

Music Instrument from Waste

Welcome & Warm-Up:

The Body Percussion

Orchestra

Our body is our first musical instrument!

Clap your hands! Pat your knees! Stamp your feet!

Click your tongue!

Has anyone tapped a box at home and made it a
drum? Wah!

Story Time: Riya and the Noisy Kitchen

Sound happens when something shakes fast — that's called **VIBRATION**!

One day, Riya walked into the kitchen and heard so many sounds! Tap-tap went the spoon on the steel thali. Clang-clang went the lid on the pot. Dhum-dhum went her hand on the dabba. Riya wondered — why do things make sounds when we hit them?

Sound Demo: Empty vs

Filled Bottle

Listen and Learn About Vibration!

Empty Bottle

Empty bottle sounds quiet.
Less vibration inside!

Filled Bottle

Filled bottle sounds LOUD!
Rice or dal inside shakes and
vibrates more!

Plastic Bottles

Rice, Pebbles, Newspaper

Steel & Rubber

Steel Dabbas, Rubber Bands

Paper & Caps

Cardboard Tubes, Bottle Caps

The Sound Hunt: Exploring Materials

Discover What Sounds Different Objects Make!

Pick any 2 items! Tap, shake or blow. What do you hear? Describe the sound to your friends!

Step 1

Take an empty, clean plastic bottle

Step 2

Put a handful of rice, dal or pebbles inside

Step 3

Close cap tightly, shake & decorate!

Make Your Own Shaker!

Turn waste into music with these easy steps!

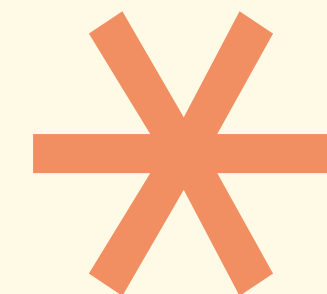

Safety first! Make sure the cap is tight so nothing spills. Ask an adult for help if needed. Now shake and enjoy your music!

Shake Along to the Music!

**Let's shake our instruments to
our favorite songs!**

Shake along to 'Twinkle Twinkle Little Star' and
'Johnny Johnny'! Follow the rhythm and have fun!
Very good ! Well Done !

Point 01

Sound is made by shaking or hitting things – that's vibration!

Point 02

Different materials make different sounds – try it!

Point 03

Everyday things can become musical instruments!

Key Concept Recap:

Sound Comes from

Vibration!

Remember These Important Ideas!

Sound happens when things shake fast – this is called VIBRATION! Let's remember what we learned today about making music!

Blowers

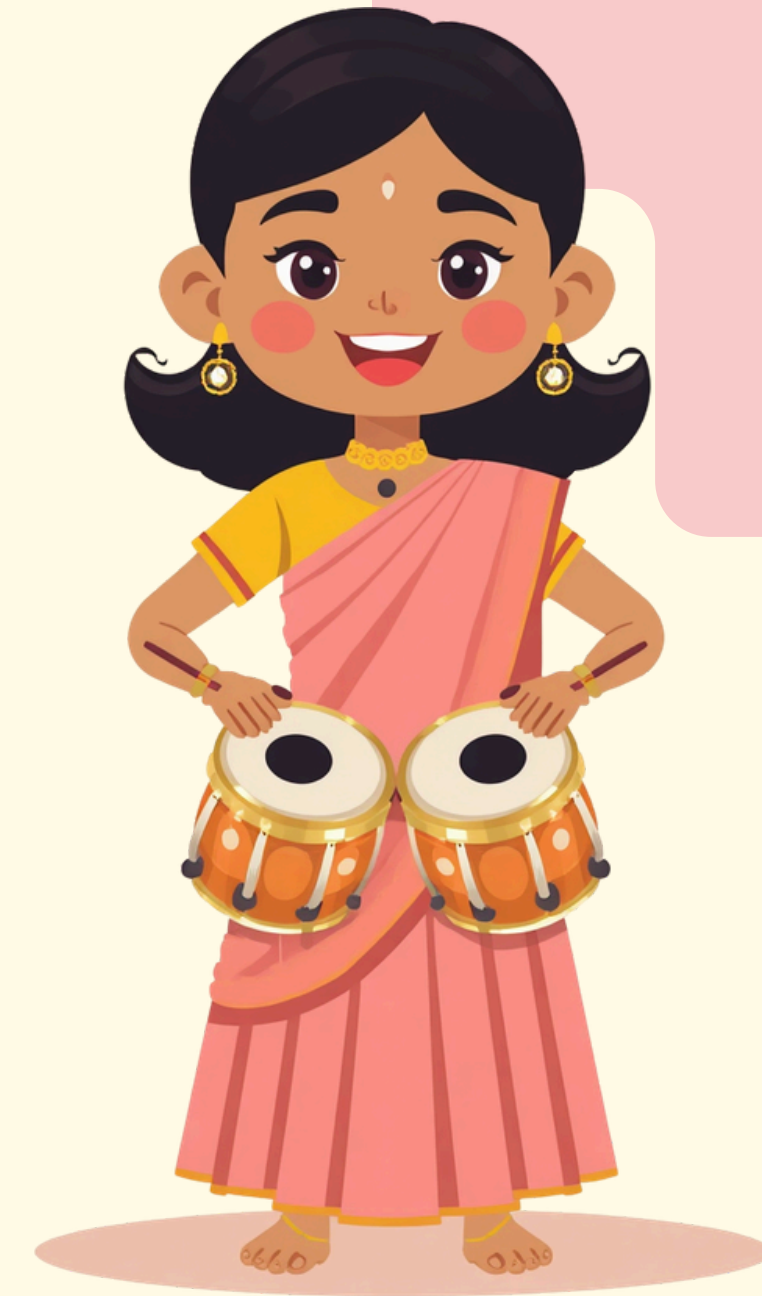

Bansuri & Shehnai — You blow air to make beautiful sounds!

Shakers

Ghungroo & Manjira — You shake them to make jingling sounds!

Tappers

Tabla & Dholak — You tap them to make drum beats!

Indian Musical Instruments Around Us

Music is everywhere in India — in festivals, homes and temples!

From the rhythmic beats of drums to the melodious sounds of flutes,
Indian instruments fill our lives with joy and celebration!

Caring for Earth by Reusing Waste

Reuse Waste Materials to Make Music!

Help our Earth by turning waste into music! Kabadiwala collects old things, Dadi uses biscuit tins as drums. Remember: "No Waste , waste is banao!" Make something beautiful from trash!

Shakers

You shake them! Like our bottle shaker with rice inside.

Tappers

You hit them! Like dholak, tabla, or steel thali.

Blowers

You blow into them! Like bansuri or paper tube flute.

Types of Instruments We Made Today

Three Fun Ways to Make Music!

Today we learned that instruments can be grouped by how we play them. Let's see what types we discovered!

You Are a Music Maker and Earth Helper!

You made music with your own hands! You helped the Earth by reusing waste! Wah! Very good Well Done !

Thank you for making
music with us today!
