

■ ELECTRICITY SAFETY ■

with Planrs Academy

■ Course	Hardware — Electricity Safety
■ Grade	Grade 2 (Ages 7–8)
■ Duration	30 Minutes
■ Platform	Planrs Academy
■ Year	2026

■ LEARNING OBJECTIVES

LO1: Name Appliances

Name at least 3 electrical items used at home (fan, TV, charger, geyser...)

LO2: Safe vs Unsafe

Identify safe and unsafe actions around electricity

LO3: The Golden Rule

State "Water and Electricity NEVER Mix!"

LO4: Emergency Action

Know the 3 steps: Don't Touch → Shout → Call 112

LO5: Warning Symbol

Recognise the ■ danger triangle symbol on equipment

LO6: Be a Safety Hero

Help friends and family stay safe around electricity

■ STORY: LIGHTS OUT! — Meet Priya

One evening, all the lights went out! **Click!** Everything was dark and quiet. Priya's family stayed calm. Papa found the torch and turned it on. The room glowed with soft light. *Don't worry, said Amma, we are safe together.* Priya felt brave with her family nearby.

- Always keep a torch in a safe, easy-to-find place at home.
- Stay calm during a power cut — it is normal and safe.
- Stay with your family and do NOT touch switches in the dark.
- Never use a candle near electrical wires during a power cut.

■ WHAT IS ELECTRICITY?

Electricity is **invisible energy** that flows through wires. It makes things like fans and lights work — like magic! It travels from a **power station** through underground cables into your home, and enters through a **main switch box (MCB)** on your wall.

■ Easy Way to Remember

Electricity is like water in a pipe.
It flows along a path called a CIRCUIT.
If the path is broken — electricity stops!
That is what a switch does — it opens and closes the path.

■ SPOT THE APPLIANCES IN PRIYA'S HOME

Look at all the electrical things in an Indian home! These all need electricity to work:

 Ceiling Fan	 Tube Light	 Mixie	 Pressure Cooker	 TV
 Geyser	 Desert Cooler	 Mobile Charger	 Electric Iron	 Street Light

■ Ask your teacher: Can you name more appliances in your school?

■■ LEARNING SAFE AND UNSAFE ACTIONS

Let's discover which actions keep us safe around electricity and which we should **never** do!

✓ DO

- ✓ Always ask a grown-up before touching appliances
- ✓ Keep water away from switches and sockets
- ✓ Unplug charger after phone is fully charged
- ✓ Tell an adult if you see broken/frayed wires
- ✓ Use a torch (not a candle) during power cuts
- ✓ Hold the plug — not the wire — when unplugging
- ✓ Look for the ISI/BIS mark on appliances
- ✓ Switch off MCB before any repair work

✗ DON'T

- ✗ Never poke fingers or pencils into sockets
- ✗ Never touch switches with wet hands
- ✗ Never pull wires to unplug — hold the plug!
- ✗ Never play near electric poles or transformers
- ✗ Never fly kites near electric wires
- ✗ Never touch a person who is getting a shock
- ✗ Never plug 5 items into one socket (overload!)
- ✗ Never put water near electrical appliances

■ SAFE OR UNSAFE? — Flip Card Questions

Touching a switch with DRY hands.

■ SAFE

Dry hands are safe around switches.

Using a pencil to poke into a socket.

■ UNSAFE

NEVER poke anything into a socket!

Pulling a wire to unplug an appliance.

■ UNSAFE

Always hold the plug, not the wire.

Using a torch during a power cut.

■ SAFE

Torches are the safest choice in the dark.

Flying a kite near electric wires.

■ UNSAFE

Very dangerous — kite strings can conduct electricity!

Telling Papa about a sparking wire.

■ SAFE

Always tell an adult about any electrical danger.

Using the charger with wet hands.

■ UNSAFE

Water + electricity = extreme danger!

Playing away from electric poles.

■ SAFE

Always play far from poles and transformers.

■ THE GOLDEN RULE

■ THE GOLDEN RULE ■

"Water and Electricity — NEVER MIX!"

Stay safe at home — that's the trick! ■

Story: Raju's Wet Hands ■

Raju came running from washing his hands.
He was about to touch the light switch — but WAIT!
His mother stopped him: "Never touch switches with wet hands, beta!"
■■ Remember: Water and electricity don't mix — ever!

■■ WARNING SYMBOL — What Does It Mean?

This sign means DANGER! Stay away!

You can find this symbol on:

- Electric transformers on the street
- Electric poles and pylons
- Power equipment boxes in buildings

When you see ■■ — STOP and tell an adult immediately!

■ WHAT WOULD YOU DO? — Reflection Scenarios

Read each situation carefully. Choose the BEST answer and circle it!

■ You see a broken wire lying in the street. What do you do?

- A) Touch the wire to see if it works
- B) Tell an adult immediately ✓ CORRECT!
- C) Ignore it and walk away
- D) Pick it up carefully

■ Power goes out while you are home. What is the SAFEST thing to do?

- A) Play with electrical wires
- B) Use a torch and call parents ✓ CORRECT!
- C) Light a candle near the switchboard
- D) Try to fix the MCB yourself

■ Your friend is touching an electric pole during a storm. What do you do?

- A) Join them — it looks fun!
- B) Ignore it — not your problem
- C) Shout "STOP!" and tell an adult immediately ✓ CORRECT!
- D) Touch the pole with a stick

■ EMERGENCY RESPONSE STEPS

If you ever see an electrical emergency — remember these 3 steps:

1

DON'T TOUCH

Move away from the danger immediately. Never touch wires, poles, or a person getting shocked.

2

SHOUT FOR HELP

Call Mummy, Papa, Teacher, or the Watchman. Shout loudly and clearly!

3

CALL 112

India's emergency number is 112. Ask an adult to call if needed. Tell them the location!

Who Can Help You?

- Mummy & Papa — always your first call at home
- Teacher — at school during the day
- Watchman — in your building or colony
- Electrician — the certified expert who fixes wires
- Emergency: Dial 112 (India's national emergency number)

DETECTIVE BIJLI'S SAFE OR NOT SAFE GAME

Sort these actions! Write **S** (Safe) or **NS** (Not Safe) in the box. Answers are provided at the bottom — no peeking! ■

Using charger properly ✓	☐	Touching wire with broken insulation ✗	☐
Playing away from electric poles ✓	☐	Flying a kite near wires ✗	☐
Unplugging with dry hands ✓	☐	Wet hands on a switch ✗	☐
Asking adults for help ✓	☐	Poking sockets with pencils ✗	☐
Switching off MCB before repair ✓	☐	3 plugs in one socket ✗	☐

Answers: 1. S | 2. NS | 3. S | 4. NS | 5. S | 6. NS | 7. S | 8. NS | 9. S | 10. NS

RECAP: WHAT WE LEARNED TODAY

✓ **Name electrical appliances in your home**
Ceiling fan, tube light, mixie, geyser, TV, cooler, charger, iron

✓ **Know safe and unsafe behaviours**
Dry hands = safe. Wet hands on switch = DANGER!

✓ **Remember the Golden Rule**
"Water and Electricity NEVER Mix!"

✓ **Recognise the danger symbol ■■**
Yellow triangle = DANGER. Stay away and tell an adult!

✓ **Know the 3 emergency steps**
Don't Touch → Shout for Help → Call 112

✓ **Know who to call in an emergency**
Mummy / Papa / Teacher / Watchman / Electrician / 112

MY SAFETY PLEDGE

■ My Safety Pledge ■

I promise to be an Electricity Safety Superhero! ■■

I will always ask a grown-up before touching switches.

I will keep water away from electricity — always!

I will tell an adult if I see broken or sparking wires.

I will help my friends and family stay safe too!

■ Water + Electricity = NEVER MIX ■

Sign your name here

How much did you enjoy this lesson?

■ CONGRATULATIONS! YOU EARNED YOUR SAFETY SUPERHERO BADGE! ■

You are now an official Electricity Safety Superhero! Share what you learned with your family today! ■
