Learning the 2 and 5 Times Tables made Fun!

Welcome, Little Mathematician! Today we are going to discover the magic patterns hidden inside numbers. Let's learn how to multiply step-by-step!

👉 The 2 Times Table (Doubling Magic!)

Multiplying by 2 is exactly the same as **doubling** a number or counting in pairs (like pairs of shoes or socks!).

$2 \times 1 = 2$	$2 \times 2 = 4$	$2 \times 3 = 6$	$2 \times 4 = 8$	$2 \times 5 = 10$
$2 \times 6 = 12$	$2 \times 7 = 14$	$2 \times 8 = 16$	$2 \times 9 = 18$	$2 \times 10 = 20$

🔍 Magic Patterns to Notice:

- Every answer is an **EVEN** number.
- The answers always end in **0, 2, 4, 6, or 8**.
- Each answer jumps up by **+2**!

🎤 Sing the 2x Rhythm Chant:

*"Two, four, six, eight, who do we appreciate?
Ten, twelve, fourteen, sixteen, eighteen, twenty—
Two-times tables, we've got plenty!"*

👋 The 5 Times Table (Handy Patterns!)

Think of your hands! One hand has 5 fingers. Let's skip-count by 5s using our hands!

$5 \times 1 = 5$	$5 \times 2 = 10$	$5 \times 3 = 15$	$5 \times 4 = 20$	$5 \times 5 = 25$
------------------	-------------------	-------------------	-------------------	-------------------

$5 \times 6 = 30$

$5 \times 7 = 35$

$5 \times 8 = 40$

$5 \times 9 = 45$

$5 \times 10 = 50$

**Magic Patterns to Notice:**

- Every single answer ends in either a **0** or a **5**!
- It matches the minute hand on a clock perfectly!

**Sing the 5x Rhythm Chant:**

*"Five, ten, fifteen, twenty—count by fives, we've got plenty!
Twenty-five, thirty, thirty-five—counting fives keeps maths alive!
Forty, forty-five, and fifty—five-times tables, aren't they nifty!"*

The "2-for-1" Number Trick (Commutativity)

Cool Secret: In multiplication, the order of numbers doesn't change the answer!
If you know $2 \times 5 = 10$, then you already know $5 \times 2 = 10$! It's a two-for-one deal!

Practice Zone: Fill in the Blanks

2x Table Practice

a) $2 \times 3 =$ _____

b) $2 \times 7 =$ _____

c) $2 \times$ _____ $= 18$

d) _____ $\times 2 = 12$

5x Table Practice

a) $5 \times 4 =$ _____

b) $5 \times 6 =$ _____

c) $5 \times$ _____ $= 25$

d) _____ $\times 5 = 50$

Spot the Mistake!

Some answers below are wrong. Can you find them and write the correct answer?

"Someone said: $5 \times 6 = 32$ "

Why is it wrong? 5x table answers must end in 0 or 5!

Correct Answer: $5 \times 6 =$ _____

"Someone said: $2 \times 9 = 19$ "

Why is it wrong? The 2x table always gives even numbers!

Correct Answer: $2 \times 9 =$ _____

Real-Life Story Math

Problem 1: Priya has 4 pairs of cute socks. How many socks does she have in total?

Working: _____ $\times$ _____ $=$ _____ socks

Problem 2: A box of tasty Laddoos has 3 rows, and each row has 5 laddoos. How many laddoos are there altogether?

 Working: _____ × _____ = _____ laddoos

Problem 3: There are 9 auto-rickshaws on the road. If each one has 2 side mirrors, how many mirrors are there in total?

 Working: _____ × _____ = _____ mirrors

 **Shabash! You are a Times Tables Star!**
