GRADE 2 | COMPUTERS IN ACTION

Recap: What Can Computers Do?

LESSON OVERVIEW

In this recap lesson, students revisit the key ideas about computers — what they are, where they are found, their five super powers, and the important things that only humans can do.

Subject: Computer Science | **Grade:** 2 | **Duration:** 40 Minutes

Presented By: Planrs Academy

SECTION 1

A Day Without Computers!

Oh No! What Happened?

Aarav from Pune woke up to find all computers went on holiday! His phone would not turn on, the TV was blank, and the ATM would not give money.

Think About It: What problems is Aarav facing? Why?

SECTION 2

What Is a Computer?

Definition

A **computer** is a smart machine that follows **instructions** to help us do things faster and easier!

Example: Dadi uses her phone to video call Chachu far away — the phone is a small computer!

Key Vocabulary

Computer	A smart machine that follows instructions
Machine	A device that does work for us
Instructions	Steps that tell a computer what to do

SECTION 3

Computers Are Everywhere!

Did You Know?

Many devices around us ARE computers — even if they do not look like big desktop machines! Smartphones, tablets, ATMs, smart TVs, and railway ticket machines all have computers inside!

SECTION 4

The Five Super Powers of Computers

Super Power 1 — CALCULATE — Maths Wizards!

Computers do maths very fast — much faster than us! When Mummy orders on BigBasket, the app adds up prices in one second!

Super Power 2 — STORE — Computers Remember Everything!

Computers can remember lots of things — photos, songs, books — and keep them safe forever!

Super Power 3 — COMMUNICATE — Send Messages Far Away!

Computers help us send messages, make calls, and share things with people far away instantly!

Super Power 4 — DISPLAY & PLAY — Screens Come Alive!

Computers show pictures, play music, run videos, and make games come alive on screen!

Super Power 5 — CONTROL — Computers Control Machines!

Computers can control other machines! The traffic signal near your school changes colours because a tiny computer tells it when to change!

SECTION 5

But Wait — What CAN'T Computers Do?

Things Only YOU Can Do!

Computers are super powerful but not magic! There are some special things only YOU can do.

Things Computers CANNOT Do:

- ✗ Feel happy, sad, hungry, or tired
- ✗ Taste if khichdi needs more salt
- ✗ Give you a warm hug when you are sad
- ✗ Make decisions without instructions
- ✗ Smell flowers or fresh rain

YOU are more powerful than computers!

SECTION 6

Quick Quiz Time!

Can a Computer Do This? — YES or NO!

1	Add 100 + 200 very fast	✓ YES
2	Feel hungry after lunch	✗ NO
3	Store 500 photos	✓ YES
4	Smell a mango	✗ NO
5	Play a song	✓ YES
6	Give someone a hug	✗ NO
7	Send a message to a friend	✓ YES
8	Decide what game to play on its own	✗ NO

SECTION 7

Interactive Quiz — Spot the Computer!

Which of these are computers?

Computers	Not Computers
Smartphone ✓	Bicycle ✗
Tablet ✓	Tiffin Box ✗
ATM ✓	Notebook ✗
Smart TV ✓	Cricket Bat ✗

SECTION 8

Key Takeaways

Remember These 3 Big Ideas!

- 1 A computer is a smart machine that follows instructions.
- 2 Computers can calculate, store, communicate, display, and control.
- 3 Computers need humans — they cannot feel, smell, or decide alone!

SECTION 9

New Words We Learned Today!

Computer	A smart machine that follows instructions
Calculate	Do maths very fast
Store	Remember and keep information safe
Communicate	Send messages far away
Display	Show pictures and videos on screen

Today's Fun Challenge!

Home Activity

Tonight, find ONE computer hiding in your home that you never noticed before! Tell your teacher or parent what it does tomorrow.

***Hint:** Check the TV, microwave, or car!*

Congratulations — You Did It!

Amazing Work! You have earned the "Computer Explorer" badge! You now know what computers can do!
