

ROTTING & DECOMPOSITION — NATURE'S RECYCLERS

THE MYSTERY OF THE DISAPPEARING LEAF

WHERE DID THE LEAF GO?
LET'S FIND OUT!

One day, a mango leaf fell in the aangan. Two weeks later, it was almost gone — turned into dark, crumbly soil! What happened to it? Who made it disappear? Let's discover the amazing mystery!

MEET NATURE'S SUPERHEROES: BACTERIAL BATTALIONS

Bacteria are tiny helpers breaking dead things. They help turn banana peels into soil. These microscopic superheroes work day and night to clean up nature!

Let's meet these amazing tiny workers!

MEET NATURE'S SUPERHEROES: MOLD & FUNGI

Fungi love damp places like rainy season logs. They help break down old things and turn them back into soil!

(mushrooms) grow on wet wood, and mold appears on stale roti.

Safety tip: Look with your eyes, don't touch with your hands!

MEET NATURE'S SUPERHEROES: EARTHWORMS

Earthworms live in wet soil and help mix the earth. They are amazing soil engineers who dig tunnels and make the ground healthy for plants to grow!

Wow, look at that busy worm go!

THE SORTING GAME — WET WASTE VS DRY WASTE

ITEMS TO SORT

- Leftover dal
- Plastic chips packet
- Coconut shells
- Old newspaper
- Broken glass bangle

TWO BINS: BLUE & GREEN

Where does each item go? Let's play!

SORTING GAME ANSWERS

✓ GREEN BIN (WET WASTE)

- Leftover dal → Green
- Coconut shells → Green

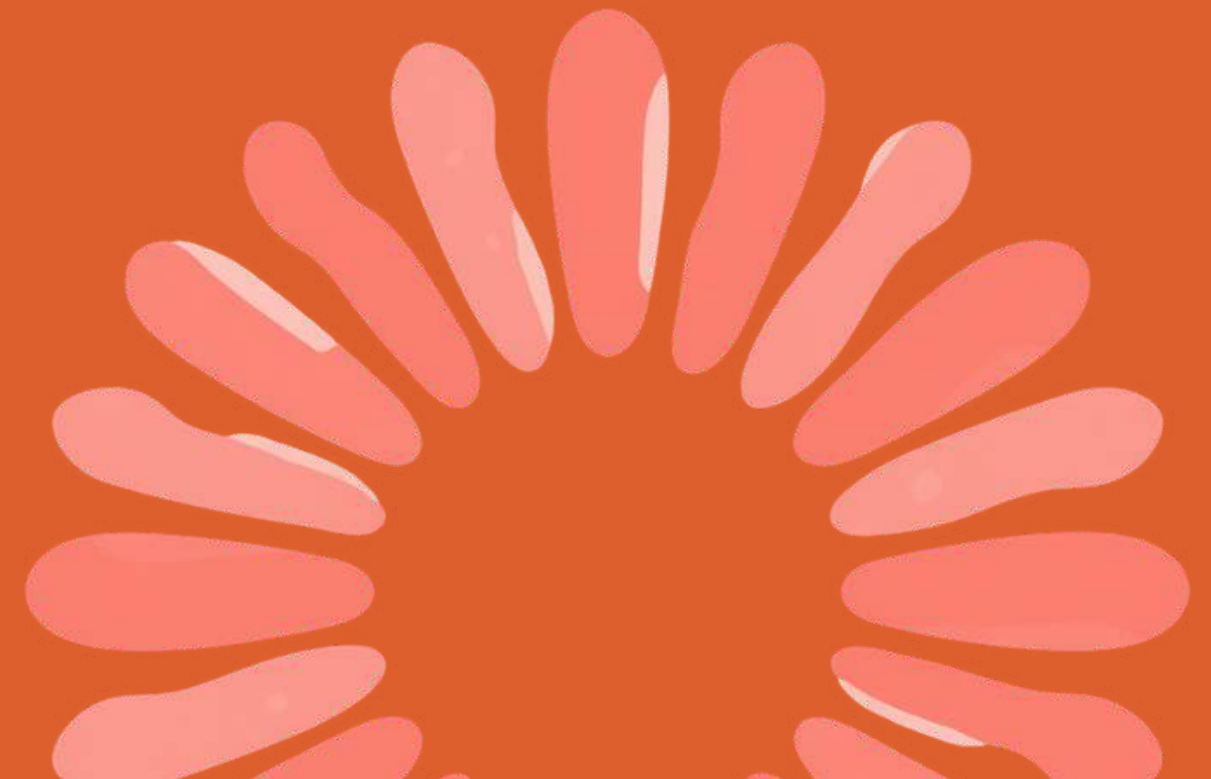

✓ HANDLE WITH CARE

- Broken glass bangle → Blue
(Ask an adult for help!)

✓ BLUE BIN (DRY WASTE)

- Plastic chips packet → Blue
- Old newspaper → Blue

THE MAGIC OF MANURE — COMPOSTING DEMO PART 1

- Get a clay pot from kitchen
- Add kitchen waste (banana peels, Tea leaves , vegetable scraps)
- Put wet waste and dry leaves into the Clay pot

THE MAGIC OF MANURE — COMPOSTING DEMO PART 2

- Cover pot with jute sack
- Keep in shaded balcony or garden spot during monsoon
- Keep the pot moist and wait for magic to happen!

THE MAGIC OF MANURE — COMPOSTING DEMO PART 3

- Dark, rich soil is now ready!
- Use Manure for plants in home garden or balcony pots
- This Manure helps plants grow strong and healthy!

WHY DECOMPOSERS ARE NATURE'S HELPERS

We thank them for their hard work! These tiny helpers clean nature, break down waste, mix soil, and turn old things into food for plants.

SAFETY FIRST!

- Always watch decomposers with your eyes only! Do not touch kitchen waste or decomposers with bare hands. Ask an adult to help you when exploring nature's recyclers.
- Stay safe while learning about nature's amazing helpers!

QUICK QUIZ TIME!

Q1. WHAT GOES IN THE GREEN BIN?

- a) Plastic bottles
- b) Banana peels
- c) Broken glass

Q2. WHICH DECOMPOSER LIVES IN SOIL?

- a) Bacteria
- b) (Earthworm)
- c) (Mushroom)

Q3. WHAT IS 'MANURE'?

- a) Garbage
- b) Compost made from waste
- c) A type of plastic bag

QUIZ ANSWERS

1. What goes in the green bin?
2. ✓ b) Banana peels
3. Which decomposer lives in the soil?
4. ✓ b) (Earthworm)
5. What is 'Manure'?
6. ✓ b) Compost made from waste

GREAT JOB!

You are a nature recycler too! Keep helping the Earth by sorting waste and making Manure at home!

THANK YOU & KEEP RECYCLING!

Thank you for learning about Nature's Recyclers! Help your family sort waste and make Manure at home. See you next time!
