

THE DIGITAL IDENTITY CARD:

HOW WEBSITES REMEMBER YOU

WHY DOESN'T AMAZON ASK FOR PASSWORD EVERY TIME?

Think About It...

How Do Websites Know It's Still You?

Let's find out how websites remember you!

IDENTIFICATION VS AUTHENTICATION

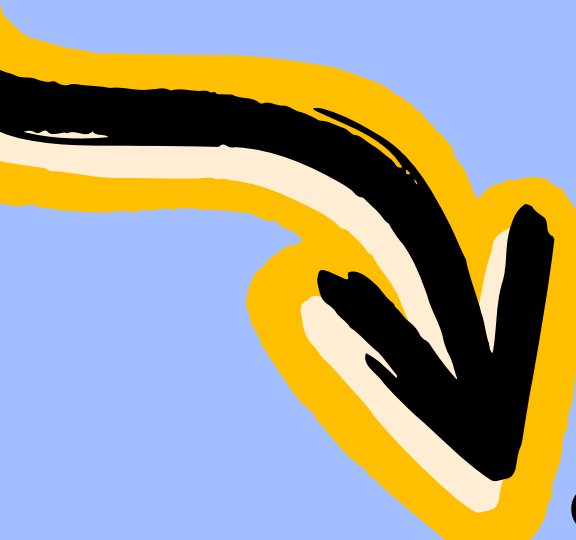

Identification: Who are you?

"I am a student at Planrs Academy" — You tell someone who you are. It's like saying your name when someone asks!

Authentication: Prove it!

Showing your school ID card with your photo and principal's signature — You prove you are who you say you are!

SESSIONS – THE AMUSEMENT PARK WRISTBAND

Pay once, get a wristband

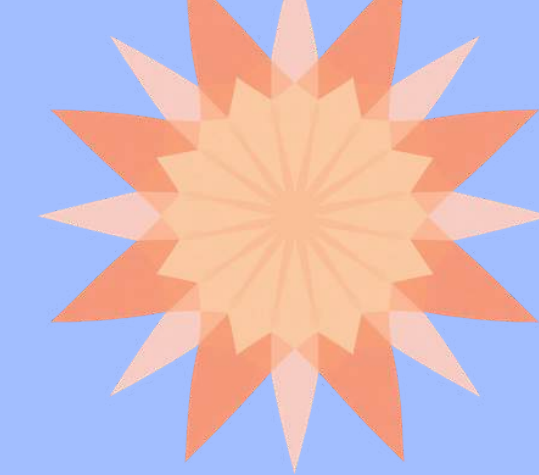

No need to show ticket at every ride

Ride operator sees wristband and knows you've paid

This is like a "Session" on a website

It remembers you while you visit!

TOKENS & JWT – THE METRO TOKEN

Token holds info about where you started and where you can go

Like a digital coupon or pass for your journey

Websites use tokens to know what you can do!

Your Digital Pass to Access Everything

Just like Metro tokens!

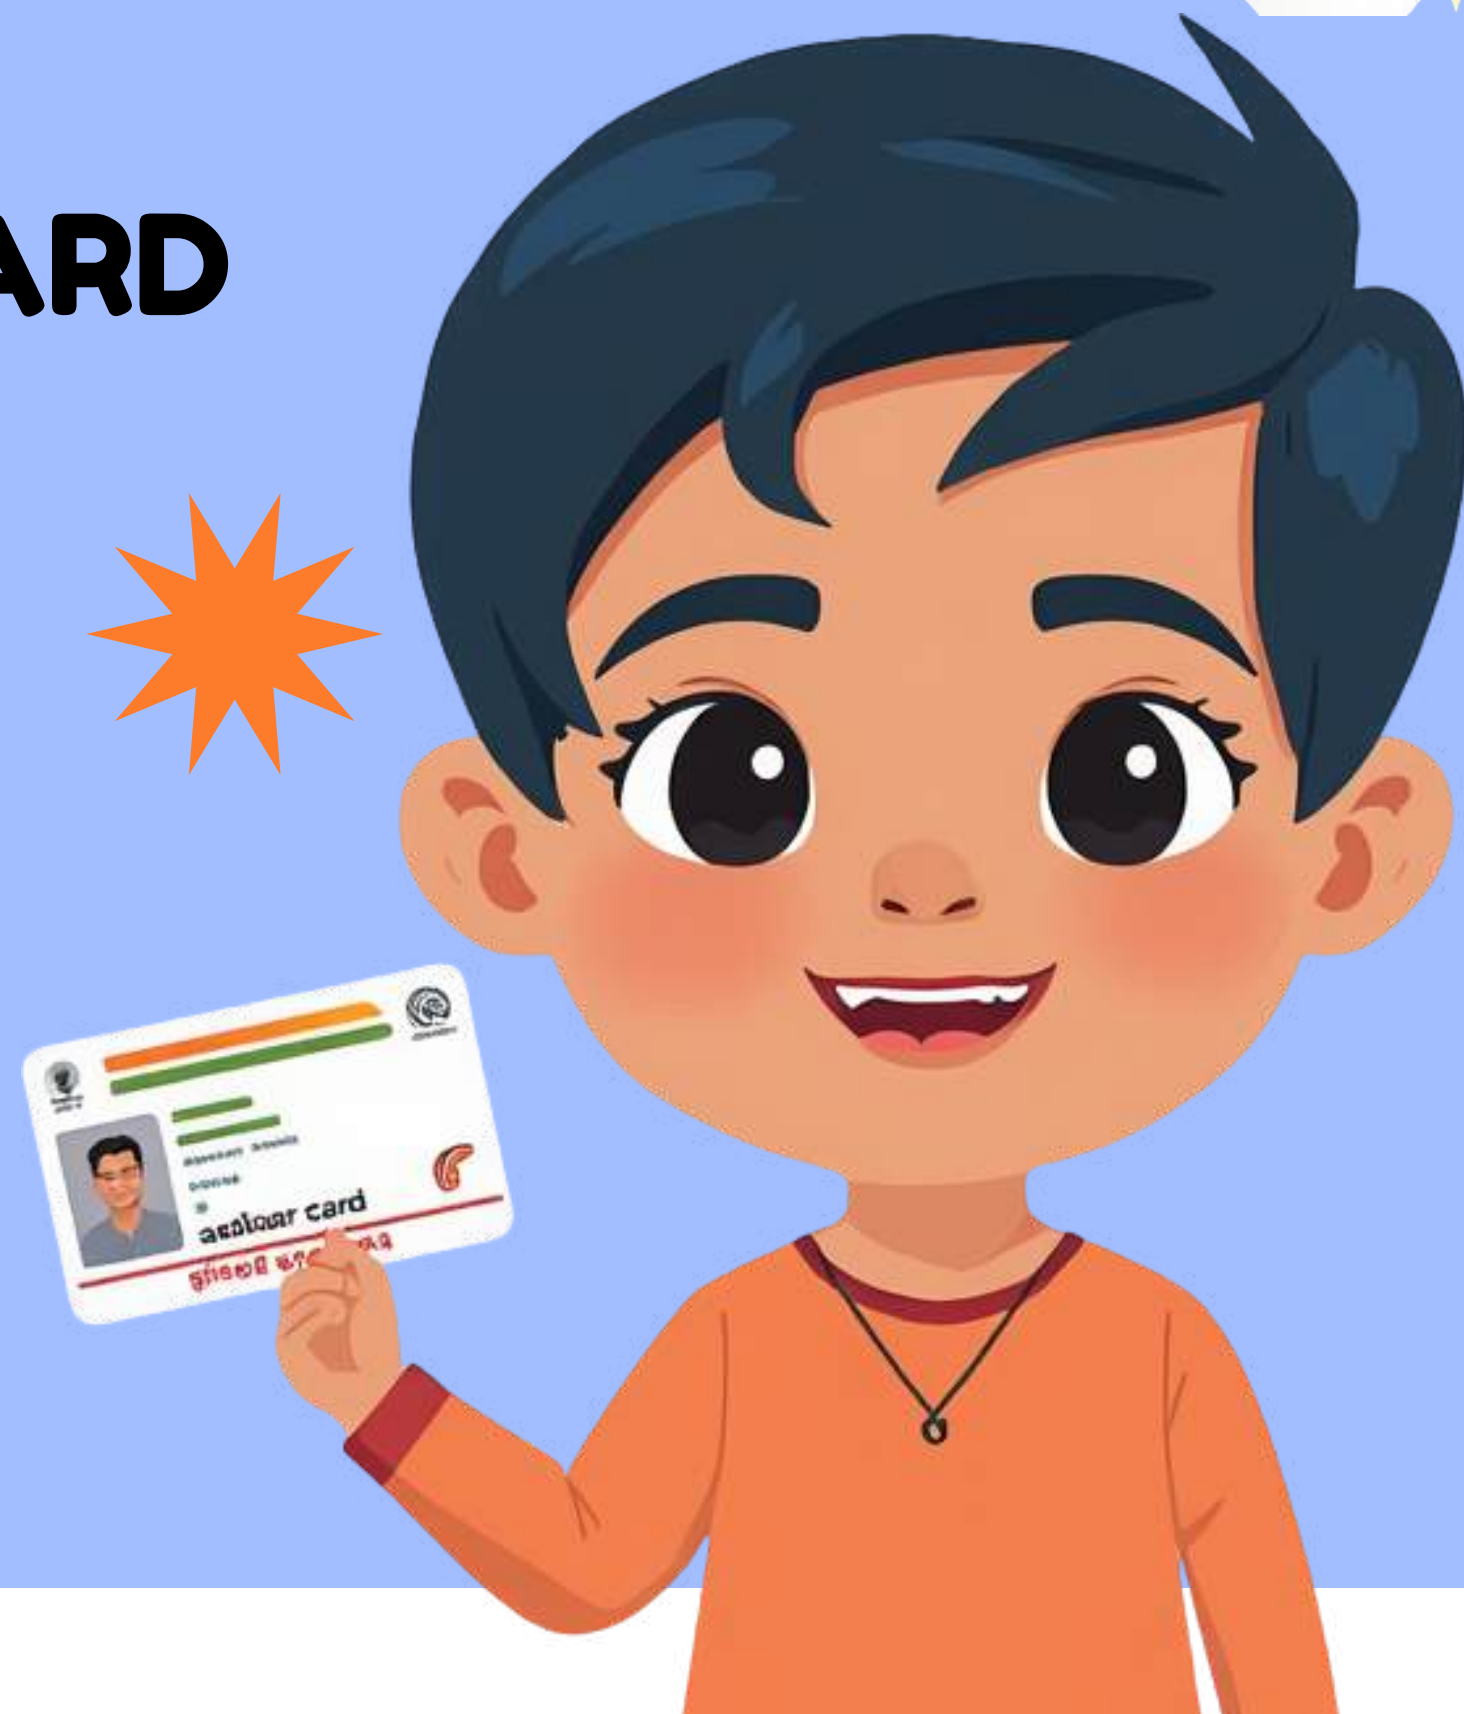

REAL-WORLD DIGITAL IDENTITY – AADHAAR CARD

Your Unique 12-Digit Identity Number

Safe Authentication for 1.3 Billion Indians

Aadhaar Card helps prove who you are safely online and offline. It's like a super secure digital ID that works everywhere in India!

HOW APPS REMEMBER YOU

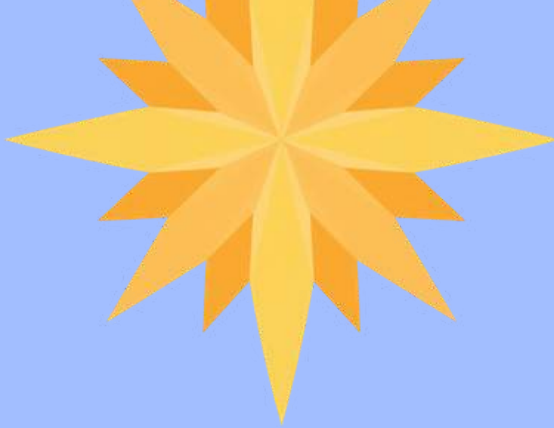

Apps Like Hotstar & JioCinema Remember You!

Ever noticed how Hotstar and JioCinema remember exactly which movie you were watching last time? They pick up right where you left off!

Sessions + Tokens = Magic Memory!

This is because of Sessions and Tokens working together! They keep track of your progress like a helpful bookmark.

ACTIVITY TIME! – THE ID CARD DESIGNER

**Draw Your Badge or
Token Shape**

**Write Your Name on the
Token**

**Write Your Age as a
Claim**

**Write Your Access Level
(Member or VIP)**

**Be Creative with
Colors!**

DEMO – LOGGING IN & RECEIVING YOUR DIGITAL KEY (JWT)

Step 1: Login

You enter your username and password on the website

Step 2: Get Your Key

Server checks and gives you a Digital Key (JWT) to keep

Step 3: Access!

Use your key to visit pages without typing password again!

WHY STAY LOGGED IN? CONVENIENCE & SECURITY

Convenience

No need to type your password again and again — saves time!

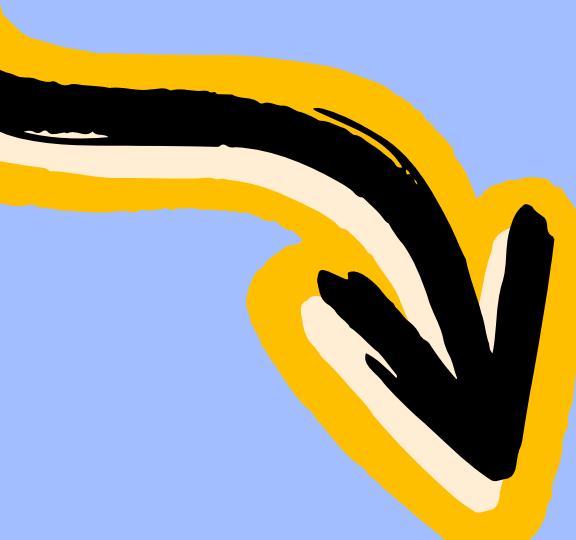

Security

Your "Wristband" or "Digital Key" keeps your data safe from others

Important!

Never share your "Wristband" on public computers — always log out!

RECAP – WHAT WE LEARNED TODAY

**Identification vs
Authentication**

Sessions Are Like Wristbands

Tokens & JWT Are Digital Keys

**Stay Safe – Protect Your
Passes**

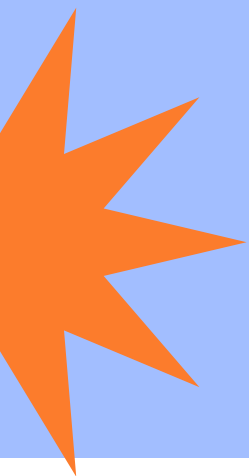

**Indian Examples:
Wonderla, Metro, Aadhaar**

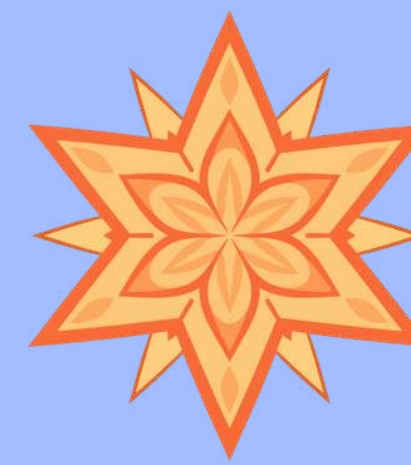

THANK YOU! ANY QUESTIONS?

Let's keep our digital identity safe and fun! Remember: protect your sessions, tokens, and digital keys just like you protect your school ID card.

Planrs Academy

FUN FACTS ABOUT DIGITAL IDENTITY!

1.3 Billion Aadhaar Cards!

India has issued over 1.3 billion Aadhaar cards — that's more than most countries' populations!

Smart Cards Rule!

Metro tokens have been replaced by smart cards in Delhi, Bengaluru, and many other cities!

Tokens Remember You!

Websites use tokens to keep your favorite shows ready to watch on Hotstar and JioCinema!
