

Understanding Levers

THE MAGIC SEE-SAW!

HOW CAN A TINY
MOUSE LIFT A
HEAVY ELEPHANT?

THINK ABOUT IT...

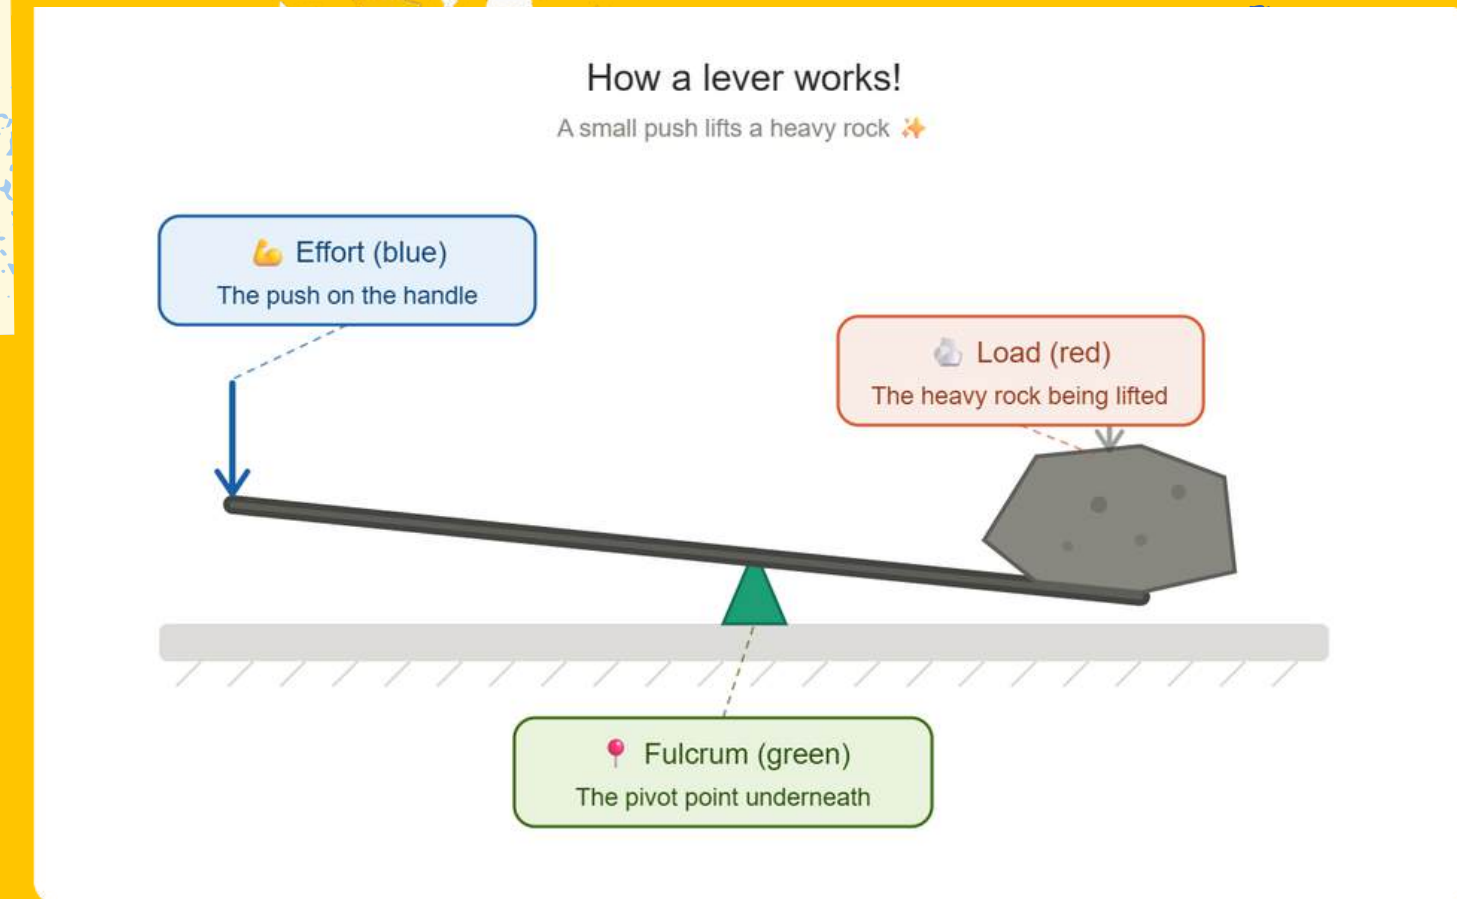

A LEVER IS A MAGIC STICK THAT HELPS

LIFT HEAVY THINGS!

Load (red): the heavy rock being lifted.
Effort (blue): the push on the crowbar handle.
Fulcrum (green): the pivot point underneath!

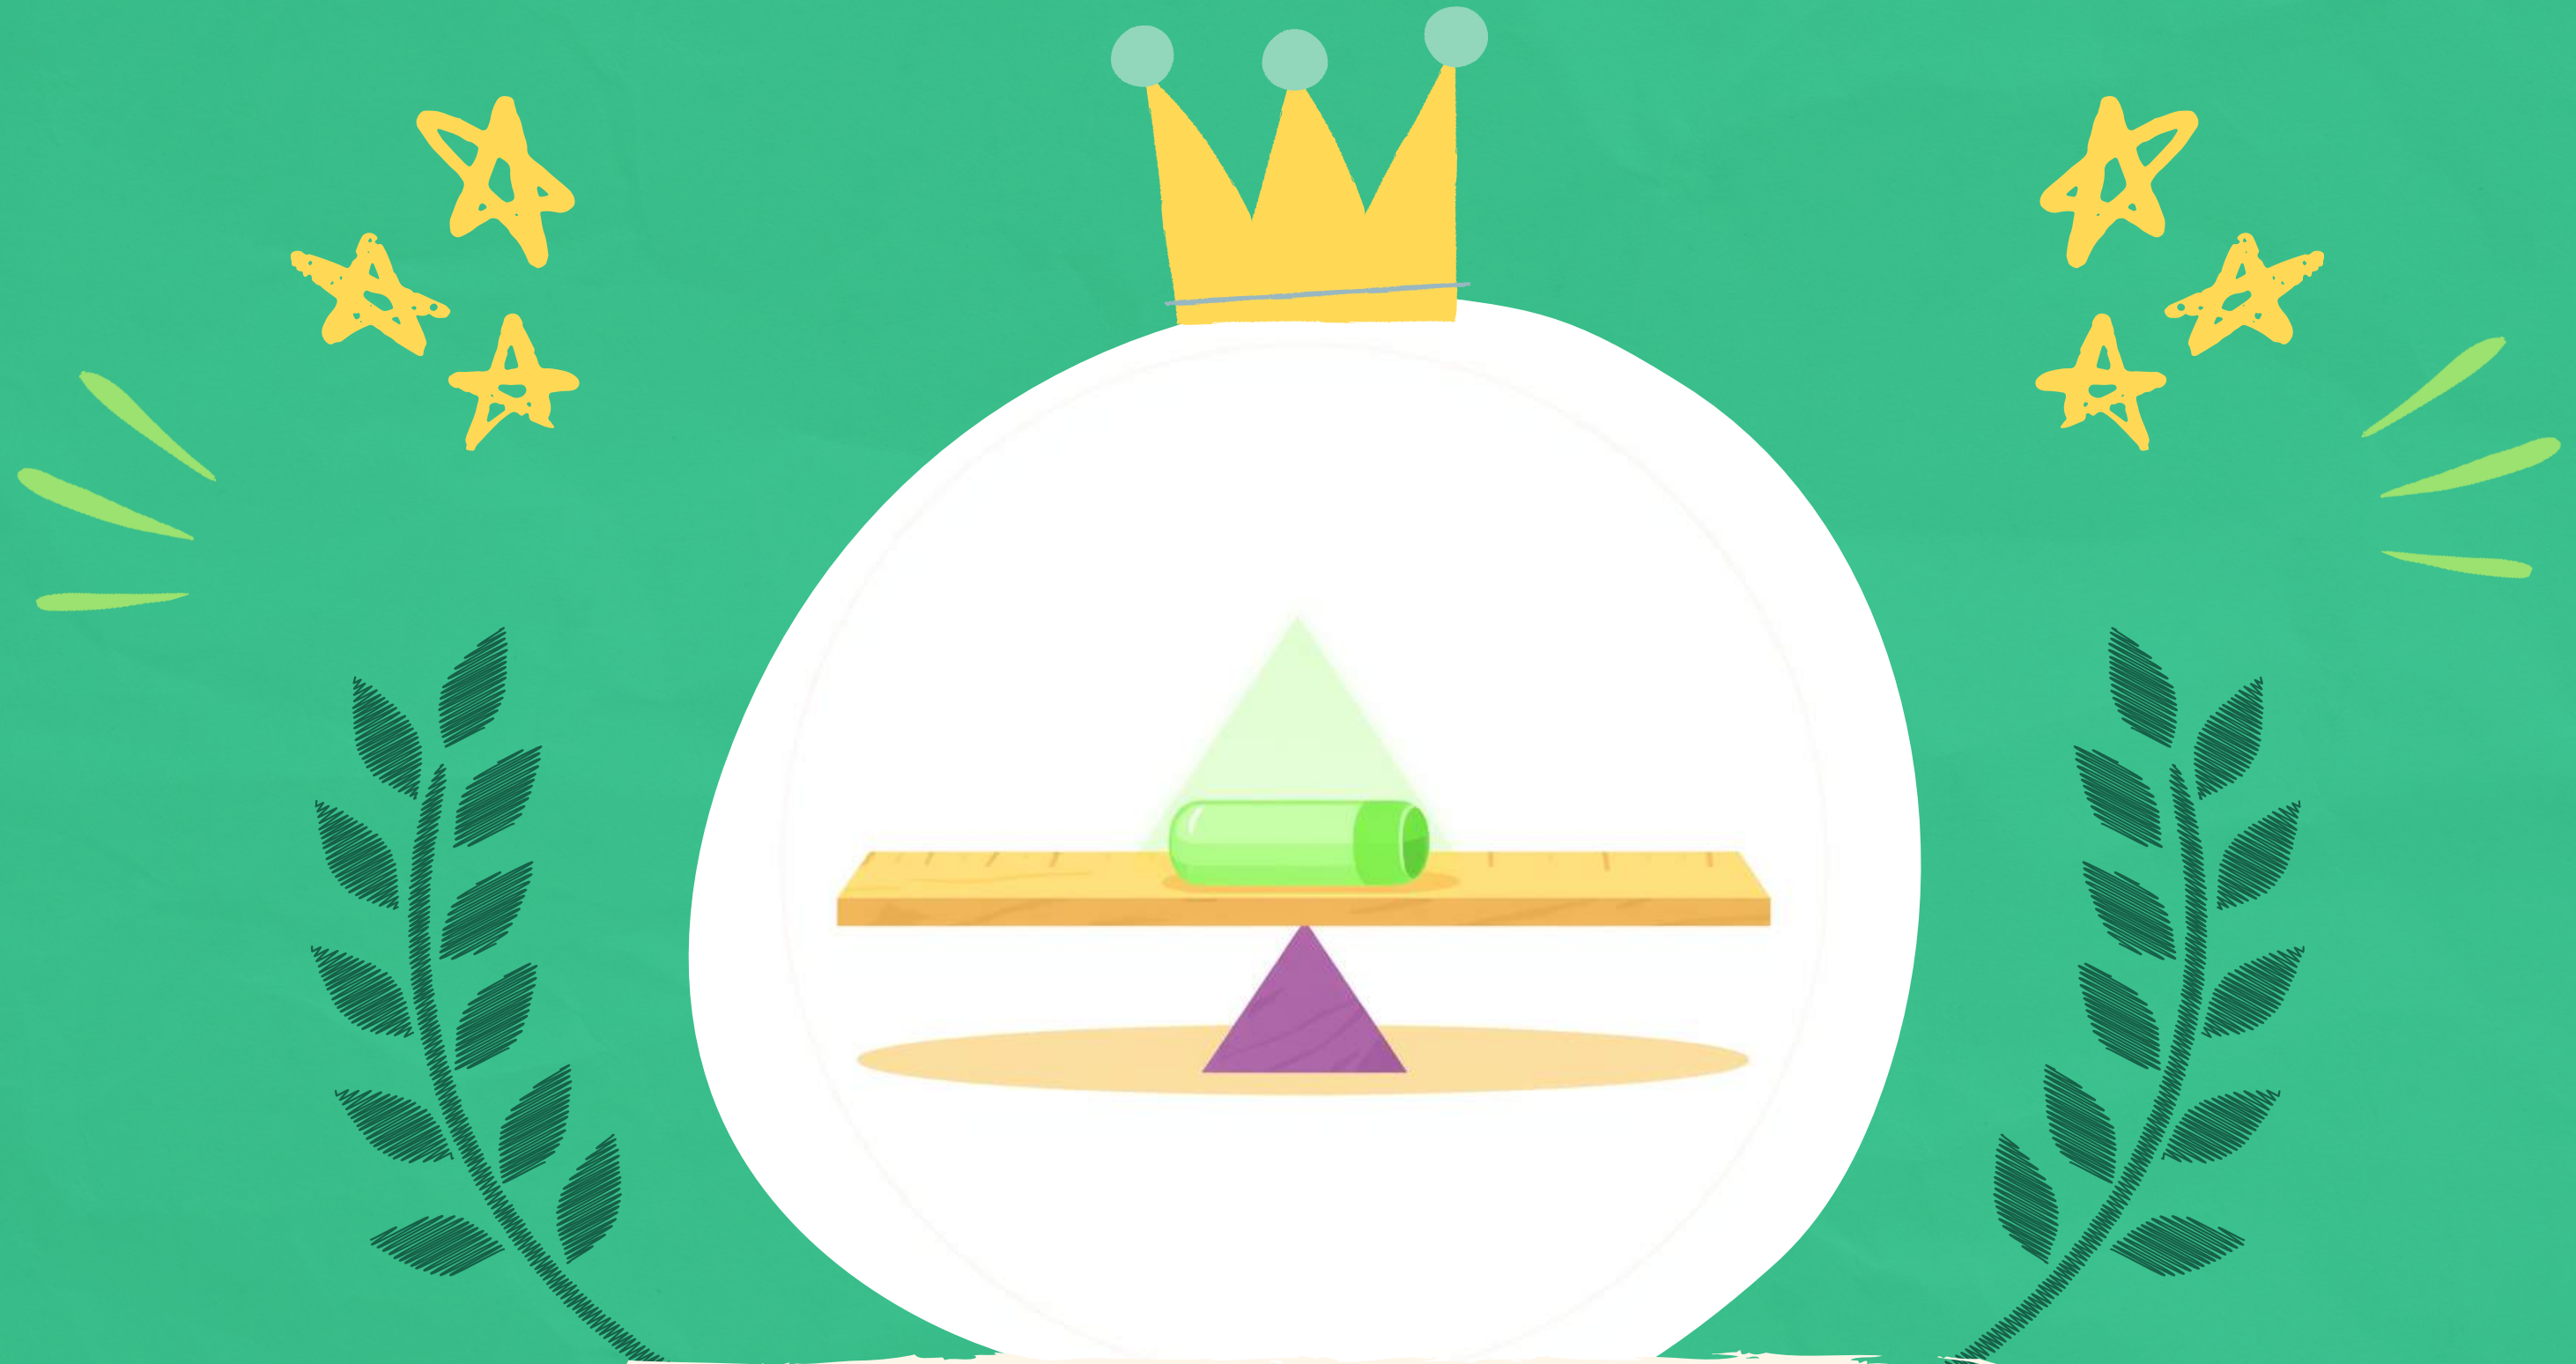

LOAD - THE HEAVY
OBJECT (WAZAN)

B. EFFORT (TAAQAT)

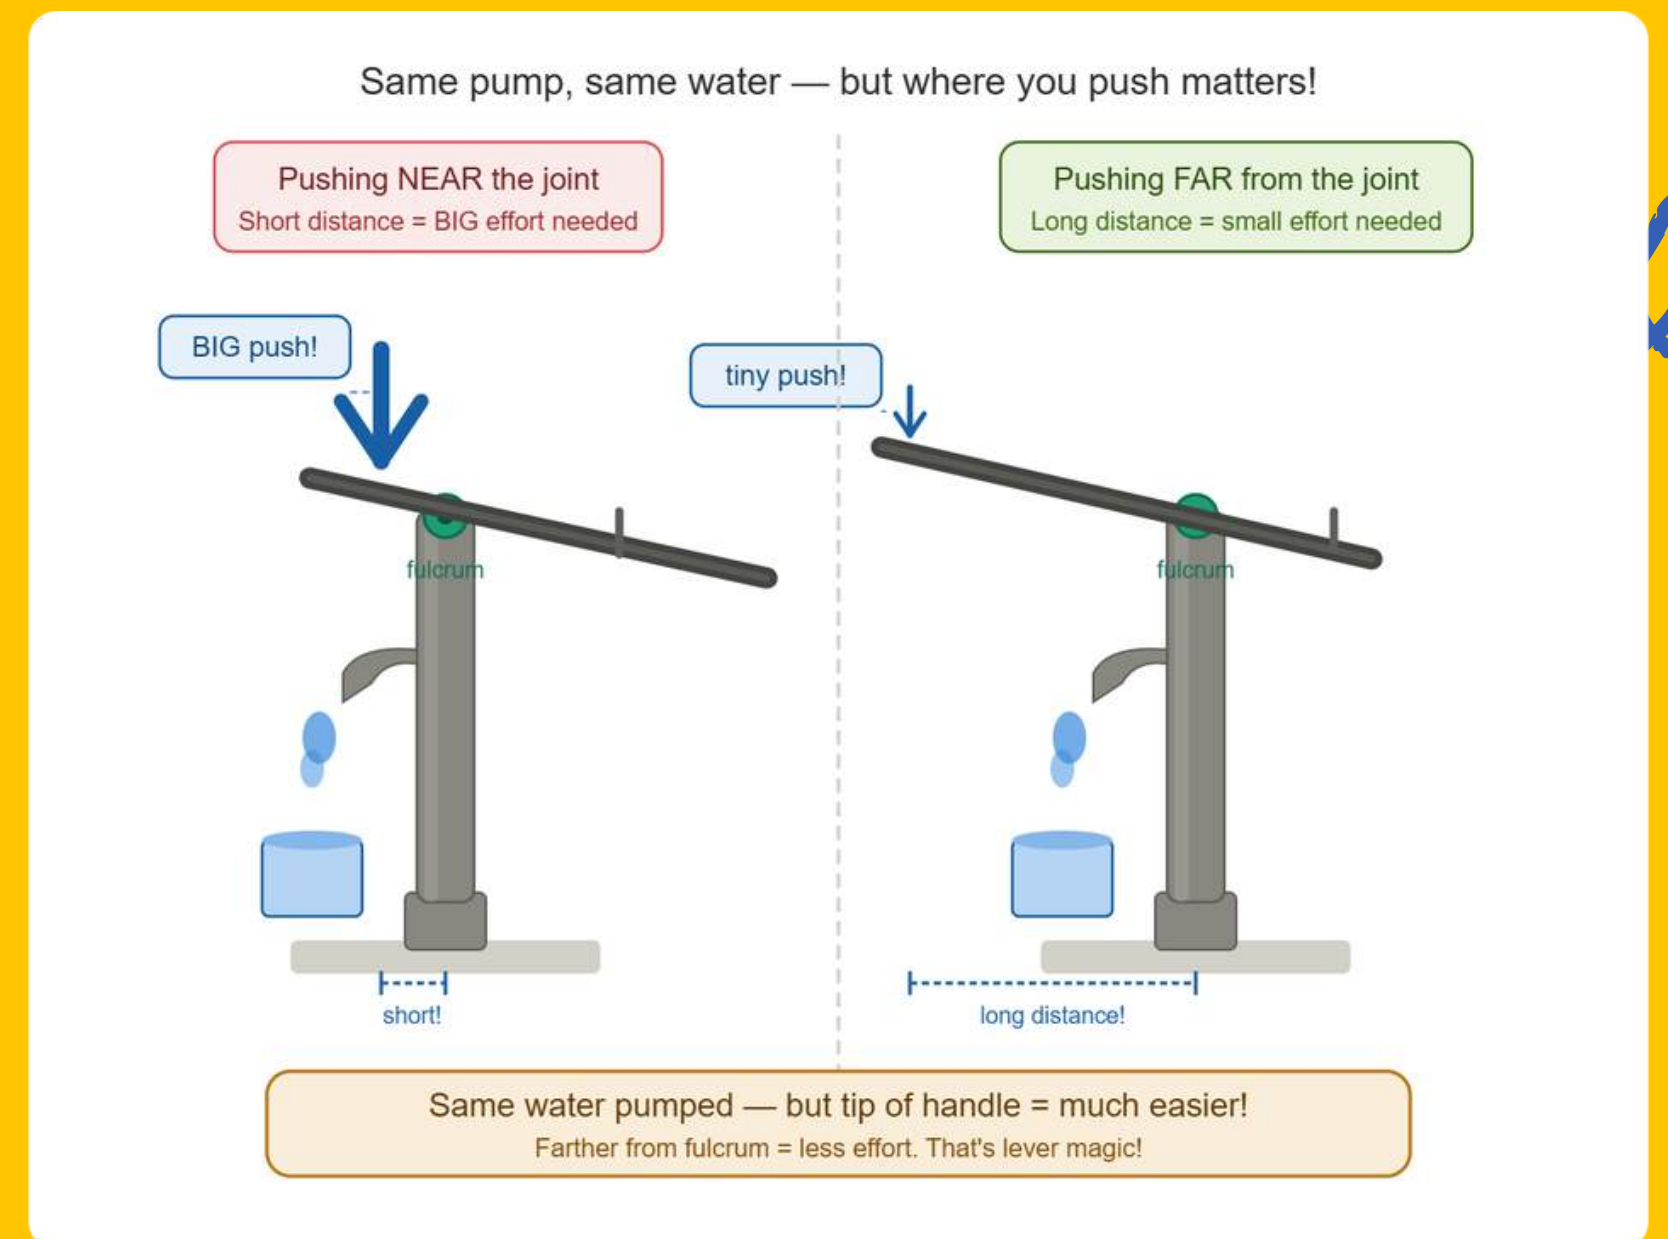

FULCRUM - THE MAGIC
PIVOT (KEEL)

THE FARTHER YOU PUSH, THE EASIER IT GETS!

**DISTANCE
MAGIC!**

When you push farther from the
Fulcrum,
you need LESS Effort to lift the Load.
Try pushing a hand-pump near the joint,
then at the very tip — feel the
difference!
Farther = Easier! That's lever magic!

LET'S EXPERIMENT!

A 30cm ruler placed flat on the table.

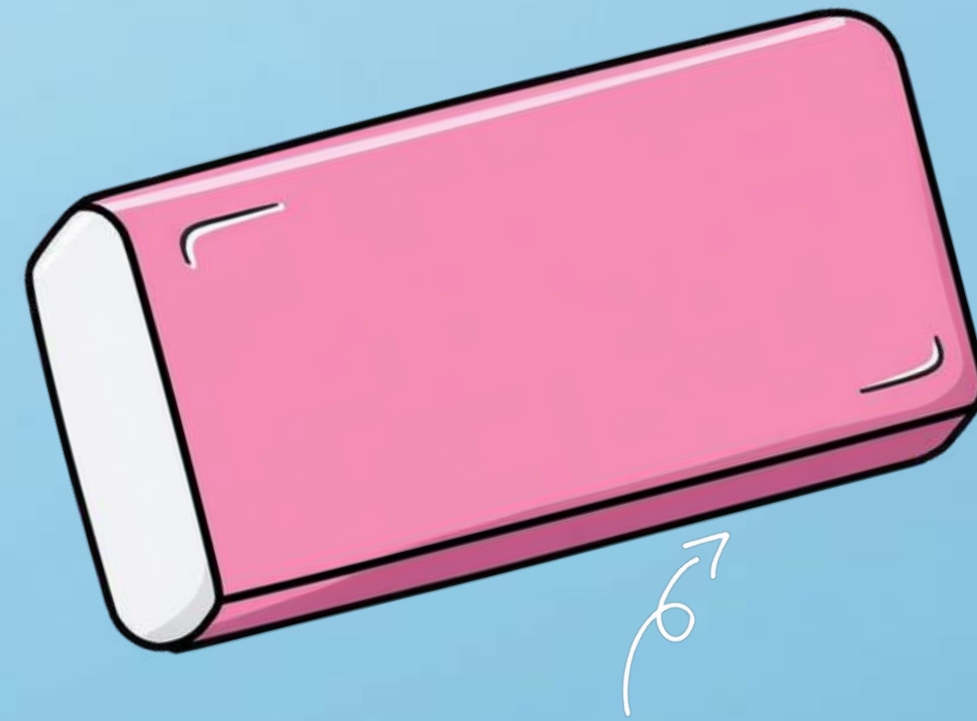

An eraser placed under the ruler as the Fulcrum.

5-rupee coins stacked as the Load on one end.

gather these
before we start!

You need!

MOVE THE PIVOT CLOSER TO COINS.

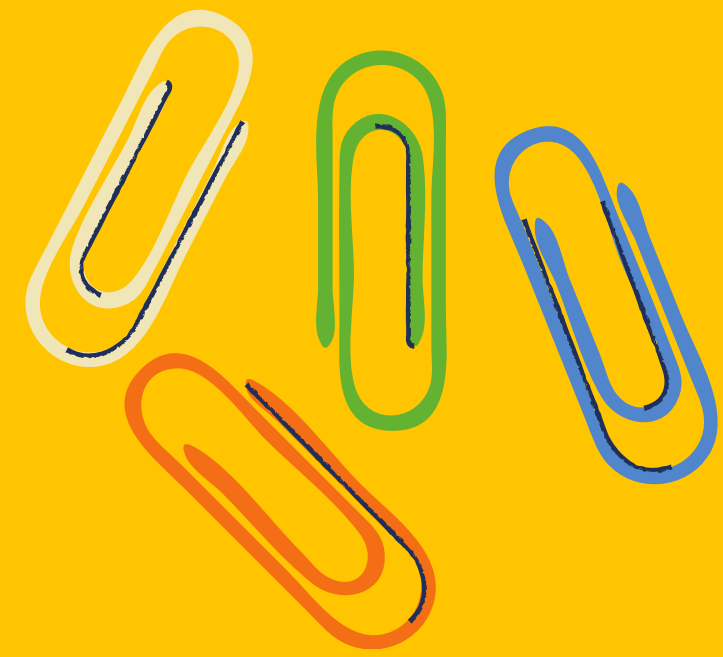

FEEL THE MAGIC!

Place the eraser (fulcrum) closer to the coins (load).

Now push the other end — it feels easier!

Move the eraser farther away — it gets harder.

The farther you push from the fulcrum,
the less effort you need. That's lever magic!

WITH AN ADULT, LET'S LOOK INSIDE THE KITCHEN
CABINETS TO DISCOVER HIDDEN LEVERS:

SEE LEVERS AT YOUR PLAYGROUND!

SEE-SAW

Load

Effort

- Load: The heavy side being lifted
- Effort: The push you give to go down
- Fulcrum: The middle pivot that balances!

ee

Fulcrum

💖 LET'S REMEMBER! 💖

LEVERS ARE MAGIC STICKS
WITH LOAD, EFFORT, AND
FULCRUM!

LOAD (RED) - HEAVY OBJECT

EFFORT (BLUE) - YOUR POWER

FULCRUM (GREEN) - PIVOT POINT

FARTHER PUSH = LESS EFFORT!

LEVERS ARE EVERYWHERE!
