

# MAKE YOUR OWN PAPER!

## A Journey into DIY & Sustainability

### ***The 'Waste Paper' Story:***

*Have you ever wondered what happens to your old school notebooks and newspapers? In India, we give this "Waste paper" to the Kabadiwala! This is the first step in a magical cycle where old paper becomes new again.*

### **Why Do We Recycle?**

Saving trees means saving our home! When we recycle, we help keep our Earth happy and protect nature.

---

**"Small hands can make a big difference!"**

---

# Let's Get Started!

---

## 1 The Big Tear

Before we can make new paper, we must break down the old!

- Take your old newspapers and notebooks.
- Use your fingers to tear the paper into tiny pieces.
- **Remember:** The smaller, the better! Can you make them really tiny?

## 2 Making the Mush ('Doll')

Now it's time for some splashy science!

- Add warm water to your bits of paper.
- Use your hands to mix and mash "**With force!**"
- Watch as the paper bits turn into a soft, squishy mush called '**Doll**'.

## Transforming the Mush

---

### 3 The Press & Shape

This is where your paper takes its new form.

Place your squishy doll onto a strainer (channi) or a flat cloth. Press the mush flat—press it down **"With force!"** using your hands. Squeeze out all the excess water. Feel the texture of your new creation!

### 4 Drying & Cleanup

Patience is the secret ingredient!

- Place your flat paper in a spot with plenty of sunlight.
- Watch it dry like magic!
- Don't worry about the mess—clean up your workspace so science stays fun for everyone.

## WHY SAVE TREES?

---

### The Indian Story: Protecting Our Heritage

In India, we have a beautiful history of loving nature. Have you heard of the **Chipko Movement**?

***The Chipko Movement:***

*Brave people helped save many trees by hugging them to protect them from being cut down!*

### Where Does Our Paper Come From?

Paper comes from trees ('Ped'), like those found in our magnificent Western Ghats and the Himalayas!

- Recycling paper means fewer trees need to be cut down.
- By saving trees, we save the beautiful forests and all the animals that live there.

## Fun Future Ideas!

---

Your handmade paper is ready for amazing creations! Let your imagination fly.

### **Art Time**

Draw or paint a beautiful landscape on your textured paper.

### **Gift a Card**

Make colorful cards or bookmarks for your family and friends.

### **The Rangoli Touch**

Decorate your recycled paper with beautiful Rangoli patterns to make it extra special!

**What will you create next? Whatever you choose, it will be something beautiful to share!**

**Great Job!**

## **YOU ARE A GREEN HERO!**

You have successfully learned how to turn waste into something wonderful. By making your own paper, you have taken a step toward protecting our Earth.

### **Your Conservation Checklist:**

- ✓ I can tear and mash paper to recycle it.
- ✓ I know that recycling saves trees in the Himalayas and Western Ghats.
- ✓ I will share the story of the Chipko Movement with my friends.

### **Let's Save Trees Together!**

*Show your family and friends your creation. Do you have any questions for your teacher?*
