

SCRATCH

CODING!

LET'S TALK

WITH

**TEACHER
MORGAN**

MEET OUR TALKING CHARACTER!

HELLO FROM SCRATCH CAT!

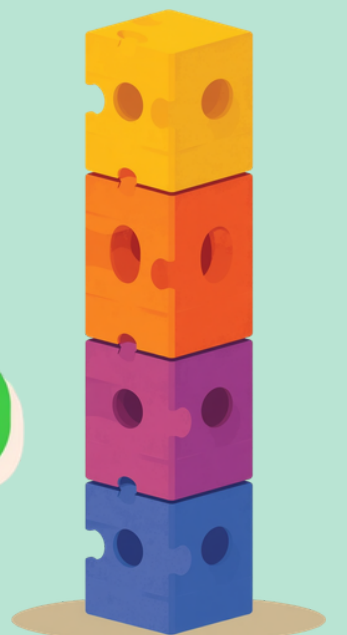

Watch how our character talks using Scratch coding! When we add the right blocks, our character can say words, make sounds, and come alive on screen. Coding is like giving your character a voice!

WHAT IS SCRATCH?

Scratch is a fun way to tell stories and make games by coding!

- Use blocks to tell characters what to do
- No typing — just drag and drop blocks!
- Make characters talk, move, and sing!

BLOCKS TO MAKE CHARACTERS TALK

**SAY
BLOCK**

**SOUND
BLOCK**

**EVENT
BLOCK**

STEP 1

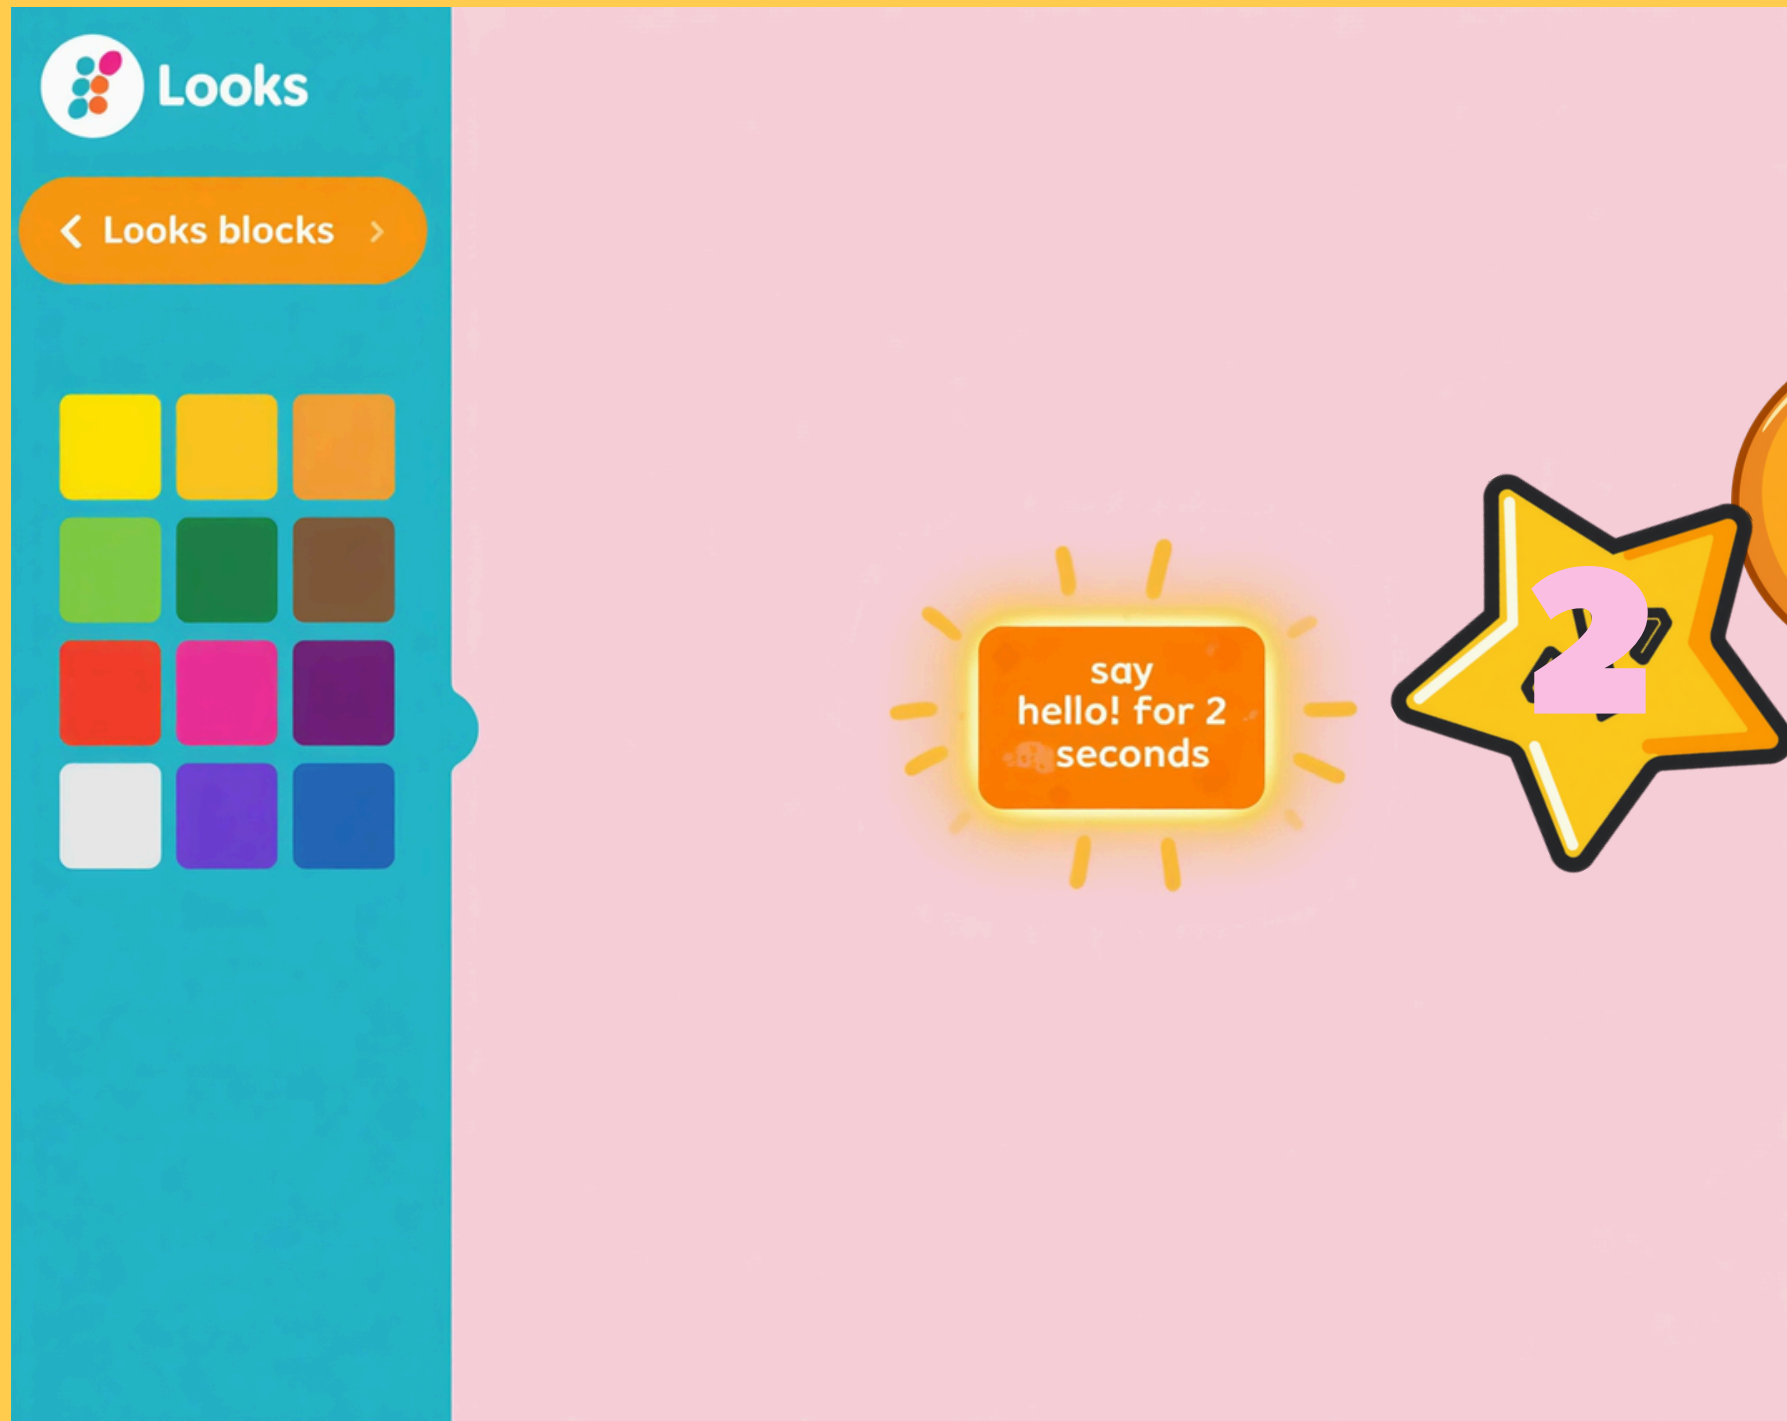

Character Selection

Pick a character you want to make talk!

Click on the character library in Scratch and explore all the fun characters. You can pick any character you like — animals, people, or fantasy creatures! Look for diverse and colorful characters to make your story unique.

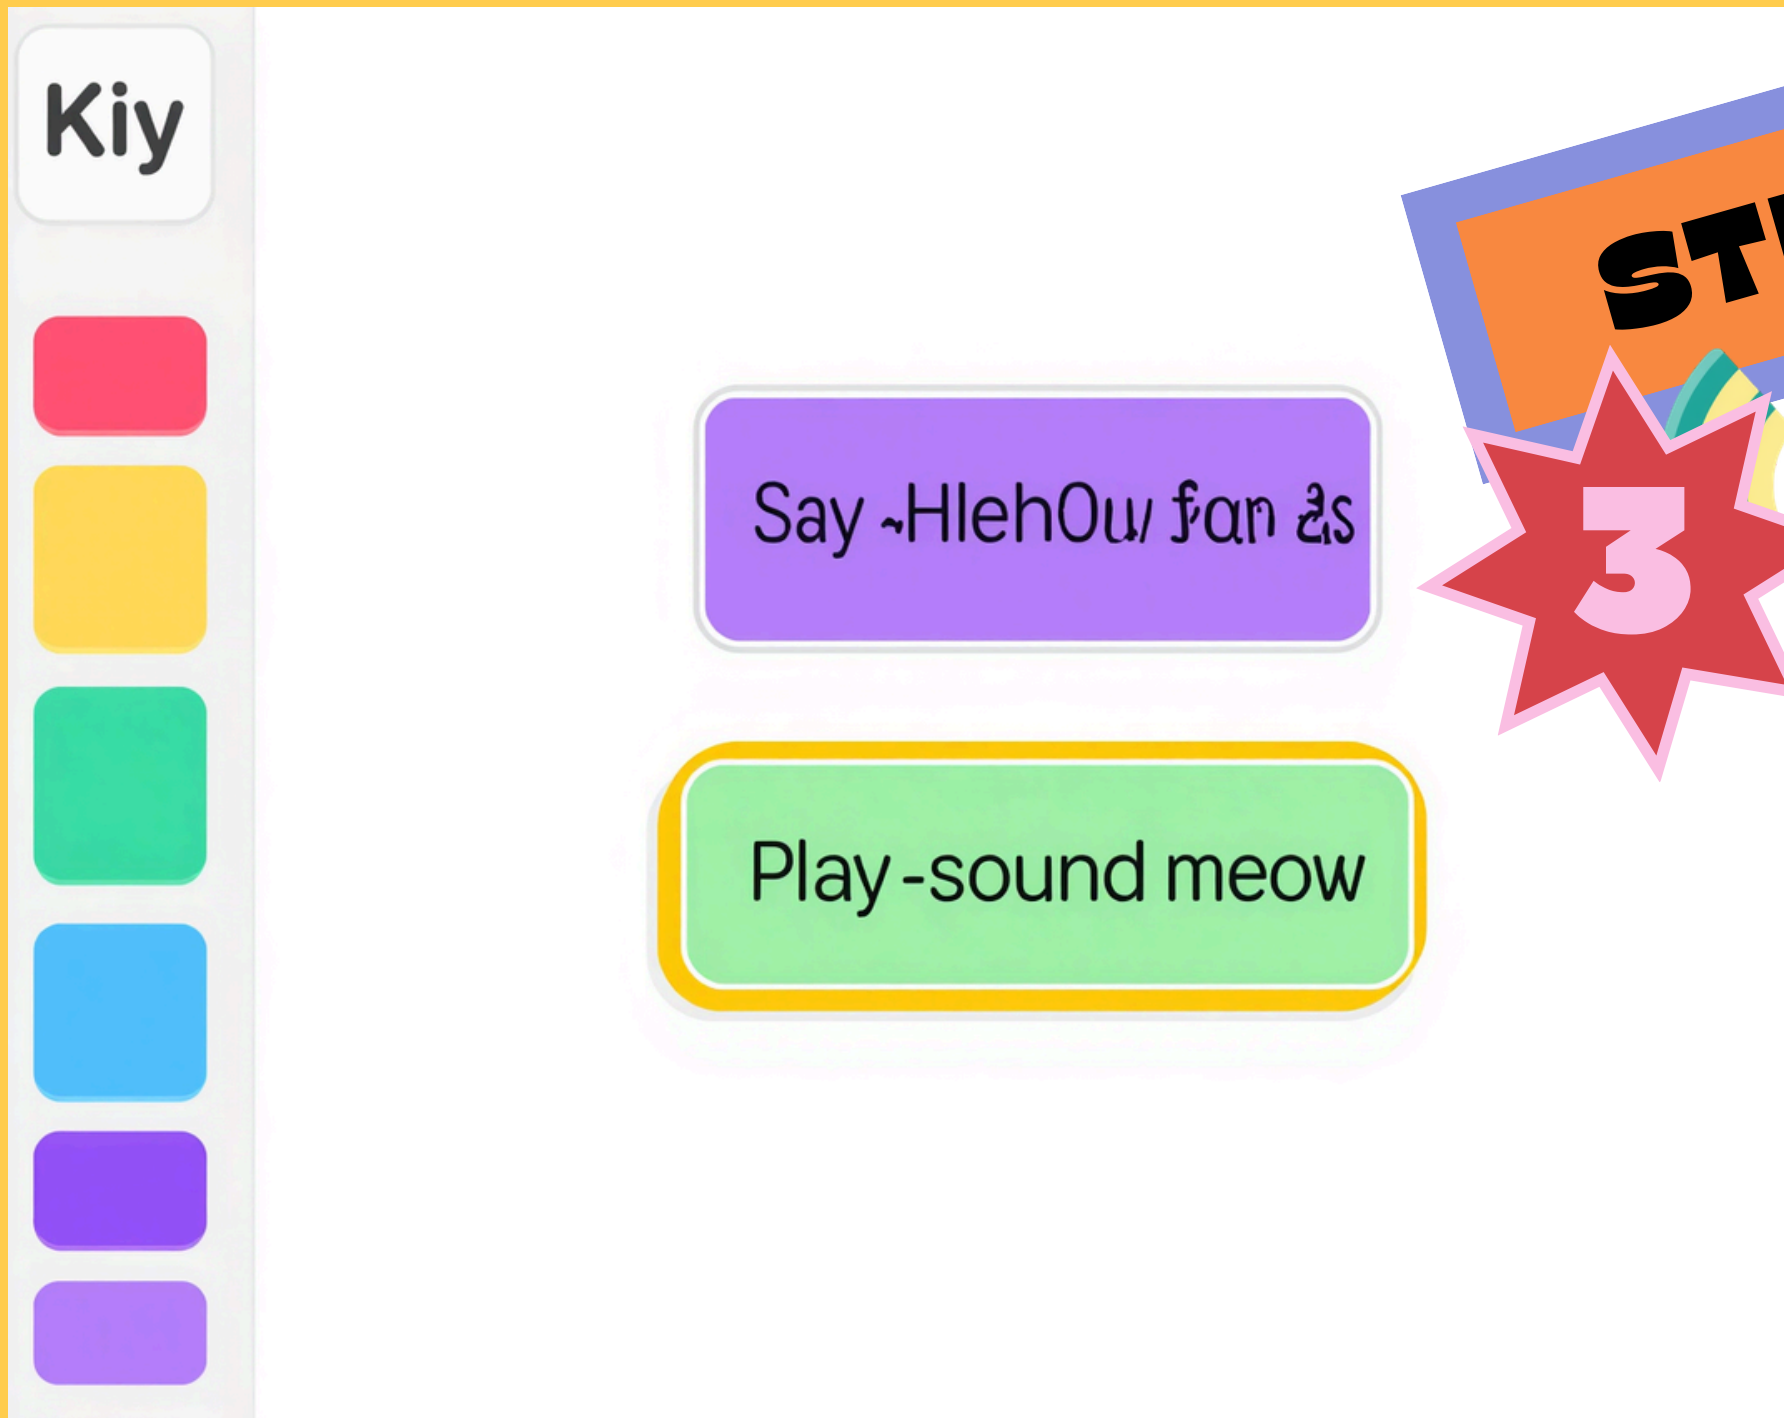

STEP 2 – ADD THE 'SAY' BLOCK

Drag the 'say Hello! for 2 seconds' block to the coding area.

Find the orange 'say' block in the Looks section. Click and drag it to the coding area on the right. Type your message inside the block — try saying "Hello!" and set the timer to 2 seconds. The block will glow when it's ready!

STEP 3 – ADD THE 'SOUND' BLOCK

The image shows a Scratch coding area. On the left, a character named 'Kiy' is visible. The coding area contains two blocks: a purple 'Say ~HlehOuw fan 2s' block and a green 'Play-sound meow' block. A large red star with the number '3' is overlaid on the blocks, indicating the current step.

Add a sound block to make your character speak with sound!

Drag the 'play sound meow' block from the Sound section and place it below the 'say' block in your coding area. Now your character will both say words AND make a sound! Try clicking the green flag to hear it.

STEP 4 – START THE CODE

GO!

Click the green flag to see your character talk!

Look for the green flag ► button at the top of the Scratch stage. Click it to run your code! Your character will say "Hello!" and play the sound. If nothing happens, check that all your blocks are connected properly.

BEFORE AND AFTER: TALKING CHARACTER

The character just sits there quietly. No speech bubble. No sound. Nothing happens when you look at it!

See how coding makes the character come alive!
The character now says "Hello!" with a speech bubble and plays a fun sound!

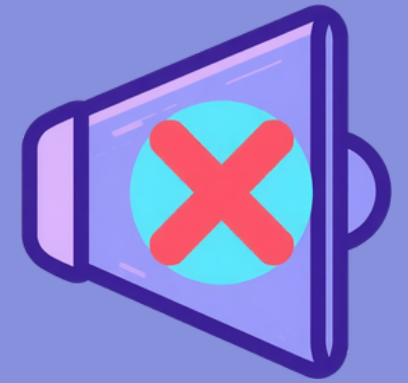

COMMON MISTAKES TO AVOID!

**MISTAKE 1:
NO GREEN
FLAG
BLOCK!**

**MISTAKE 2:
SPEECH
TEXT TOO
LONG!**

**MISTAKE 3:
NO SOUND
BLOCK
ADDED!**

PRACTICE TIME!

Now it's your turn! Make your own character talk in Scratch.

Try these fun phrases:

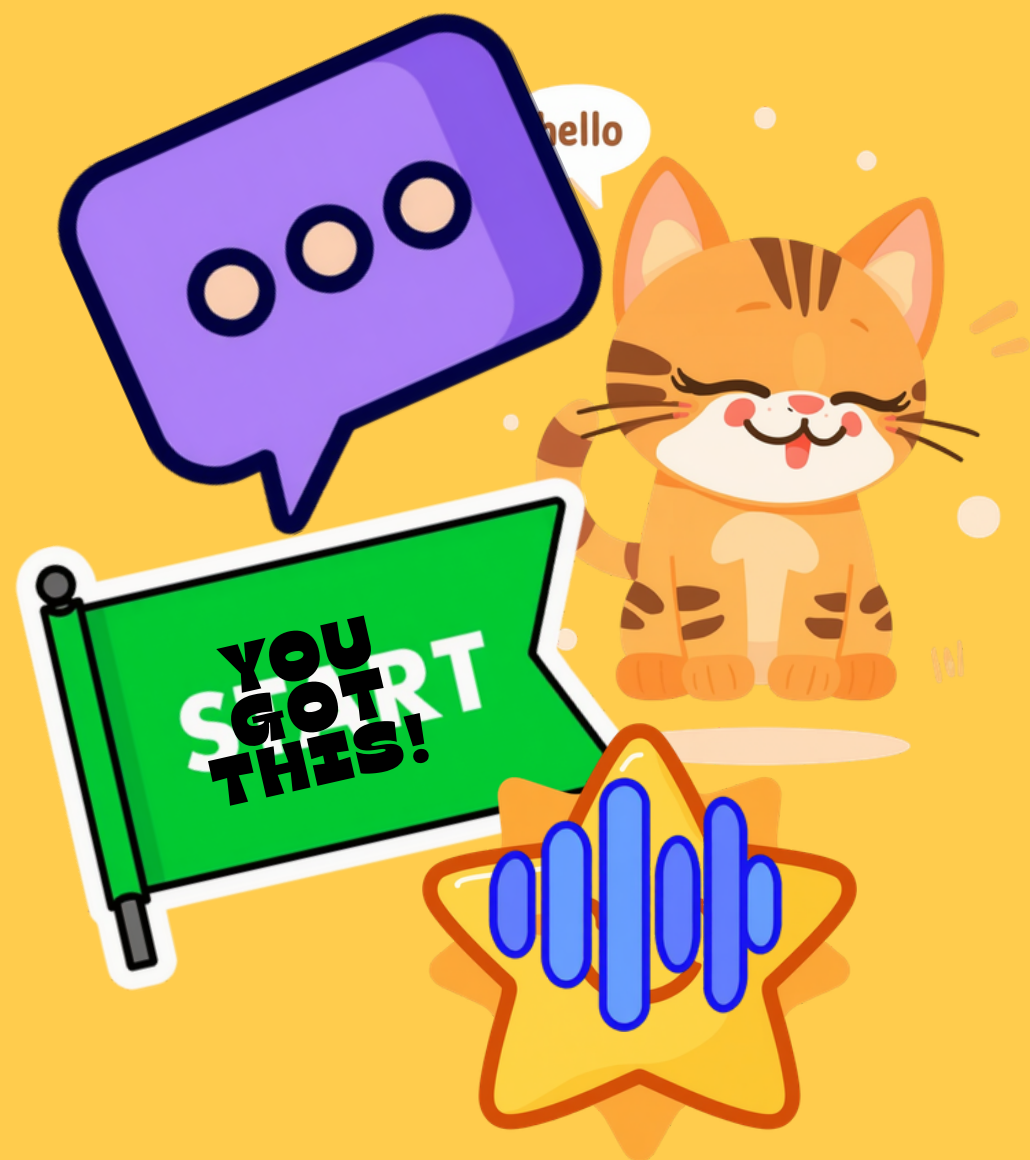

- ★ "Hi!"
- ★ "Good morning!"
- ★ "Let's code!"

Drag the 'say' block, type your phrase, then click the green flag. You did it!

QUIZ TIME!

How Did It Go? Answer these questions about what you learned today!

QUESTION 1:

A1:

What block makes your character say words on the screen?

QUESTION 2:

A2:

Which block do you use to play sounds in Scratch?

QUESTION 3:

A3:

What do you click to start your code and make your character talk?

CODING STEPS SUMMARY

Choose your character from the Scratch library and pick a fun costume!

Drag the 'say Hello! for 2 seconds' block and add a sound block to the coding area.

Click the green flag to start your code and watch your character talk!

WHY LEARN TO CODE?

Coding is a superpower for kids!

- 🎮 Create your own games and stories
- 🧠 Learn problem-solving and creativity
- 💡 See your ideas come alive on screen
- ☀️ Build skills for the future!

**CODE =
POWER!**

NEXT STEPS: WHAT'S NEXT IN SCRATCH?

MOVE IT!

**MUSIC &
BACKGROUNDS!**

**YOUR OWN
STORY!**

KEEP CODING!

Great job today! Keep exploring
Scratch and have fun coding!
