

NUMBER DETECTIVES

My First Sudoku

Session 1: Solving the
4x4 Puzzle

MEET THE GRID!

What is a Grid?

A grid is a big square made of smaller squares called **Khali jagah** (empty spaces).
[cite: 367]

The Story of the Mela

Imagine a stall at a bazaar or mela. Every shelf must have different toys so everyone can see something new! In Sudoku, our "toys" are numbers or fruits.
[cite: Sudoku Brief]

Our Fruit Friends

Before we use numbers, let's meet our 4 fruit friends who each need their own square: [cite: 368]

Mango, Guava, Banana, and Papaya

It's like friends waiting for their turn on the swing—everyone wants a turn, but only one can sit at a time! [cite: 366]

The One Rule: No Repeats!

To be a true **Jasoos** (Detective), you must remember the most important rule in Sudoku. [cite: 369, 371]

"If Mango is here, no other Mango can be in this row or column! Right or Wrong?"
[cite: 370]

Spot the Mistake!

Look carefully at a row. If you see two Mangoes, that is **Wrong!** [cite: 372]

A detective's job is to scan each row and column to fix these repeats. [cite: 371, 372]

How to Scan:

- Look left-to-right (Row).
- Look top-to-bottom (Column).
- Ask: "Is my friend already here?"

Dira the Jasoos

Let's watch how Dira solves a puzzle. She scans each row carefully to find where the missing friends belong. [cite: 374, 375]

Scanning Step-by-Step

Step 1: Scan. Dira looks at a row and sees:

Mango... Guava... Banana... [cite: 376]

Step 2: Identify. She asks, "Hmm, who is missing?" [cite: 376]

Step 3: Found! "Papaya! Papaya goes in the **Empty space!**" [cite: 377]

"I scan each row like a Jasoos!" says Dira. Can you spot the empty space? [cite: 374, 375]

Check! -> Scan.. -> Found! [cite: 378, 379, 380]

THE BLOCK CHALLENGE

Looking Inside the 2x2 Boxes

Inside our big 4x4 grid, there are 4 smaller squares. We call these **2x2 blocks**. [cite: 381, 382]

"Each little box is like a small stall in the bazaar—no repeats allowed inside!"
[cite: 384]

Each 2x2 block must have all 4 friends—Mango, Guava, Banana, and Papaya—
with no repeating! [cite: 382, 383, 386]

The Block Scan:

Look at a 2x2 block. If you have Mango, Guava, and Banana... who is missing? [cite: 385, 386]

Use your detective skills to find the missing friend and fill the stall! [cite: 387]

You Are a Number Detective!

Congratulations! You filled the grid like a real Jasoos. [cite: 388, 389]

What We Learned Today:

- How to find repeated friends and fix them. [cite: 388]
- How to scan rows and columns for missing pieces. [cite: 371]
- How to complete the 2x2 Block Challenge. [cite: 381]

Next Time: We'll try even bigger 6x6 puzzles! Keep practicing your detective skills. [cite: 389]

Thank You, Number Detectives! [cite: 391]

"Ask questions, solve more puzzles, and become a Sudoku master!" [cite: 392]
