

ADDITION WAR

CARD GAME

Grade 1

Ages 5–7

30 Minutes

Hands-On Session

Card Game

Maths Through Play

Welcome to Addition War Card Game! This hands-on maths game is designed for Grade 1 students (ages 5–7). In just 30 minutes, children will build addition fluency through exciting card play.

Learn + Play = Fun!

LEARNING OBJECTIVES

GOAL 1

Add Numbers

Add two single-digit numbers (1–10) and add three single-digit numbers together.

GOAL 2

Compare Sums

Compare sums using greater than ($>$), less than ($<$), and equal to ($=$) symbols.

GOAL 3

Win and Play Fair

Understand the winning condition: higher sum wins! Practise fair play and taking turns.

KEY CONCEPTS

■ ADDITION

Definition: Putting numbers together using the + and = signs.

Example: $3 + 2 = 5$ | Like counting kirana biscuit packets on two shelves!

■ SUM

Definition: The total you get after adding numbers together.

Example: When we add $4 + 3$, the SUM is 7! | Your SUM = your score in the game.

■■ COMPARE

Definition: Finding which number is bigger or smaller.

Example: $9 > 7$ (more than) | $4 < 8$ (less than) | $6 = 6$ (equal to). Bigger sum wins!

KEY CONCEPTS — ADDING THREE NUMBERS

3■■ ADDING THREE NUMBERS

Definition: Add the first two numbers together, then add the third to that result.

Example: $2 + 3 + 4 = ?$ First: $2 + 3 = 5$. Then: $5 + 4 = 9$!

2

+ 3+4

=

9

How to add three numbers — step by step:

1

FLIP three cards from the top of your pile.

2

ADD the first two cards together. Remember the sum!

3

ADD the third card to that sum.

4

That final number is your TOTAL SUM for the round!

INDIAN CONTEXT EXAMPLES

Connect maths to everyday Indian life!

■ Cricket Runs

■ Kirana Store

■ Kanche (Marbles)

■ Sugar in Chai

■ Puja Flowers

■ Tiffin Items

■ **CRICKET RUNS:** Team A scores 4 runs and Team B scores 6 runs. Total runs = $4 + 6 = 10$. Just like adding your two card numbers!

■ **KANCHE (MARBLES):** You collect 3 kanche from one friend and 5 from another. $3 + 5 = 8$ kanche total. Whoever has more kanche (bigger sum) wins — just like our card game!

SESSION OUTLINE — 30 MINUTES

WARM-UP 4 MINS

Number Flashcards

Show flashcards 1–10.
Students call out numbers quickly to build recognition speed.

CONCEPT INTRO 5 MINS

Teach ADD + SUM + COMPARE

Explain addition concepts with visual aids. Use number lines and counters to show how numbers combine.

GAME SETUP 3 MINS

Rules Demonstration

Explain game rules clearly.
Demonstrate card flipping, adding, and comparing sums live.

ROUND 1 8 MINS

Flip 2 Cards

Each player flips 2 cards and adds them. Say "4 PLUS 5 EQUALS 9!" Higher sum wins all 4 cards!

ROUND 2 7 MINS

Flip 3 Cards!

Players flip 3 cards and add all three numbers together. Add first two, then add the third!

WRAP-UP 3 MINS

Reflection Time

Discuss what was fun and which sums were tricky!
Award Maths Champion badges to everyone!

■ **GAME CHANT** — Use before every round! "FLIP! ADD! COMPARE!" —
Shout it together: 3... 2... 1... FLIP!

LET'S PLAY ADDITION WAR!

ROUND 1 — FLIP 2 CARDS

1

Each player gets HALF the deck, face down in a pile.

2

Both players FLIP 2 cards at the same time.

3

ADD your two cards. Say the full sentence: "4 PLUS 5 EQUALS 9!"

4

The player with the BIGGER SUM wins all 4 cards!

5

If sums are EQUAL — it's a WAR! Each player flips 1 more card. Higher single card wins all.

KEY TEACHING MOMENTS

SAY IT ALOUD

Always say addition sentences aloud: "4 PLUS 5 EQUALS 9!" This builds maths fluency.

ENCOURAGE

Encourage finger counting if needed. It helps students visualise numbers and build confidence.

CELEBRATE

Celebrate every correct answer with enthusiasm! Clap, cheer, or give high-fives to motivate learners.

MATERIALS CHECKLIST

Card Deck (1–10)

Remove face cards from a standard deck, or use Planrs printed cards.

Activity Sheet

One per student for recording rounds. Take-home sheet.

Champion Badges

"Maths Champion" badge or sticker for every child at session end.

■ BUDGET NOTE: Estimated material cost per student group in India: under
■20. A standard playing card deck costs ■30–■60 and is reusable across
ALL sessions!

TEACHING TIPS

CONNECT

Use Indian context examples naturally during play, like kirana store shopping or cricket runs.

REINFORCE

Reinforce turn-taking and fair play. Remind students: "Wait for your turn" and "Be a good sport!"

CELEBRATE

Praise every effort! Say "Well done!" even for small wins to build confidence and enthusiasm.

SUCCESS CRITERIA

GOAL 1

80% ADD CORRECTLY

80% of students add two single-digit numbers correctly by end of Round 1.

GOAL 2

USE THE WORD "SUM"

Students use the word "SUM" when describing their answers, with or without prompting.

GOAL 3

60% ADD THREE NUMBERS

60% of students successfully add three numbers in Round 2, with or without finger support.

BUILDING NUMBER SENSE

■ Quick recognition of card values boosts fluency! When students can instantly see that a card shows 7 or 4, they add faster. Practice through repetition and fun games like Addition War helps build this skill naturally. Soon, students feel confident with numbers 1 to 10! 1, 2, 3... 10!

REFLECTION TIME

FUN

What was the most fun part of playing Addition War today?

CHALLENGE

Which addition sums were easiest? Which ones were hardest?

FAIR PLAY

How did you practise fair play and taking turns with your partner?

**THANK YOU FOR JOINING
PLANRS ACADEMY!**

HAPPY ADDING IN YOUR CLASSROOMS!

Next Sessions in this Track:

SESSION 2	Addition War with Tens — Number bonds to 10
SESSION 3	Subtraction Snap — Flip 2 cards, subtract the smaller
SESSION 4	Number Bonds War — Race to call the number that makes 10
CAPSTONE	Maths Games Festival — Teach a parent one card game!
