

■ NUMBERS TO 100

Grade 2 Mathematics — Lesson Guide

Counting · Place Value · Comparing · Ordering · Skip Counting

Planrs Academy • www.planrsacademy.com

■ Topics Covered

1. Counting from 1 to 100 with the 100 Chart
2. Place Value — Tens and Ones
3. Comparing Numbers ($>$, $<$, $=$)
4. Ordering Numbers — Ascending & Descending
5. Before, After, and Between Numbers
6. Skip Counting by 10s

■ Section 1: Counting from 1 to 100

The 100 chart is our magic tool! It has **10 rows** and **10 columns**. Each row ends with a round number: 10, 20, 30... all the way to 100. These patterns help us count faster and remember numbers easily.

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

■ Decade numbers (10, 20, 30 ... 100) are highlighted in blue — they always end in 0!

■ Section 2: Place Value — Tens and Ones

Every two-digit number is made of **tens** and **ones**. The tens place tells how many groups of 10 we have. The ones place shows the extras left over.

Number	Tens Place	Ones Place	How We Say It
64	6 (= 60)	4	Sixty-four
37	3 (= 30)	7	Thirty-seven
90	9 (= 90)	0	Ninety
15	1 (= 10)	5	Fifteen

■ **Key Idea:** In the number **64**, the digit **6** stands for **60** (six tens), and the digit **4** stands for just **4** (four ones). Together $60 + 4 = 64$.

■ Section 3: Comparing Numbers (>, <, =)

Use the **crocodile trick**! The crocodile's mouth always opens toward the **bigger** number because it wants to eat more.

Symbol	Meaning	Example
>	Greater than	$64 > 47$ (64 is bigger)
<	Less than	$82 < 88$ (82 is smaller)
=	Equal to	$90 = 90$ (same value)

More Examples:

- Priya scored 82, Rohan scored 88 → **$82 < 88$** — Rohan scored more!
- Anita has 55 stamps, Vikram has 45 → **$55 > 45$** — Anita has more!
- Both friends got 90 marks → **$90 = 90$** — It is a tie!

■ Section 4: Ordering Numbers — Ascending & Descending

Order	Direction	Example	Memory Tip
Ascending	Smallest → Largest	23 → 45 → 67	Climbing UP stairs ■
Descending	Largest → Smallest	67 → 45 → 23	Going DOWN stairs ■

■ **Kabaddi Example:** Raj scored 23, Priya scored 45, Arjun scored 67.

Ascending order: **23, 45, 67** (Raj, Priya, Arjun)

Descending order: **67, 45, 23** (Arjun, Priya, Raj)

■ Section 5: Before, After, and Between Numbers

Every number has neighbours! The number just before is **one less**; the number just after is **one more**; the number between two consecutive numbers is the one in the middle.

Term	Meaning	Example (using 42)
Before	One less	Before 42 → 41
After	One more	After 42 → 43
Between	Middle	Between 41 and 43 → 42

Piggy Bank Practice: Which number comes *after* 70? → **71**. Which number is *between* 69 and 71? → **70**.

■ Section 6: Skip Counting by 10s

Skip counting by 10s is like counting ■10 coins — each coin is one jump of 10! Notice the pattern: the **ones digit always stays 0** and the **tens digit goes up by 1** each time.

10	20	30	40	50	60	70	80	90	100
----	----	----	----	----	----	----	----	----	-----

■ *Tip: When you reach 100, you have counted ten groups of 10 — that is the whole chart!*

⇒ ■ Practice Quiz — Test Your Knowledge!

Q1: What number comes after 58?

A: 59

Q2: Which is bigger — 73 or 79?

A: 79 (73 < 79)

Q3: 5 bundles of 10 + 6 loose ones = ?

A: 56 ($50 + 6 = 56$)

Q4: Count by 10s — what comes after 40?

A: 50

Q5: What number comes before 85?

A: 84

Q6: Write 47 in tens and ones.

A: 4 tens and 7 ones

Q7: Order 67, 23, 45 in ascending order.

A: 23, 45, 67

Q8: What number is between 91 and 93?

A: 92

■ Summary — You Did It!

- Count from 1 to 100 using the 100 chart.
- Understand tens and ones (place value).
- Compare numbers using $>$, $<$, and $=$.
- Order numbers in ascending and descending order.
- Find numbers that come before, after, and between.
- Skip count by 10s all the way to 100.

■ **Take-Home Activity:** Draw your own 100 chart and colour all the tens numbers (10, 20, 30 ... 100) in your favourite colour!

Bonus Challenge: Pick any 3 numbers and write what comes before and after each one. Ask a parent to check your answers!
