

REACT FUN WITH USESTATE & EVENTS!

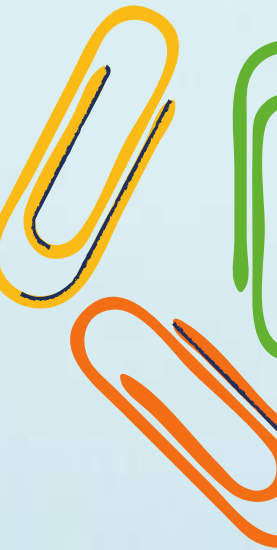

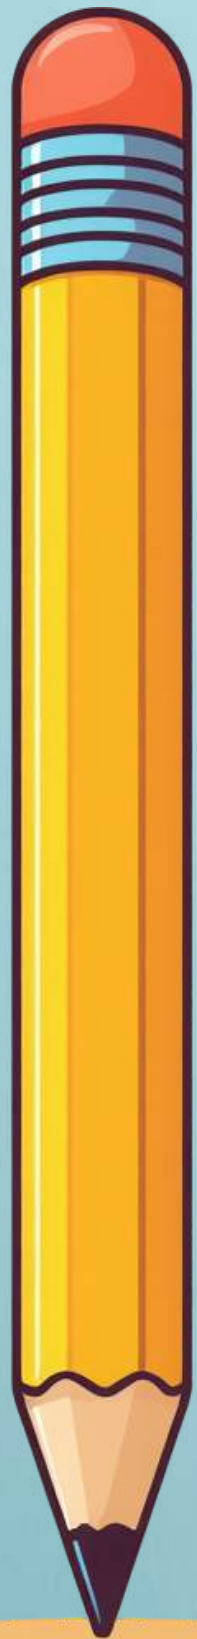

Printed dice? Or a CLICKABLE live dice?

PRINTED

LIVE!

💛 USESTATE & EVENTS 💛

YOUR REACT SCOREBOARD & MAGIC PIGGY BANK!

STATE = YOUR COMPONENT'S
PERSONAL NOTEBOOK

USESTATE = MAGIC PIGGY BANK
WITH DIGITAL COUNTER

EVENTS = CALLING BELL OR
SHOUTING 'OUT!' IN KABADDI

```
CONST [RUNS, SETRUNS]  
= USESTATE(0);
```

```
<BUTTON ONCLICK={() =>  
SETRUNS(RUNS + 1)}>ADD RUN
```

LET'S BUILD: LIVE IPL FAN CHEER COUNTER!

USES TATE
STORES CHEERS

CODE TIME!

USESTATE & ONCLICK

- 1 `import React, { useState } from 'react';
function CheerCounter() {`
- 2 `const [cheers, setCheers] = useState(0);
// cheers = your live memory box!`
- 3 `<button onClick={() => setCheers(cheers +
1)}>
+1 Cheer`

Click = Magic!

Like a metro card
tap — live update!

MULTIPLE CHOICE

WHAT HAPPENS IF ONCLICK IS
SPELLED ONCLICK IN REACT?

A. WORKS FINE

B. NOTHING HAPPENS

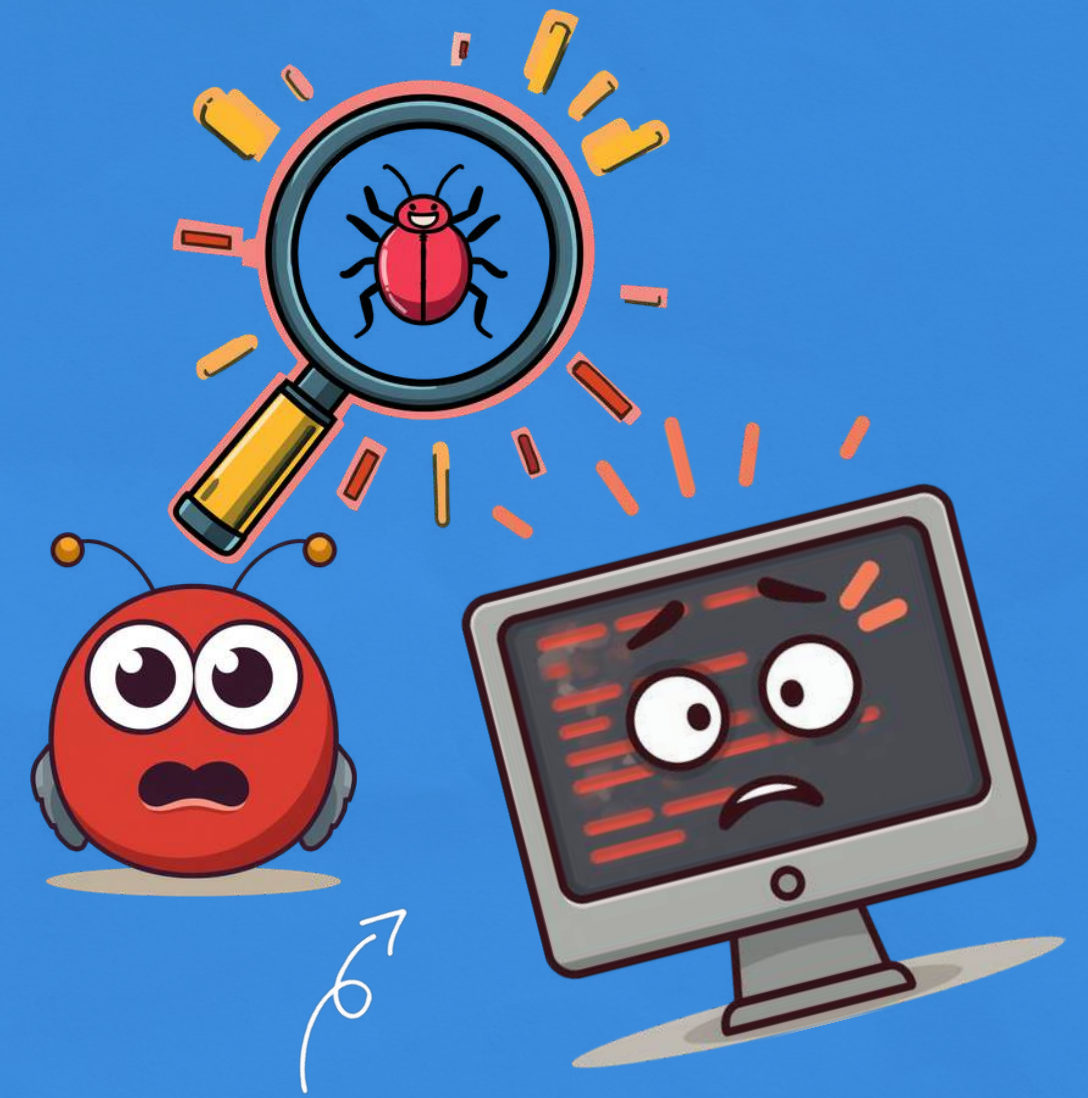

C. SHOWS ERROR

D. COMPUTER EXPLODES

BUG BUSTER: COMMON OOPSIES!

- 1 Use capital 'C' in onClick!
(not onclick — React is case-sensitive!)
- 2 Don't forget to import:
`import { useState } from 'react';`
- 3 Always call setCheers
with parentheses!

Fix it!

Fix these bugs and
cheer louder!

WRAP-UP & HOMEWORK

KEY TAKEAWAYS & HOMEWORK MISSION!

STATE = YOUR LIVE
DIGITAL MEMORY BOX!

EVENTS = CLICKS & TAPS
THAT CHANGE STATE!

USESTATE BUILDS FUN,
INTERACTIVE APPS!

HOMEWORK: GULLY CRICKET
RUNS COUNTER!

OR: DIWALI DIYA
ON/OFF APP!

Shabash Coders! You rocked

**READY FOR
SESSION 2?
STAY TUNED!**
