

DESIGN YOUR OWN ROBOT!

A Fun Robotics Lesson Guide for Budding Inventors

What is a Robot?

A robot is a super cool machine built by people to do jobs and help us! They come in many different shapes and sizes, and they are built to make our lives easier and a lot more fun.

What can robots do?

- **Move, think, and work** – sometimes entirely all on their own!
- Help us with every single day tasks, both big and small.
- Do tricky jobs that people find too hard or dangerous.

Robots and AI: Best Friends!

Did you know robots have a special helper called **AI (Artificial Intelligence)**? AI gives robots a "brain" to think, learn, and solve problems!

Just like how you learn new things at school by practicing every day, robots use AI to watch, practice, and understand the world around them. The more a robot practices, the smarter it gets!

Fun Robot Fact: The very first robot was made over 90 years ago! Since then, they have grown smarter and more helpful every single day.

Let's Design Your Unique Robot!

Every robot is unique—just like you! Grab a pencil, let your imagination run wild, and choose the perfect parts for your robot creation:

1. Choose a Head Shape (Where the brain lives!)

Round Head

Comes with big, friendly eyes to look around.

Square Head

Features a tall, powerful antenna on top.

Triangle Head

Filled with colorful, blinking lights!

2. Pick a Body Style (Holds everything together!)

Boxy Body

Packed with tons of buttons and switches to press.

Round Body

Features glowing digital screens and bright lights.

Tall Slim Body

Equipped with shiny metal panels and cool gadgets.

3. Select Arms & Hands (To do cool things!)

Claw Hands

Perfect for grabbing and picking up objects.

Gentle Hands

Made for hugging and holding things softly.

Tool Hands

Built with built-in screwdrivers or paintbrushes!

4. Choose How it Moves!

Strong Legs

For walking, jumping, and running around!

Fast Wheels

For rolling around quickly and smoothly!

Hover Fans

Small spinning fans that let your robot fly!

Robots Around Us

Robots aren't just in stories—they are already helping real people every single day! You can find them working in:

- **Hospitals:** Assisting doctors to take care of patients.
- **Schools:** Helping teachers guide students during fun activities.
- **Homes:** Helping clean up rooms, cook yummy food, and care for families!

Creative Activity: My Robot's Story

Now it's your turn to be a robot designer! Fill out the blanks below to share your amazing creation with friends and class:

My Robot's Name is:

What is your robot's ultimate special superpower or ability? (Can it talk, sing, draw art, or clean your bedroom?)

Where does your robot help people the most?
