

WHAT IS AI?

A Fun Introduction to Artificial Intelligence

For Young Curious Minds

Grade Level	Subject	Duration
Grade 2	Technology	45 Minutes

Planrs Academy | AI Literacy Series

LESSON OVERVIEW

Topic	What is Artificial Intelligence (AI)?
Grade	Grade 2 (Ages 7–8)
Duration	45 Minutes
Subject	Technology / AI Literacy
Materials	Whiteboard, printed worksheets, projector

LEARNING OBJECTIVES

- Define what AI is in simple, child-friendly language
- Identify everyday examples of AI (voice assistants, apps, smart devices)
- Understand how AI learns from examples
- Recognise that AI can see, hear, and speak
- Appreciate real-world AI applications in India
- Ask thoughtful questions about technology and AI

KEY VOCABULARY

AI	Artificial Intelligence – machines that can think and learn
Algorithm	A set of instructions a computer follows
Data	Information that AI learns from
Voice Assistant	An AI that listens and responds to your voice
Machine Learning	How AI learns by looking at lots of examples

SECTION 1 — WHAT IS AI?

AI stands for **Artificial Intelligence**. It is a super-smart helper inside machines that can think, learn, and make decisions — because humans teach it! Just like your teacher helps you learn new things every day, people teach AI too.

AI is **all around us!** When you ask Google Assistant a question, when Mummy orders food on her phone using Swiggy, or when YouTube recommends your favourite cartoons — that's AI at work!

Voice Assistants

Alexa and Google Assistant answer your questions by listening!

Food Apps

Swiggy & Zomato suggest yummy food you might enjoy!

Smart TVs

YouTube and Netflix recommend shows you love!

Photo Apps

Google Photos groups all of Dadi's photos together automatically!

SECTION 2 — HOW DOES AI LEARN?

AI learns just like **you** learn! When Mummy showed you many mangoes, you learned what a mango looks like. AI also learns by seeing lots and lots of examples. The more it sees, **the smarter it gets!**

■ Face Unlock	Your phone sees many photos of your face and learns to unlock only for you.
■ Photo Groups	Google Photos learns what Dadi looks like and groups all her pictures together.
⇒ ■ Autocorrect	WhatsApp learns correct words and fixes your spelling mistakes automatically.

SECTION 3 — AI CAN SEE, HEAR & SPEAK!

■ AI Can SEE!

AI can see things like you, your face, and your Smart TV and AI play-
aces at airports. Smart "OK Google, play my favourite rhymes!" — that's AI listening!

■ AI Can HEAR!

■ AI Can SPEAK!

SECTION 4 — AI HELPERS IN INDIA ■■

AI is already helping people across India in amazing ways! Here are some real examples that make our country smarter and safer every day.

Smart Traffic Lights

Traffic lights change by counting cars and bikes on the road — less waiting, faster movement!

Weather Prediction

AI helps scientists predict floods and monsoon rains to keep communities safe!

Doctor's Helper

AI helps doctors read X-rays and find sickness faster, saving precious lives!

DigiYatra

AI scans your face at airports so you don't need to show your boarding pass every time!

45-MINUTE TEACHING PLAN

Time	Activity	Description	Style
0–5 min	■ Warm-Up	Ask: 'Has anyone talked to a phone or TV today?' Let children share.	Discussion.
5–12 min	■ Intro to AI	Explain AI as a 'super-smart helper'. Show examples like Alexa, Google Maps.	Lesson, Google Maps.
12–20 min	■ How AI Learns	Mango analogy: just like you learn to recognise fruit, AI learns from pictures!	Storytelling.
20–28 min	■■■ AI Senses	Discuss AI seeing, hearing, speaking. Use voice assistant demo if possible.	Interactive demo if possible.
28–35 min	■■■ AI in India	Show traffic lights, weather AI, DigiYatra examples. Invite questions.	Discussion.
35–42 min	■■■ Quiz Time!	AI Detective Game: Does this use AI? Phone ■, Ball ■, Smart TV ■	Group Activity ■
42–45 min	■ Wrap Up	Summarise key points. Encourage: 'Keep asking questions — just like AI learns, you do too!'	Recap

TEACHING TIPS FOR EDUCATORS

1. Use relatable, local examples — Swiggy, Zomato, Ola, Google Maps work great for Indian classrooms.
2. Bring a phone and demonstrate OK Google or Siri live. Children LOVE seeing AI respond!
3. Use the mango analogy to explain machine learning — it sticks brilliantly for 7–8 year olds.
4. Let children name their own AI examples — this builds ownership and excitement.
5. Avoid technical jargon. If you must use a word, explain it with a fun analogy immediately.
6. Encourage all answers during the quiz — wrong answers are great teaching moments!

CLASSROOM ACTIVITIES

Activity 1: The AI Detective Game ■■

Show children different objects or images. For each one, ask: **"Does this use AI?"** Children raise their hands for YES or NO.

Object	Uses AI?	Reason
■ Smartphone	■ YES	Has voice assistant, autocorrect, face unlock
■ Football	■ NO	Just a ball — no computer inside!
■ Smart TV	■ YES	Recommends shows, responds to voice
■ Textbook	■ NO	Paper and ink — no computer!
■ Smart Speaker	■ YES	Alexa / Google Home listen and respond
—■ Pencil	■ NO	A simple writing tool, no AI inside

Activity 2: Draw Your AI Helper! ■

Ask each child to draw their favourite AI helper and write (or dictate) one sentence: **"My AI helper is ___ and it helps me by ___!"** Display the drawings on the classroom wall as an 'AI Gallery'.

Activity 3: Story Time — Zara and the Lost Homework ■

Read (or narrate) the story of **Zara the Robot Owl** and her friends Meera and Arjun. Discuss: How did AI help solve the mystery? What would have happened without AI? This builds comprehension and creative thinking.

ASSESSMENT — QUIZ QUESTIONS

Q1	What does AI stand for?	<i>Artificial Intelligence</i>
Q2	Name one AI helper you use at home.	<i>Alexa / Google Assistant / YouTube / etc.</i>

Q3	How does AI learn?	<i>By looking at lots and lots of examples</i>
Q4	Can AI see? Give an example.	<i>Yes — Face Unlock / DigiYatra / Photo Groups</i>
Q5	Name one AI helper used in India.	<i>Smart Traffic Lights / Weather AI / DigiYatra</i>
Q6	Who builds AI?	<i>Scientists and engineers</i>

⇒ ■ STUDENT WORKSHEET ⇒ ■

Name: _____ Class: _____ Date: _____

Question 1: What is AI? Fill in the blank.

AI stands for A _____ I _____.

AI is like a super-smart _____ inside machines.

Question 2: Circle the things that use AI.

■ Phone

■ Ball

■ Smart TV

⇒ ■ Pencil

■ Speaker

■ Book

Question 3: How does AI learn? Draw or write your answer.

Draw or write here ⇒ ■

Question 4: Name 2 AI helpers in India ■ ■

1. _____

2. _____

Question 5: Draw your favourite AI helper! ■

My AI helper is: _____ It helps me by: _____

■ Great work! You are an AI Explorer! ■
