

STOCK MARKET BASICS: WHAT IS A SHARE?

What Is Money?

Money is something we use to buy the things we need and want! When you give money to a shopkeeper, you get toys, snacks, or books in return.

Key Point: Money helps us buy things and save for the future!

What Is a Company?

A company is a group of people who work together to make or sell things. For example, a company might make toys, clothes, or yummy snacks! Companies need workers, ideas, and money to create amazing things for us to enjoy.

What Is a Share?

A share is a small piece of a company that you can own. Imagine a big yummy cake — that's the company! When we cut the cake into many equal slices, each slice is like a share. Owning a share means you own a tiny part of that company!

Why Do Companies Sell Shares?

To Grow Bigger
To Build New Things
To Hire More People
Get Better Equipment
Reach More Customers

How Do You Become an Owner?

When you buy a share, you become a part-owner of that company! It's like owning a tiny piece of something big. Even with just one share, you are a real owner and can feel proud of being part of the company's journey.

Shares Can Grow in Value

BEFORE & AFTER

Before: Share price = ₹10

After: Share price = ₹15

If the company does well, your share can be worth more!
This means the money you invested can grow over time.

What Are Dividends?

SHARING THE PROFITS!

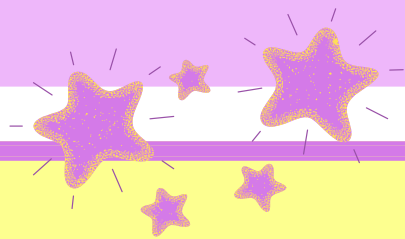

Some companies share their profits with owners. This is called a dividend! If you own shares, you might get extra money as a thank you for being a part-owner. It's like getting a little gift for helping the company grow!

What Is the Stock Market?

A BIG SHOP FOR SHARES!

The stock market is like a big shop where people buy and sell shares. Just like you go to a market to buy vegetables or toys, grown-ups go to the stock market to buy and sell pieces of companies!

How Do People Buy and Sell Shares?

Buying and selling shares is easy! Here's how it works:

1. A person wants to buy shares of a company
 2. They go to the stock market (like a big shop for shares)
 3. They find someone who wants to sell their shares
 4. They exchange money for shares — and now they're an owner!
- It's like trading cards with your friends, but for companies!

Why Do Share Prices Go Up and Down?

Company doing well or not so well
People wanting to buy or sell shares
News about the company or world

Good news = prices go up!
Bad news = prices go down

Fun Facts About Shares!

- ★ The oldest stock market started over 400 years ago!
- ★ Some companies have millions of shares!
- ★ You can own parts of famous companies like toy makers!
- ★

What Have We Learned?

★ Shares = Small Pieces of a Company
★ Owning Shares = Owning Part of a Company
Shares Can Grow & Pay Dividends
Stock Market = Where Shares Are Traded
★ You're a Stock Market Star!
