

BUILDING MY FIRST MINI QUIZ GAME IN SCRATCH

WHAT ARE SPRITES, STAGE & BLOCK CODE?

SPRITES

Sprites are like puppets or actors in a Ramlila show!

They move, talk, and do fun things on screen. 🐼

STAGE

The Stage is the painted backdrop of the puppet show — the background where all the action happens! 🏰

BLOCK CODE

Block Code = Instructions that tell sprites what to do!

● Events

● Looks

● Sensing

PROGRAMMING IS LIKE MAKING MANGO LASSI!

STEP 1: PUT CURD

Start with fresh curd
in your blender. This is
your first step!

STEP 2: ADD MANGO PULP

Pour in sweet mango pulp.
Yummy! This is your second
ingredient.

STEP 3: MIX WELL!

Mix it all up! Follow steps in
the right order. Sequence
matters! 🥭

CODING PALETTE

Choose blocks to snap together here!

- Events – Yellow blocks that START things (like Green Flag!)
- Looks – Purple blocks that make sprites SPEAK and CHANGE
- Sensing – Light blue blocks that ASK questions and LISTEN

Click a block colour to see all its blocks!

YOUR BLOCK BOX!

Think of it like a Lego box — each colour has special pieces!

Pick your block → Drag it → Snap it together!

👉 Try clicking "Events" and find the Green Flag block!

SCRATCH INTERFACE TOUR — WORKSPACE & STAGE

🧱 Building Ground (Workspace)

This is where you snap your code blocks together — like building with Lego bricks!

Drag blocks from the palette and connect them here to write your program.

BUILD YOUR CODE HERE → WATCH IT HAPPEN HERE!

🎭 Live Theater Stage

This is where your sprites act out your code! See Sheru the Tiger move and talk here.

An Indian ancient fort backdrop sets the scene — just like a real stage show!

STEP 1 — GREEN FLAG!

When Green Flag clicked ●

This is a yellow Events block — it STARTS your game! Just like the railway master waves the green flag to start the Vande Bharat train, this block tells Scratch: "Go! Begin now!"

□ Find the green flag block and snap it to your sprite!

"This block starts your game — click the green flag and watch your sprite come alive!"

STEP 2 — SAY HELLO!

Use the purple Looks block to make your sprite speak!

● Looks Block: "Say [Welcome to my Quiz! Let's play!]"

Change the message to: "Welcome to my Quiz! Let's play!"

☐ Tick when done!

Make your sprite greet players with a friendly message! 😊

STEP 3 — ASK A QUESTION

Use the light blue Sensing block:

"Ask [] and wait"

Type your question:

"Which beautiful bird dances
when it rains in India?"

✅ Correct Answer: Peacock

Ask a question and wait for the player's
answer — just like asking Dadi what's for
dinner! 🦚

STEP 4 — SPRITE'S REACTION!

When the player answers correctly, your sprite celebrates!

- Say "Wah! Shabash!" for 2 secs
 - Wait 1 second
 - Say "You are amazing!" for 2 secs
- ☐ Done? Tick the box and show your teacher!

Make your sprite cheer when the player answers correctly! 🎉

MAKE IT YOUR
OWN!

- Change your sprite's colours!
 - Mix and match sprites!
 - Be creative — it's YOUR game!
- Add a 2nd question: Ladoo or Jalebi?
 - Add fun sounds: bicycle bell!
 - Choose Indian fort backdrops

VOCABULARY REVIEW

SPRITE

A character or puppet on the stage — like Sheru the Tiger in your quiz game!

SEQUENCE

Step-by-step instructions in the right order. Also: Stage = background, Blocks = puzzle pieces of code!

TRIGGER

The event that starts your code — like the Green Flag that says "Go!"

HOMEWORK TIME!

SHOW YOUR QUIZ TO YOUR FAMILY!

Share your quiz game with your parents or siblings! Tell them what your sprite says and asks. Show them the Green Flag and let them play!

REMEMBER THIS!

Practice makes you a CREATOR, not just a user! Every coder started just like you. Keep building, keep playing!

THANK YOU & SEE YOU IN NEXT SESSION

Great job today! Keep coding and having fun!
