Why Teamwork Matters

Recap: When things go wrong without checking work

Imagine your school project went wrong because no one checked the final report before submitting it to the teacher.

How can teammates help each other so mistakes don't happen?

Working together means catching mistakes early, helping each other improve, and creating something better as a team!

What is a Pull Request?

Like a Panchayat Proposal

Ask your committee to approve a new rule before it becomes final.

Real Example

Adding 'Super Over' feature to your Gully Cricket app!

How It Works

Your team reviews and approves changes before they go live.

The Reviewer's Eyes Checklist

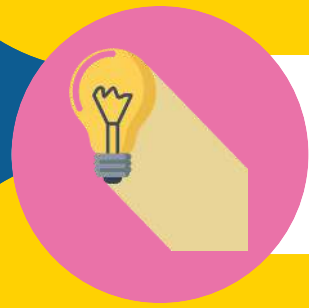

Clarity

Is the change easy to understand?

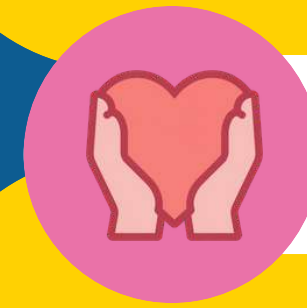

Correctness

Does it fix the problem or add the right feature?

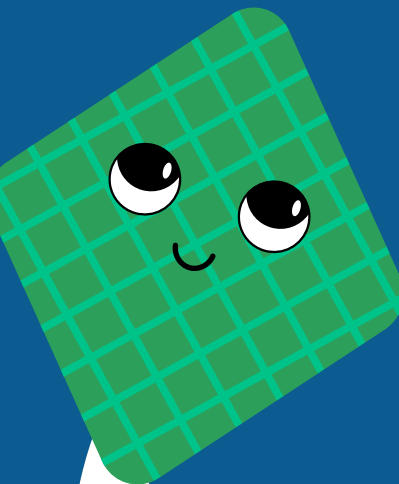

Understanding

Look for these three things when reviewing code!

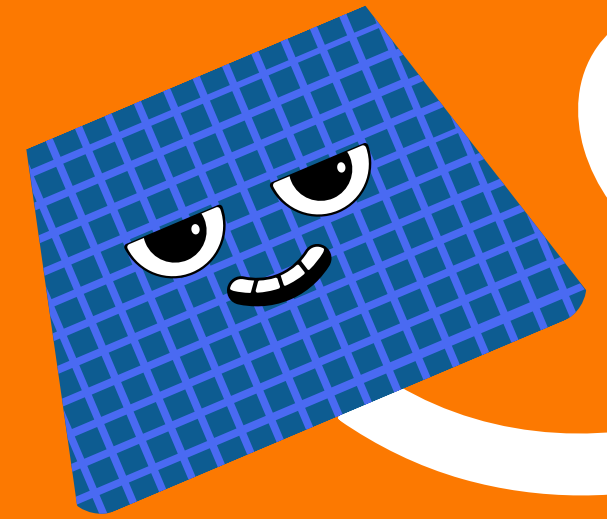

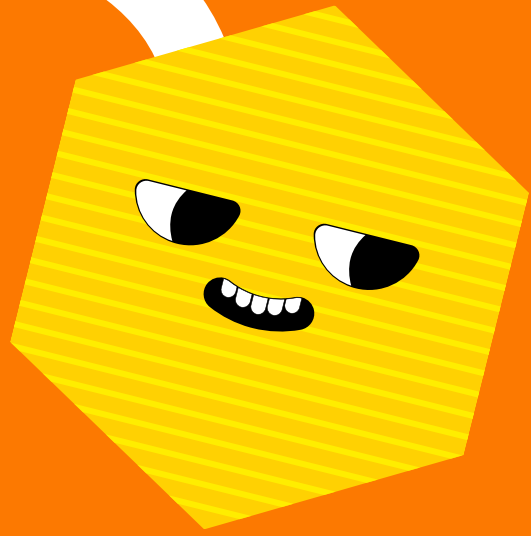

Kindness

Is the feedback polite and helpful?

Activity: The Peer Review Circle

Write Steps

Write clear steps to make Masala tea– be specific!

Swap Papers

Exchange your instructions with a partner nearby.

Review Partner's Work

Check for clarity, correctness, and kindness.

Give Kind Feedback

Share helpful suggestions to improve their steps!

Good vs Bad Review Comments

"This is wrong."

Priya - 12 y.o

"Could we try adding a check here to avoid errors?"

Arjun - 11 y.o

"I noticed this might cause an issue. What do you think?"

Meera - 12 y.o

suggestions

The Reviewer's Eyes Checklist

Clarity

Is the change easy to understand?

✓ Clear

Correctness

Does it fix the problem or add the right feature?

✓ Correct

Kindness

Is the feedback polite and helpful?

✓ Kind

The Rule of Kindness in Reviews

"Review the code, not the coder."

Focus on helping improve the work, not criticizing the person who wrote it.

Use Polite Language Always

Say "Could we try..." or "I noticed that..." instead of "This is wrong."

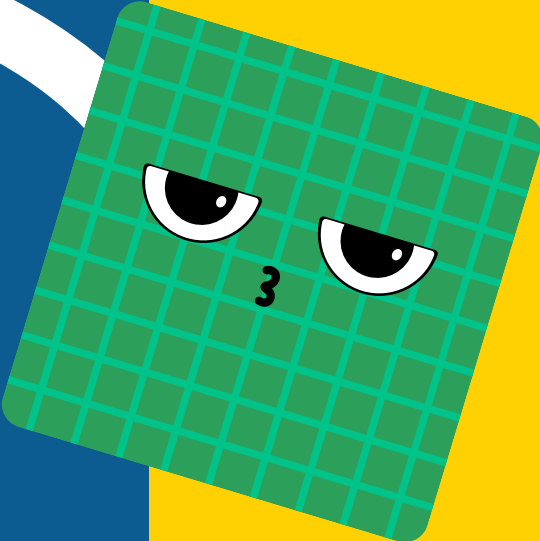

Be Clear and Kind Together

Give helpful solutions, not just problems. Kindness makes teamwork fun!

The Reviewer's Script

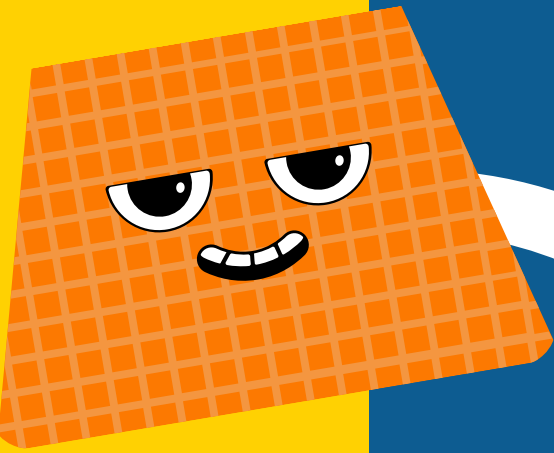

I noticed that...

Start with an observation to open discussion gently.

Could we try...

Suggest alternatives without demanding changes.

What do you think about...?

Always appreciate your teammate's effort!

"Thanks for your work on this!"
