

**MAKE A NIGHT LIGHT!
FUN DIY ELECTRONICS
& CRAFT
PLANRS ACADEMY |
SESSION 1 | GRADE 1**

Meet Our Story Friend

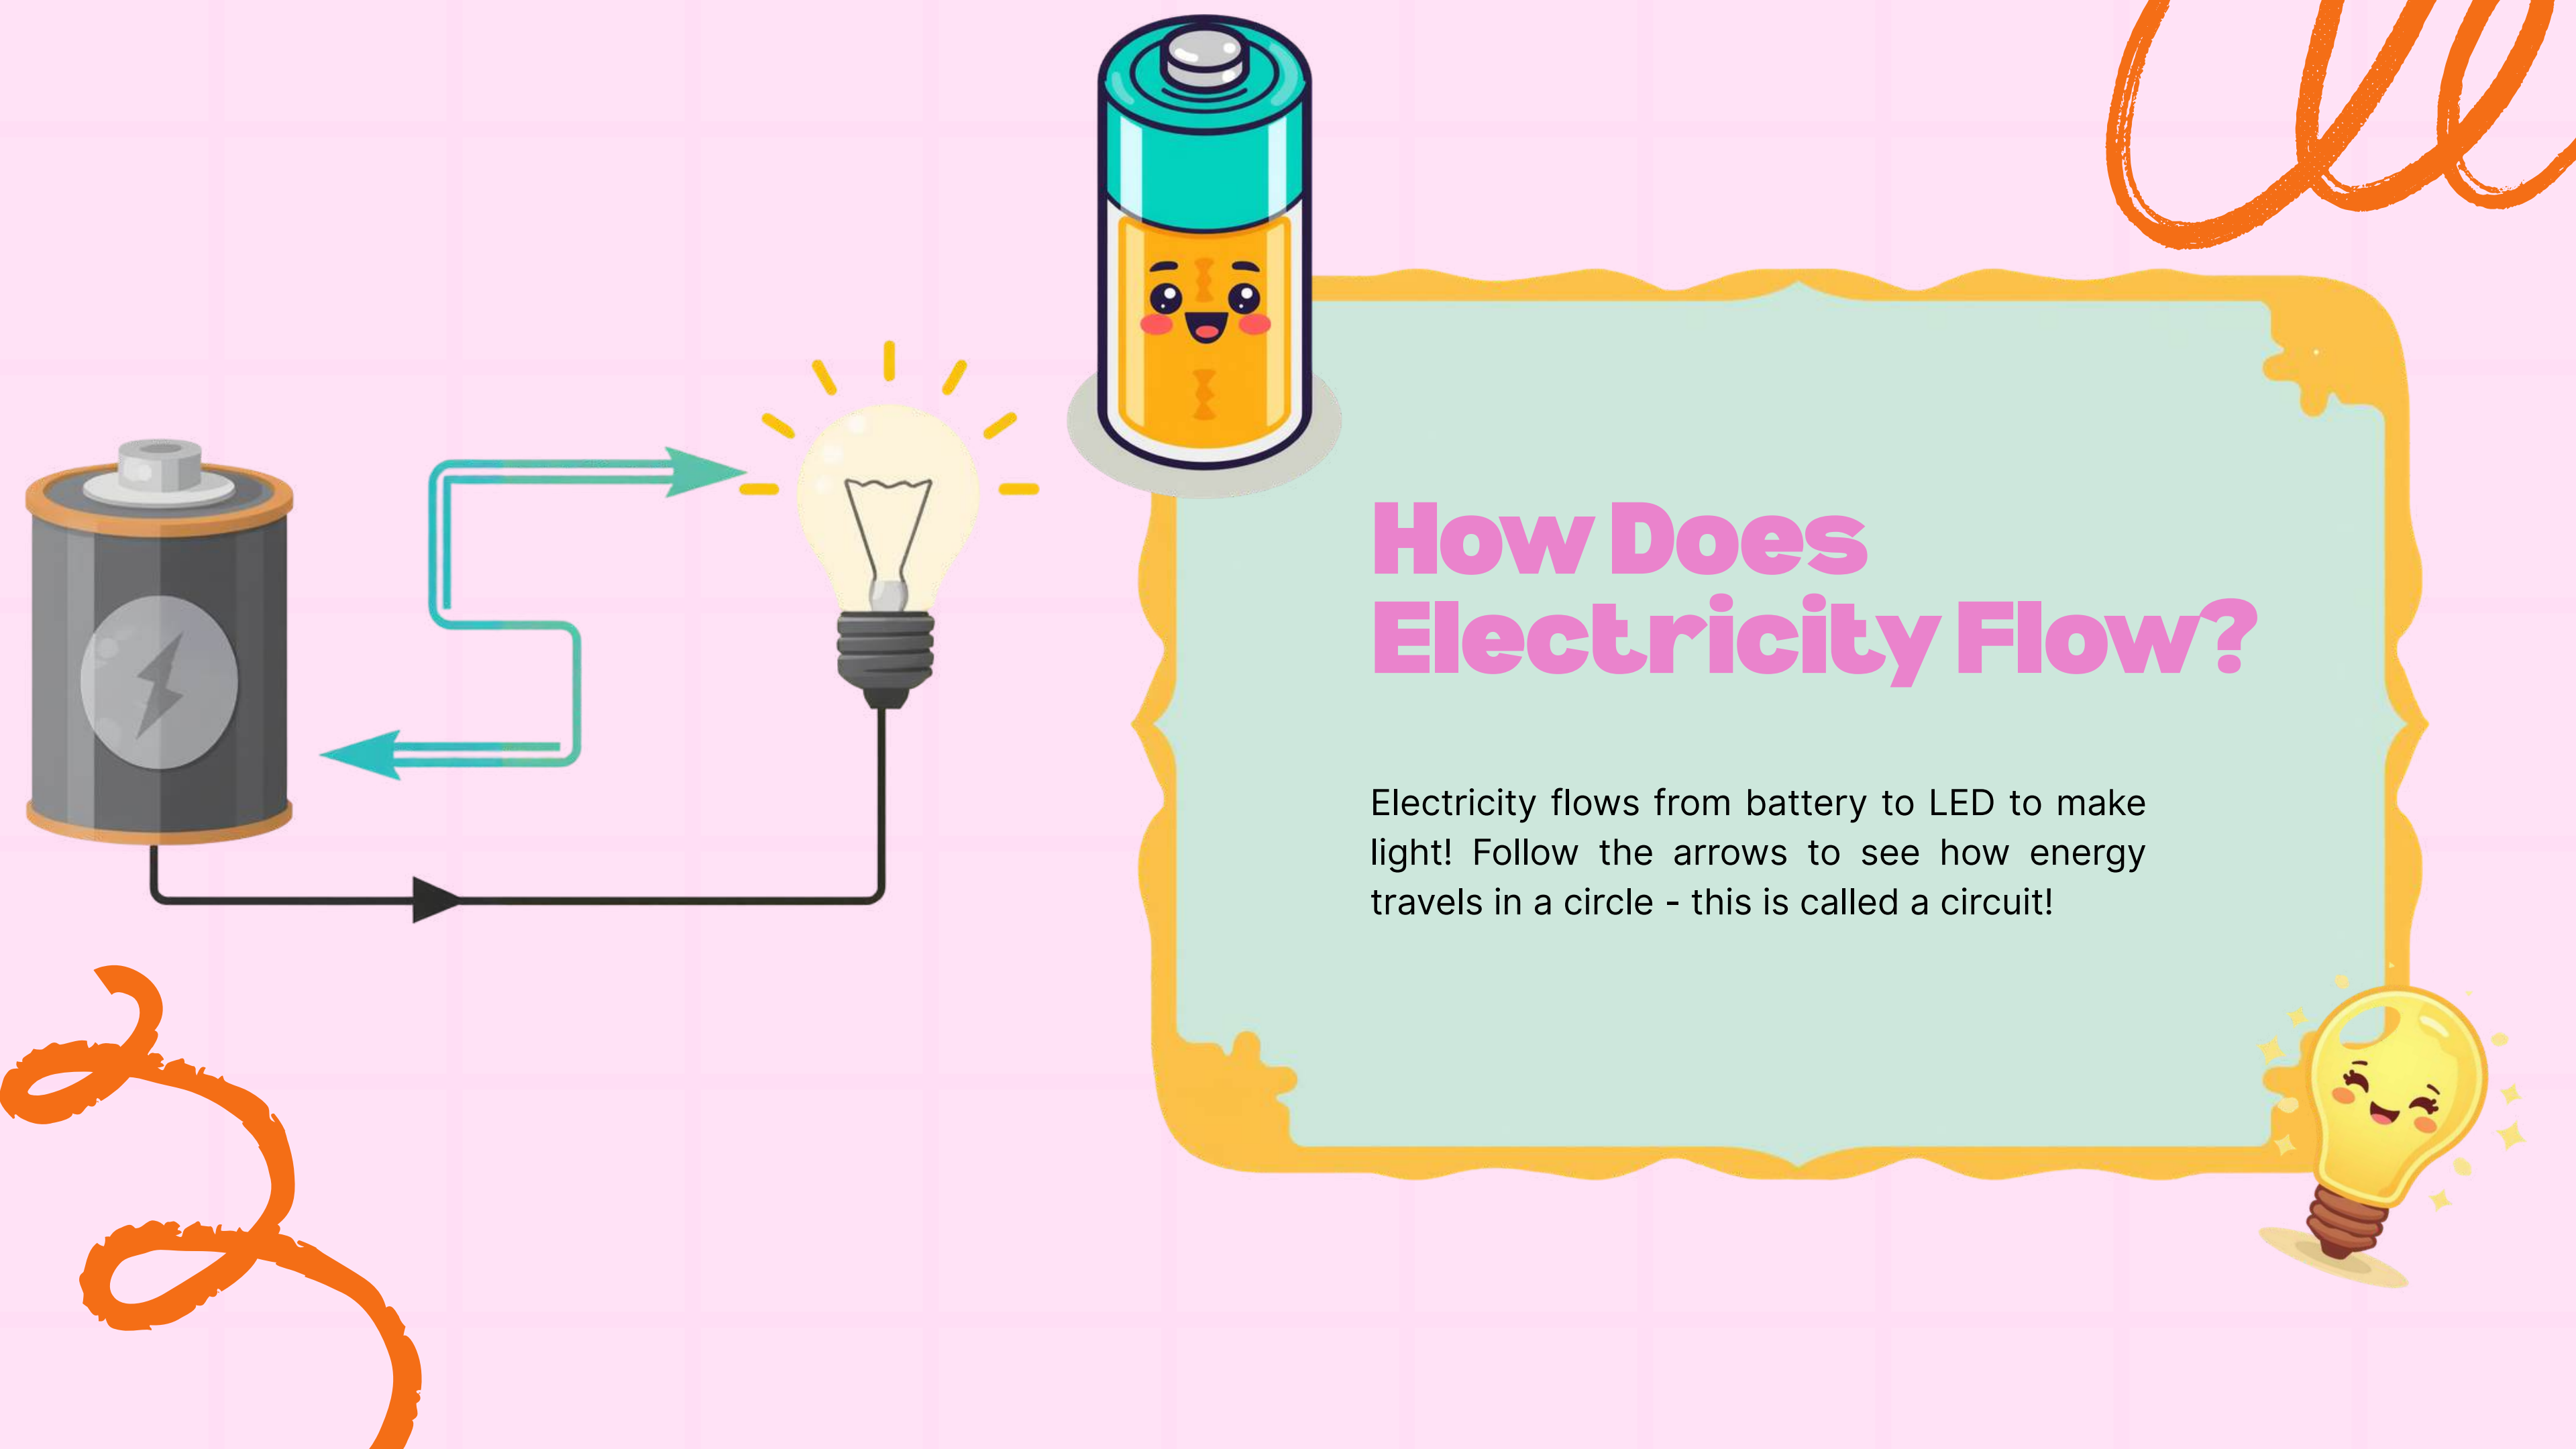

“Small Priya was scared of the dark at night, but she found comfort in the glow of Deepavali diyas and Jugnu fireflies. Today, we help Priya "let that light come" by making our own night lights ”

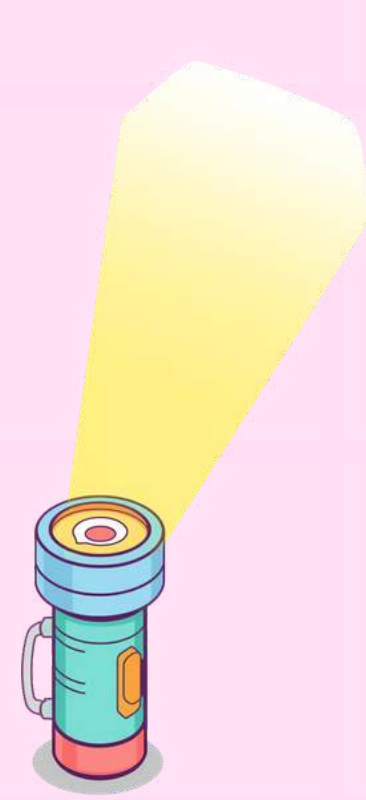

What Makes the Light Glow?

"The battery gives power to the small LED. Connect the long leg to + and short leg to -."

See How Light Passes Through!

Transparent Sweet Box

Translucent Paper Chai Cup

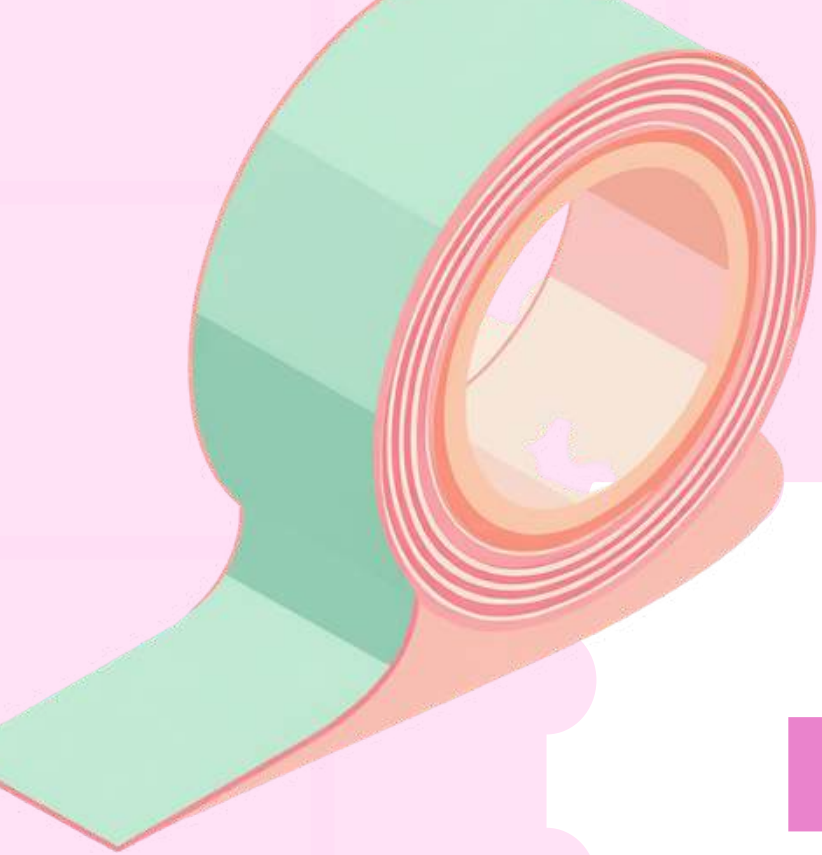

Opaque Jar - Light Cannot Pass!

— Light behaviour —

Light passes through some things!
Let's see which materials let light shine through and which ones block it.

Sweet box box Chaii cup blocking hart

Keeping It Safe!

Always follow these safety tips when making your night light. Safety first, bachche!

**Cover with tape
(Insulation)**

**No big batteries
or tools**

**Keep hands dry and
clean**

Clever fixTime! Upcycling Materials

Old Horlicks Jar

Transparent Sweet Box

Rangoli Paper

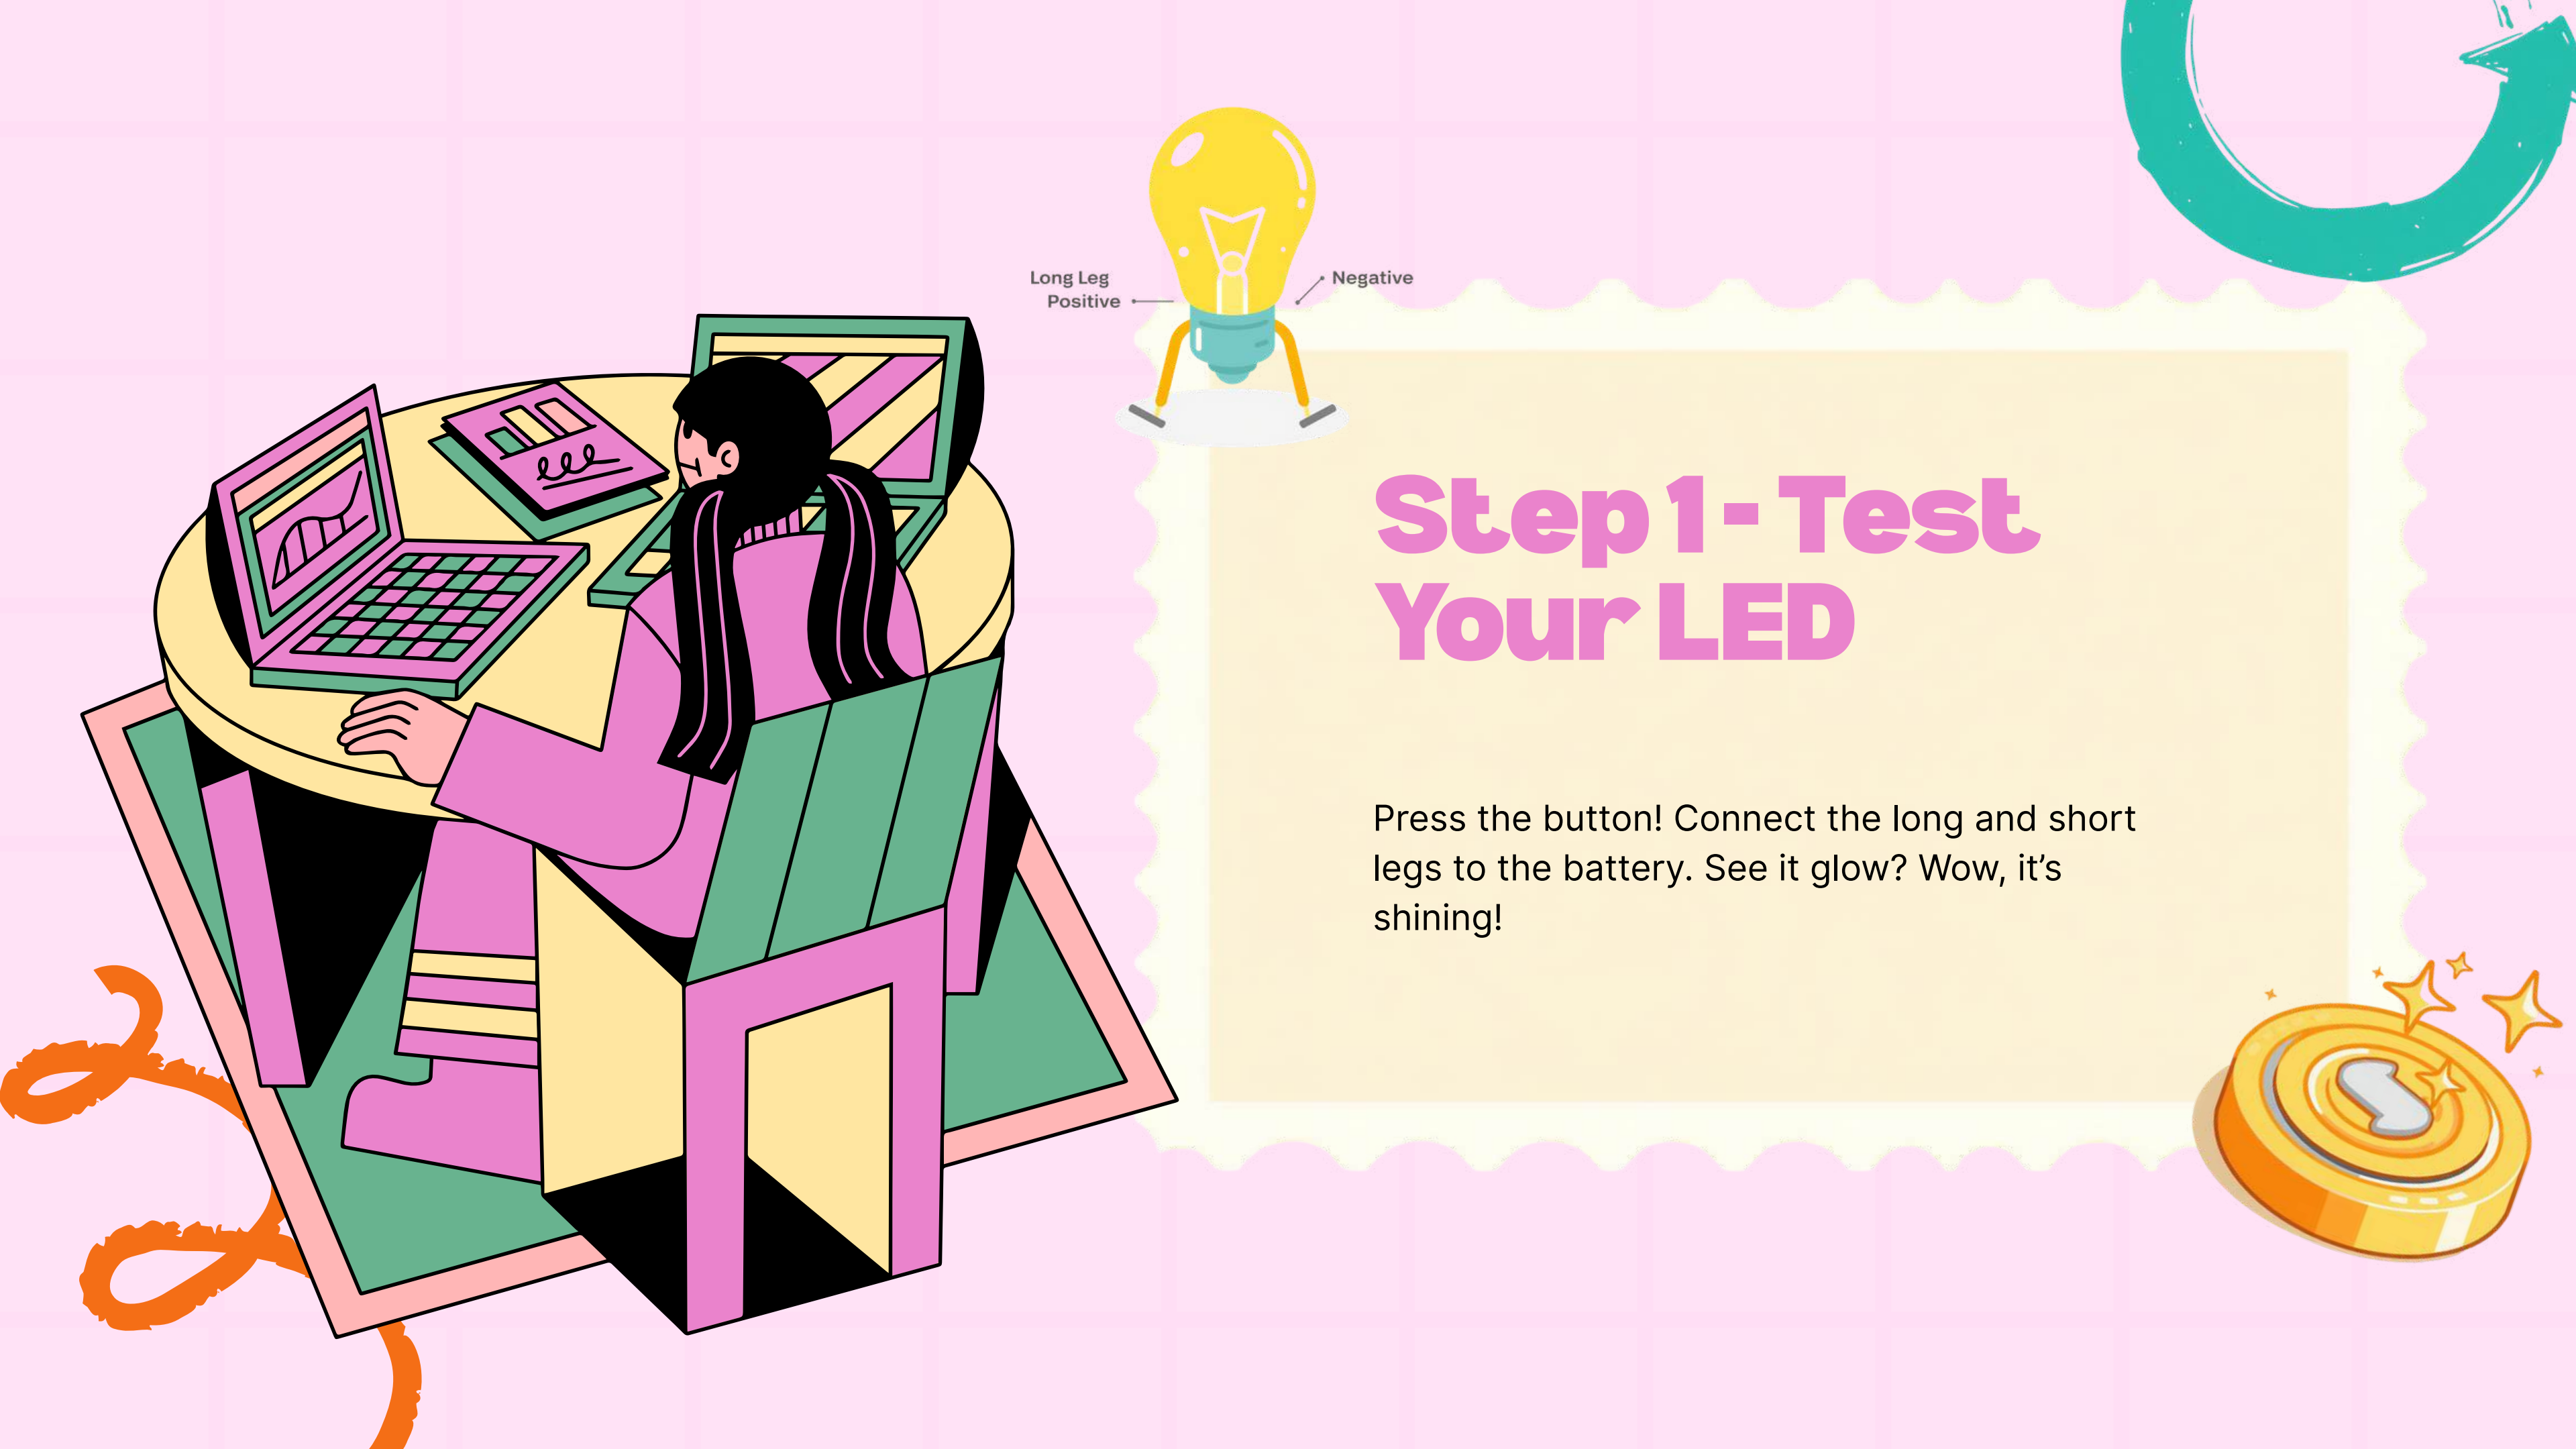

Paper Tea cup

Colorful Stickers

Long Leg
Positive

Negative

Step 1- Test Your LED

Press the button! Connect the long and short legs to the battery. See it glow? Wow, it's shining!

Step 2 - Decorate Your Jar!

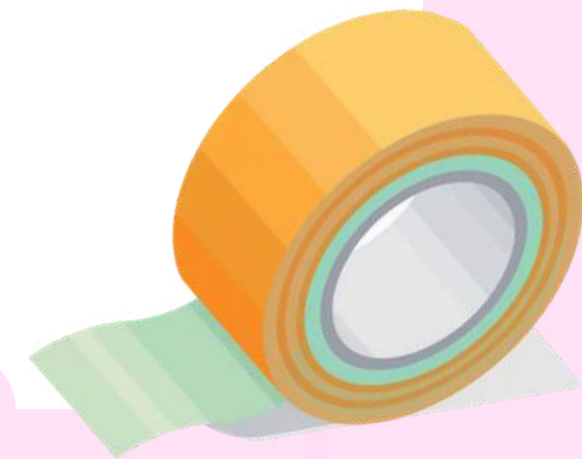

Stick colorful patterns like Diwali Rangoli on your jar! Use paper cut-outs, stickers, and bright colors. Make it YOUR special night light!

Step 3 - Fix the Light Inside

Place LED and battery inside jar safely. Tape the connections tight! Close the jar and make it neat. "Attach it carefully!"

The Magic Moment!

Turn off the lights and see the magic glow!
Your night light is ready to shine! Wow! How beautiful !

Quiz Time! Which One Lets Light Pass?
