

Measurement – Length

Riya's Dupatta Question

Can you think of things we measure every day?

Riya wants to buy a new dupatta for her doll. The shopkeeper asks — How long should it be? How does Riya tell him?

Long

A cricket bat is LONG from top to bottom!

Tall

A palm tree is TALL – it reaches up high!

Wide

A thali is WIDE – it stretches across!

What is Length?

Length tells us how long, tall, or wide something is!

Look around you! Everything has a length. Let's learn how to describe things using special words like long, tall, and wide.

Long Words

long → longer → longest
short → shorter → shortest

Tall Words

tall → taller → tallest
wide → wider → widest

Equal Words

same length = equal
Two things can be the same size!

Length Vocabulary

Comparing Sizes with Fun Words!

Learn these special words to describe and compare how long, short, tall, or wide things are!

Example 01

My notebook is 3 hand spans long

Example 02

The diya is 2 finger widths tall

Example 03

The tiffin box lid is 4 pencil widths across

Non-Standard

Measurement

Measuring with Everyday Objects!

We can measure things using our hands, fingers, and pencils! This helps us understand length before using rulers.

Activity 1

Measure your desk with your hand span. How many hand spans wide is it?

Activity 2

Measure your pencil box using a pencil. How many pencils long is it?

Activity 3

Count footsteps from the door to your desk. How many steps did you take?

Hands-On Activity

Let's Measure Things Around Us!

Try these fun measuring activities! Use your hands, pencils, and feet to measure objects in your classroom.

Why We Need Standard Units

Different Hands, Different Measurements!

The Solution

Arjun's hand span is bigger than Priya's — same table, different answers!

The Problem

We need a unit everyone agrees on — the centimetre!

10-Rupee Note

A 10-rupee note is about
12 cm long

Parle-G Biscuit

A Parle-G biscuit is about
5 cm wide

Introducing the Centimetre (cm)

A Standard Unit of Length – Same Everywhere in the World!

The centimetre (cm) is a unit we all agree on. We use a ruler to measure in centimetres. Let's see some examples of things we can measure!

Step 1

Place ruler flat on the object.
Line up one end with the 0 mark.

Step 2

Look straight down at the ruler,
not from the side.

Step 3

Read the number at the end of
the object — that's the length in
cm!

How to Use a Ruler

Step-by-Step Instructions for Measuring in Centimetres

Follow these easy steps to measure any object
correctly. Remember: always start from zero, not
from the edge of the ruler!

Common Mistakes

Do's and Don'ts for Measuring with a Ruler

✗ Wrong Ways

Starting from 1, ruler slanted,
reading from wrong side

✓ Right Way

Start at 0, ruler flat and straight,
read from correct side!

Example 01

Bindi is shorter than a pencil

Example 02

Sugarcane is longer than a ruler

Example 03

Raju is taller than Meena

Comparing Lengths

Practice Using Comparison Words

Use words like longer, shorter, taller, and wider to compare objects around you!

Anchor 01

New Apsara pencil is about 17 cm long

Anchor 02

Parle-G biscuit is about 5 cm wide

Anchor 03

Width of finger is about 1 cm

Estimation

Guessing Length BEFORE Measuring

Estimation helps us develop number sense!
Before using a ruler, try to guess how long something is using these helpful anchors.

Practice Challenge

Before I Measure — Guess!

How long do you think this eraser is?
Make your guess!

Now look at the pencil and crayon —
which one is longer?

Question 1

What unit do we use to measure length?

Question 2

Where does ruler measurement start?

Question 3

Which is longer: 20 cm or 15 cm?

Quick Quiz

Check Your Understanding!

Answer these three questions to show what you learned about measuring length!

✓ Point 1

Standard unit =
centimetre (cm) — same
everywhere!

✓ Point 2

Always start measuring
from 0 on the ruler!

✓ Point 3

Length tells us how long,
tall, or wide something is!

Recap & Summary

What We Learned Today!

"Measure it right, measure it well —
in centimetres, we always tell!"

✱

Great Job!

✱

Keep Measuring and Exploring!
