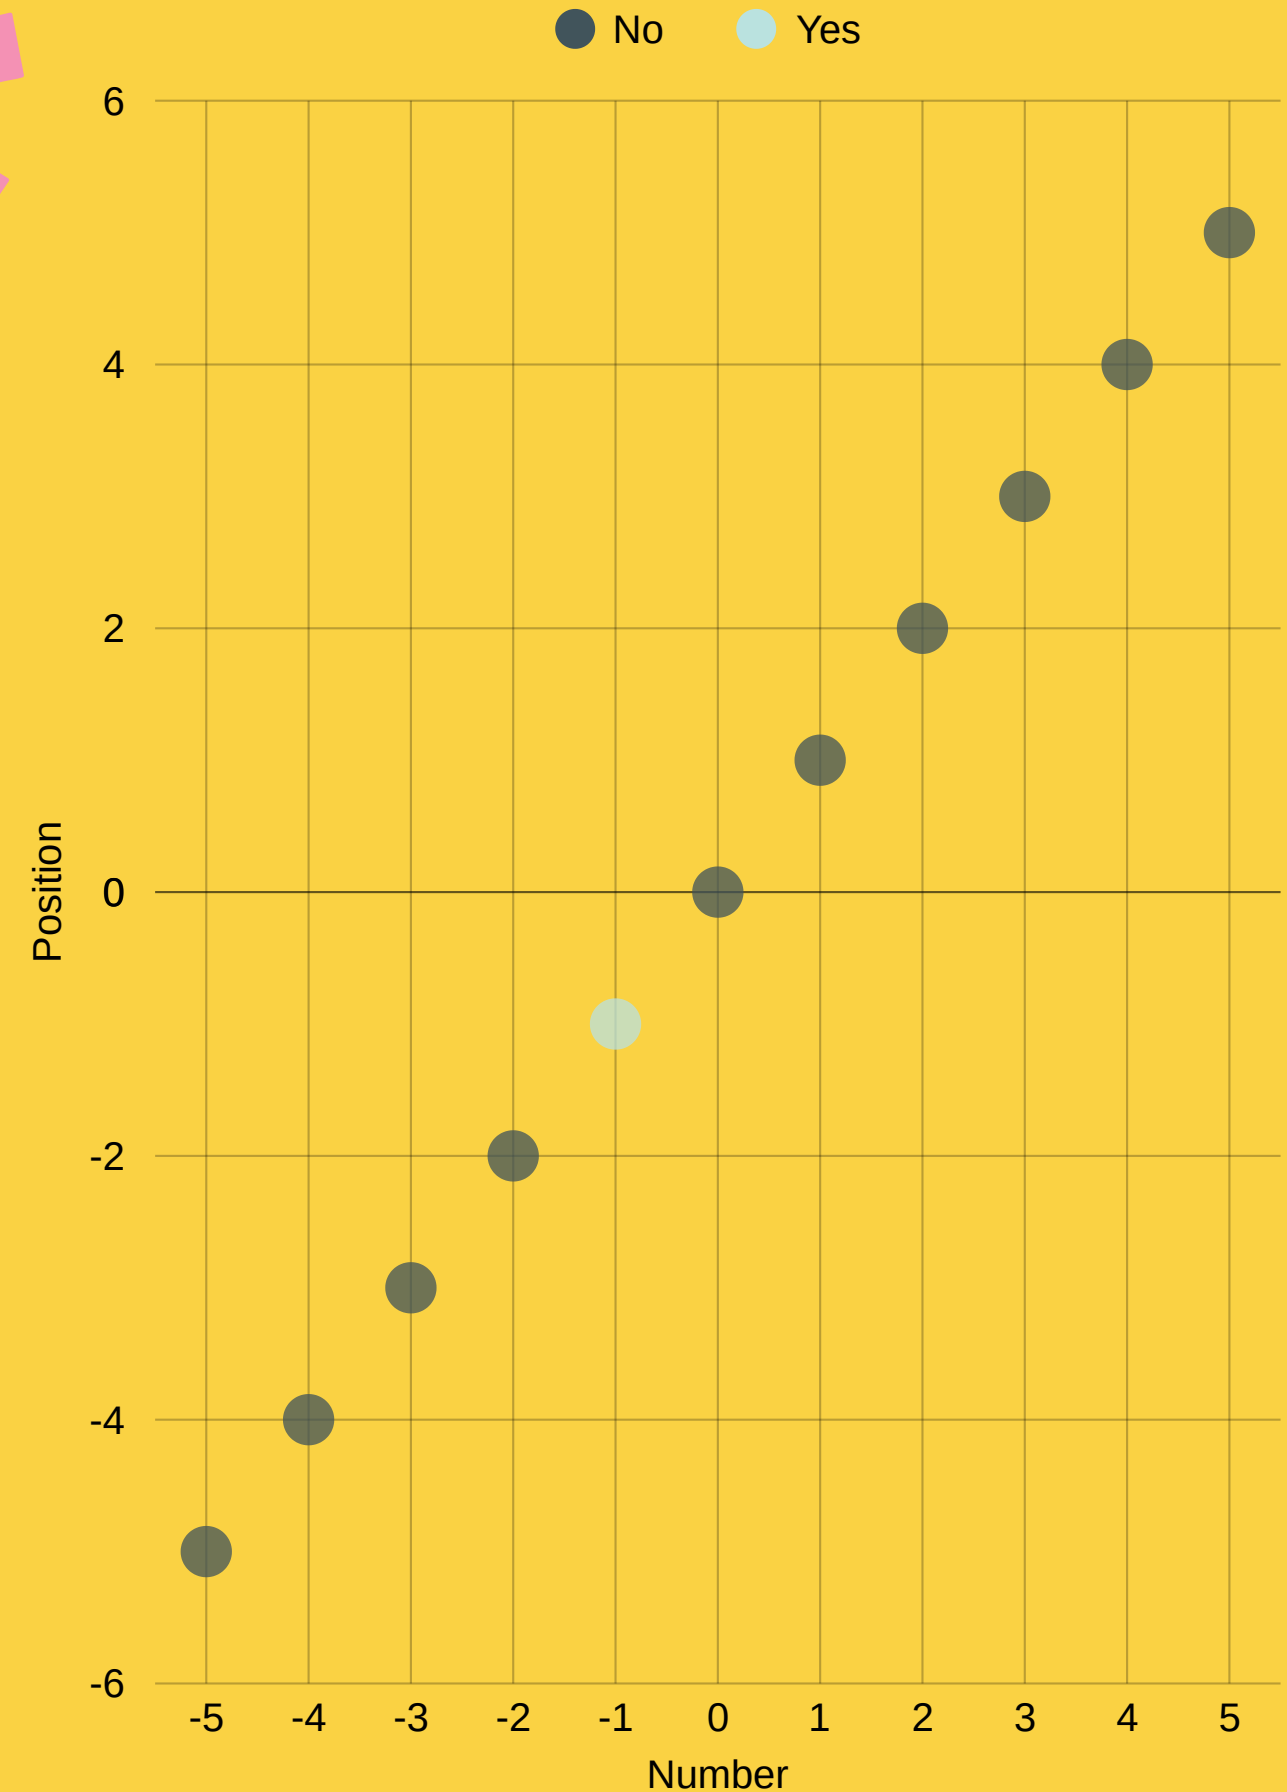

8TH PRACTICE

Locate -1 on the Number Line

Q1: Where is -1 on the number line? Look at the number line from -5 to +5. Can you find where -1 sits? Remember, it's just one step to the left of zero!

One step left of zero!

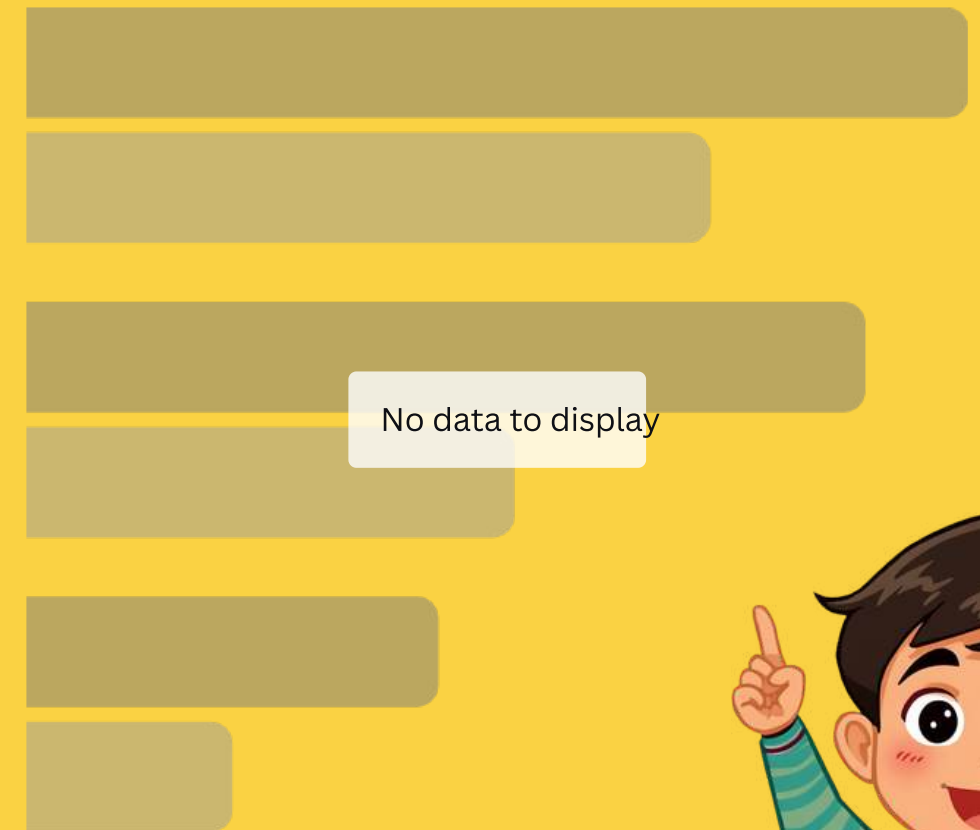

Source: AI-generated data. Replace or verify before use.

9TH PRACTICE

Locate -4 on the Number Line

Q2: Where is -4 on the number line? Look carefully at the numbers. Count 4 steps to the left of zero. That's where -4 lives – on the far left side!

Answer: -4 is far left!

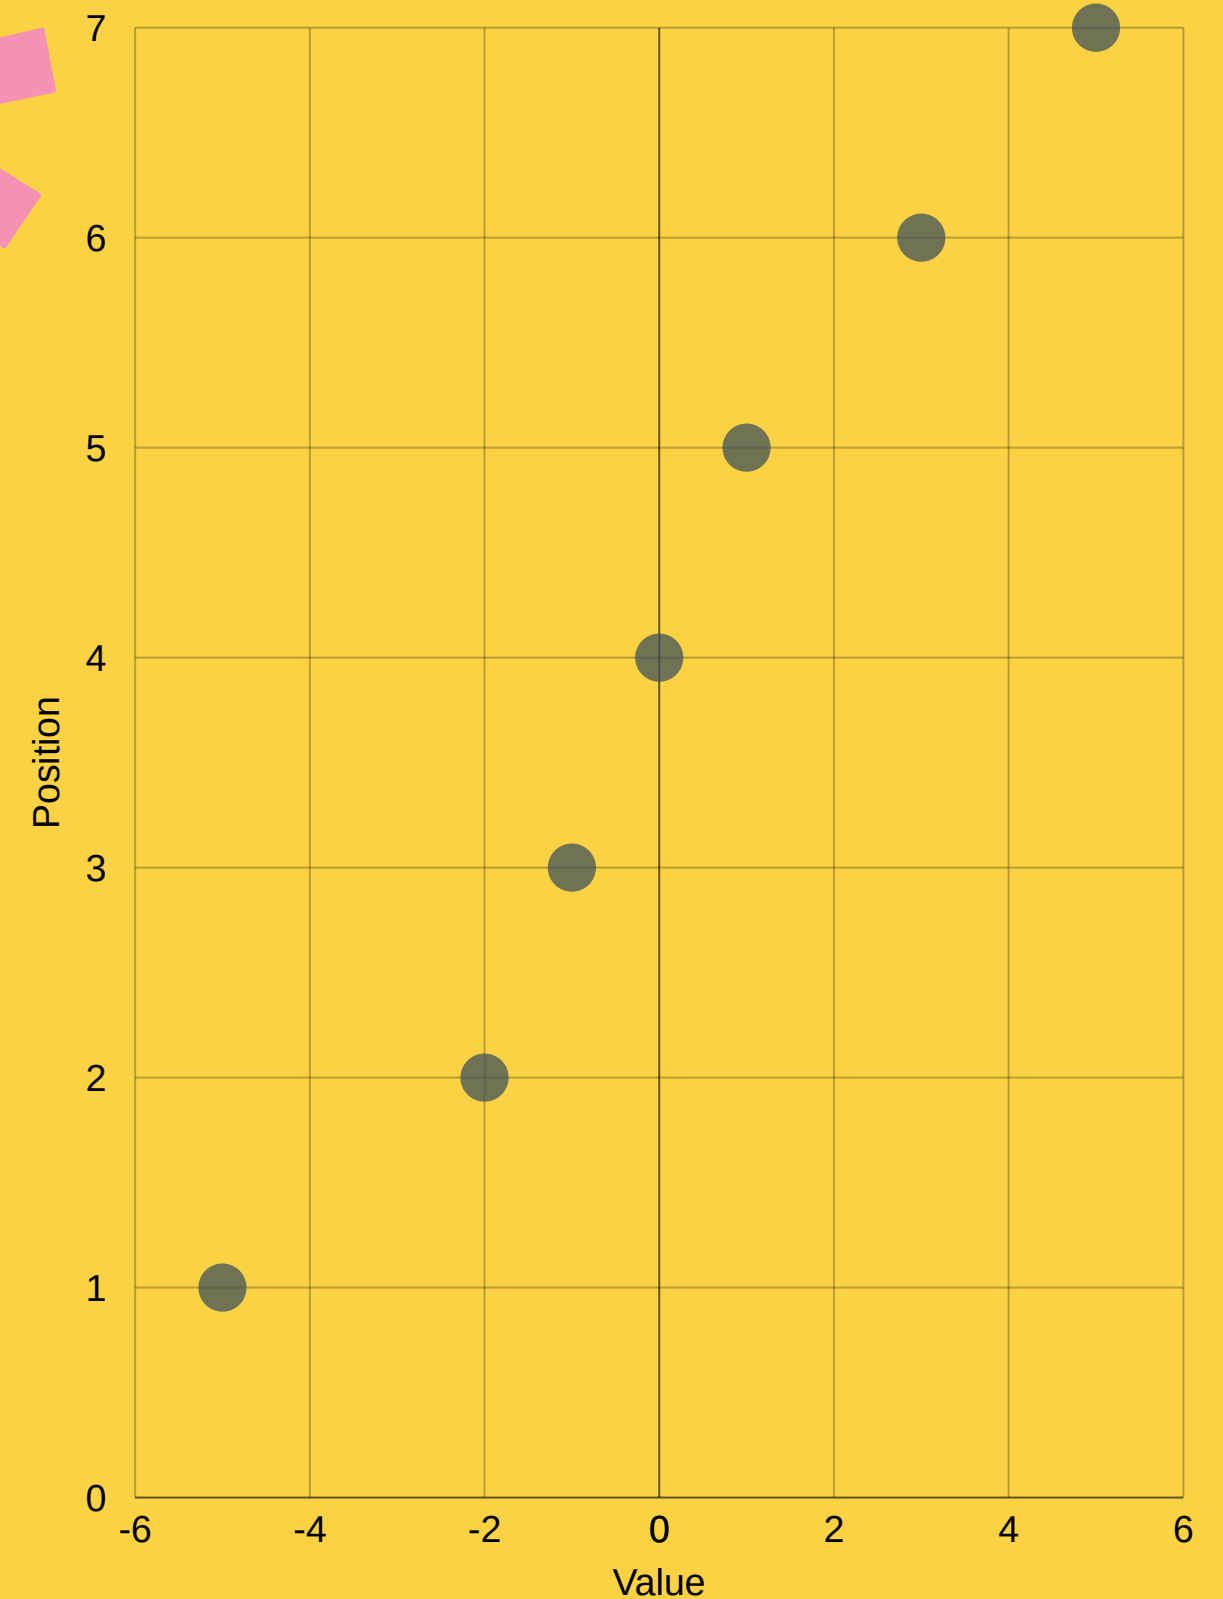

10TH PRACTICE

Which is Further Left?

Q3: Which is further left on the number line – -2 or -5? Look carefully at where each number sits!

Answer: -5 is further left!

Source: AI-generated data. Replace or verify before use.

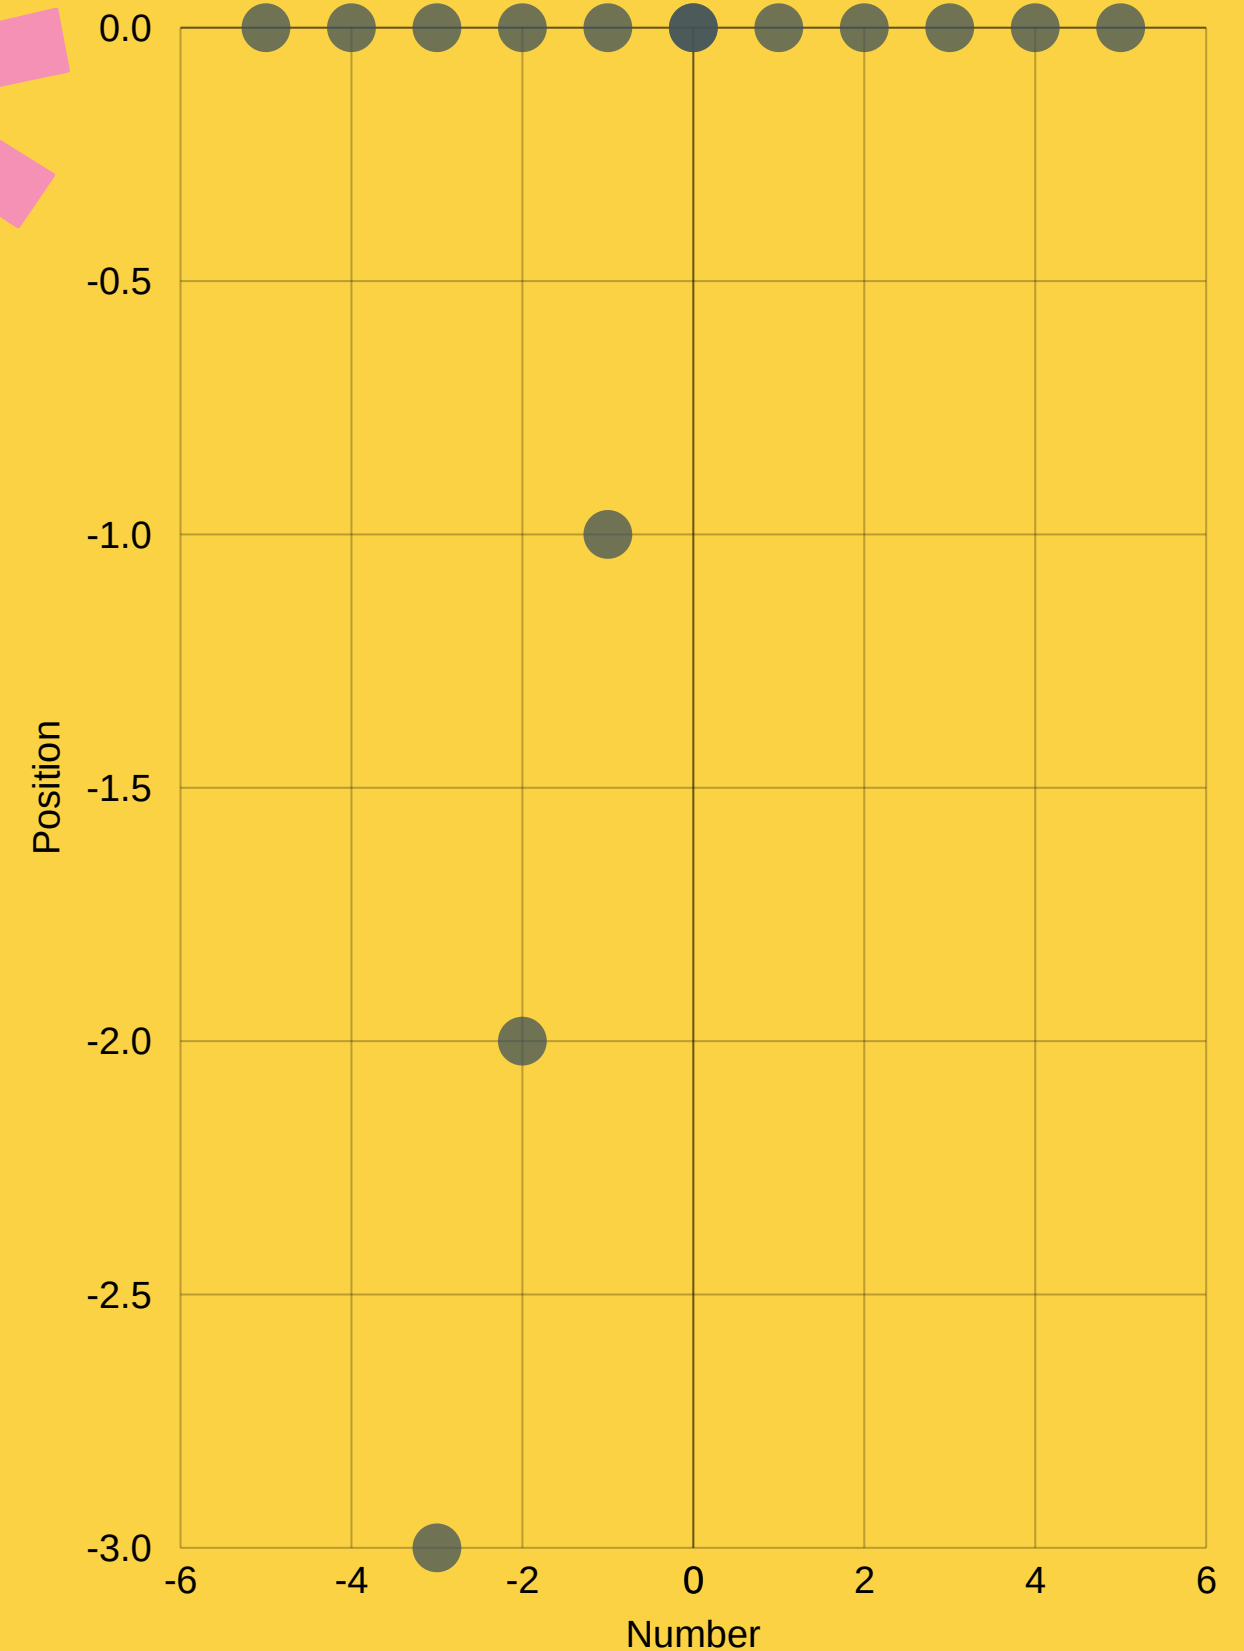

11TH

GUIDED PRACTICE

What Number is 3 Steps Left of Zero?

Start at zero on the number line. Now take 3 big jumps to the left! Count with me: 0... -1... -2... -3!
The answer is -3!

Answer: -3

Source: AI-generated data. Replace or verify before use.

12TH ACTIVITY

Match the Situation to Negative Numbers

Draw lines to match each situation with its negative number:

- 3 floors below ground $\rightarrow -3$
- Temperature 5° below zero $\rightarrow -5$
- Priya owes ₹2 $\rightarrow -2$
- Lift at basement 1 $\rightarrow -1$

Think and match!

13
TH vs

CHALLENGE

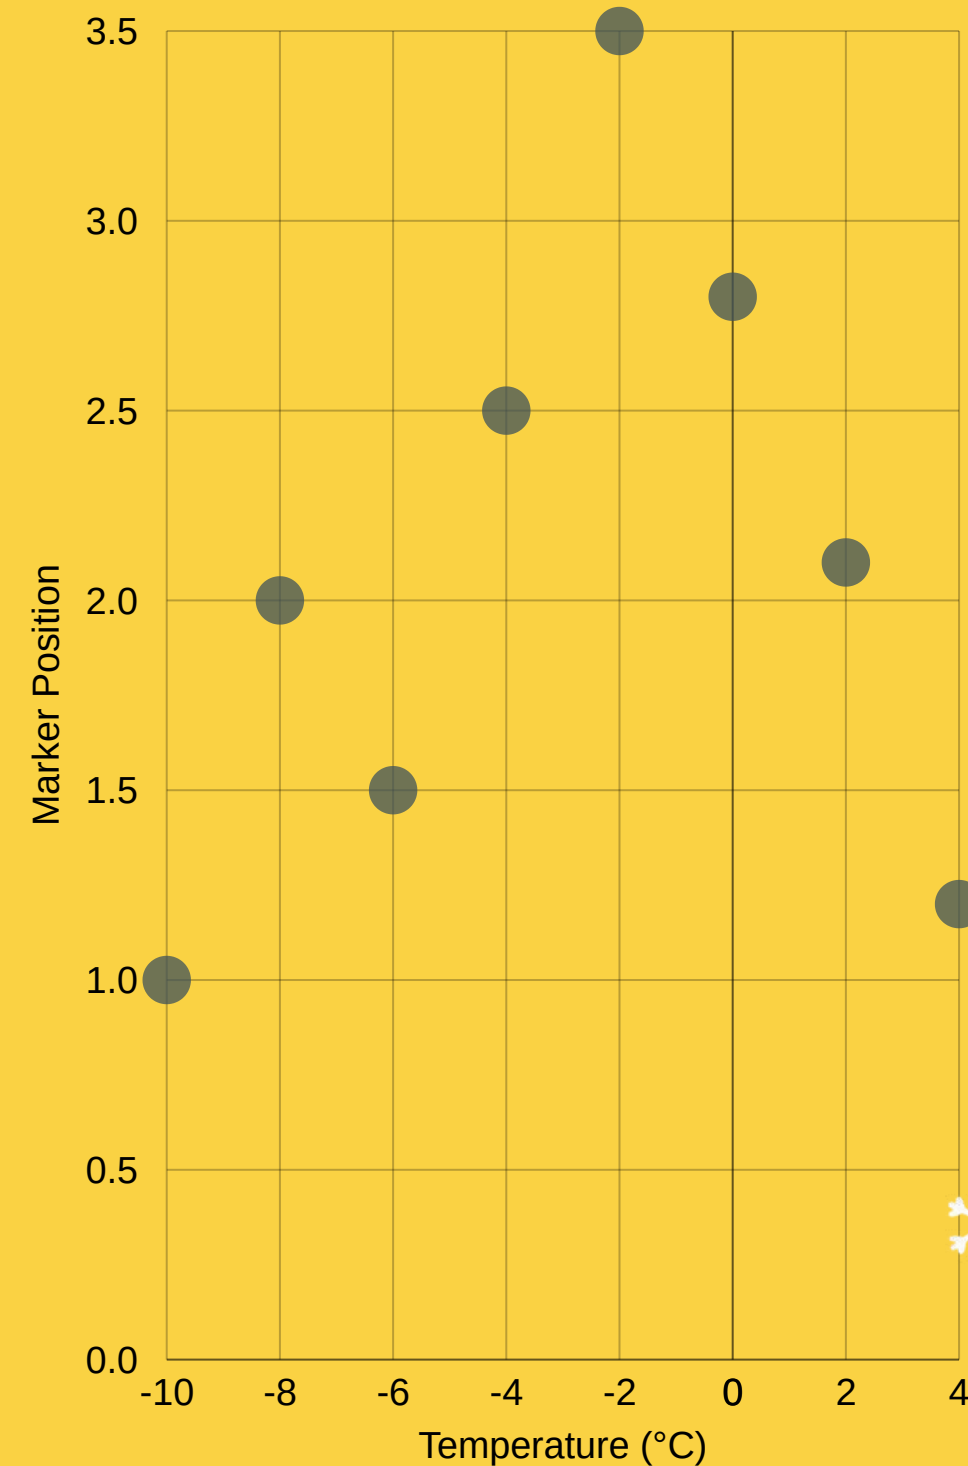

Which Is Colder?

Delhi winter: -2°C

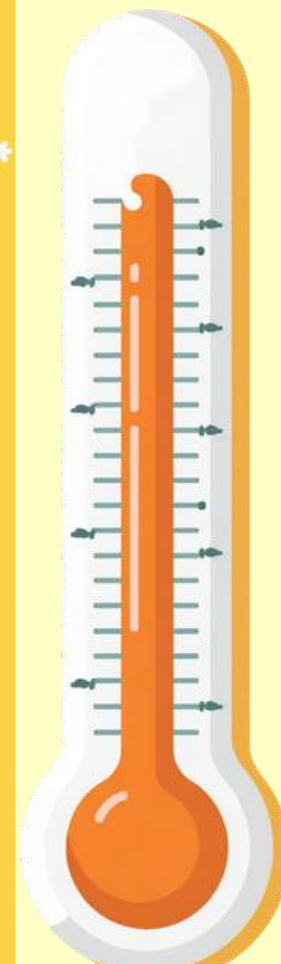

Kargil winter night: -8°C

Further left on the number line
means colder. So -8°C is colder than
 -2°C !

Think about it:
Which place is colder?

Source: AI-generated data. Replace or verify before use.

14TH

KEY

Vocabulary Recap

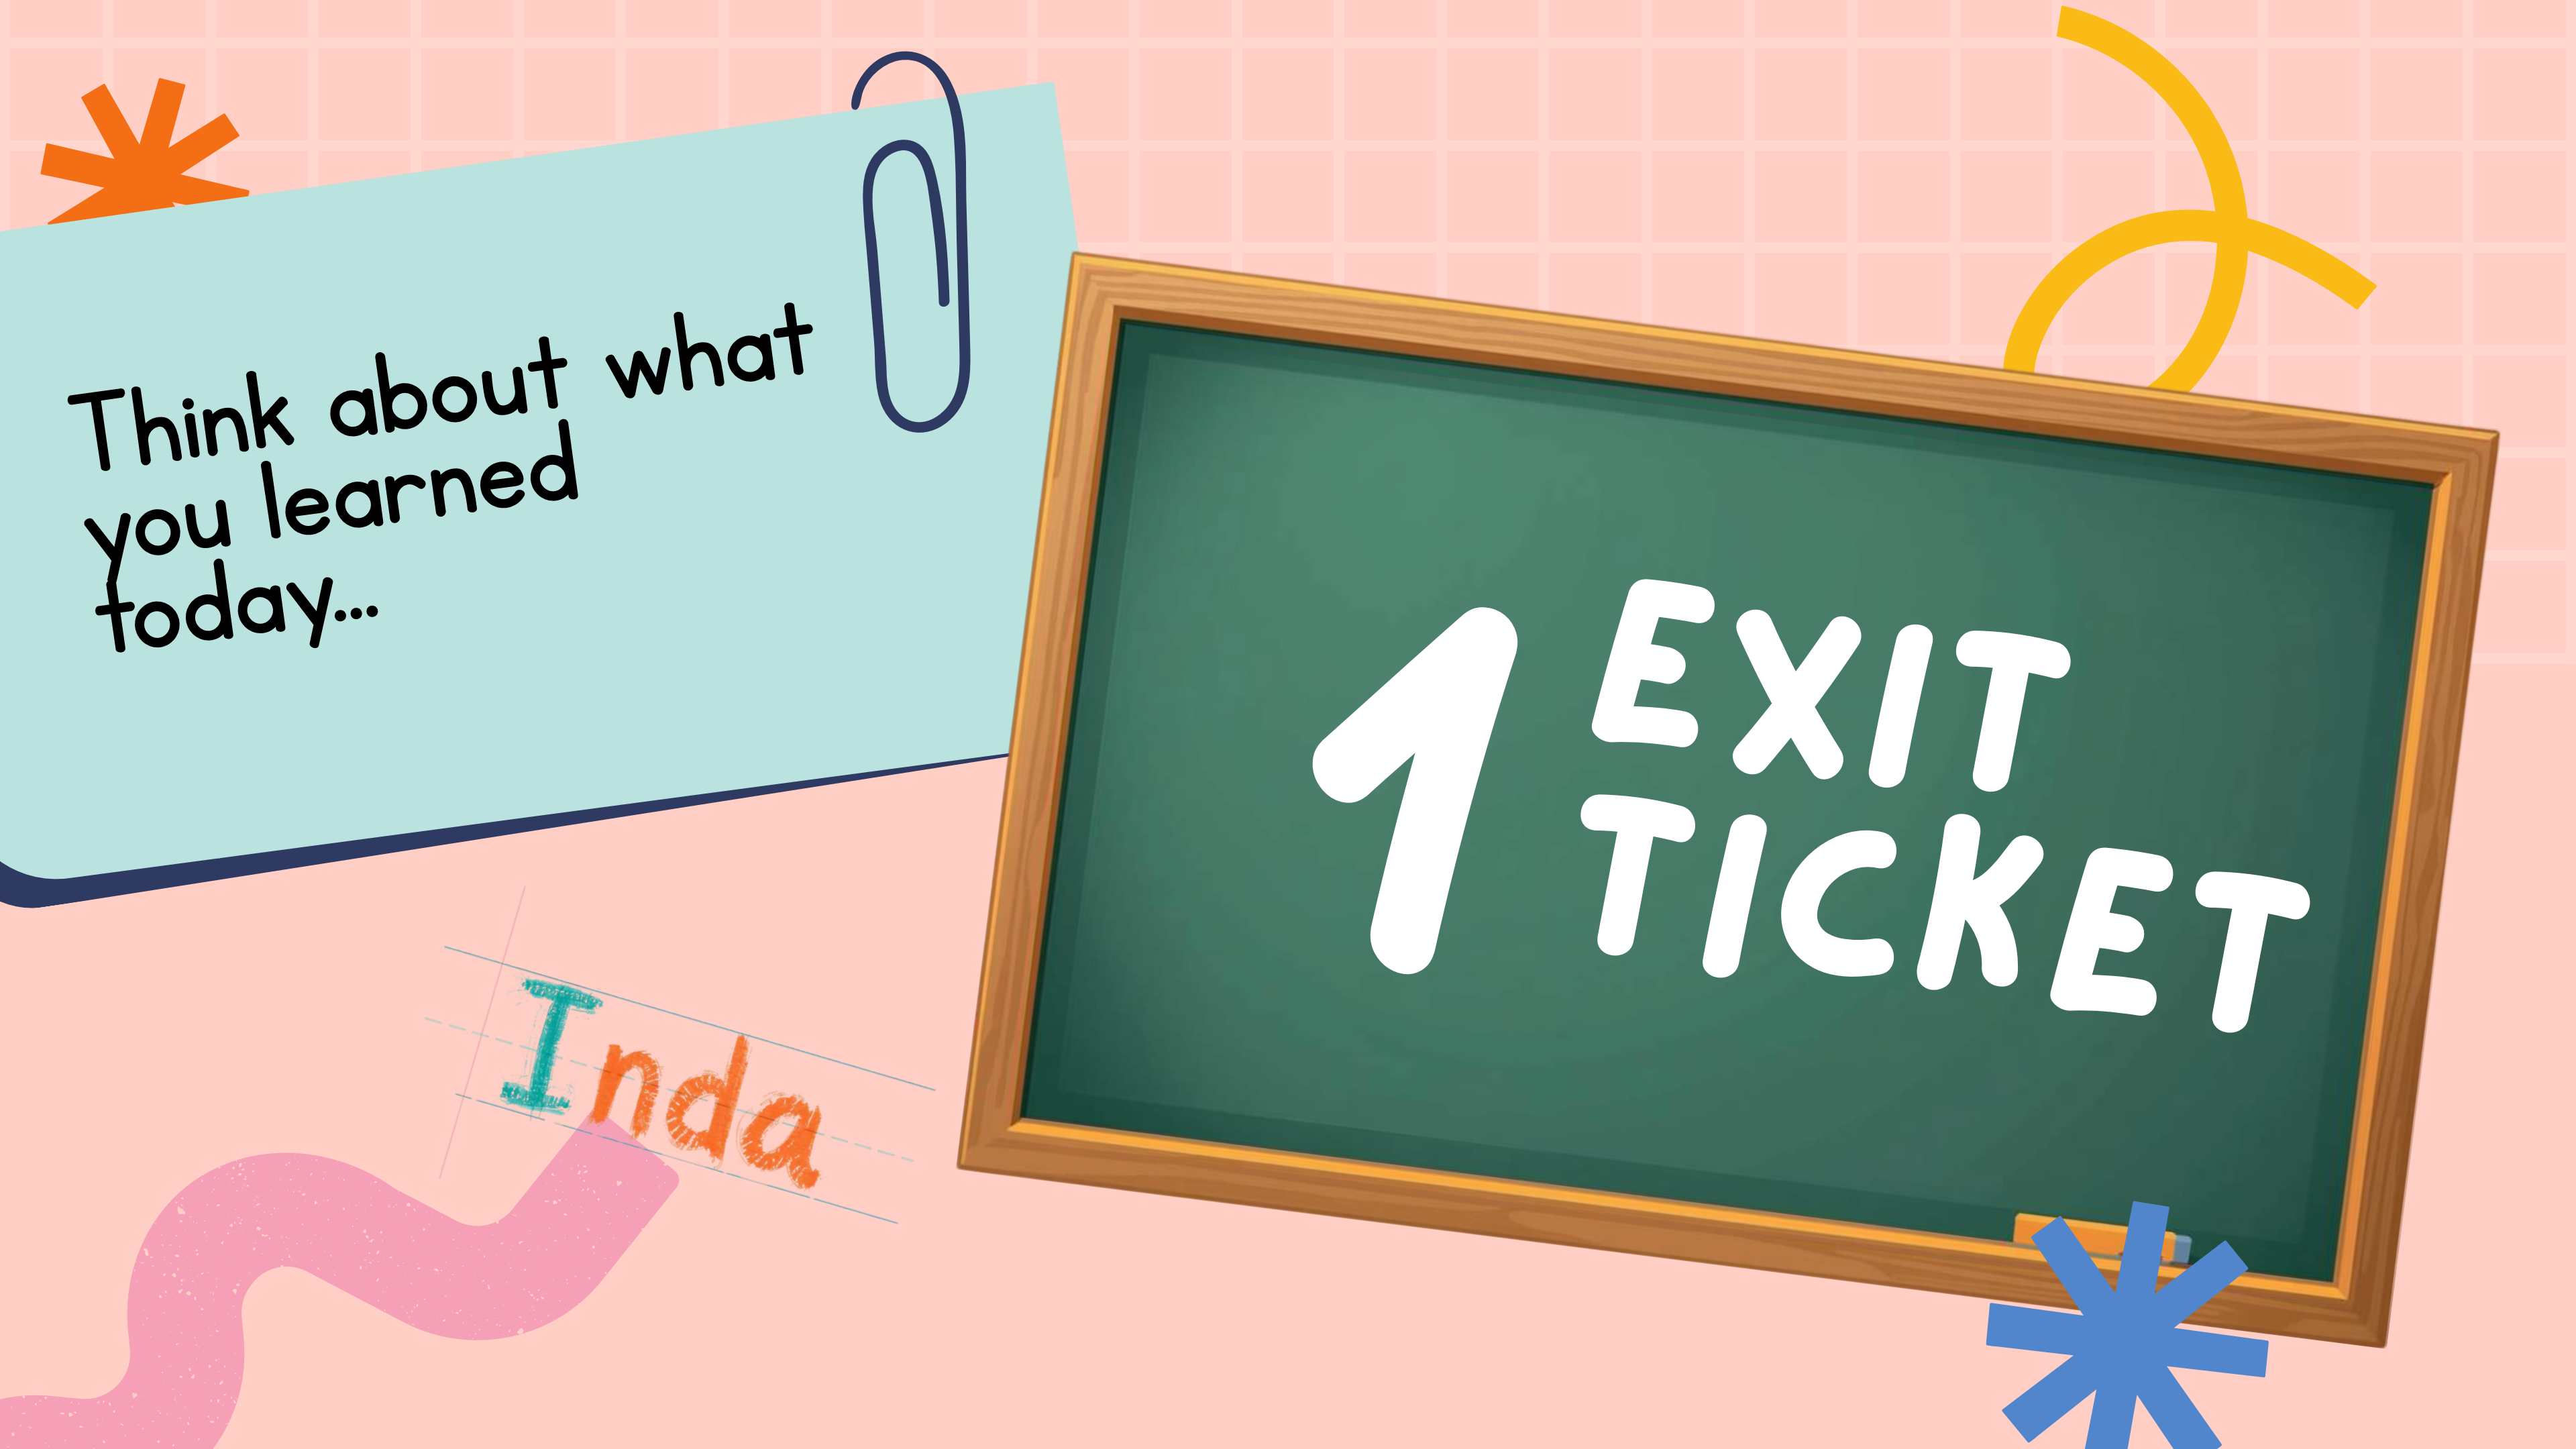

Negative Number: A number less than zero, shown with (-)

Zero: The middle point, neither positive nor negative

Number Line: A line showing numbers going both ways from zero

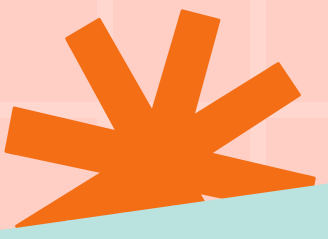

Remember these words!

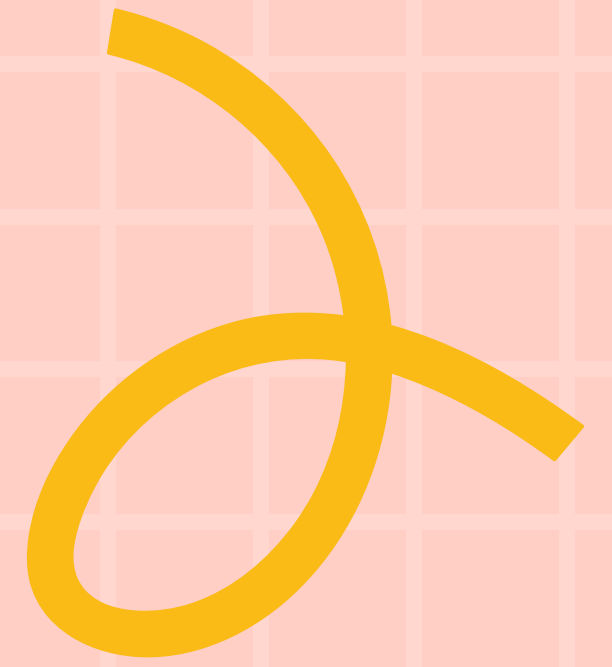

Think about what
you learned
today...
