

If-Then Thinking Game: The Magic Rules of Mowgli

Session 1: Coding Without Computers

PLANRS Academy Master Course

Follow the Leader!

Get ready for a fun game with **Magic Rules!** [cite: 619] In this game, we aren't just playing; we are learning the secret language of computers.

How it works: When I give you an **If-Then command**, you follow along!
[cite: 619]

Example: *"If I say 'clap your hands', then you clap your hands!"* [cite: 621]

Listen carefully and move fast! This is how we start thinking like a Logic Wizard.
[cite: 621, 628]

What is If-Then?

If-Then is like a secret language used to give instructions! [cite: 625]

The Two Parts:

1. **The "If" part:** This is the **CONDITION** (what happens first). [cite: 626]
2. **The "Then" part:** This is the **ACTION** (what you do next). [cite: 627]

Example: *If you see a red light, then stop!* [cite: 627]

Logic Wizard Tip: Always look for the "If" first! [cite: 628]

Magic Rules in Everyday Life!

Did you know we use If-Then logic every single day in India? [cite: 634]

- 1 If it rains during monsoon, then we open umbrellas! [cite: 630]
- 2 If the pressure cooker whistles 3 times, then turn off the gas! [cite: 631]
- 3 If the school bell rings, then stand in line for prayers! [cite: 632]
- 4 If it is Diwali, then light diyas! [cite: 632]

Logic is all around us! From the kitchen to the school assembly, we follow If-Then rules. [cite: 634, 681]

Mowgli's Jungle Rules

Welcome to the jungle adventure! [cite: 637] To survive in the wild with Mowgli, you must listen to the **Magic Rules** very carefully. [cite: 638]

Jungle Game Commands: [cite: 642]

- If you see a tiger, then **freeze!** [cite: 644]
- If you hear a monkey, then **jump up!** [cite: 646]
- If you spot a snake, then **curl up!** [cite: 648]

Challenge: Can you follow 3 commands in a row? [cite: 650]

Create Your Own Magic!

Now it is your turn to be the Logic Wizard! [cite: 652]

In pairs, invent your very own If-Then rule for your friend. [cite: 654]

Examples from your friends: [cite: 666]

Arjun: "If I clap, then you spin!" [cite: 655]

Sana: "If I wave, then you hop!" [cite: 656]

Ishan: "If I stomp, then you freeze!" [cite: 658]

What is your rule? *If I _____, then you _____!*

How Do Robots Think?

Computers follow **If-Then instructions** just like you! [cite: 670] When you play this game, you are learning how to talk to robots. [cite: 671]

Success Check: [cite: 674]

- ✓ I can complete: "If I am hungry, then I ____" [cite: 676]
- ✓ I know the If comes before Then. [cite: 677, 678]
- ✓ I can follow 3 commands in the Jungle Game. [cite: 679, 680]
- ✓ I can create my own If-Then rule. [cite: 680]

Keep looking for If-Then rules everywhere you go! [cite: 681]
