

Our Digital Citizenship Pledge

AI & Digital Subject · Grade 2 · Digital Citizens

■ We all explore and learn in the digital world every day! From fun games to exciting lessons, technology helps us discover new things and connect with friends. Tablets, computers, and the internet are part of our everyday learning. This lesson helps us use them safely and happily!

1. What Is Digital Citizenship?

Being a **digital citizen** means using computers, tablets, and the internet **safely and kindly**. It's about making good choices when we use technology!

Think of it like being a good friend — online and offline! Just like we share, take turns, and speak nicely to friends at school, we do the same when using devices.

■ Over **90% of kids** use digital devices to learn and play every day! When we use technology kindly and carefully, everyone has a better time online!

2. How Can We Be Good Digital Citizens?

Being a good digital citizen is easy! Just follow these four simple rules every day:

■ Be Kind Online

Use kind words and treat others with respect online.

■ Keep Info Private

Never share your name, address or passwords.

■ **Ask an Adult**
When unsure, always ask a trusted grown-up.

■ **Learn and Play**
Use devices for learning and fun — wisely!

3. What Is AI & Digital Technology?

AI stands for **Artificial Intelligence** — smart computers that help us learn and play! These clever helpers can talk to us, answer questions, and make learning fun with games and activities.

■ Examples you might know:

- ■ Voice assistants like Alexa or Google that answer your questions
- Educational games that teach you maths and reading
- Apps that help you draw and create amazing art

4. Staying Safe with AI & Digital Tools

When we use computers, tablets, and smart tools, we need to stay safe! Here are important tips to remember every time you go online or use digital devices:

- Always ask an adult before using new apps.
- Don't share passwords or personal information.
- Be careful what you click or download.
- When unsure, ask a grown-up for help!

5. Our Digital Citizenship Pledge

■ Today we make our special promise to be good digital citizens. This pledge helps us remember how to behave kindly and safely whenever we use computers, tablets, or the internet.

Part 1 — Be Kind Online

"I promise to be kind and respectful when using the internet and devices."

I will treat others online the way I want to be treated.

Part 2 — Keep Info Private

"I promise to keep my personal information safe and private."

I will not share my name, address, phone number, or passwords with strangers online. My personal details are special and belong only to me and my family!

Part 3 — Ask for Help

"I promise to ask for help when I don't understand something online."

It's okay to not know everything! When something confuses me or seems wrong, I will always talk to a trusted adult like my teacher or parent. Asking for help keeps me safe!

6. Practising Our Pledge

■ At School

- Follow classroom rules for devices
- Help friends use tech safely
- Report problems to teachers
- Be a team player with technology!

■ At Home

- Use devices only with permission from parents
- Take breaks from screens to play and rest
- Talk with parents about online experiences
- Share what you learn and see with family

7. What You Can Do

■ ■ Staying Safe and Happy Online

■ Making New Friends Respectfully

■ Learning New Things Every Day

■ Helping Others Use Technology Well

■ Remember This Golden Rule ■

"Treat others the way you want to be treated — online and offline."

This golden rule helps us be kind and respectful in everything we do, whether we're playing with friends at school or chatting online!

■ Take the Pledge!

Are you ready to be a great digital citizen?
Let's make our pledge together as a class!

■ I promise to be kind, safe, and responsible online — always!
