Factors & Multiples: The Magic of Sharing and Grouping

Let's explore the fun of numbers together!

The Great Indian Picnic

Story of friends sharing snacks at a picnic – laddoos and gulab jamuns!

Imagine you and your friends are sharing sweets and snacks. How can we share them equally?

CLOSING

What Are Factors? The Builders of Numbers

Factors are numbers that multiply together to build a bigger number.

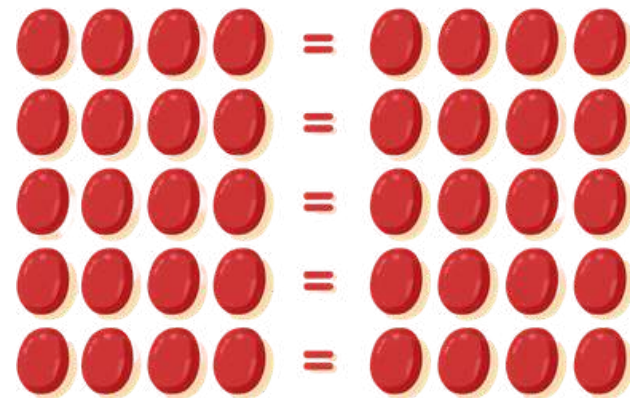

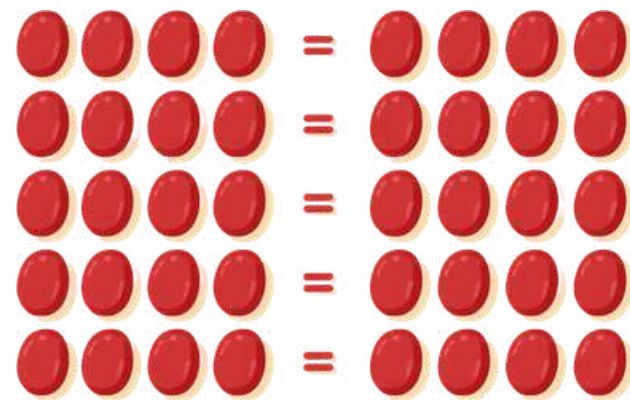

Think of factors as building blocks that create bigger numbers!

12 ladoos can be packed in different boxes!

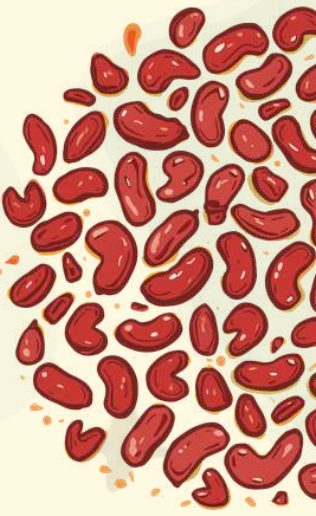

$1 \times 12 = 12$, $2 \times 6 = 12$, $3 \times 4 = 12$
- So many ways to make 12!

Array Method: Seeing Factors with Rajma Beans

Let's arrange rajma beans in rows and columns to see factors!

Highlight factor pairs: 3 and 4, 2 and 6

INTRO

FACTORS

PRACTICE

Factors of 12: The Ladoo Boxes

Factors of 12 are 1, 2, 3

Factors of 12 are 4, 6, 12

Toh chalo, let's find the factors of 12!

PRACTICE

What Are Multiples? The Family of Numbers

Multiples are numbers we get when we multiply a number by whole numbers.

$$\begin{aligned}3 \times 1 &= 3 \\3 \times 2 &= 6 \\3 \times 3 &= 9\end{aligned}$$

One auto has 3 wheels, two autos have 6 wheels, three autos have 9 wheels!

$$\begin{aligned}3 \times 4 &= 12 \\3 \times 5 &= 15 \\3 \times 6 &= 18\end{aligned}$$

Skip-Counting Game with Currency Notes

Let's play a game! Count money by Rs. 2 or Rs. 5 notes to find multiples

Can you count by 5s? 5, 10, 15, 20...

HOME

LEARN

PRACTICE

Multiples of 3: The Auto Rickshaw Wheels

Multiples of 3 are 3, 6, 9

Multiples of 3 are 12, 15...

Great! These are the multiples of 3.

RECAP

Interactive Practice: Factor Finders

Now, let's find factors of 10 and 15 together!

Simple instructions for group activity or
individual try

Factors of 10 and 15

Factors of 10:
1, 2, 5, 10

10 ladoos can be shared equally in 2 groups of 5, or 5 groups of 2!

Factors of 15:
1, 3, 5, 15

15 marigolds can be grouped in 3s or 5s for beautiful garlands!

Daily Life Challenge

Can you find factors and multiples around you?

Like gulab jamuns, cricket balls, or rangoli patterns!

PRACTICE

EXAMPLES

RECAP

Examples from Daily Life

Gulab Jamuns in boxes: factors of 8 or 12

Marigold garlands: grouping in 2s or 5s

Rangoli patterns: repeated shapes show arrays!

Recap: Factors vs Multiples

Factors: Numbers that multiply to make a product

Usually smaller or equal to the product. Example: Factors of 12 are 1, 2, 3, 4, 6, 12

Multiples: Products of a number and whole numbers

Usually bigger or equal. Example: Multiples of 3 are 3, 6, 9, 12, 15...
