

ENTREPRENEURSHIP AND UNIT ECONOMICS YOUR GUIDE TO STARTING A BUSINESS

WHAT IS AN ENTREPRENEUR?

An entrepreneur is someone who starts a business to solve a problem or help others.

Why do people start businesses?

- To make money
- To share something special
- To help others in their community

Think about it: What business would YOU like to start?

FINDING BUSINESS IDEAS

Problems to Solve

Thirsty people need drinks

Friends want fun crafts

Pets need care and toys

Tips to Find Ideas

Look around you daily

Notice what people need

Ask friends and family

**WHO ARE YOUR
CUSTOMERS?**

WHAT IS UNIT ECONOMICS?

UNDERSTANDING COSTS PER ITEM

Unit economics means looking at how much it costs to make ONE thing you want to sell. Before you can earn money, you need to know what you spend!

LEMONADE EXAMPLE

To make one cup of lemonade, you need lemons (₹4), sugar (₹3), water (₹1), and a cup (₹2). Total cost = ₹10 per cup!

HOW TO PRICE YOUR PRODUCT

Cost to Make One Cup:

- Lemons: ₹4
- Sugar: ₹3
- Cup: ₹3
- Total Cost: ₹10

WHY ADD EXTRA?

Selling Price: ₹15

Profit per cup: ₹5

The extra ₹5 helps you earn money and grow your business!

WHAT IS REVENUE?

Revenue is the money customers pay when they buy your product or service.

It's the total amount of money that comes into your business from sales!

Think of it as the cash that flows in every time someone buys from you.

Example: Selling 5 cups of lemonade at Rs. 15 each = Rs. 75 revenue!

WHAT ARE COSTS?

1. INGREDIENTS

Lemons, sugar, water —
everything you need to make
your product costs money!

2. SUPPLIES

A table, pitcher, or craft tools —
things you use again and again to
run your business.

3. EQUIPMENT

Cups, napkins, bags —
items you need to serve or
package your product.

WHAT IS PROFIT?

THE SIMPLE MATH

Profit is the money you keep after paying for everything! Use this simple formula: Profit = Revenue - Costs

LET'S CALCULATE!

Example: You sold lemonade and earned Rs. 75 (Revenue). You spent Rs. 50 on ingredients (Costs).
Your Profit = Rs. 75 - Rs. 50 = Rs. 25!

THE BREAK-EVEN POINT

Break-even means you have earned back all the money you spent to start your business!

Imagine you spent Rs. 50 on lemons, sugar, and cups. When you sell enough lemonade to make Rs. 50, you have reached the break-even point. After that, every rupee you earn is profit!

Example: Sell 10 cups at Rs. 5 each = Rs. 50.
That covers your costs!

SAVING AND REINVESTING YOUR PROFIT

What should you do with the money you earn? Save some for yourself, and reinvest some to grow your business even bigger!

REAL-LIFE KID ENTREPRENEURS

Meet inspiring young business owners from India! Priya, age 9, sells handmade friendship bracelets to classmates. Arjun, age 10, runs a weekend lemonade stand in his colony. Meera, age 8, makes and sells homemade cookies with her grandmother's recipe. These kids show that anyone can start a business!

TEAMWORK IN BUSINESS

Learn New Skills
Make Work More Fun
Solve Problems Faster

Share Ideas Together
Help Each Other with Tasks
Sell More as a Team

**"MISTAKES HELP US
LEARN AND GROW!"
MEET PRIYA – SHE
BURNED HER FIRST
BATCH OF COOKIES, BUT
KEPT TRYING UNTIL
THEY WERE PERFECT!**

YOUR ENTREPRENEURSHIP JOURNEY

YOU CAN START YOUR OWN BUSINESS ANYTIME!

Keep dreaming and trying! Every big business started with a small idea. You have amazing ideas inside you waiting to come out. What will your first business be? Maybe a craft shop, a snack stand, or something totally new! The most important thing is to believe in yourself and take that first step.

SUMMARY AND NEXT STEPS

ENTREPRENEURSHIP

Solving problems and helping
others while making money.
You can start your own
business!

UNIT ECONOMICS & PROFIT

Know your costs, set your
price, and save your profit to
grow your business bigger!

PLANNING & TEAMWORK

Make a plan, work with
friends, and learn from
mistakes. Keep dreaming and
trying!

THANK YOU!

Thank you for learning about entrepreneurship! Any questions or ideas you want to share?
