

Grade 1 Coding

Make a Quiz Game in HTML!

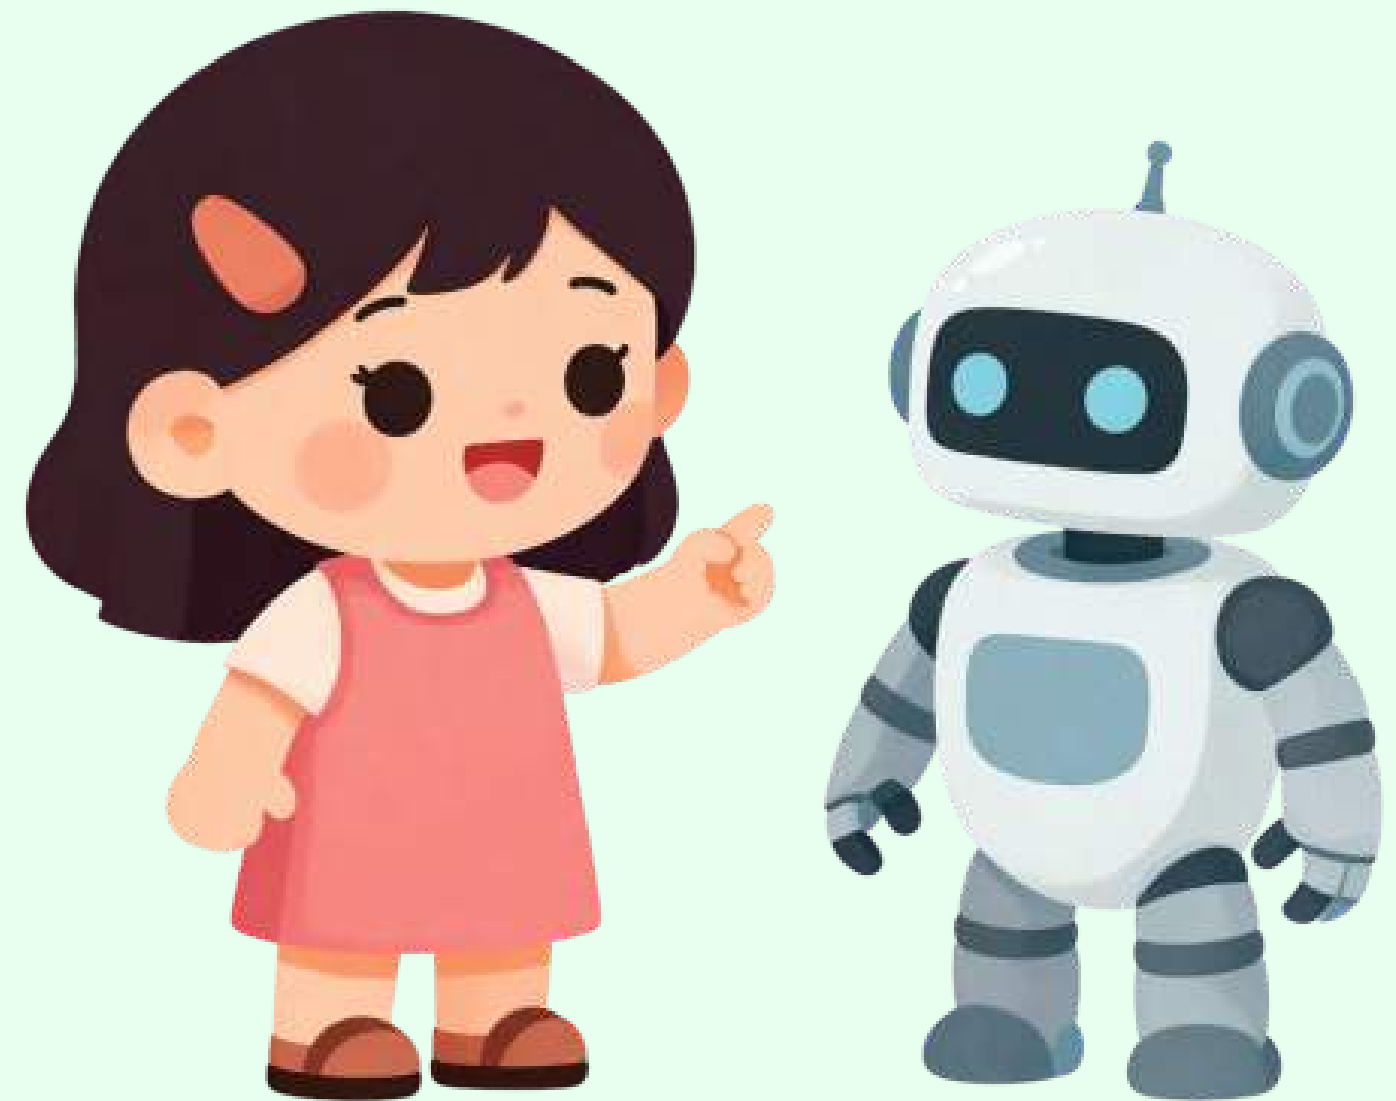

Let's learn to build a fun quiz game!

What is Coding?

Coding is telling the computer what to do using special instructions.

It's like giving step-by-step directions to a robot friend!

What is a Quiz Game?

A quiz game asks you questions
and tells you if your answer is right!

You click on answers and get points.
It's fun and helps you learn!

Introduction to HTML

HTML stands for
HyperText Markup Language

It tells the computer how to show
words, pictures, and buttons
on a webpage.

Building Blocks of a Webpage

Every webpage has parts:

- Headings — big titles
- Paragraphs — sentences
- Buttons — things you click
- Lists — items in order

How Does a Quiz Game Work?

1. A question appears on screen
2. You see answer choices as buttons
3. You click your answer
4. It tells you: Correct or Wrong!

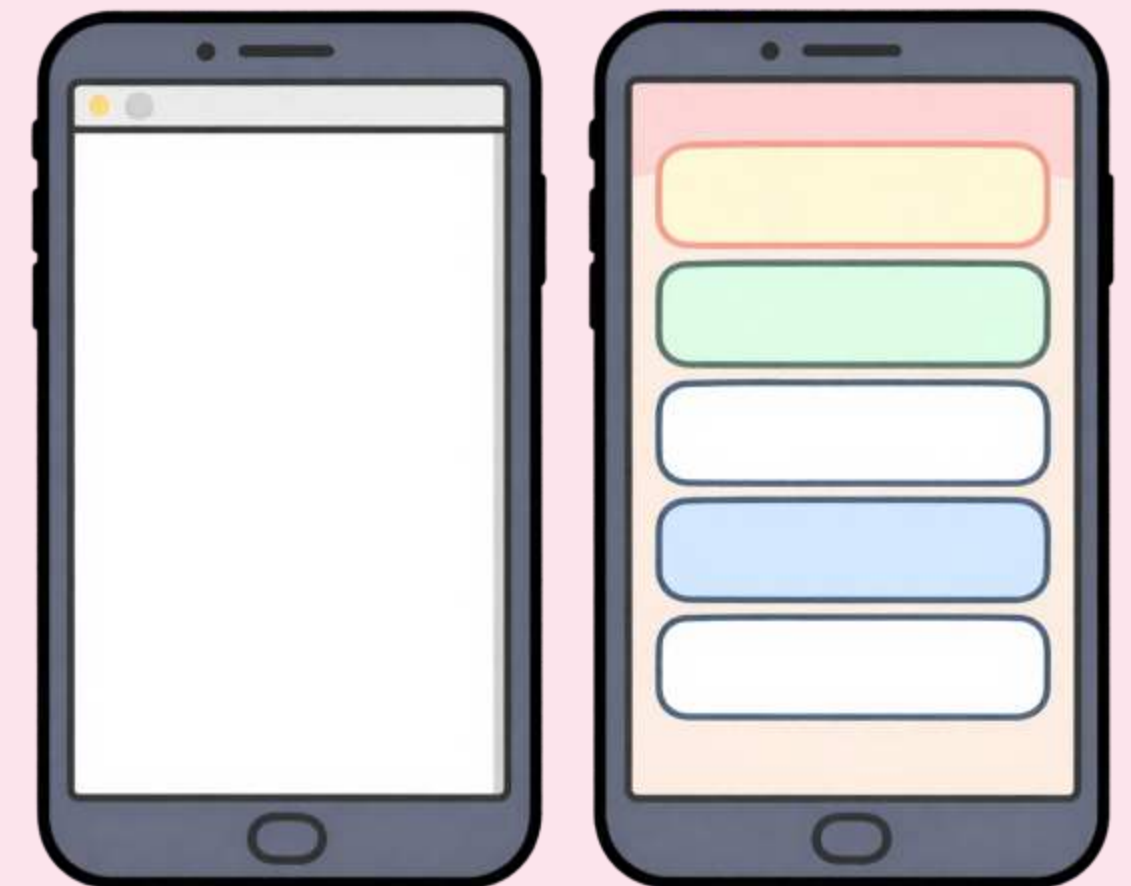

Simple Page vs Quiz Game

Simple Page:

- Just shows text
- You only read it

Quiz Game:

- Shows questions
- You click answers
- It talks back to you!

Step 1: Write Your Questions

Use HTML to write a question:

```
<h2>What is 2 + 2?</h2>
```

Tip: Keep questions short and clear so everyone can understand!

Step 2: Add Answer Options

Add buttons for answers:

```
<button>3</button>
```

```
<button>4</button>
```

```
<button>5</button>
```

Each button is one choice!

Step 3: Check the Answers

When you click a button,
the computer checks if it's right!

Click 4 → 'Correct! Well done!'

Click 3 → 'Oops! Try again!'

Step 4: Show Results

After clicking, a message appears:

✓ 'Great job! That is correct!'

'Not quite — try again!'

This is called feedback.

Step 5: Add More Questions

A quiz needs many questions!

After answering one question, the next one appears.

Question 1 → Question 2 → Question 3

Testing Your Quiz Game

Open your HTML file in a browser!

Check:

- Do buttons work?
- Does feedback show?
- Can you go to the next question?

Summary: What We Learned

- ✓ Coding means giving instructions
- ✓ HTML makes web pages and games
- ✓ Quiz games have questions,
answers, and feedback
- ✓ We built a simple quiz game!

Keep Coding and Have Fun!

Every coder starts with one step
— and you did it!

Try making your own quiz
with new questions.
You are a coder now!

Thank You!

Thank you for learning
to code with us!

Share your quiz game
with friends and family.

Keep exploring and creating!
